Acts of the Governor General's Council assented to by the Governor General

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 30th April, 1880, and is hereby promulgated for general information:—

ACT No. IX OF 1880.

An Act to amend the Bombay Civil Courts Act, 1869.

Preamble.

WHEREAS it is expedient to empower the Governor of Bombay in Council to fix and, from time to time, to alter the local limits of the ordinary jurisdiction of the Subordinate Judges appointed under the Bombay Civil Courts Act, 1869; It is hereby enacted as follows:—

Short title.

1. This Act may be called "The Bombay Civil Courts Act, 1880";

Commencement.

and it shall come into force at once.

Insertion of a new section after section 22 of the Bombay Civil Courts Act.

2. In the said Act, after section 22 the following section shall be inserted:—

Power to fix local limits of jurisdiction of Subordinate Judges.

"22A. The Governor of Bombay in Council may, by notification in the official Gazette, fix, and by a like notification from time to time alter, the local limits of the ordinary jurisdiction of the Subordinate Judges."

Limits already fixed to be deemed to have been fixed according to law.

3. All orders issued by the Governor of Bombay in Council previous to the passing of this Act fixing or altering the local limits of the jurisdiction of a Subordinate Judge, shall be deemed to have been issued in accordance with law.

D. FITZPATRICK,

Secy. to the Govt. of India,

Legislative Department.

GOVERNMENT OF INDIA

DEPARTMENT OF FINANCE AND COMMERCE

APPREHENDED UNDERESTIMATE OF THE COST OF THE MILITARY OPERATIONS IN AFGHÁNISTÁN

The following extracts from a Despatch addressed to Her Majesty's Secretary of State for India, No 148, dated 4th May, are published for general information, with the documents which accompanied it —

In continuation of our Despatch No 81, dated 25th February, we regret to report for the information of Her Majesty's Government, that we have grave reasons for apprehending that the cost of the military operations in Afghánistán will seriously exceed the amount entered in the Financial Statement for 1880-81

2 The total expenditure upon those operations in India was calculated in that document at 5,512,670*l*, as follows —

	£
In 1878 79 (Account No 57)	600,270
In 1879 80 (para 130 of Statement, less expenditure from the Home Treasury)	2,954,400
In 1880 81 (para. 18 of Statement, less expenditure from the Home Treasury)	1,958,000
	5,512,670

3 The estimates for 1879-80 and 1880-81 were prepared in the Military Department by the usual methods, with careful deliberation We forward with this Despatch a Memorandum by Major Newmarch, the Military Accountant General, detailing the procedure in ordinary use, describing how it was actually employed on the present occasion, and explaining, in particular, his estimates of the cost of the war Major Newmarch submitted his estimates to the Military Department with a Memorandum, No 4108, dated 19th

A

January It is shown in the Minute of our Honorable Colleague, Sir Edwin Johnson, which accompanies this Despatch, that those estimates were carefully examined and accepted in the Military Department, they were formally transferred by that department, on the 26th January, to the Financial Department, with the recommendation that they should be adopted, and they were incorporated, in usual course, in the Budget presented with the Financial Statement

4 The estimates were held open to revision till just before the Statement was made, but no correction was suggested in the Military Department, or considered necessary in the Financial Department On the contrary, the unexpectedly high amount of our January balances (1,352 lakhs), coupled with the comparatively moderate amount of the military expenditure brought on record up to that date, gave rise to a doubt whether the Accountant General in the Military Department might not have entered too large an amount in his Regular Estimate, but it was ascertained specifically on the 18th February, six days before the Statement, that the Accountant General in the Military Department fully maintained that estimate, and it was not altered There being thus, at that time, no apparent cause for distrusting the sufficiency of the Military Department's estimates, Sir John Strachey, in paragraph 27 of the Financial Statement, while pointing out that "the estimates of the cost of the war must of course be, to a great extent, speculative," said that he saw "no reason to suppose that they erred on the side of being too low"

5 Before the middle of March, however, we became uneasy at the unexpectedly large demands upon our frontier treasuries, and, not being satisfied with the result of a summary investigation of the causes, we instituted a fresh enquiry into the cost of the war, which has brought to light the fact that the aggregate net disbursements from our treasuries to the Military Department since the beginning of the operations, have so much exceeded the normal payments to that department as to suggest strong doubts of the correctness of its estimates of the cost of the war

6 No doubt, the balances in the treasure chests and with the military disbursers are much in excess of the ordinary amount Moreover, apart from the operations in Afghánistán, the disbursements on account of the Malta Expedition, the Nága disturbances, and political events in Burma, have caused exceptional military drafts upon our treasuries, and there may be other abnormal transactions which may operate, eventually, in reduction of the obligations of the Military Department Nevertheless, and taking the most sanguine view of the prospects of the termination of the war, we cannot, now, doubt that its cost will largely exceed the departmental estimates.

7 There is, however, much still to be done before we can venture to estimate the cost of the war afresh with any precision It has not yet been fully explained why the large outflow from our treasuries in excess of the military estimates did not show itself sooner in the diminution of our balances, which we are now at last witnessing Nor is the Accountant General in the Military Department, an officer in whose prudence and ability we place the greatest confidence, as yet, able to reconcile the treasury figures with the estimates which reach him from the Military Controllers

8 Under ordinary circumstances, we should have thought it desirable to wait until we could explain the facts better than is yet possible But we are sensible of the inconvenience which must result from the failure of our war estimate, and deem it incumbent on us to substitute for that estimate at once the most correct forecast that we can make with our present data, however imperfect such may be We hope that, before Your Lordship makes the yearly Financial Statement to Parliament, we may be in a position to telegraph more trustworthy estimates of the cost of the war than we can now make Meanwhile, we consider that it will be necessary to add at least 4,000,000*l* to our estimate of the cost of the war in 1880-81 We can only speak, now, with much reserve of the total amount which the war, apart from the Frontier Railways, will ultimately cost The responsible officers in the Military Department still confidently expect that its cost will not be nearly so much as 10,000,000*l* , but we are unable, at present, to reconcile this expectation with the actual outgoings from our treasuries.

9. Our Honorable Colleague General Sir Edwin Johnson has recorded, for our information and for that of Her Majesty's Government, a Minute, which we transmit herewith, describing the action of the Military Department throughout the whole proceedings, the manner in which the estimates for the war were made, and the circumstances under which the Military Department thought itself justified in recommending the Financial Department to accept them, and explaining, so far as this can now be done, the causes which, in our Honorable Colleague's opinion, have operated, and are still operating, to render those estimates insufficient

10 As stated by the Military Accountant General in paragraph 14 of his memorandum, although it cannot now be doubted that the amount of the war charges outstanding at the close of 1879 80, and which will have to be adjusted in 1880 81, will be much larger than was anticipated, there is no reason for supposing that the amount of these charges brought to account in the former year will seriously differ from the Regular Estimate presented with the Financial Statement

* * * * * * *

13 As we have been obliged to take the unusual course of revising our estimate of one important item before the Financial Statement is made to Parliament, we subjoin, for any use which Your Lordship may think fit to make of it, a statement of the other variations from our Regular Estimates, which are now known to us —

	Regular Estimates.	Approximate Accounts.	Better	Worse
	£	£	£	£
I Land Revenue	22 389 000	22,426 200	37 200	
IV Excise	2 765 000	2 792 587	27 587	
V Assessed Taxes	797 000	783 800		13 200
VII Customs	2 231 000	2 283 352	52 352	
VIII Salt	7 835 000	7,756 698		78 302
IX Opium	10 459 000	10 361 555		97 445
X Stamps	3 203 000	3 192 811		10 189
TOTAL	49 179 000	49 097 003		81 997

14. * * * * * * *

The deficiency under *Salt* is due to an unexpected intermission of the deliveries from the Sámbhar Lake, which will, doubtless, soon be resumed The deficiency under *Opium* is owing to a similar temporary check in the trade in Málwa Opium

15 On the whole, our estimates have been very satisfactorily realised The only considerable Revenue Head of which we do not yet know the approximate result, is that of *Railways*, the accounts of which cannot be quickly closed We know no grounds for revising our estimates of Railway revenue

16 On the expenditure side, however, 100 000*l* must be added under Head *32—Railways*, being the supplementary grant made for the Jhelum-Rawalpindi Section of the Punjab Northern State Railway, as explained in paragraph 6 (4) of our Despatch No 142 of this date This is, in truth, part of the cost of the war

17 However disappointing it is to find that the war is likely to cost so much more than was expected, the permanent effect upon the condition of our finances will be limited to the extent to which the charge for interest on the debt may be increased In all essential respects the condition of our finances appears to us no less sound and satisfactory now than it did when the Financial Statement was made The improvement in our general financial position remains as unquestionable as before, there is still no reason to doubt that, but for the war, our surplus of revenue over expenditure would have hardly been less than 4,000,000*l*, both in the year 1879 80, which has just closed, and in the year 1880 81, which has now commenced, nor do we see reason to modify any of the views regarding the past, or any of the anticipations regarding the future, which were set forth in the Financial Statement

---

Minute by General the HON'BLE SIR E B JOHNSON, K C.B , C I E

The attention of the Financial Department having been directed to the large disbursements which were being made from the Civil Treasury on account of the war in Afghanistan—

disbursements seriously in excess of the estimated cost of the operations—the Military Department was requested to cause enquiry to be made, and to furnish information as to the cause of this difference between the estimates and the actual expenditure

In accordance with this request the Military Accountant General was called on for a report on the subject, and at the same time full enquiry was ordered in other branches of the Military Department, in view to eliciting the causes of these unexpected calls on the Civil Treasury

Pending the result of these enquiries, the Military Accountant General has furnished a statement explaining, fully and clearly, the course he has followed in the preparation of the estimates of expenditure on account of the operations in Afghanistan for 1880-81

To Major Newmarch's statement, which I attach, I need add nothing, but, as Head of the Military Department, I desire to state that the estimates which were prepared by the Military Accountant General were not submitted by me to the Financial Department until, in personal and anxious communication with him, I had satisfied myself that they were framed on just principles and on data which might fairly and reasonably be accepted in the forecast of the probable expenditure on account of the war

Satisfied, therefore, of the correctness of the estimates, which appeared to me as accurate as any estimate of the cost of military operations can be, I accepted them, and caused them to be sent to the Financial Department, with a recommendation that they should be adopted

It will be seen, therefore, that though the estimates were prepared by the Military Accountant General, they were submitted and explained to me before acceptance, and I desire to state, without any reserve whatever that, as Head of the Military Department, I alone am responsible for the estimates, and that I fully accept such responsibility

That this Department has underestimated the probable cost of the war cannot be gainsaid, but until the result of the enquiries which have been ordered to be made is received, it is not possible for this Department to state either the extent to which the estimates have been exceeded, or the causes which have led to such excess

Without attempting to anticipate the result of the enquiry, I may be permitted, however, to touch very briefly on some of the causes which have led to such a disturbance of our calculations, and which were not, and could hardly have been, foreseen at the time the estimates were prepared

First, the purchase of a very great proportion of the transport, instead of hiring it. This recommended itself to the Controller General of Transport and Supply as not only a measure of expediency and improved organisation, but one which, owing to the nature of the service and to the extreme difficulty of hiring, appeared to be an absolute necessity The outlay under this head has been considerable

The necessity, as a measure of precaution, when it became evident that the war would not be brought to a close as early as was anticipated, for purchasing and transporting six months' supplies to be stored at the front and on all the lines of communication before the hot weather set in

The enormous increase in the price of grain and other supplies—famine prices in fact—owing to the unexpected scarcity which prevailed in the Peshawar and Rawalpindi Districts notwithstanding the promise of an abundant harvest which has been fulfilled everywhere else

A similar, and also unexpected increase in the price of stores, such as firewood, forage, &c., purchased in Afghanistan itself

The necessity for paying increased wages, in addition to half rations, to all followers north of Jhelum—a necessity which arose partly from the growing dread of service in Afghanistan, and partly from the extreme demand for labor, locally, by the Railway authorities on the line to Rawalpindi

In addition to what has been already stated, there is also this fact to be taken into consideration, that when it became evident that the occupation would be prolonged through the summer months, and even into autumn, the works necessary for the maintenance of our positions and protection of the troops, thus detained, necessarily far exceeded any charges which had hitherto been incurred, or would under other circumstances have been needed, both at Kabul and on the whole line of communications

In short, in such operations as those in which we are engaged, their cost increases in a progressive ratio, week by week, with their continuance For not only are the local resources of a poor country drawn on to a point almost of exhaustion, thereby forcing supplies to be sent from remote bases, but also the transport, which has to be continuously renewed to supply the ordinary casualties, has to be procured and drawn from far distant provinces in India at an ever increasing cost

It is now clear to myself that, in accepting, as the basis of the estimated cost of the war carried on in the year 1880 81 the estimates which had proved sufficient for the operations of the corresponding months of the previous year, I had not sufficiently appreciated the main fact of progressive rates of expenditure—an expenditure necessarily increasing through an expansion both of the period and scope of the operations which have since been developed.

It seemed to me that, in providing for the war expenditure up to the month of July of the present year, based on the rate which had proved sufficient for those of the preceding year, which I had no reason to believe was being materially exceeded, I was making the utmost provision which I could at the time have been justified in recommending to the Council and I submit that the correctness of the course I then pursued is not invalidated by the facts which have since come to our knowledge

E B JOHNSON

Memo No 451, dated 30th April, 1880

From—MAJOR O R NEWMARCH, Accountant General, Military Dept,
To—The Secretary to the Government of India, Military Department

With reference to Military Department No 6538K of the 28th April 1880 the undersigned has the honor to explain for the information of Government the course followed in the preparation of the estimates of expenditure on account of the operations in Afghanistan

2 The military estimates are prepared by the Controllers of Military Accounts, Bengal Madras and Bombay, received and consolidated in this branch, and submitted by the Military Department to the Financial Department In all ordinary cases the figures proposed by the Controllers—officers of considerable experience and having the advantage of local knowledge—are accepted But when there is reason to suppose—from a reference to past actuals from a consideration of impending changes of organisation or other facts not known to the Controllers when their estimates were prepared from the prospects of the harvests from the progress of the accounts which are more advanced when the estimates are finally consolidated and for other reasons—that their estimates are not correct, then they are increased or diminished to the extent thought to be necessary in view of the foregoing considerations

The reasons for any variation from the figures of previous years are always given in abstract and in detail in the transmitting memorandum and its appendices

3 The first provision for the Kabul Campaign was made in the revised estimate for 1878 79

In this estimate the Controller of Military Accounts, Bengal provided 90 lakhs on this account with the remark— This sum may cover the extra charges that will be brought forward this year, but a correct estimate seems impossible at present ' The Madras Controller made no provision The Bombay Controller estimated the charges at 20 lakhs total of estimates 110 lakhs Judging from the state of the accounts when the estimate was made up and from the known delays in their receipt from officers in the field it appeared to the undersigned that the charges to be brought into the year would not exceed 67 lakhs and that there would remain between 50 and 60 lakhs to be adjusted in the accounts of 1879 80

4 In proposing these figures, the following remarks were made in paragraph 5 of the transmitting memorandum —"Looking at the twofold uncertainty attending this item the doubtful estimate of the probable expenditure and the progress of adjustment every allowance must be made for any want of accord hereafter between the revised estimate and the actual charges " The amount charged in the year in India was Rs 60,02,703, a tolerably close approximation to the estimate

This left according to the above calculation about 60 lakhs outstanding from 1878 79, under the head of Advances Recoverable Unadjusted Items &c, which would have to be adjusted and charged in the accounts of 1879 80

5 In the Budget estimates of that year the Bengal Controller, writing on the 17th December 1878 made no provision whatever for Kabul remarking—' At present it is impossible to state what amount will be charged to this head in the accounts of 1879 80 perhaps later on, more definite information than now exists may be available " The Controllers of Military Accounts Madras and Bombay made no provision for the Kabul operations, ' having no information as to whether the war was likely to extend to the year 1879 80 or if it did, as to how long it might be expected to continue Allowing for the arrears to be brought forward from 1878 79 and in the anticipation of an early termination of the campaign the extra expenditure of the year was estimated in this branch at 200 lakhs with the following remark — " It is of course impracticable to form any trustworthy estimate of the year but it is not considered necessary to make any larger provision on this account at present than the above sum

The above anticipation was realised by the signing of the Treaty of Peace on the 26th May 1879 and had the war then been finally concluded, the estimate would probably have proved to be fairly correct

6 On the renewal of hostilities in September, it of course became necessary to increase the estimate

In submitting his revised estimate for the year 1879 80, the Bengal Controller provided 300 lakhs under the head of " Kabul " in lieu of 170 lakhs, the sum allotted to Bengal in the budget estimate, with the remark—" Increased, to provide for charges on account of the second expedition "

The Madras Controller reduced his allotment of 12 lakhs to 8 lakhs, with reference to the amounts compiled under this head in the accounts received by him up to date

The Bombay Controller increased the 18 lakhs assigned to that Presidency to 40 lakhs, with the remark—" Provision made for second Kabul Expedition "

The total of these estimates amounted to 348 lakhs

7 After the most careful and anxious consideration of all the facts available and after personal consultation with the officers in charge of the field commissariat accounts, with the special Examiner of these accounts and with the Controller of Military Accounts, Bengal, the undersigned considered that about 300 lakhs would probably be charged in the year, and that something over 100 lakhs would as in 1878 79, be outstanding under the head of Advances Recoverable Unadjusted Items, &c , and fall into the charges of 1880 81

8 It was as may be easily understood extremely difficult if not wholly impracticable, with the scanty materials available, and in view of the uncertainty as to the progress, extent and duration of operations the phases of which were changing from week to week, to frame even an approximate estimate of the extra cost of the war, and the above conclusion was not arrived at without much hesitation and anxious consideration In submitting it, the following remarks were offered for the consideration of Government —

"In the revised estimate it has been deemed necessary, owing to the renewal of hostilities, to increase the provision on this account to Rs 3 00,00 000 The estimates submitted by the Controllers provided Rs 3 18 00 000 on this account but so far as any estimate can be made of charges so uncertain, both in their nature and as to the period within which they may be brought forward their estimates appear susceptible of reduction by Rs 48,00 000 There is one charge in particular which may affect the calculation very considerably—the compensation for loss of camels but up to date no trustworthy statistics or even estimate, of the probable losses and consequent claims have been received With every desire to make full provision for the war charges, the undersigned can, at present, see no reason for going beyond the above figures"

9 These figures are exclusive of the charge for the construction of frontier railways and telegraphs the estimate for which *in India* is Rs 1,12,15,000 in 1879 80, and Rs 1,04,22,000 in 1880 81

10 In the estimate for the year 1880 81 the Controller of Military Accounts Bengal, provided 200 lakhs for Kabul without remark The Madras Controller provided six lakhs, with the remark that the figure had been reduced (that is from last year's figures), with reference to the first four months of 1879 80 The Bombay Controller made no provision, with the remark—'Provision on this account was made by the Accountant General in the current year's budget and will, it is assumed be similarly made for 1880 81, if necessary"

11 Following the course pursued in preparing the estimate of 1879 80, as explained in paragraph 5, it was estimated by the undersigned that about 100 lakhs would be brought forward from 1879 80, and that, anticipating, as in 1879 80, an early termination of the campaign, a hundred lakhs would be spent on the war during the year 1880 81 This rate of expenditure was based on rough estimates prepared in this branch of the cost of the war, and supported by a consideration of the expenditure incurred in 1878 79 and in the early months of 1879 80

12 In submitting this estimate, the following remarks were made in the transmitting memorandum —

'For the Kabul charges it has not been considered necessary to do more than repeat last year's provision, Rs 2,00 00,000 But for the renewal of hostilities in September last that sum would probably have sufficed to meet the extra charges of the year With an early settlement of affairs beyond the frontier, the same amount may suffice to wind up the accounts of the campaign should the operations be protracted, this figure will, no doubt, have to be increased hereafter in the revised estimate as has been done this year"

13 As regards the threatened inadequacy of the estimates, the undersigned proposes to defer any explanation on this head till the accounts for the year 1879 80 are completed, and the further information called for by the Military Department has been received

14 The completed accounts for January 1880 have been received, with approximate figures for the remaining two months of the year and there are grounds for supposing that, apart from the charges for frontier railways and telegraphs the recorded charges of the year will not much exceed the estimate of 300 lakhs There is, however, reason to fear that, owing to the largely increased expenditure of the last three months of the year—January, February and March 1880—considerably more than a hundred lakhs will be outstanding at the close of the year, and have to be adjusted in the accounts of 1880 81 At the same time, this increased rate of expenditure shows no signs of diminution, and the war promises to be protracted considerably beyond the anticipation of the estimate while the operations are more extended than they were or than was foreseen when that estimate was prepared It may also be noted that from various causes which will no doubt be elucidated hereafter, the war expenditure has increased, beginning from January last, and is progressing, at a rate far beyond any calculation that could have been made, based on the past rate of expenditure, and on the relative number of troops in the field at various periods

From these two causes the expected increase in the outstandings from 1879 80 and in the cash expenditure in 1880 81, the budget estimate of the year threatens to prove very inadequate To what extent it will actually be found to be insufficient can only be determined on the receipt of the further information lately called for, and by the progress, extent and duration of the campaign

On this point a further report will be submitted hereafter

R B CHAPMAN,

Secy to the Govt of India

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC, CAP 67

The Council met at Government House on Friday, the 30th April, 1880

PRESENT

His Excellency the Viceroy and Governor General of India, G M S I, *presiding*
His Honour the Lieutenant Governor of the Panjáb, K C S I
His Excellency the Commander in Chief, G C B, G C S I, C I E
The Hon'ble Sir J Strachey, G C S I, C I E
General the Hon'ble Sir E B Johnson, R A, K C B, C I E
The Hon'ble Rivers Thompson, C S I
Major General the Hon'ble A Fraser, C B, R E
The Hon ble B W Colvin
The Hon ble C Grant

BOMBAY CIVIL COURTS ACT, 1869, AMENDMENT BILL

The Hon'ble Mr Grant moved that the Bill to amend the Bombay Civil Courts Act, 1869, be taken into consideration He said that it would be in the recollection of the Council that in January last a short Bill had been introduced by the Honourable Member in charge of the Legislative Department to empower the Bombay Government to alter the local limits of the jurisdiction of subordinate judges in that Presidency After its introduction the Bill was referred for opinion, in the ordinary course of business, to the Bombay Government and early in the present month a telegram was received, expressing approval of the Bill as it stood, reporting that the prescribed number of publications had been made in the local Gazette, and requesting that the Bill might be passed into law with the least possible delay, as the powers conferrible by it were urgently needed in order to give effect to certain of the provisions of the Dekkhan Agriculturists' Relief Act In the absence, therefore, of the Honourable introducer of the Bill, he (Mr Grant) moved that it should be taken into consideration

The Motion was put and agreed to

The Hon'ble Mr Grant also moved that the Bill be passed

The Motion was put and agreed to

NORTH WESTERN PROVINCES RENT ACT, 1873, AMENDMENT BILL

The Hon'ble Mr Colvin moved that the Bill to amend the North Western Provinces Rent Act, 1873, be referred to a Select Committee consisting of the Hon'ble Messrs Stokes and Thompson, the Hon ble Sayyad Ahmad Khán, the Hon'ble Mr Grant and the Mover

The Motion was put and agreed to

JHÁNSÍ ENCUMBERED ESTATES RELIEF BILL

The Hon'ble Mr Colvin also moved that the Bill to provide for the relief of Encumbered Estates in the Jhánsí Division of the North-Western Provinces

be referred to a Select Committee consisting of the Hon'ble Messrs Stokes and Thompson, the Hon'ble Sayyad Ahmad Khán, the Hon'ble Mr Grant and the Mover

The Motion was put and agreed to

MULTÁN DISTRICT LAWS BILL

The Hon'ble MR COLVIN also moved that the Hon'ble Mr Grant be added to the Select Committee on the Bill to declare the laws in force in certain lands annexed to the Multán District

The Motion was put and agreed to

The Council adjourned to Friday, the 21st May, 1880

SIMLA,
The 30*th April*, 1880

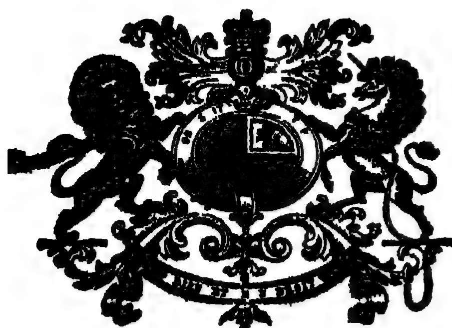
GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 4TH MAY 1880

GENERAL REMARKS —Rain has continued in the Provinces from which it was reported last week, and has also fallen in the North Western Provinces and Oudh There has been none in Berar and Hyderabad the northern districts of Bombay, the Central Provinces, Central India States, Rajputana and the Punjab Preparations for the *kharif* sowings are in active progress General prospects continue good



Presidency or Province and District.	Rainfall for week preceding	State of agricultural prospects
Madras— (May 5th)—		
Bellary	1 in Pennakonda	*Ragi* 29·26 standing crops generally good.
Kurnool	35 in Cumbum	*Ragi* 33 11 paddy harvest nearly completed, outturn ¾ to full
Ganjam	17 (average of six stations)	*Ragi* 31 53
Kistna	76 (average of two stations)	*Ragi* 32 24
Chingleput (Madras)		*Ragi* 22 58 wet and dry crops being harvested standing crops doing well
Coimbatore	74 (average of ten stations)	*Ragi* 23 87 crops generally fair harvest of paddy in Erode full
Tanjore	71 (average of five stations)	*Ragi* 2[illegible] crops generally good harvest of oil seeds chillies and tobacco outturn to ¾
Madura	82 (average of seven stations)	*Ragi* 25 21
Malabar	85 (average of ten stations)	*Ragi* 20 2
Travancore	17	
		General Remarks —General prospects fair
Bombay— (May 5th)—		
Hyderabad		Fever of a mild type in six cattle disease in four talukas small pox continues in Mehar Naushahro and Kandiaro weather seasonable
Ahmedabad		Manuring operations for next season's crop going on in some talukas
Baroda		Harvest *rabi* completed sowing of summer *juwar* commenced in the Kari division preparations for *kharif* progressing weather seasonable public health good prices stationary
Surat		*Rabi* harvest nearly completed
Násik		Ague in one taluka cattle disease in Igatpuri crops harvested and nearly threshed land being prepared for new crops weather getting warm
Colaba (Bombay)		Average abnormal temperature 1 warm vapour in air in excess of normal till [illegible] afterward normal wind normal except from 29th to 2nd when it was abnormal and southerly
Poona (May 2nd)		In district average price of *jowari* falling whilst that of *bajri* rising
Ahmednagar		Preparation of land for monsoon crop progressing
Sholapur	31 (average of seven talukas and Peta station)	Slight fever and cattle disease in two talukas cotton picking progressing harvest of late crop nearly completed
Dharwar		
Kanara	30 (average)	Land being prepared for monsoon crop
Rajkot	Few drops in Songad and Gohelvad	Weather very hot health good.
		General Remarks —Land being everywhere prepared for *kharif* crops public health good except in Hyderabad slight rain in Dharwar and Kanara.
Bengal—		
Chittagong	1 19	Weather cloudy and more rain expected prospects of crops favourable cholera in some parts cattle-disease continues.
Dacca	1 28	Prospects of crops good public health good
24-Pergunnahs (Calcutta)	86	*Boro dhan* at Satkhira being harvested, outturn satisfactory ploughing going on sowing of *aus* commenced at Busseerhat; a few cases of small pox in Baraset, of cholera in Baraset and Barrackpore and of cattle-disease in Satkhira and Diamond Harbour
Moorshedabad	48 (rain general)	*Amun* and *aus* sowings commenced fever and cholera in a few places otherwise public health good
Rajshahye	1·66	Sowing of *aus* going on outturn of *boro* good, other crops doing well some cases of cholera.

Presidency or Province and District	Rainfall for week preceding	State of agricultural prospects.
Bengal—*continued*		
Burdwan	2 Culna 42 Cutwa 1 93 Raneegunge 20	Weather seasonable cultivation progressing satisfactorily, some cases of cholera and small pox, otherwise public health good.
Rungpore	305	Prospects of crops good slight fever prevalent.
Bhágalpur	24	Easterly winds and occasional storms; no crops on ground; health good small pox abating
Purneah	*Nil*	Prospects of crops good all round farming operations well advanced sufficient moisture for growing crops health fair
Patna	10	Outturn of *rabi* good
Durbhunga	71	Harvesting of *rabi* nearly finished rain beneficial to *dhan* land general health good at head-quarters prices stationary
Hazáribágh	*Nil*	Weather seasonable easterly wind rendered it comparatively cool no crops to report on food grains cheap general health good solitary cases of cholera in north a few cases of small pox in interior
Cuttack	Sufficient rain in town and interior	Ploughing continues small pox still reported
		General Remarks—Rain in most districts during week but still wanted in Midnapore 24-Perguunahs Backergunge and Lohardugga few crops on ground doing well and ploughing and sowing are proceeding save where rain has not fallen spring rice being harvested with good outturn sugarcane plantation still continues in some districts *rabi* in Behar generally yielded a good outturn with the exception of some cholera and small pox in places public health good
N W P and Oudh—		
Benares (May 4th)		Wind easterly rain threatening must have fallen in vicinity as the weather has become remarkably cool cholera seems to be decreasing prices stationary
Allahabad ( )	Slight shower	Wind east cholera decreasing wheat 20½ seers coarse rice 19½ seers unhusked *dhan* 28$\frac{1}{16}$ seers
Gorakhpur („ 3rd)	3	Weather cooler wind variable thunder storm on the 3rd cholera decreasing prices easy wheat 24$\frac{1}{16}$ seers
Jhansi (5th)		Harvest over fever continues but is not severe prices falling slightly
Agra (4th)		The crops are being harvested fever prevails in district except Futtehabad days hot nights pleasant
Bareilly („ 5th)	Heavy shower on night of 2nd	East wind slight fever
Meerut ( )	2 with light hail storm	Wind easterly small pox prevalent at Mowana prices falling
Kumaun („ 4th)	Rain on 28th April 1st and 2nd	Cloudy *rabi* nearly cut outturn good
Lucknow („ 5th)	1 on 3rd	Strong and continuous east wind fever cholera and cattle-disease prevalent harvesting nearly completed outturn good barley 29 seers
Partabgarh (3rd)	*Nil*	Cholera cases continue wind variable
Sitapur (5th)		No change a few cases of cholera reported health otherwise good
Fyzabad („ „)	13	
		General Remarks—Weather much cooler wind easterly slight rain has fallen in Gorakhpur Allahabad Meerut and Lucknow heavier rain in Bareilly Kumaun and Fyzabad slight hailstorm in Meerut cholera prevalent in Lucknow and Partabgarh but is decreasing in Benares Gorakhpur and Allahabad a few cases are reported from Sitapur fever prevails in Jhansi Agra and Lucknow and small pox in one tahsil of the Meerut district some cattle-disease in Lucknow prices falling in Jhansi harvest outturn in Kumaun and Lucknow good
Punjab— **(May 4th)**—		
Delhi		Agricultural and health reports favourable prices of food grains fluctuating with downward tendency
Hissar		Weather seasonable; winnowing and storing in progress prices almost stationary health good
Umballa		Crops being harvested health fair
Jullundur		Health good crops cut; prices steady
Lahore		Crops cut outturn good health good.
Ferozepore	„	Crops being cut and threshed prices have a downward tendency public health good
Siálkot		Crops being harvested health good.
Ráwalpindi		Health fairly good rain wanted for next crop
Peshâwar	•	Harvest prospects still reported indifferent, but price of wheat has fallen during the past week
Mooltan		*Rabi* crops still being threshed and garnered; prices steady health good
Dera Ismail Khan		Reaping in progress health good
		General Remarks—Agricultural and health reports generally favourable except in the Peshawar district where the harvest prospects are indifferent
Central Provinces—		
Nágpur (May 1st)		Harvest over ploughing for *kharif* continues; prices stationary
Jubbulpore		Cloudy threshing nearly completed, winnowing progressing small pox continues prices stationary
Saugor		Hot harvest over; small pox and cattle-disease continue; prices declining
Seoni		Warm cloudy; ploughing for *kharif* progressing prices stationary
Hoshangabad		Cloudy ploughing continues, small pox prevalent prices stationary
Raipur		Report not received.

Presidency or Province and District.	Rainfall for week preceding	State of agricultural prospects
Central Provinces— *continued.*		
Sambalpur (April 30th)	...	Clear and cloudy alternately sugarcane doing well no other crops on ground *General Remarks.*—Cloudy hot winnowing still continues in a few districts outturn of *rabi* generally good preparations for *kharif* sowings progressing prices stationary
British Burma— **(May 5th)—**		
Akyab		Public health normal
Rangoon	1 30	Total rainfall 7 11 19 deaths from small pox. Fever prevalent in two townships in the Hanthawaddy district health of cattle good
Bassein	*Nil*	Total rainfall 8 88 public health good slight cattle-disease in two townships
Prome	92	Total rainfall 2 86 small pox in one township
Amherst (Moulmein)	4 26	Total rainfall 10 33 public health good.
Toungoo	46	Total rainfall 3 inches public health good. *General Remark* —Small pox continues in Pegu a few cases in Arakan otherwise general health good weather unsettled
Assam—(May 5th)—		
Gauháti	2 19	Frequent rain sky overcast with clouds *ásu* cultivation much retarded by rain prospects of tea fair
Sylhet	1 98	Ploughing and sowing going on satisfactorily
Cachar	1 95	Weather hot sowing of seasonable crops continues common rice 13⅝ seers per rupee public health good
Dibrugarh	·26	Sowing for early rice nearly all done sugarcane cultivation still in progress weather clear and cool
Mysore and Coorg— **(May 5th)—**		
Bangalore	·01	Prospects favourable health good murrain still prevalent in parts price grain rally stationary
Mysore	1 09	
Mercara	...	Report not received
Berar & Hyderabad— **(May 5th)—**		
Amráoti	...	Land being prepared for sowing
Akola		Weather very hot health good
Hyderabad		*Rabi* crops nearly ripe land being prepared for *kharif* no sickness or cattle disease except in southern taluk where heat is intense with some fever price —yellow *jowar* 18 white *jowar* 15 wheat 9 seers per current sicca rupee
Central India States— **(May 5th)—**		
Indore	...	Weather seasonable health and prospects good
Morar (Gwalior)		Fever still prevail heat intense *jowar* 30 *bajra* 34 seers
Sutna		Prospects good *jowar* 37 seers 10 chittacks
Rutlam		Weather clear and hot public health good
Neemuch	...	Health good weather hot and cloudy
Goona		Hot crops good health good wheat 10 seers
Bhopal		Health good
Agar		Health good agricultural prospects favourable
Nowgong		Health fair harvest good
Mánpur		Weather hot fever and small pox prevalent
Rajputana—		
Serohi (May 2nd)		Tanks dry wells fairly full healthy very much hotter
Marwar (April 30th)		Water only obtainable in wells health good crop excellent excessively hot hot wind blowing furiously price falling
Meywar		Tank dry from sun parts water reported low in well around Ood ypore plentiful health good threshing in progress high wind
Harowtee (May 1st		Health good wind variable prices steady heat great
Jhallawar		Health and prospect continue good
Ajmere (May 5th)		Prospects favourable seasonable health good prices stationary
Jeypore		Reaping completed fair outturn health good seasonable
Bhurtpore		
Ulwur (May 4th)		Health good hot winds
Nepal— **(April 27th)—**		
Katmandu	1 22	Prospects good

SIMLA, FRIDAY, MAY 14TH, 1880

DEPARTMENT OF FINANCE AND COMMERCE

NOTIFICATION

ACCOUNTS AND FINANCE

No 461

Simla, the 11th May, 1880

In consequence of the increased cost of the war in Afghánistán as now estimated, the Governor General in Council has determined to borrow 313 Lakhs of Rupees being the amount required for the construction of Productive Public Works in 1880 81

The following Notification is, therefore, published—

FOUR AND A HALF PER CENT LOAN 1880

His Excellency the Right Hon'ble the Governor General in Council has resolved to borrow Three Crores and Thirteen Lakhs of Rupees for the public service in the following manner

2 Promissory Notes will be issued for the said amount in the form annexed to this Notification, being the form of the notes of *The Transfer Loan, 1879*, of which Loan the notes to be now issued will form a part All the conditions which apply to notes of the first form of *The Transfer Loan, 1879*, will apply to the notes to be now issued

3 Tenders for the whole or any part of the said amount of Three Crores and Thirteen Lakhs of Rupees will be received by the Comptroller General from this date to noon of Monday, the 14th of June 1880

4 Each tender must be addressed in the form annexed to this Notification, to the Comptroller General, Treasury Buildings, Calcutta, and enclosed in a sealed cover superscribed '*Tender for the Four and a Half Per Cent Loan, 1880*" If the tenderer is not resident in India, he must name an agent resident in India to whom a letter of allotment may be issued, if any part of the Loan is allotted to such tenderer

5 Each tender must be accompanied by a receipt from one of the Banks of Bengal, Madras, or Bombay, or one of their Branches, or from an officer in charge of some public Treasury, or by a cheque on a banker in Calcutta, Madras, or Bombay, or by Government Promissory Notes made payable to the Comptroller General, for not less than one-hundredth, or, if the tender be for less than Five Lakhs of Rupees, then for not less than one fiftieth part of the tender This deposit of one or two per centum will be forfeited if the allotment is not fully taken up, otherwise, if the deposit

is in cash, it will be treated as in part payment of the last instalment A cash deposit may after acceptance of the tender in support of which it is made, be replaced by a Government Promissory Note

6 The rate at which a tender is made must not contain a fraction of an anna if a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out, and the tender treated as if the rate did not contain such fraction of an anna

7 The rate at which each tender is made must be specified in rupees or rupees and annas a tender in which no rate is thus specified, but a subscription is offered at the recorded minimum, or at some specified percentage in addition to the recorded minimum, will be rejected as null and void

8 The minimum rate at which tenders will be accepted will be recorded under the signature of the Comptroller General and when the tenders are opened, placed upon the table in a sealed envelope, but will not be declared unless some tender is rejected only because it is below the recorded minimum

9 Tenders will be opened, publicly, at the office of the Comptroller General in Calcutta, at noon on Monday, the 14th of June 1880 but the contents of the tenders will not be disclosed otherwise than as provided in Clause 11

10 Tenders at the recorded minimum rate, and at rates above the recorded minimum rate, will be accepted in the order of the rates tendered beginning with the highest rate, the amount allotted at the lowest rate at which tenders are accepted, will be divided amongst those who have tendered at this rate in proportion, as nearly as may be found convenient, to the amounts of their tenders

11 As soon as possible after the 14th June 1880, letters of allotment will be issued to those persons whose tenders are accepted in whole or in part, or to their agents and an alphabetical list of the names of those to whom such letters of allotment are issued will be posted for general information, at the Head Offices of the Banks of Bengal, Madras, and Bombay

12 Payment of any accepted tender may be made to the account of the Government in the Head Office of one of the Banks of Bengal, Madras or Bombay or in any Branch of any of these Banks or into any public Treasury or Treasuries in India which may be named in the tender

13 Accepted tenders must be paid, in four equal instalments, as follows —

One fourth on or before Friday, the 25th June 1880
One fourth on or before Monday the 26th July 1880
One fourth on or before Friday, the 27th August 1880,
One fourth on or before Monday, the 13th September 1880

but the whole or any part of any accepted tender may be paid at any time after receipt of the letter of allotment

14 Interest upon each payment will be promptly paid in advance, at the rate of four and a half per centum per annum, from the date of such payment to the fourteenth day of September 1880

15 Scrip receipts for instalments paid will be given by the Banks of Bengal, Madras, and Bombay, or their Branches, or by the officers in charge of the Government Treasuries at which payment is made These receipts will, as soon as possible, be exchanged for promissory notes issued under this Notification

---

FORM OF PROMISSORY NOTE —(See Clause 2)

FORT WILLIAM THE 15TH SEPTEMBER 1880

Transfer Loan 1879 Four and a Half Per Cent Portion

Promissory Note for Government Rupees [X] bearing Interest payable half yearly at the rate of Four and a Half Rupees per centum per annum

The Governor General of India in Council does hereby acknowledge to have received from (A B) the sum of Government Rupees [X], as a loan to the Secretary of State in Council for India

and does hereby promise for and on behalf of the said Secretary of State in Council on demand three months after notice of repayment published by order of the Governor General of India in Council in the *Gazette of India* to repay the said loan of Rupees [X] to the said (A B) his (or her or their) executors administrators or assigns or his (or her) or their order in Calcutta with interest from the 15th day of September 1880 to the date appointed for discharge at the rate of four-and a half per centum per annum

and such notice as aforesaid shall be equivalent to a tender of repayment at the period therein appointed for the discharge of this note

And the Governor General in Council hereby promises on and after each succeeding fifteenth day of the months of March and September until the expiration of three months after notice of repayment as aforesaid (when all further interest will cease) on demand to pay to the said (A B) his (or her or their) executors administrators or assigns or his (or her) or their order in Calcutta interest on the said sum of Government Rupees [X] for half a year at the rate of four-and a half per centum per annum

The Governor General in Council hereby further engages that notice of repayment as aforesaid shall not be given before the fifteenth day of June 1893 and that this note shall not be discharged before the fifteenth day of September 1893.

FORM OF TENDER.—(*See Clause 4.*)

I A B, hereby tender for Rupees [X] of *The Four and a Half Per Cent Loan, 1880*, advertised in the Notification published in the *Gazette of India Extraordinary* dated the 11th May 1880, and agree to pay for the same, subject to the conditions notified, at the rate of Rupees [Y] Annas [Z] for every hundred rupees allotted to me

No 456I P—With reference to Foreign Department Notification No 1756I P dated 18th December 1879 republishing for general information the 'Treaty of Commerce and Extradition between Her Majesty the Queen of Great Britain and Ireland Empress of India and His Most Faithful Majesty the King of Portugal and the Algarves the following separate Convention under Article V of the said Treaty is hereby published for general information —

CONVENTION

Whereas by the fifth article of a Treaty of Commerce and Extradition executed at Lisbon on the twenty sixth day of December 1878 and ratified on the sixth day of August 1879 between His Most Faithful Majesty the King of Portugal and the Algarves and Her Majesty the Queen of the United Kingdom of Great Britain and Ireland Empress of India it is provided that the High Contracting Parties shall use their best endeavours to establish between their respective systems of moneys weights, and measures the harmony desirable for the development of commercial relations between their respective dominions, and whereas by the same article it is further provided that the detailed measures to be adopted shall form the subject of a separate convention between the Governors General of British India and Portuguese India to be executed within two years from the date when the said Treaty comes into force and whereas the said Treaty came into force on the fifteenth day of January 1880

In pursuance of the said article, the following Convention has been made —

1 The Governor General of Portuguese India shall adopt in the Portuguese possessions in India, the monetary system of British India for the time being in force provided that the coins shall have on one side the effigy of the King of Portugal, with the legend *Ludovicus I, Portugaliæ et Algarbiorum Rex* around it or such other effigy and legend as the said Governor General may from time to time desire, and on the other side the value of each coin the year of the Christian era, and the words *India Portugue a*

2 Subject to the provisions of clause 7, so long as this Convention remains in force the following

CONVENÇÃO

Como pelo artigo V do tratado de Commercio e Extradição feito em Lisboa a 26 de Dezembro de 1878 e ratificado em 6 de Agosto de 1879 entre e Sua Magestade Fidelissima o Rei de Portugal e dos Algarvese, Sua Magestade a Rainha do Reino Unido da Gra Bretanha e Irlanda Imperatriz da ia, está estipulado que as Altas Partes Contratantes concordam em empregar todas as deligencias para estabelecer entre os seus respectivos systemas de moedas pesos e medidas a harmonia desejavel para o desenvolvimento das relaçoes commerciaes entre os seus respectivos dominios e como pelo mesmo artigo esta tambem estipulado que as disposiçoes especiaes que teem de ser adoptadas, serão assumpto de uma convenção separada entre os Governadores Geraes da India Britannica e da India Portugueza que deverá executar se dentro de dois annos a contar da data em que o dito tra for posto em vigor e como o referido sto em vigor no dia 15 de Janeiro de 1880

Em conformidade do dito artigo se celebrou a seguinte convenção —

1 O Governador Geral da India Portugueza adoptará nas possessoes Portuguezas da India o systema monetario da India Britannica que de tempos a tempos vigorar comtanto que as moedas tenham de um lado a effigie do Rei de Portugal com a legenda em torno *Ludovicus I Portugaliæ et Algarbiorum Rex* ou qualquer outra effigie e legenda que o dito Governado Geral possa de quando em quando determinar, e do outro lado o valor de cada moeda o anno da era christã e as palavras *India Portugue a*

2 Durante o tempo que esta convenção vigorar, cunhar se hão as seguintes moedas e nenhumas

coins and no others shall be struck for Portuguese India —

O valor em cobre de uma rupia Portugueza será de dezeseis tangas Portuguezas sessenta e quatro quartos de tanga ou paisas, cento e noventa e dois reaes ou pies

3 A moeda Portugueza de prata e cobre de que trata esta convenção será emittida por autoridade do Governo da India Portugueza, e cunhada para o mesmo Governo pelo Governo da India Britannica e por ninguem mais

O Governador Geral da India Portugueza obriga se em quanto durar esta convenção a não cunhar nem importar para a India Portugueza nenhumas moedas senão estabelecidas n'esta Convenção

4 Com o fim de obter no mais curto praso de tempo possivel a desejavel uniformidade de moeda em todas as possessões indianas das altas partes contractantes o Governador Geral da India Britannica obriga se pelo Governo da India Britannica—

(*a*) a prescindir de receber pelo periodo de tres annos contados da data em que esta convenção começar a vigorar todos os direitos ou outras despezas por fundir cortar afinar ou recunhar qualquer moeda de prata da que exista em circulação na India Portugueza, e for apresentada para recunhagem em moeda da India Portugueza,

(*b*) a entregar durante o periodo de cinco annos, a contar da data d'esta convenção moedas de cobre da moeda de cobre portugueza estabelecida por esta convenção em troca das moedas de cobre das actuaes moedas portuguezas da India que possam ser trazidas á casa da moeda para este fim pelo valor representado por esta moedas ultimamente mencionadas da circulação actual portugueza O relativo valor re

The relative representative value of the old and new coin to be thus exchanged on equal terms and without charge for manufacture, shall, if the Governor General of Portuguese India so desires, be determined, once for all, by a mixed commission appointed in the manner provided in the sixteenth article of the above cited Treaty,

(c) advance to the Governor General of Portuguese India in the Portuguese currency established by this Convention such sums in such denominations of coin and in such instalments (if any) as the said Governor General of Portuguese India may require provided

1stly—That the amount of such advances outstanding at any time shall not exceed in the whole ten lakhs of rupees

2ndly—That an interval of two months shall be allowed for compliance with any such requisition and that no such advance shall be made after the expiration of eighteen months from the date on which this Convention comes into force

3rdly—That every such advance shall be within two months repaid in coin of the existing Portuguese Indian currency equivalent thereto in intrinsic value ascertained upon assay at Her Majesty's Mint or in copper coin of the existing Portuguese Indian currency valued as prescribed in clause (b)

5 The Governor General of British India engages that the Government of British India shall—

(a) on presentation by or on behalf of the Governor General of Portuguese India of any silver bullion or coin at the Mint at Bombay or at such other Mint as the said Government from time to time appoints, deliver to the said Governor General or his agent, after such interval as in the judgment of the Mint Master is necessary for the process of coinage the produce of such silver bullion or coin in the silver coin established by this Convention subject, always to the same duty charges, fees and regulations as are for the time being in force for the conversion into British Indian currency of bullion and coin presented at the said Mint provided that save as provided in clause 4 the said Government shall not be bound thus to deliver more than four lakhs of rupees in any one year

(b) coin for the Governor General of Portuguese India the copper coins established by this Convention to such amounts and in such denominations as the said Governor General may require upon payment of the value inscribed upon such coins in the silver coin established by this Convention or in British Indian rupees provided that, saving as engaged in clause 4 the said Government shall not be bound thus to coin more than twenty thousand rupees worth of such coin in any one year

In lieu of any seignorage or profits which the Portuguese Government might otherwise claim on account of the coinage on their behalf provided by this clause, the Governor General of British

presentativo da antiga e nova moeda que tem de ser assim trocada em condições iguaes e sem despezas de fabrico, será, se o Governador Geral da India Portugueza assim o desejar, determinado, uma vez por todas por uma commissão mixta nomeada pelo modo indicado no Art 16 do supra citado tratado,

(c) a adiantar ao Governador Geral da India Portugueza na moeda Portugueza estabelecida por esta convenção, quantias, nas especies de moeda e nas prestações se as houver que o dito Governador Geral queira requisitar comtanto

1° —Que a importancia de taes adiantamentos em qualquer occasião não excederá, na totalidade, de dez laques de rupias

2° —Que um intervallo de dois mezes será concedido para o cuprimento de qualquer das ditas requisições e que nenhum dos ditos adiantamentos será feito depois de decorridos dezoito mezes contados da data em que esta convenção for posta em vigor

3° —Que cada um dos ditos adiantamentos será dentro de dois mezes liquidado com moeda actualmente circulante na India Portugueza, equivalente em valor intrinsico, determinado por ensaio feito na casa da moeda da Sua Magestade, ou com moeda de cobre da que existe actualmente na India Portugueza, avaliada como prescreve a clausula (b)

5 O Governador Geral da India Britannica obriga-se, alem do que determina a clausula 4, pelo Governo da India Britannica—

(a) apresentando o Governador Geral da India Portugueza, ou alguem por elle encarregado prata em barra ou moeda á casa da moeda de Bombaim, ou a qualquer outra casa de moeda como o dito Governo de tempos a tempos quizer a entregar ao dito Governador Geral ou ao seu agente, depois do intervallo que o director da casa da moeda entender necessario para o processo de cunhagem, o producto da dita prata em barra ou moeda em moeda de prata estabelecida por esta convenção sujeito comtudo, aos mesmos direitos, despezas, pagamentos e disposições regulamentares que então estiverem em vigor para a conversão da prata em barra e moeda em moeda corrente da India Britannica apresentadas na dita casa da moeda comtanto que salvo o que determina a clausula 4 o dito Governo não seja obrigado a entregar mais de quatro laques de rupias em cada anno

(b) a cunhar para o Governador Geral da India Portugueza as moedas de cobre estabelecidas por esta convenção na importancia e nas especies que o dito Governador queira requisitar mediante pagamento do valor inscripto sobre cada moeda com moeda de prata estabelecida por esta convenção ou com rupias da India Britannica comtanto que salvo o que determina a clausula 4, o referido Governo não será obrigado a cunhar mais que o valor de vinte mil rupias d'esta moeda em cada um anno

Em logar de *seignorage* ou lucros que o Governo Portuguez podesse reclamar por causa da cunhagem estabelecida em seu proveito por esta clausula, o Governador Geral da India Britannica

India engages to pay the Governor General of Portuguese India an indemnity of four thousand rupees per annum, commencing from the first day of November, one thousand eight hundred and eighty three, and continuing as long as this Convention remains in force

6 All silver and copper Portuguese coins, coined under the provisions of this Convention, shall, while this Convention remains in force, be legal tender in payment or on account throughout British India to the same extent and subject to the same exceptions in the case of coin which has been called in, or is under weight, or has been clipped, filed or defaced, as in the case of the corresponding silver and copper coins issued by the authority of the Government of British India for the time being in British India

All silver and copper coin which has been issued by the authority of the Government of British India shall, to the said same extent and subject to the same exceptions, be a legal tender in payment or on account, throughout Portuguese India

7 The Governor General of Portuguese India agrees that if at any time while this Convention continues in force the Government of British India should recall the whole body of British Indian coin corresponding to any description of Portuguese coin issued under this Convention, or change the monetary system of British India, he will if requested by such Government so to do recall all Portuguese coin of that description, or change in like manner as the case may be, the monetary system of Portuguese India provided that the expense incurred in recalling such coin or making such change shall be defrayed by the Government of British India

8 When any silver coin purporting to have been issued under the provisions of this Convention, is tendered to any officer of the Government of British India authorized by that Government to act under this clause, and is deemed by such officer to be counterfeit or to have been reduced in weight otherwise than by reasonable wearing, he may by himself or another (subject to the rules which the said Government prescribes in this behalf), cut or break such coin and return the pieces to the person tendering the same, and the loss caused by such cutting and breaking shall be borne by such person

9 When any such silver coin which has been called in is tendered to any officer of the Government of British India authorized by the Government to act under this clause, he may cut or break such coin, and shall receive it at the rate of one rupee per tola but the expense thus incurred shall except when such coin has been recalled under clause 7, be borne by the Portuguese Government

10 In like manner, when any British Indian coin which has been called in is tendered to any officer of the Government of Portuguese India authorized by that Government to act under this clause he may cut or break such coin, and shall receive it at the rate of one rupee per tola, and the expense so incurred shall be borne by the Government of British India

11 The Governor General of Portuguese India engages to appoint an officer who will receive, while this Convention continues in force, from any

obriga se a pagar ao Governador Geral da India Portugueza uma indemnisação de quatro mil rupias por anno, a contar do 1 de Novembro de 1883, a qual continuará depois por todo o tempo que durar esta convenção

6 Todas as moedas de prata e cobre Portuguezas cunhadas em virtude d'esta convenção, terão, em quanto ella vigorar, curso legal nos pagamentos e nas transacções em toda a India Britannica até os mesmos limites e sujeitas as mesmas excepções no caso de moeda que tenha sido recolhida, que lhe faltar o pezo, estiver cerceada, limada ou deformada como no caso das moedas correspondentes de prata e cobre emittidas por ordem do Governo da India Britannica que então cicularem na India Britannica

Todas as moedas de prata e cobre emittidas por autoridade do Governo Britannico deverão com a mesma latitude, e sujeitas as mesmas excepções, ter curso legal nos pagamentos ou nas transacções em a India Portugueza

7 O Governador Geral da India Portugueza se alguma vez durante o tempo que esta convenção vigorar o Governo da India Britannica quizer recolher completamente uma especie de moeda da India Britannica correspondendo a qualquer moeda Portugueza emittida em virtude d esta convenção ou mudar o systema monetario da India Britannica concorda sendo lhe pedido pelo dito Governo em fazer o mesmo e retirar da circulação toda a moeda portugueza d aquella especie, ou a mudar egualmente quando o caso se dê o systema monetario da India Portugueza comtanto que as despezas que se fizerem em recolher a dita moeda ou realisar a dita mudança, sejam pagas pelo Governo Britannico

8 Quando qualquer moeda de prata, pretextando se ter sido emittida em virtude das disposiçoes d esta convenção for apresentada a qualquer empregado da India Britannica, autorisado pelo dito Governo a observar esta clausula, e for por elle considerada falsificada reduzida em pezo por modo differente do que o seria pelo uso ordinario poderá o dito empregado por si ou por outrem (sujeito ás disposiçoes que o dito governo prescreve para este caso) cortar ou quebrar a dita moeda e devolver os fragmentos ao apresentante d ella e o prejuizo causado por este corte ou quebra sera por conta do dito apresentante

9 Quando qualquer moeda de prata que tenha sido recolhida for apresentada a um empregado do Governo da India Britannica autorisado pelo dito Governo a observar esta clausula, poderá cortar ou quebrar a dita moeda recebendo a á razão de uma rupia por tola porem a despeza que houver excepto quando a dita moeda tenha sido recolhida em virtude da clausula 7 ficara a cargo do Governo Portuguez

10 Igualmente, quando qualquer moeda da India Britannica tendo sido recolhida for apresentada a qualquer empregado do Governo da India Portugueza autorisado por este Governo a observar esta clausula, poderá cortar ou quebrar a dita moeda recebendo a á razao de uma rupia por tola, e a despeza que houver ficará a cargo do Governo da India Britannica

11 O Governador Geral da India Portugueza obriga-se a nomear um empregado que receberá, durante o tempo que esta convenção vigorar, de

person tendering the coin next hereinafter mentioned, all silver coin issued under this Convention which may have lost by reasonable wearing more than two per cent and shall pay for the same at the rate of one rupee per tola

12 Nothing in this Convention shall be held to limit the powers of His Most Faithful Majesty the King of Portugal and the Algarves to establish at any time such system of paper currency as he may deem fit

The Governor General of Portuguese India has the power for the present to issue the following paper money —

Five rupee notes, payable in copper		
Ten rupee notes, payable in silver		
Twenty	do	do
Fifty	do	do
One hundred	do	do
Five hundred	do	do

The amount of paper money issued will never be above four per cent of the value of the money in circulation, the Portuguese India Government notes being guaranteed by the Portuguese Government and payable to the bearer

13 The Governor General of Portuguese India engages that, whenever the Government of British India exercises in respect of British India generally, or of all the territories adjacent to Portuguese India the powers conferred on it under a certain Act of the Governor General of British India in Council called ' The Indian Weights and Measures of Capacity Act 1871 " then he the said Governor General of Portuguese India will enforce throughout Portuguese India provisions similar to those of that Act

14 This Convention shall come into force on the first day of November one thousand eight hundred and eighty, and shall remain in force until the expiration of a year counting from the day on which one or other of the Contracting Parties shall have given notice to the other of its intention to put an end to it provided that no such notice shall be given until four years after the date on which the Convention comes into force

15 The Governor General of Portuguese India undertakes that in the event of this Convention being put an end to under clause 14 or otherwise no coins resembling any of the coins struck under this Convention shall be struck in or imported into Portuguese India or shall be struck under the authority of or with the sanction of His Most Faithful Majesty in any other place

DEPARTMENT OF FINANCE AND COMMERCE

NOTIFICATIONS

Simla the 14th May 1880

No 461—In consequence of the increased cost of the war in Afghanistán as now estimated, the Governor General in Council has determined to borrow 313 Lakhs of Rupees, being the amount required for the construction of Productive Public Works in 1880 81

The following Notification is, therefore, published—

FOUR AND A HALF PER CENT LOAN 1880

His Excellency the Right H[illegible]'ble the Governor General in Council has resolved to borrow Three Crores and Thirteen Lakhs of Rupees for the public service in the following manner

2 Promissory Notes will be issued for the said amount in the form annexed to this Notification, being the form of the notes of *The Transfer Loan, 1879*, of which Loan the notes to be now issued [illegible]ill form a part All the conditions which apply to notes of the first form of *The Transfer Loan, 1879*, will apply to the notes to be now issued

3 Tenders for the whole or any part of the said amount of Three Crores and Thirteen Lakhs of Rupees will be received by the Comptroller General from this date to noon of Monday, the 14th of J[illegible]

4 Each tender must be addressed, in the form annexed to this Notification to the Comptroller General, Treasury Buildings, Calcutta and enclosed in a sealed cover superscribed "*Tender for the Four-and a Half Per Cent Loan, 1880*" If the tenderer is not resident in India, he must name an agent resident in India to whom a letter of allotment may be issued, if any part of the Loan is allotted to such tenderer

5 Each tender must be accompanied by a receipt from one of the Banks of Bengal, Madras, or Bombay, or one of their Branches, or from an officer in charge of some public Treasury, or by a cheque on a banker in Calcutta, Madras, or Bombay, or by Government Promissory Notes made payable to the Comptroller General, for not less than one hundredth, or, if the tender be for less than Five Lakhs of Rupees, then for not less than one fiftieth part of the tender This deposit of one or two per centum will be forfeited if the allotment is not fully taken up, otherwise, if the deposit is in cash, it will be treated as in part payment of the last instalment A cash deposit may, after acceptance of the tender in support of which it is made, be replaced by a Government Promissory Note

6 The rate at which a tender is made must not contain a fraction of an anna if a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out, and the tender treated as if the rate did not contain such fraction of an anna

7 The rate at which each tender is made must be specified in rupees or rupees and annas a tender in which no rate is thus specified, but a subscription is offered at the recorded minimum or at some specified percentage in addition to the recorded minimum, will be rejected as null and void

8 The minimum rate at which tenders will be accepted will be recorded under the signature of the Comptroller General, and, when the tenders are opened, placed upon the table in a sealed envelope, but will not be declared unless some tender is rejected only because it is below the recorded minimum

9 Tenders will be opened, publicly, at the office of the Comptroller General in Calcutta, at noon on Monday, the 14th of June 1880 but the contents of the tenders will not be disclosed otherwise than as provided in Clause 11

10 Tenders at the recorded minimum rate, and at rates above the recorded minimum rate, will be accepted in the order of the rates tendered, beginning with the highest rate, the amount allotted at the lowest rate at which tenders are accepted, will be divided amongst those who have tendered at this rate, in proportion, as nearly as may be found convenient, to the amounts of their tenders

11 As soon as possible after the 14th June 1880, letters of allotment will be issued to those persons whose tenders are accepted in whole or in part, or to their agents, and an alphabetical list of the names of those to whom such letters of allotment are issued will be posted, for general information, at the Head Offices of the Banks of Bengal, Madras, and Bombay

12 Payment of any accepted tender may be made to the account of the Government in the Head Office of one of the Banks of Bengal, Madras, or Bombay, or in any Branch of any of these Banks, or into any public Treasury or Treasuries in India which may be named in the tender

13 Accepted tenders must be paid, in four equal instalments, as follows —

One fourth on or before Friday, the 25th June 1880
One fourth on or before Monday, the 26th July 1880,
One fourth on or before Friday the 27th August 1880,
One fourth on or before Monday the 13th September 1880

but the whole or any part of any accepted tender may be paid at any time after receipt of the letter of allotment

14 Interest upon each payment will be promptly paid in advance, at the rate of four and a half per centum per annum, from the date of such payment to the fourteenth day of September 1880

15 Scrip receipts for instalments paid will be given by the Banks of Bengal, Madras, and Bombay, or their Branches, or by the officers in charge of the Government Treasuries at which payment is made These receipts will, as soon as possible, be exchanged for promissory notes issued under this Notification

---

FORM OF PROMISSORY NOTE—(See Clause 2)

FORT WILLIAM THE 15TH SEPTEMBER 1880

The Four-and-a Half Per Cent Loan of 1880

Promissory Note for Government Rupees [X] bearing interest payable half yearly at the rate of Four-and a Half Rupees per centum per annum

The Governor General of India in Council doth hereby acknowledge to have received from (A B) the sum of Government Rupees [X] as a loan to the Secretary of State in Council for India

and does hereby promise for and on behalf of the said Secretary of State in Council on demand three months after notice of repayment published by order of the Governor General of India in Council in the *Gazette of India* to repay the said loan of Rupees [X] to the said (A B) his (or her or their) executors administrators or assigns or his (or her) or their order in Calcutta, with interest from the 15th day of September 1880 to the date appointed for discharge at the rate of four-and a half per centum per annum

and such notice as aforesaid shall be equivalent to a tender of repayment at the period therein appointed for the discharge of this note

And the Governor General in Council hereby promises on and after each succeeding fifteenth day of the months of March and September until the expiration of three months after notice of repayment as aforesaid (when all further interest will cease) on demand to pay to the said (A B) his (or her or their) executors administrators or assigns or his (or her) or their order in Calcutta interest on the said sum of Government Rupees [X] for half a year at the rate of four and a half per centum per annum

The Governor General in Council hereby further engages that notice of repayment as aforesaid shall not be given before the fifteenth day of June 1898 and that this note shall not be discharged before the fifteenth day of September 1898

FORM OF TENDER —(*See Clause 4.*)

I A B, hereby tender for Rupees [X] of *The Four and-a Half Per Cent Loan, 1880*, advertised in the Notification published in the *Gazette of India Extraordinary*, dated the 14th May 1880, and agree to pay for the same, subject to the conditions notified, at the rate of Rupees [Y] Annas [Z] for every hundred rupees allotted to me

I enclose a *deposit receipt** for Rupees [XX], and engage, if my offer be accepted, to pay to the account of the Government at the Bank of† (or at the† Branch of the Bank of† , or into the public Treasury at† as the case may be) the first instalment on or before Friday the 25th June 1880, and the several later instalments on or before the dates fixed by the said Notification, as follows —

* Or Cheque or Government Promissory Note

† Here enter the name of Bank, Branch Bank, or Treasury

One f[illegible] before Friday the 25th June 1880
On[illegible] Monday the 26th July 1880
[illegible]th on or before Friday the 27th August 1880
[illegible]urth on or before Monday the 13th September 1880

Any allotment made to me may be communicated to C D at‡

‡ Here insert C D s [illegible] which must be in India This [illegible] should only be inserted if A [illegible] reside in India.

NOTE.—(1) [illegible] *separate tender must be made at each rate tendered, and each tender must be supported by a separate deposit As a precaution against mistakes, the tender, or, at least the name of the tenderer, and the amount and rate tendered, should be written in English The rate tendered should be the whole amount per centum, not the premium or discount thus — One hundred and two" or "One hundred," or "Ninety-nine " not "Two per cent premium," or " Par, or " One per cent discount "*

The 15th May 1880

No 529—The following Order by Her Majesty the Queen in Council, is published for general information —

AT THE COURT AT WINDSOR,

The 18th day of March 1880

PRESENT—

The Queen's Most Excellent Majesty in Council

Whereas by the "Foreign Deserters Act" 1852 it is provided that whenever it is made to appear to Her Majesty that due facilities are or will be given for recovering and apprehending seamen who desert from British merchant ships in the territories of any Foreign Power Her Majesty may by Order in Council stating that such facilities are or will be given, declare that seamen not being slaves who desert from merchant ships belonging to a subject of such Power when within Her Majesty's dominions shall be liable to be apprehended and carried on board their respective ships and may limit the operation of such Order and may render the operation thereof subject to such conditions and qualifications, if any, as may be deemed expedient

And whereas it hath been made to appear to Her Majesty that due facilities for recovering and apprehending seamen (not being German subjects) who desert from British merchant ships in the territories belonging to His Imperial Majesty the Emperor of Germany will be given under an Agreement between the Governments of Great Britain and Germany signed at London on the [illegible] vember 1879

Now, therefore Her Majesty by virtue of the powers vested in Her by the said ' Foreign Deserters Act 1852 and by and with the advice of Her Privy Council, is pleased to order and declare, and it is hereby ordered and declared, that from and after the publication hereof in the *London Gazette* seamen, not being slaves (and not being British subjects), who desert from merchant ships belonging to subjects of the Emperor of Germany within Her Majesty's dominions shall be liable to be apprehended and carried on board their respective ships; provided always, that if any such deserter has committed any crime in Her Majesty's dominions he may be detained until he has been tried by a competent Court, and until his sentence (if any) has been fully carried into effect

And Her Majesty by virtue of the powers vested in Her by the said ' Foreign Deserters Act ' 1852 and by and with the advice of Her Privy Council is further pleased to order and declare that, upon and after the publication hereof in the *London Gazette*, the Order in Council made, by virtue of the said Act on the 16th day of October 1852 and published in the *London Gazette* on the 26th day of October 1852 so far as it relate to seamen who desert from merchant ships belonging to citizens of the Free Hanseatic Cities of Lubeck, Bremen and Hamburg and the Order in Council relating to seamen who desert from the merchant ships belonging to subjects of the King of Prussia made by virtue of the said Act, on the 16th day of October 1852 and published in the *London Gazette* on the 26th day of October 1852 and the Order in Council relating to seamen who desert from the merchant ships belonging to subjects of the Grand Duke of Oldenburg made, by virtue of the said Act on the 13th day of June 1853, and published in the *London Gazette* on the 11th day of June 1853 and the Order in Council relating to seamen who desert from the merchant ships belonging to subjects of the Grand Duke of Mecklenburg Schwerin made, by virtue of the said Act on the 9th day of March 1854 and published in the *London Gazette* on the 10th day of March 1854 and the Order in Council relating to seamen who desert from the merchant ships belonging to subjects of the King of Hanover made by virtue of the said Act on the 8th day of June 1854 and published in the *London Gazette* on the 13th day of June 1854 shall be revoked, and the same are hereby revoked accordingly

And the Secretary of State for the Home Department the Secretary of State for the Colonies and the Secretary of State for India in Council are to give the necessary directions herein accordingly

No 534—Privilege leave for three months having been granted to Mr T W Biss Deputy Accountant General, North Western Provinces and Oudh and Mr R L Hamilton having been appointed to act in the said office during the absence of Mr Biss, or until further orders, Mr Hamilton assumed charge thereof on the 12th April 1880

No 551—Mr C R C Kiernander having been appointed to officiate as Deputy Comptroller General during the absence of Mr E W Kellner on furlough, received charge of the said office on the 7th May 1880

Acts of the Governor General's Council assented to by the Governor General

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[Third publication]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 30th April 1880 and is hereby promulgated for general information —

ACT No IX OF 1880

An Act to amend the Bombay Civil Courts Act 1869

Preamble

WHEREAS it is expedient to empower the Governor of Bombay in Council to fix and, from time to time, to alter the local limits of the ordinary jurisdiction of the Subordinate Judges appointed under the Bombay Civil Courts Act 1869 It is hereby enacted as follows —

Short title

1 This Act may be called "The Bombay Civil Courts Act, 1880",

Commencement

and it shall come into force at once

Insertion of a new section after section 22 of the Bombay Civil Courts Act

2 In the said Act after section 22 the following section shall be inserted —

Power to fix local limits of jurisdiction of Subordinate Judges

"22A The Governor of Bombay in Council may by notification in the official Gazette fix and, by a like notification from time to time alter the local limits of the ordinary jurisdiction of the Subordinate Judges

Limits already fixed to be deemed to have been fixed according to law

3 All orders issued by the Governor of Bombay in Council previous to the passing of this Act fixing or altering the local limits of the jurisdiction of a Subordinate Judge, shall be deemed to have been issued in accordance with law

RAILWAY ESTABLISHMENT

PROGRESS MADE IN THE CONSTRUCTION OF THE RUK SIBI SECTION KANDAHAR STATE RAILWAY

Nos 261 62 R E dated Simla 28th April 1880

RESOLUTION—By the Government of India P W Dept

Read again—

Public Works Department Resolution Nos 079 80R C, dated the 6th February 1880

Read also—

No 6 R—238 dated 12th March 1880

From—Colonel C J Merriman C S I Acting Secy to the Govt of Bombay P W Dept

To—The Secretary to the Government of India, Public Works Department

In continuation of my letter No 5 R—164, dated 24th February 1880 I am directed to forward for the consideration of the Government of India a minute dated 10th March 1880 by the Governor of Bombay on the ' Services of Engineer Officers on Surface Railway between Indus Valley and Sibi ' together with the report (in original) by Colonel Lindsay R E referred to in paragraph 1 of the minute

Minute by the Governor of Bombay, dated 10th March 1880

1 I have much pleasure in submitting for the consideration of the Government of India the report (in original) received from Colonel Lindsay R E Engineer in Chief of the Kandahar Railway on the completion of the Jacobabad Sibi Section of that line

2 The work which was begun on 5th October 1879 was completed on 14th January 1880 and represents the construction of 133½ miles of surface broad gauge railway in 101 days showing a daily average of 1⅓ miles—a fact which of itself speaks to the energy and zeal displayed by all concerned

3 I entirely concur in the commendation bestowed by the Engineer in Chief on the officers mentioned in his report, but would more particularly bring to the notice of the Supreme Government the names of the following gentlemen specially mentioned by Colonel Lindsay for the reasons stated in paragraphs 17 and 18 of his report Mr J R Bell, the Superintendent of Works an officer well known for his ability in several of the special branches of the Engineering profession Mr MacIvor, Mr Routh and Mr Hutchinson and of the platelaying division Mr Monk Executive Engineer whose services have been conspicuous on this occasion and whose administrative ability is well proved Mr Tait and Mr Moyle a young officer who has rendered remarkably good service also Mr Peel

4 I would also add the names of Captain Hall and Lieutenant Rayner of the Transport Department, serving with the Railway authorities

5 I would further mention, for the kind consideration of the Government of India the name of Mr Maclean of the Government Telegraph Department whose exertions in keeping the telegraph line well up with the advancing railway are well worthy of commendation

6 Of Colonel Lindsay himself it is almost superfluous for me to speak The services of this officer are already well known to the Government of India and I will but add that it is to his untiring energy, superior discretion and ceaseless exertions that the rapid construction of the railway is especially due. I am sure that his high professional qualifications will be specially manifested in the further progress of the line through the difficult country which lies before us

7 Lastly I have to record my sense of the services rendered to me by my Military Secretary Major E S Rivett Carnac, 11th Hussar whose practical experience in the field in various countries was of great use to me in ensuring rapid and useful progress in a work of this nature

No 486 dated 15th February 1880

From—Lieut Col J G Lindsay R E Engineer in Chief Kandahar State Railway

To—The Military Secretary to the Government of Bombay

I have the honor to report for the information of His Excellency the Governor of Bombay, the completion of the Jacobabad Section of the Kandahar Railway and to place on record as briefly as possible a few facts regarding its construction Mr Mallet, Engineer in

Chief, Indus Valley State Railway, received orders on 10th September to begin the line at Ruk On 12th September I was desired to proceed from Darjeeling to Jacobabad and select a line from that towards Dadur Mr J R Bell then at Simla was appointed Superintendent of Works, and the Engineers named in the margin were posted to the line, and joined on the dates specified

Lieutenant Colonel J G Lindsay R E Sept	19th
Mr J R Bell	16th
Mr H L Monk "	18th
Mr J Tait	25th
Mr G Moyle	22nd
Mr Routh	19th

2 The first few days were occupied in laying down sidings at Ruk Station, and making preliminary arrangements for the reception and carriage of material The platelaying on the main line began on 5th October In the meantime I had examined the country between Jacobabad and Dadur by the Bagh and Lehri routes, and had recommended to His Excellency the adoption of the direct line

3 On the 15th October Sir Richard Temple arrived at Ruk, travelled by the line as far as Shikarpur, the first station and as the work had been well started by Mr Mallet and the forward line selected, His Excellency handed over charge of the undertaking to me on 16th October, the platelaying on that date having advanced nearly to mile 13th from Ruk

4 The orders of the Government were to make a surface line of railway from Ruk to Dadur at a mile a day The obstacles met within the first 45 miles were the different irrigation canals and channels On these temporary wooden bridges were made, the line was cleared of jungle to allow of a double cart-road, and a one foot bank, just enough to pack the sleepers, was thrown up In this preliminary work the civil authorities, who had immediate command of local labor, greatly assisted From mile 45th the difficulty lay in the fact of there being a waterless desert for a distance of 84 miles

5 A survey party as named in the margin, marked out the line and built small sheds every six miles They were supplied with water by means of camels and carts from the right and left but the quality was bad and the supply small, and it was soon realized that all water for the platelayers and cattle must be brought from the rear

Mr MacIvor Executive Engineer —25th September
Mr Routh Assistant Engineer —19th September
Mr Hutchinson Assistant Engineer —4th October

6 His Excellency the Governor, before finally approving of the line I had recommended rode over it on 26th October

7 For the supply of the large quantity of water required two reservoirs were made at mile 45th where advantage was taken of a small channel which brought Indus water by the Begari and Nourwah canals Mr Tait, the Engineer in charge of the local irrigation works undertook to and did, keep this reservoir full of water, and the necessary steam-pumping machinery was fixed there Mr Bell with much forethought had procured ten tank wagons from the Sind, Punjab and Delhi Railway Company, each containing 2,000 gallons of water General Trevor, the Director General subsequently procured five more of these vehicles, which were supplemented by 400 gallon tanks, eight of which were placed on each wagon frame

8 On an average there were 3,800 men in the platelaying camp and 1,400 cattle these required 20,000 gallons of water daily, which was sent them

9 From the beginning it was anticipated that there would be trouble in inducing the laborers to enter on their work in the desert It was true that its horrors could not be exaggerated the workmen of course heard of the manifold dangers before them long before they reached the desert border, and it remained to be proved whether their confidence in the Engineers who led them would overcome their natural fears or not Camps were established every six miles across the desert firewood and forage were stacked there, and at the first three camps portable mat huts (which were moved on as the line advanced) were erected The workmen struck, as had been anticipated they were asked to state their fears fully and the preparations that had been made for their safety and comfort were patiently and distinctly described to them All demands for an increase of pay were refused, while it was shown that extra work on the part of the men would bring extra wages The strike was in my opinion most firmly and judiciously dealt with by Mr Bell and Mr Monk The men were convinced that they would be taken care of they saw and heard of the preparations made for their safety, and after a delay of five days started work again with a will, and, with only one day's holiday worked as, I believe, men seldom have worked in this country until the line was completed to Sibi

10 A Storekeeper and Assistant Locomotive Superintendent who joined on the dates named, were appointed to the line On the first devolved the duty of receiving loading, and despatching all the material at and from Ruk and the second had charge of all rolling stock and workshops These duties were admirably performed, material and stores arrived at the front with almost perfect regularity, and all work connected with the Locomotive Department was most satisfactorily done

Mr L C Desmazures	September 20th
Mr M MacInerney	28th

11 The permanent-way with which the line was laid is particularized in the margin the many different descriptions of it entailed, as may be imagined considerable trouble, and great care had to be taken that the material was not mixed

Railway from which received	No of miles	Description of permanent way
East Indian Railway Company	30	80-lb iron rail with cast iron chai s and wooden sleeper supplied by East Indian Railway
Do do	40	Ditto [illegible] purchased
Great Indian Peninsula Railway Company	45	84-lb bu[illegible]headed steel rails, new cast-iron chairs; 25 mil s sl pers supplied by Great Indian Peninsul balance purchased
Punjab Northern State Railway	19½	60-lb flat footed steel rails, wooden sleepers spikes made in B mbay
S n l, Punjab and Delhi Railway Company	4½	72-lb new teel rails with cast-iron pot sleepers
Do do	8	Old 70-lb iron rails with cast-iron posts keyed inside
D do	10	Old rail corroded ery badly with salt wat ast-iro hairs with wooden sleepers purchased
Do do	5	Old 72-lb rails with cast iro chairs; wooden sleepers purchased
Tot l	172	

12 Some time elapsed before the full staff required were able to join The Engineers named in the margin* joined on the dates specified, and were employed in various duties connected with the completion and up keep of the line as it was laid down

* Mr P Dease, Assistant Engineer 1st October 1879
Armstrong Temporary Executive Engineer 3rd Nov
Collet Assistant Engineer 15th
" Cole " 15th
Keelan 20th
Baxter 30th
Parry 6th Dec
Lloyd Temporary Assistant Engineer 7th
Rabsch Assistant Engineer 8th
Hodges 28th Nov

13 The progress of the work may be briefly recorded as follows From the 5th October to 16th December the daily average was 1 05 miles from 16th December to 14th January the average daily progress was exactly 2 miles, the greatest length laid in any one day was 2¾ miles and the whole 133½ miles were laid in 101 days, giving a daily average of 1⅓ miles

14 For the purpose of carrying forward permanent way material from the front, where it was daily brought by train, His Excellency allotted six hundred carts of the Bombay Transport Train, which were first under Lieutenant Rayner and afterwards under Captain Hall To show that the work they did was well done I need only mention that they used to lead forward over 600 tons of material daily on an average lead of four miles loaded, four miles empty Had it not been for the transport carts the work would either have been delayed, or the people of the district heavily taxed by the necessity of forced labor

15 Dr Faulkner, Indian Medical Department, was posted to the Railway He paid much attention to the sick along the long length of line to which his duties extended and well looked after the sanitation of the Railway camps

16 The Subordinates staff, who advanced with and followed up the platelaying party were those named in the margin † They worked throughout with unremitting energy and skill

† Bristow October 5th
Hamilton November 28th
Robinson October 1st
J MacInerney September 29th
Dwyer 22nd

17 His Excellency the Governor has spent so much time actually on this work that he is well aware of the merits of the Engineers who have been engaged on it, and it is only necessary for me to name those who have borne the most prominent part in the undertaking On Mr J R Bell, the Superintendent of Works fell the burden of the work and to his ceaseless energy and ability its successful completion must be attributed

Mr MacIvor with his Assistants Messrs Routh and Hutchinson, when the heat was still severe marked out the line to Sibi and to Dadur With Mr MacIvor to deal with, I felt that the work entrusted to him would be well and efficiently done, as indeed it was

18 The platelaying division was under Mr Monk Executive Engineer, assisted by Messrs Tait and Moyle I need only draw attention to the result of their labors to show how well and how devotedly they worked Mr Peel, Assistant Engineer, was early in the field, and most efficiently carried out the preliminary work and arrangements north of Jacobabad In this hurriedly written narrative of an important work, directed by His Excellency Sir Richard Temple, I am actuated by a desire to name all who have well borne their part in it, and trust that I have not omitted any who have contributed to its success I write this in justice to those whose labors have resulted in the completion of this line in less than the time named by the Government of India—in less time, I may be permitted to say than was thought possible even by the most sanguine

Resolution —His Excellency the Governor General in Council is pleased to add the names of Mr C V MacIvor, Executive Engineer, and Messrs R S Routh and W C Hutchinson, Assistant Engineers, to the list of officers whose services have been specially recognized in Public Works Department Resolution Nos 079 80R C, dated the 6th February 1880, and to whom certain privileges have been granted

---

Ordered, that this Resolution be communicated to the Government of Bombay and to the Director General of Railways for information and guidance, and be published in the Supplement to the *Gazette of India*

J S TREVOR, *Major General, R E,*
Offg Secretary to the Government of India

GOVERNMENT OF INDIA

HOME, REVENUE AND AGRICULTURAL DEPARTMENT

NOTIFICATIONS —PUBLIC

Simla, the 12th May 1880

No. 721 —THE Most Honourable SIR GEORGE FREDERICK SAMUEL ROBINSON, K G , P C , MARQUESS OF RIPON, EARL DE GREY of Wrest, County Bedford , EARL OF RIPON, County York, VISCOUNT GODERICH of Nocton, and BARON GRANTHAM of Grantham, County Lincoln , and a Baronet is expected to arrive at Aden on or about Wednesday, the 26th current, and at Bombay on or about Tuesday, the 1st proximo, in the P & O S S *Ancona*, to assume the office of Viceroy and Governor General of India

The Resident at Aden will receive the MARQUESS OF RIPON with all the honours and distinctions which are due to the Viceroy of India

His Excellency the Governor of Bombay will make arrangements, in communication with the Naval Authorities, for the landing and reception of the MARQUESS OF RIPON at Bombay with all the honours and distinctions which are due to the Viceroy of India

An Aide-de-Camp of the Viceroy will proceed to Bombay to attend upon the MARQUESS OF RIPON throughout his journey from Bombay to Simla

One of the Principal Civil Officers of each Government, Administration, or Agency will be deputed to meet the MARQUESS OF RIPON, as he enters the limits of such Government, Administration, or Agency, and will remain in attendance upon His Lordship until he passes beyond those limits

At the Railway Stations at which halts are made for rest and refreshment, Civil and Military Officers will be in attendance There will also be a Guard of Honour upon the platform

As the MARQUESS OF RIPON will travel by night, arrangements will be made by the several Local Governments, in communication with the Military Authorities, for His Lordship's reception in a suitable manner at the Stations where he may halt during the day The Government of Bombay will notify to the several Governments and Administrations the names of the Stations where the MARQUESS OF RIPON will halt for the day

At Stations between Bombay and Umballa other than those mentioned in the two preceding paragraphs the attendance of Officers is dispensed with

Proper police precautions will be taken at all the Stations along the Line at which the train stops

Orders regarding the reception of the MARQUESS OF RIPON at Simla will be issued hereafter

DEPARTMENT OF FINANCE AND COMMERCE

NOTIFICATIONS

Simla, the 22nd May 1880

No 686—In exercise of the powers conferred by section 19 of the Indian License Acts Amendment Act 1880 the Governor General in Council hereby directs that when any person is engaged in any trades, dealings industries or callings in more than one of the local areas to which—

The Northern India License Act, 1878,
The Madras License Act 1878,
The Bombay License Act, 1878, and
The Bengal License Act 1880,

respectively extend, and is thereby liable to pay fees under more than one of such Acts, he shall be chargeable with a fee only under the Act under which he is liable to pay fees in respect of his principal place of business and the amount of such fee shall be calculated as if he were engaged in all such trades, dealings industries and callings within the local area to which such Act applies

When any question arises as to what shall for the purpose of this direction be deemed to be the principal place of any business the Governor General in Council will decide such question

No 687—In exercise of the powers conferred by section 4 of the Indian License Acts Amendment Act, 1880, the Governor General in Council hereby appoints the following authorities to decide any question which may arise as to what for the purposes of the Northern India License Act 1878 shall be deemed to be the principal place of business of any person who falls under any of the heads specified in the schedule annexed to the Act last herein before mentioned, and carries on his trade or dealings in more than one district situate either in the territories under the administration of the Lieutenant Governor of the Punjab or in those administered by the Lieutenant-Governor of the North Western Provinces and Chief Commissioner of Oudh, namely,—

(1) If such person carries on business exclusively in the territories administered by the Lieutenant-Governor of the Punjab, the authority who shall decide such a question is the Financial Commissioner of the Punjab

(2) If such person carries on business exclusively in the territories administered by the Lieutenant-Governor of the North Western Provinces and the Chief Commissioner of Oudh, the authority who shall decide such a question is the Board of Revenue, North Western Provinces.

No. 731—Whereas doubts have been raised as to the liability to stamp duty of the receipts endorsed by the payee on Postal Money Orders, the Governor General in Council, in exercise of the powers conferred by section 8 of the Indian Stamp Act, 1879, has remitted the whole of the duties, if any, payable under the said Act on such receipts

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT

[First publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 21st May, 1880, and is hereby promulgated for general information —

ACT No X OF 1880

An Act to declare the law in force in certain lands annexed to the Multán District

Preamble. WHEREAS the lands occupied by the Indus Valley State Railway, and the works, premises and stations thereof, within the limits of the Baháwalpur State, which have been ceded to the British Government in full sovereignty by that State, have been declared by the Governor General in Council to be subject to the Lieutenant-Governorship of the Panjab, and have by the Lieutenant-Governor of the Panjáb been annexed to the Multan District,

and whereas it is expedient that the law in force in the said lands should be the same as the law in force in the Multán District, It is hereby enacted as follows —

Enactments in force in Multán District to apply. 1 All enactments which, on the second day of September, 1879 were in force in the Multán District and not in the said lands shall be deemed to have come into force in the said lands on that day

HOME, REVENUE AND AGRICULTURAL DEPARTMENT

STATE RIGHTS IN MINERALS AND MINING LEASES

From the Government of India, to the Secretary of State for India,—No 7, dated Simla, the 1st September 1879

We have now the honour to reply to Your Lordship's despatches marginally noted, concerning the rights of the State in minerals, and the terms that should be imposed on gold mining leases on Government lands in the Wynaad districts of Madras There has been delay in coming to a decision on these points, because we were obliged to take legal advice on some of the questions raised, and because we desired to ascertain the policy recently adopted in Australia regarding mining leases in the gold fields of that continent.

No 40 dated 10th May 1877
No 69 dated 10th October 1878.

2 Regarding the State rights in minerals, three distinct questions had first to be considered, namely—

(1) whether the royal prerogative, as it obtains in England in respect to gold and silver mines, prevails in British India, and whether grantees of waste land are entitled to mines of gold or silver found thereunder, when the deed of grant is silent as to such mines,

(2) whether, apart from such prerogative, the Crown in India can assert a right to gold, silver, or other minerals on any other ground,

(3) whether, if both these questions are answered in the negative, the mineral resources of the land can be taken into account in assessing land revenue

3 The Madras Government, in their letter No 320, dated 23rd January 1877, concurred with their Advocate General, and expressed an opinion that the royal prerogative regarding gold and silver mines did not prevail in India They held that it would be impolitic, even if it were legally possible, to assert any Government right in the mineral resources of lands sold under the Waste-Land Sale Rules, or in lands held by certain ancient proprietors of the Malabar district The Governor of Madras in Council advised also that the claims of ryots to the mineral wealth of their holdings should not be disturbed, and on this point His Grace in Council differed from the view expressed by the Madras Board of Revenue The Madras Government pointed out that, if large numbers of gold-workers were to come to the mines, police and other expenses would be thrown on the Government, to meet which a reasonable royalty might properly be imposed The Governor of Madras in Council also recommended that, until the policy of Government with reference to mineral rights in the soil was settled, all sales of Government land under the Waste Land Sale Rules should be made subject to the reservation of the State rights in minerals found underneath those lands

4 We referred the three questions stated in the second paragraph of this letter for the opinion of our Advocate General, of our Standing Counsel, and of one of the first lawyers in Calcutta We submit copies of the opinions of these gentlemen for Your Lordship's information It will be seen that they all three agree that the prerogative of the Crown regarding gold and silver mines does not exist in India outside the presidency towns, and that grantees of waste land are entitled to mines of gold or silver found thereunder when the terms of the grant are silent as to such mines While there is no doubt that all the prerogatives essential to the maintenance of the executive power, such as the right of making war, peace and treaties, are in force throughout British India, yet, as the right to mines of gold and silver is merely a fiscal prerogative, and is not essential to the maintenance of the executive power,

it stands precisely on the same footing as the prerogative rights to whales and sturgeon, wrecks, treasure trove, waifs and estrays—cases in which no one would maintain that the Crown has any right in India apart from express legislation Such prerogatives, in fact, belong to that part of the English Common Law which has arisen from, and is adapted to merely local requirements, and is not therefore in force in this country Moreover, since the Indian Legislature, in the Punjab Land-Revenue Act (XXXIII of 1871), section 29, thought it necessary to declare that in the Punjab mines of metal shall be deemed to be the property of Government, and since, by the Ajmere Land Revenue Regulation (II of 1877), section 3, the Government is, with certain exceptions, presumed to be the sole owner of all mines until the contrary is proved, it would be inconsistent to contend that the prerogative right to gold and silver mines exists in India, as, if it did, there would have been no need for these express statutory provisions, or at least these particular metals would have been excluded in framing them On these grounds, we consider that the opinion of the law officers may be finally accepted, and that whatever be the rights of the Government of India in the matter, no claim on the part of the State can be preferred on the ground of the prevalence in India of this royal prerogative outside the limits of the presidency towns. As to the right of grantees, the decisions in England are to the effect that mines of gold and silver will not pass by a grant from the Crown without express words granting them We are, however, advised that the principle of such decisions is wholly inapplicable to India When this principle was established in England, grants from the Crown of its land had the effect of impoverishing the Crown, being made from favour and without consideration moving from the grantee But in India such grants have, it is believed, usually been made in consideration of a money payment, and have therefore had the effect of enriching the Crown We are aware that this argument was used unsuccessfully before the Judicial Committee of the Privy Council in the case of *Woolley* v *The Attorney General of Victoria*, Law Reports, 2 App, Ca 163, 165 But the reason why it failed was that the Common Law of England (including all the prerogatives and the consequences thereof) had been introduced into the Colony of Victoria, from which that appeal was presented No such introduction, it is conceived, can be held to have taken place in this ceded and conquered country The reason why in England grants from the Crown are construed strictly against the grantee is generally said to be that prerogatives are conferred on the Crown for public use, and are therefore not to be understood as diminished by any grant beyond what it takes away by necessary and unavoidable construction But where no such prerogative exists, of course that reason ceases We therefore consider that grantees of waste lands (whether or not the grants expressly comprise "all products both above and below the surface") are, in the absence of any provision to the contrary, entitled to mines of gold and silver found thereunder

5 In regard to the second question, whether the State possesses other general or special rights in minerals lying under lands which are private property, our Advocate General differs from the other two learned gentlemen who were consulted Their opinions referred mainly to Bengal and the permanently-settled districts, with the circumstances of which they were conversant Mr Paul considers that the State has rights in the minerals found in permanently-settled estates, while Messrs Bell and Evans think that the State does not possess such rights We consider that the latter is the opinion most likely to be taken by the Courts And we are confirmed in this view by the practice of the past twenty years, whereby the Government or any private parties who desired to work coal or iron within the limits of a permanently settled estate have been obliged to buy, or at any rate have bought, the right of so doing from the zamindar of the lands underneath which such coal or iron might exist Regarding the circumstances of other provinces, and the way in which State rights in minerals had been asserted or waived, enquiry was made from Local Governments in the year 1871 The replies to that enquiry are recorded in the Proceedings of the Revenue, Agriculture and Commerce Department for August 1872, Nos 26 to 37, copies of which are now submitted for Your Lordship's perusal. It appears from these papers that in most parts of the country

no established law or practice was known upon the subject, and that, as no mines had been opened, no occasion had arisen to determine the rights of the State in respect to such property In the North Western Provinces, however, it had been ruled that, where the surface land had been declared private property, the ownership extended, in default of some distinct and special reservation, to what was below the surface In newer provinces, on the other hand, such as the Punjab, there was no settled judicial precedent making mines and metal private property And accordingly opportunity was taken to declare by legislation (section 2 of Act XXXIII of 1871) that mines of metal in the Punjab and also in Ajmere (section 3 of Regulation II of 1877) should be deemed to be the property of Government Similarly, in the Central Provinces, at the time when proprietary right in their lands was conferred upon the landholders, the full right of Government to minerals was reserved under the provisions of the Settlement Code So also in Berar, a notification issued by the Resident in 1868 concerning the settlement then in progress declared that "the prior right to all valuable things below the surface belonged to the State"

6 On the third point, namely, whether minerals belonging to private proprietors can be taken into account in assessing the estates of those proprietors to land revenue, the Advocate General and the other learned gentlemen consulted are, in the main, agreed that, when temporarily settled estates come under resettlement, the minerals, just like the other resources of such estates, constitute assets on which land-revenue may fairly be assessed This practice has been already partially followed in provinces where miscellaneous items are reckoned into the village assets for the purposes of the assessment of land-revenue

We have already noticed (paragraph 3 of this despatch) the views of the Madras Government and of the Madras Board of Revenue regarding the rights of ryots to all mines and minerals in their holdings Seeing that different classes of tenure may be grouped under the generic term of 'ryotwari tenure,' we hesitate finally to accept, without further enquiry, the view that all holders of ryotwari lands are entitled to all mines and minerals under the holdings Probably the *jenmies* of Malabar, whose tenure is ancient, may be so entitled But we shall ask the Madras Government to consider further the question of the rights of ordinary ryots in the minerals under their holdings

7 Such being the opinions of the Law officers, and such being the reports or recommendations of the several Local Governments, we would advise Your Lordship to answer the three questions summarised above (paragraph 2) thus —

(1) The Crown has in British India no special prerogative over gold and silver mines outside the presidency towns, and grantees of waste land are entitled to mines of gold or silver found thereunder when the deed of grant is silent as to such mines

(2) No general rule, applicable to all provinces, can properly be laid down, either that minerals and metals found in proprietary lands belong to Government, or that they do not so belong Even in different parts of the same province, the law and the fact on this matter may be different When the question arises in each province, it will have to be answered for that province only, in accordance with the practice of the Government and with judicial (or other) precedent But in any province where proprietary rights have been a recent creation of the British Government, where their precise nature and extent are still unsettled, and where custom or practice about mines has not had time to grow up, advantage should be taken of favourable opportunity to declare by legislation that mines of metals in such provinces are State property

(3) Mineral resources of temporarily settled lands, where the proprietors are held to be the owners of such resources, may be taken into account at any resettlement as assets on which the public demand for land-revenue may be assessed

Further, we should have no hesitation in proposing legislation, if necessary, to provide for raising from mining communities the expenses of special police, special communications regulating the water supply, or other special administrative arrangements which might be necessary for the protection or welfare of such communities Such legislation would be in accordance with the principle adopted in section 14 of Act V of 1861, where provision is made for enlisting special police for the protection of, and at the cost of, any manufactory or public work

8 We have considered the proposal of the Madras Government that in future sales of waste lands the State should reserve full rights and property in all metals and minerals which may be found in such lands, and also all reasonable conveniences for working such minerals or metals, either by itself, or through other parties We agree that it is expedient henceforward to sell or grant on lease waste lands subject to these reservations We solicit Your Lordship's sanction to our modifying the Waste Land Sale Rules accordingly, and we enclose copy of a circular order we have issued, directing that, until Your Lordship's orders are received, sales or leases of waste lands shall be made subject to such reservation of full State rights in mines and minerals, together with all convenient powers for getting the same

9 Lastly, there remains the practical question, which requires early decision, namely, on what terms shall mining leases on Government waste lands in the Wynaad, Coorg, or adjacent auriferous tracts be given We recognise the fact that it is of great importance to India that these gold sources should be worked to the best advantage, we admit that, if gold should be produced in large quantities, the effect of such production on the exchanges between England and India would be of great value, and we think that the terms as to royalty, area of mining leases, and the mode of working should be as liberal as may be possible without encouraging undue speculation We learn from Mr Brough Smyth that the most approved system of mining leases in Australia now is to let the land at a moderate rent (ten shillings) per acre, the lessee being bound to employ per acre, or per running yard of reef, a certain minimum quantity of labour on *bonâ fide* mining operations of an approved kind If the lessee fails to fulfil this condition, he forfeits his lease, and the terms of the mining lease make the Governor of the Colony the final arbiter, on such evidence as may be laid before him, whether a particular lessee has, or has not, failed to fulfil the condition In the early days of gold mining industry in Australia, heavy fees (£3 and £2 per month) were charged for mining licenses. Subsequently an export duty was levied on gold taken from the colony, but latterly the Colonial Government of Victoria has found that the largest indirect advantages to the Colony are secured by making the mining leases simple and liberal, subject to the one condition that a certain quantity of labour is employed on *bonâ fide* mining operations for each acre leased

10 Plans for levying a royalty on the ton of quartz raised, or for establishing a local office of assay and levying a royalty on the gold, have been proposed But we consider that, for the present, while the industry is undeveloped, our object should be to make the terms of mining leases of Government lands as simple and liberal as possible In order to prevent large areas falling into the hands of speculators, it has been suggested that a certain limit of available capital, or a certain quantity of (stamping or other) machinery, should be required per acre of land leased But we are advised that these conditions have been tried, and have been found inoperative and unsatisfactory in Australia, and that the simple condition that a certain quantity of labour shall be employed per acre in *bonâ fide* mining has been found to work best For the present, therefore, we would propose to authorise the Government of Madras to grant gold-mining leases of Government lands, in lots of from one to thirty acres, for a term of ten to twenty years, at a rent of five rupees an acre, subject to the condition that not less than five labourers are regularly employed per acre on *bona fide* mining operations in such manner as the Government may approve The leases should be liable to forfeiture on failure of this condition, or failure to pay rent, as soon as either failure had continued for a period of six months, and should be renewable, at the lessee's option, on such terms as the then

Government may settle, at the expiration of the original term The Governor of Madras in Council would be declared to be in each case the final arbiter, whether the lessee had, or had not, fulfilled the conditions of his lease

We would propose thus to leave wide discretion to the Local Government with reference to the term of each lease and the area comprised therein We do not propose to levy any royalty or other tax, for the present, on the industry, because we deem it most important to attract capital to the Wynaad gold fields The cost of bringing machinery for quartz-crushing to the spot will be heavy, the pioneers of the undertaking will have to buy their experience in many directions, and it is very undesirable that the first ventures now to be made should be unsuccessful

11 If Your Lordship approves the foregoing sketch of the terms on which gold mining leases of Government lands might be granted, we shall authorise the Government of Madras to act thereupon, and we shall cause draft leases to be drawn up by our legal advisers.

12 There is apparently ground for believing that some of the best gold reefs that are known in India lie in the estates of the Raja of Nellambor, and of other private proprietors The Alpha Gold Company's works were opened in the Nellambor lands As yet the Raja has made his own terms with companies intending to carry on gold mining, and at present we are not prepared to urge the Madras Government to undertake legislation with a view of compelling private landowners to give gold-mining leases on any particular terms, or against their will

13 We shall be glad to be favoured with early instructions from Your Lordship, not only on the subject of the terms on which mining leases should be granted in the Wynaad, but also on the three questions raised in paragraph 2 and answered in paragraph 7 of the present despatch And we solicit Your Lordship's confirmation of our orders directing that, in all future sales or agricultural leases of waste lands in any part of India mines and minerals found on such lands shall be reserved to the State, together with all convenient powers for working and getting and carrying them away

---

From the Secretary of State for India, to the Government of India,—No 35 (Revenue—Minerals), dated India Office, London, the 25th March 1880

I HAVE considered in Council your letter, with accompaniments,* dealing with the important questions of the general rights of the State to minerals in India, of modifications of the Waste Land Rules necessary to secure these rights, and of the terms on which applications to mine in Government waste lands in auriferous tracts shall be complied with

* No 7 (Home Revenue and Agricultural Department) of 1st September 1879

2 You point out that, regarding general State rights in minerals, three distinct questions have to be considered In the first place, you hold, and I concur in your view, that the royal prerogative, as it obtains in England in respect to gold and silver mines, does not prevail in British India, at least outside the presidency towns You proceed to infer that grantees of waste lands, whether or not the grants expressly comprise all products above and below the surface, are, in the absence of provision to the contrary, entitled to mines of gold and silver found thereunder If this proposition be limited to grantees of waste lands "in fee simple" under the rules framed in different provinces in accordance with the instructions given by my predecessor, Sir C Wood, in his despatch No 14 of 1862, I do not dispute it But I must point out that the expression "grantees of waste land," used without limitation, might be held to include persons who have received, under ordinary terms of settlement, the proprietary rights in lands formerly waste and unoccupied, and to such grantees this view does not apply.

3 As regards the second question, whether, apart from the prerogative, the Crown in India can assert a right to gold, silver, and other minerals found in proprietary lands, you are disposed to agree with Messrs Bell and Evans that, in the permanently settled districts, the State does not possess such right. This was the view arrived at by my predecessor, Sir C Wood, after consideration of Mr Millet s report, dated 26th March 1842 But, without weighing this opinion against that of your learned Advocate General, I am disposed to think that, even if the legal right to minerals in permanently settled estates could be established, it would not be desirable to enforce it I agree with you that the indirect advantages resulting from making available the mineral resources of India are likely to be more valuable to the State than any direct returns, and I therefore consider that it would not be desirable to enforce the right of the State, supposing that such right can be established, to mines in permanently-settled estates Industries requiring skilled and scientific management and the extensive application of capital have flourished under the permanent settlement, and I apprehend that, speaking generally, the landholders of the Lower Provinces are sufficiently alive to their own interests either themselves to develop the mineral resources their estates may contain, or to afford facilities to others to do so

4 This, however, does not apply to many other parts of India I look upon it as pretty certain that the mineral resources of their lands will not be effectually worked by the peasant proprietors themselves of Madras or Bombay, or by the village communities of Northern India, and I apprehend that other promoters of mining enterprise would be likely to meet with considerable obstacles from intricacies of tenure and the difficulty of dealing with numerous small landholders I consider, therefore, that care should be taken to reserve all State's rights to minerals which still exist And I am of opinion, especially with reference to the views of the Madras Government mentioned in paragraphs 3 and 6 of your letter, that, in the absence of any distinct judicial precedent or proof of established law or practice, such rights should be presumed still to exist throughout India I take it that the notion that payment of an assessment based on the agricultural value of land, and intended to cover the right of cultivation, conveys property in minerals below the surface of the soil is essentially a modern one, and would never have occurred to the Native Governments to which our own succeeded I approve therefore of the instructions you propose (paragraph 6 of your letter) to give to the Government of Madras on this subject With regard to the other provinces, you state that no general rule, universally applicable, can be laid down, either that minerals found in proprietary lands belong to the State, or that they do not so belong But, speaking generally, in the North West Provinces it was ruled, but not, as it appears, by judicial authority, that when the surface is private property, the ownership extends, in default of special reservations, to what is below the surface The precise degree of authority possessed by this ruling should, however, receive further consideration In the Central Provinces and Berar the full right of Government to minerals has been reserved at settlement, while in the Punjab and Ajmere, and, it may be added, in the Bombay Presidency,* it has been declared by legislation that mines are the property of Government You conclude therefore that, whenever the question as to the right of the State to minerals found in proprietary lands actually arises, it will have to be answered for that locality in accordance with practice and precedent But that where the nature and extent of proprietary rights are still unsettled, and where custom and practice regarding mines has not been established, opportunity should be taken to declare by legislation that mines are State property With these views I fully concur

* Section 60 of the New Land Revenue Code

5 With regard to the third question, you consider that where proprietors of lands temporarily settled are held to be the owners of the minerals they may contain, such mineral resources may be taken into account for assessment on resettlement In this view I concur, but request that care may be taken not to confer proprietary rights in minerals by including them among assessable assets where such ownership has not been proved previously to exist.

6 Upon the second point discussed in your letter,—the modification of the Waste-Land Rules suggested by the Government of Madras,—I agree with you that, in future, sales and leases of waste lands for agricultural purposes should be generally made subject to reservation of the full right of the State in mines and minerals, and of right of access and other reasonable conveniences for working them on behalf of Government, or the assignees of Government I approve the circular you have issued on this subject, and sanction the necessary modification of the Waste Land Rules

7 Regarding the last subject discussed in your letter,—the terms on which applications to mine in Government waste land in Wynaad and similar auriferous tracts shall now be granted,—you point out that, if gold should be largely produced in India, the effect on exchanges would be highly beneficial, and that it is consequently of great importance that the gold sources in India should be worked to the best advantage You consider therefore that the mining terms granted by Government should be as liberal as possible without encouraging undue speculation, and you deem it of importance thus to attract capital to the Wynaad gold fields You have ascertained that Australian experience is that the largest indirect advantage to the State is secured by making mining leases simple and liberal, on the one condition that a certain quantity of labour is employed per acre on *boná fide* mining operations You propose therefore to authorise the Government of Madras to grant gold mining leases of Government lands, in lots of from 1 to 30 acres, for terms of 10 or 20 years, at a rent of Rs 5 per acre, on condition that not less than five labourers per acre are regularly employed on *boná fide* mining operations, in such manner as Government may approve Power will be given to the Government of Madras to enforce fulfilment of these conditions, and the leases are to be renewable at the expiration of the original period on such terms as the Madras Government may then settle You thus leave to the Government of Madras wide discretion with reference to the term and area of each lease, and you do not propose for the present to levy any royalty or other tax on the industry

8 These arrangements appear to me to be judicious, and I approve them With reference however to the last sentence of the preceding paragraph, and also to the last clause of paragraph 7 of your letter, I am of opinion that it should be made clear that for the term of leases now granted there will be no liability to any future royalty or other tax in addition to the rent, with the exception of any taxation which may hereafter be found necessary to provide, at the expense of mining communities,—the expenses of special police, communications, water supply, sanitation, or other similar administrative arrangements needful for their own protection or convenience

9 Finally, I have to observe that the arrangements you now propose appear to refer to mining operations in Government waste lands only Should, however, it be decided that mineral rights in any owned or occupied lands in Madras are vested in Government, and should gold be discovered in any such lands, I presume that, with due regard to the rights of the cultivating proprietors, mining privileges will be granted on terms similar to those now approved for Government lands

---

From the Officiating Secretary to the Government of India, to all Local Governments and Administrations,—No 1 40—48 (Minerals), dated Simla, the 15th May 1880

In continuation of my Circular No 2 11—19, dated the 1st September 1879, I am desired to forward copy of a despatch No 35, dated 25th March 1880, from the Secretary of State for India, regarding rights of Government to minerals in this country The policy of the Government of India, as already announced, is generally approved, subject to certain additions to be noticed below

2 The most important declaration contained in the despatch is that expressed in the fourth paragraph Hereafter, except in permanently settled

estates, it will be presumed throughout India that, in the absence of any distinct judicial precedent or proof of established usage, the State has a right to minerals

3 Attention is invited to paragraph 2 of the despatch, under which the ruling that grantees of waste lands, whether or not the grants expressly comprise all products above and below the surface, are, in the absence of provision to the contrary, entitled to mines of gold and silver found thereunder, is limited to grantees of waste land "in fee simple," made in accordance with the rules framed upon the instructions given in Sir C Wood's despatch No 14 of 1862 Should any question hereafter arise in respect to grants of waste land made on other terms, Local Governments and Administrations will have to consider, in each class of cases, what is the specific effect of the form of grant regulating them as touching rights to minerals The general ruling above quoted must be held not to apply to ordinary cultivating leases made in the course of settlement operations, or in the routine of district revenue work

4 The direction in paragraph 5 of the despatch, to avoid conferring proprietary rights in minerals by including them amongst the assessable assets where such ownership has not been previously proved to exist, will be duly observed in making temporary settlements The view of the Government of India, that where proprietors of temporarily-settled lands have been judicially held to be owners of minerals contained therein such mineral resources may be taken into account for assessment on resettlement, has been accepted by the Secretary of State But, as explained in paragraph 2 above, in the absence of a judicial decision, the presumption will be that such landholders are not owners of the minerals underneath the surface of their lands

5 With reference to paragraph 6 of the despatch, I am to request that the rules regarding the sale and lease of waste lands for agricultural purposes in force in   may be modified, so far as may be necessary, to make leases and sales under them subject to reservation of the full right of the State in mines and minerals, and of right of access and other reasonable conveniences for working them on behalf of Government or the assignees of Government Full publication should be given to the modifications of rule made under these instructions, and copies of such orders as may be passed by the   on the matter should be forwarded to this Department for information

C BERNARD,

Offg Secretary to the Govt of India

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 15TH MAY 1880

GENERAL REMARKS.—The rainfall of the week presents no new features either in distribution or amount, except that in Mysore it was heavier, and that from Bombay, the Central Provinces and Central India States, where, with the single exception of the Kanara District, there was no rain in the previous week, slight showers are reported. Cultivation is progressing satisfactorily Agricultural prospects and public health remain generally good

Presidency or Province and District.	Rainfall for week preceding	State of agricultural prospects.
Madras—(May 19th)—		
Bellary	·58 (average of nine stations)	*Ragi* 32·4 paddy harvesting in two taluks standing crops generally good
Kurnool	44 (average of six stations)	*Ragi* 34·13.
Ganjam	34 (average of six stations)	*Ragi* 31 69
Kistna	·67 (average of four stations)	*Ragi* 33 L.
Chengleput (Madras)	1 02 (average of four stations)	*Ragi* 22·74 wet and dry crops being harvested standing crops doing well.
Coimbatore	1 57 (average of sixteen stations)	*Ragi* 24 15 crops fair harvest of paddy in two taluks, outturn full.
Tanjore		*Ragi* 25 54 crops generally good harvest of chillies, outturn ½
Madura	83 (average of seven stations)	*Ragi* 25 58.
Malabar	91 (average of twelve stations).	*Ragi* 19 7
Travancore	88	
		General Remarks.—General prospects fair.
Bombay—(May 19th)—		
Kurrachee	...	River at Kotri on 16th 10 feet 9 inches against 6 feet 1 inch on same date last year *kharif* preparations and rice transplanting progressing fever and cattle-disease in four and small pox in two talukas
Hyderabad		Fever in three cattle-disease in two, and small pox in five talukas; dust-storm on the evening of 18th with very hot wind from the north lasted for about half an hour
Ahmedabad		Ploughing and manuring operations going on public health good.
Baroda		Sugarcane crop in good condition land being prepared for *kharif* cultivation public health good
Surat		Fever in three talukas one death from cholera in Surat.
Násik		Public health good land being prepared for new crops
Colaba (Bombay)	A few drops on 12th	Average abnormal temperature 1° warm vapour in air normal; abnormal wind northerly lightning on the 18th.
Poona (May 16th)		Cattle-disease continues in Khed
Ahmednagar		Preparation of land for monsoon crops nearly finished sky clear
Sholapur		Prospects unchanged public health good.
Dharwar	53 in seven talukas	More rain required *rabi* harvest completed land being prepared for sowing, slight fever in six and cattle-disease in one taluka.
Kanara		Monsoon crop preparations continue weather cloudy
Rajkot	10 on 16th	Weather very hot health good
		General Remarks—Land being prepared for monsoon crops slight rain in Kattywar and Dharwar public health generally good, except in Sind, where fever is prevalent.
Bengal—(May 19th)—		
Chittagong	2 58	Weather fair but unusually hot prospects of crops favourable; *aus* seedlings being transplanted; *panta aus* thriving well cholera in several places
Dacca	·95	Prospects of crops promising public health good
24-Pergunnahs (Calcutta)	·81	No crops on ground rice and jute being sown prospects good late rain very beneficial some cholera in Satkhira and Baraset
Moorshedabad	1 30	*Aus* and *amun* paddy sown; rain general and good for cultivation; fever in some thanas of sadr and cholera in Sujagunge, otherwise public health good
Rajshahye	1 16	Last two days of week very hot sowing of *amun* considerably advanced, cutting of *boro* still continues prospect of *til* good; public health good.
Burdwan	·51 Culna 55 Cutwa 67 Raneegunge 1 20.	Weather seasonable sowing of *aus* going on, *amun* cultivation begun; a few cases of cholera.

Presidency or Province and District.	Rainfall for week preceding	State of agricultural prospects.
Bengal—*continued*		
Rungpore	1 49	Weather hot, prospects of crops good price of rice low; public health fair
Bhágalpur	14	Rain enabled cultivators to begin preparing land for next crops; public health good
Purneah	77	Prospects of crops good farming operations well forward; plenty of moisture health fair
Patna	47	Prospects favourable rain enabled cultivators to commence preparing land for future crops
Durbhunga	*Nil*	Weather moderately hot, with strong east wind; general health good in head-quarters a few cases of small pox and cholera in Mudhoobunnee prices stationary
Hazáribágh	88	Weather unusually cool for time of year lands being ploughed for autumn and winter crops prices cheap solitary cases of small-pox and cholera and cattle-disease here and there, otherwise general health good
Cuttack	·9	Ploughing and sowing continue; small pox decreasing prices almost stationary
		General Remarks—Rain in nearly all districts during week; general prospects favourable cultivation forward and crops on ground promising in Central and Eastern Bengal *aus* and jute sowing mostly finished and *amun* sowing commenced small pox and cholera still in some places, otherwise general health good.
N W P and Oudh—		
Benares (May 18th)	A smart shower on 17th	Wind still easterly weather close after the fall of rain the clouds dispersed cholera still in the district, but almost disappeared from the city prices stationary
Allahabad („)	Slight and partial showers	The rain was chiefly to the north of the Ganges cholera still in some centres but most severe at present in the extreme south east fever not more prevalent than usual wind easterly wheat 21½ seers, coarse rice 19$\frac{1}{16}$ seers unhusked rice 27¾ seers
Gorakhpur („ 17th)	1	Wind east weather cool with occasional storms cholera decreasing; prices are easy wheat 22½ seers.
Jhansi („ 19th)		Estimated outturn of *rabi* is 14 annas slight fever prices fluctuating
Agra (18th)		Weather changeable and unseasonable there is sickness, but not to a great extent.
Bareilly („ 19th)		Wind easterly appearance of weather more settled health fair
Meerut ( )		Wind variable frequent dust-storms; fever reported in places prices stationary
Kumaun („ 18th)	6 at Champawat, 26 at Pithoragarh 4 Naini Tal, 3 Almorah 9 Haldwani between 8th and 15th.	Health good *rabi* outturn good prices of wheat 13 seers barley 14 seers rice 11 seers *kharif* crop being sown wind variable
Lucknow („ 19th)		Wind variable mainly easterly cattle-disease reported, but not increasing barley 30 seers wheat 21 seers
Partabgarh („ 17th)		Weather cool slight showers in parts of two tahsils sugarcane is being irrigated cholera decreasing

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[Second publication]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 21st May, 1880, and is hereby promulgated for general information —

ACT No X OF 1880

An Act to declare the law in force in certain lands annexed to the Multán District

Preamble.

WHEREAS the lands occupied by the Indus Valley State Railway, and the works, premises and stations thereof, within the limits of the Baháwalpur State which have been ceded to the British Government in full sovereignty by that State, have been declared by the Governor General in Council to be subject to the Lieutenant Governorship of the Panjab and have by the Lieutenant-Governor of the Panjab been annexed to the Multan District,

and whereas it is expedient that the law in force in the said lands should be the same as the law in force in the Multán District, It is hereby enacted as follows —

Enactments in force in Multan District to apply

1 All enactments which on the second day of September, 1879 were in force in the Multán District and not in the said lands shall be deemed to have come into force in the said lands on that day

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC, CAP 67

The Council met at Government House on Friday, the 21st May, 1880

PRESENT

His Excellency the Viceroy and Governor General of India, G M S I, *presiding*
His Honour the Lieutenant Governor of the Panjáb, K C S I
His Excellency the Commander in Chief, G C B, G C S I, C I E
The Hon'ble Sir J Strachey, G C S I, C I E
General the Hon'ble Sir E B Johnson, R A, K C B, C I E
The Hon'ble Rivers Thompson, C S I
Major-General the Hon'ble A Fraser, C B, R E
The Hon'ble J Gibbs, C S I
The Hon'ble B W Colvin
The Hon'ble C Grant

MULTÁN DISTRICT LAWS BILL

The Hon'ble MR COLVIN presented the Report of the Select Committee on the Bill to declare the law in force in certain lands annexed to the Multan District

The Hon'ble MR COLVIN also moved that the Report be taken into consideration

He said that the object of this simple Bill had been already sufficiently explained to the Council All that he need add to that explanation on the present occasion was that the Select Committee had made no change in the Bill since its introduction Inquiry had been made in order to ascertain whether any validating clause would be necessary in respect of things done during the time which had elapsed between the cession of this territory in 1872 and the time when the present Bill would become law It had been found, however, that no such clause was required, and that the Government of the Panjáb did not wish any other change to be made in the Bill Accordingly the Committee recommended that it should be passed in the shape in which it had been introduced

His Honour the LIEUTENANT GOVERNOR remarked that the Bill was very short and simple, and the object of it appeared perfectly clear from the wording of it It had been found necessary to enact a law to provide that jurisdiction might be legally exercised over the lands of the Indus Valley State Railway transferred from Baháwalpur territory to the Multan District, and the Bill as it stood met that want completely

The Motion was put and agreed to

The Hon'ble MR COLVIN also moved that the Bill be passed

The Motion was put and agreed to

CENTRAL PROVINCES LAND REVENUE BILL

The Hon'ble MR GRANT moved for leave to introduce a Bill to consolidate and amend the law relating to Land revenue and the jurisdiction of Revenue-officers in the Central Provinces He said this Bill, and the Tenancy Bill which he would subsequently move for leave to introduce, were of a kind familiar to the Council, several similar measures having been enacted in the course of the last few years As in those cases, the Land-revenue Bill would provide for the

assessment and collection of the land-revenue, and for the maintenance of the machinery required for those purposes, whilst the Tenancy Bill would complete the scheme of revenue administration by regulating the relations of landlords to tenants, and the fund out of which the revenue was ultimately paid

The Land revenue Bill would, however, differ from most of its predecessors, and indeed from the form in which it was itself at first cast, in being limited as closely as possible to the subjects just enumerated, and so in excluding much matter of a class which, though usually treated as belonging to Revenue administration proper, really lay quite apart from it Whether it was because we inherited some of the traditions of the Native rulers whom we succeeded, or because the position of the Government, as partner in so vast an estate, tended somewhat to cast its other relations into the shade, the fact was notorious—that the collection of land revenue had always been allowed in this country to stand forward as the representative function of the executive as might be exemplified in the common designation, so puzzling to English ears of the chief administrative official of a district as the "Collector," or in the recognized division of the public services into two branches, the Judicial and the Revenue Departments, the latter embracing, as was well known, almost every miscellaneous duty which could be imposed on an executive official, such, for instance, as supervising girls' schools or looking after the board and lodging of travellers, or even providing fireworks for fairs Probably for that reason few Land revenue Acts were quite free from some admixture of foreign matter, and in the Central Provinces Revenue Bill, as it first stood, there were chapters on pre emption, partition Government wards and irrigation tanks, all of which had now been transferred to a separate Bill As Land revenue administration pure and simple was a subject on which the authorities were pretty well agreed, its principles having been settled by a long course of experience the transfer would not only shorten the Revenue Bill, but also, by excluding from it most questions on which difference of opinion was likely to arise, would, he hoped, have the effect of accelerating its passage through the Council

How important it was that the Revenue Bill as well as the Tenancy Bill, should be passed without avoidable delay would, he thought, be apparent if he explained briefly the existing condition of the Land-revenue and Rent Law in the Central Provinces In doing so, he would endeavour to pass as lightly as possible over all details, geographical and historical, which might be found in any ordinary gazetteer or book of reference

The Central Provinces, as was well known, were made up of various fragments, including a large division of the North Western Provinces, a district from Central India another from Orissa, the remains of an extinct Marátha kingdom, and a wild strip of territory from Haidarabad For present purposes it would, perhaps, be sufficient if he confined his remarks to the two larger of these component portions formerly known as the Nágpur Province and the Saugor and Nerbudda territories

The Saugor and Nerbudda territories had now been under British rule for rather more than sixty years, during the first two-thirds of which they were tossed about from Administration to Administration They were originally divided between the political authorities of Nagpur and Central India, but were soon united under a Governor General's Agent of their own From his charge they were transferred to the Government of the North-Western Provinces Then broke out the rebellion of 1842, and the Governor General, Lord Ellenborough, took them into his own hands In a few years, however, they were restored to the North Western Provinces, and lastly, in 1861, they were incorporated into the newly created Central Provinces.

Thus, in little more than forty years, there were five changes of administration, with an average duration scarcely exceeding eight years to each. It would readily be conceived that in such circumstances there was little opportunity for the law to settle down and consolidate The spirit of the Regulations was, it was true, prescribed for the guidance of local officials, but it did not seem to have penetrated very deeply, for in 1834 Mr Mertins Bird, a distinguished and still remembered Member of the North-West Revenue Board,

who was deputed to visit and report upon the country, wrote that "none of the British officers had read a word of the Regulations applicable to the province," and that they "knew nothing of their spirit or of what was valuable in them" Twenty years later a scheme of coercive processes for the collection of the land revenue was introduced by the North West Board of Revenue, but as parts of the existing province were not confiscated and annexed until after the rebellion of 1857, whilst others again, though managed by us from an early period, were not formally ceded to us until 1860, it was impossible to say that the powers with which the Local Government was thus armed were of universal application even in the Saugor and Nerbudda territories

In the Nagpur province the difficulty was, not to say how far the revenue-law was applicable, but what was the law—indeed, whether there was any law at all After the death of the last Bhonsla Rajá in 1853, and on our assumption of the country in 1854, it was decided by Lord Dalhousie that the system which had been employed in the management of the State by Sir R Jenkins, during a Regency lasting from 1818 to 1827, should be resumed The essence of that system was declared to lie in the adoption of 'plain, simple and efficient Regulations based on the ancient laws and usages of the country" It did not seem, however, to have provided any particular procedure for the collection of the land revenue Probably it would not have occurred to any-one at that time that special powers were needed for such a purpose The land was undisputedly the property of the State, and, even if there could have been any doubt on the point, the Resident, assuming, perhaps, some of the despotic powers of the Native dynasty which he represented, had been long accustomed to solve far more intricate questions by his simple fiat Thus, when he determined to put down complaints of witchcraft, he ordered fifty lashes, and if necessary more, to be administered to all over officious witchfinders, and he suppressed even in a more summary way, an ancient and lucrative usage of the country *viz*, the sale of poor men's widows for the benefit of their richer neighbours and of the Government An authority, thus competent to declare a new offence and suppress an old usage, would certainly not be unequal to enforcing, even without legislative aid, the collection of revenue admittedly due to the State

When by degrees a more settled system was introduced, the moderation of the land revenue assessment, and the long habituation of the people to executive guidance, for a time kept administrative jars and legal difficulties in the back-ground Of late years however, the diffusion of legal knowledge and the increasing facility for obtaining legal advice had on some occasions placed the Government and the land revenue payers at arm's length, if not in actual collision, and, although, by the exercise of some mutual forbearance those cases had been compromised or otherwise settled, it was high time that the rights and liabilities to each other of the Government and the land holders should be clearly defined, and that land revenue administration should no longer proceed more or less in the dark

Passing on to the Tenancy question, we came upon the firmer ground of positive law, though it might be questioned whether the reign of a foreign law was altogether preferable to the kind of legal anarchy, tempered by local custom, which it replaced The present law of landlord and tenant in the Central Provinces was the well known Act No X of 1859, which had been described as the "raiyat's charter,"—the complement, in regard to tenants, of the beneficent legislation which conferred a permanent settlement on the landlords of Bengal Act X might perhaps have been entitled to those high eulogies in the Lower Provinces, where landlords had, by their long start, gained considerable vantage-ground over their tenants, and used it—so it was said—to obtain enhanced rents by means of confinement and other modes of restraint But in Upper India the new law was certainly no unmixed boon to tenants Even in the North Western Provinces it altered the law to their disadvantage by introducing a rapid and summary procedure for enhancing rents instead of the slow and cumbrous process of a civil suit, and by materially enlarging the grounds on which a Court might decree enhancement

In the Central Provinces, where, as we had seen, custom was stronger than law, it substituted machinery which, if somewhat rigid and ill adjusted to

local circumstances, was none the less powerful in skilled hands, for a system of complete conservatism, founded, partly no doubt on sympathy for the people, but also on a fear of all changes and disturbances which might prejudice the collection of the land revenue Mr Bird, whom MR GRANT had already quoted, described very graphically the lengths to which this apprehension led the revenue authorities—how they forced bankers to give loans to insolvent cultivators—how they refused to enforce Civil Court decrees against cultivators until the revenue had been collected—how all agricultural stock was exempted from distraint—and, generally, how all other interests were subordinated to the paramount object of getting in the State dues As at that time cultivators were scarce, the displacement of a cultivator would have been discouraged, not only as injurious to him, but as objectionable on fiscal grounds, and the result was that old cultivators in the Saugor and Nerbudda territories enjoyed a very considerable measure of protection, and indeed were practically secure against ejectment, so long as they paid a moderate rent with reasonable punctuality Not only were those privileges directly curtailed by Act No X of 1859, but, as Mr Jones, the author of these Bills, pointed out—

"with the inevitable tendency of written to drive out unwritten and customary law, it spread among all ranks of officers a more or less definite impression that it was not very necessary to enquire what rights tenants had before its introduction, and that they could have no rights except those which it recognized An Act which was intended to confer rights on tenants was construed as if it had demolished rights which, before its introduction, they possessed"

Now, no definite law could, of course, restore to tenants, even if such restoration were desirable, immunities which they derived from the very absence of a defined legal system, but this much at any rate might be advanced with confidence respecting the Bills which he asked leave to introduce—that they had been prepared with much research, and with careful regard to the interests, not only of tenants but of landlords, by one of the most experienced of the officials who had served in the province, and that they had since been subjected to repeated and minute criticism, both here and in the Central Provinces When the time came for him to explain the details of the Bills, the Council would, he hoped, find that they adequately met all reasonable requirements

The Motion was put and agreed to

CENTRAL PROVINCES TENANCY BILL

The Hon'ble MR GRANT then moved for leave to introduce a Bill to define and amend the law relating to the tenancy of land in the Central Provinces

The Motion was put and agreed to

EXEMPTION FROM MUNICIPAL TAXATION BILL

The Hon'ble MR GRANT also moved for leave to introduce a Bill to exempt certain persons and property from municipal taxation He said it was a Bill for the purpose of empowering the Governor General in Council to exempt military officers and men (not being in civil employ), and also public property, such as horses and wagons, from certain forms of municipal taxation in municipalities which were not also military cantonments As regards military cantonments, that object had already been attained by section 24 of the recently passed Cantonment Act, No III of 1880, and it had been proposed to deal with the case of military men and public property in ordinary municipalities by introducing the necessary provisions into the Bill to regulate the levy of Town duties and Tolls in Municipalities That Bill, however, could not be proceeded with immediately, and hence it had been thought advisable to complete the necessary legislation by asking the Council to deal with the subject independently

The Motion was put and agreed to

The Council adjourned to Friday, the 28th May, 1880

SIMLA,
 The 21st May, 1880

TREASURE TROVE

Notice is hereby given under Section 5 of "The Indian Treasure Trove Act (VI of 1878)," that on the 25th July 1879 treasure consisting of twenty three silver coins of the old currency of the value of about Rs 18 was found in a piece of Government land to the north of the house of Raoji Shimpe in Wadale a hamlet of the village of Kh...wandi in the Newasa Taluka of the Ahmednagar Collectorate in the Bombay Presidency

All persons claiming the treasure or any part thereof are required to appear personally, or by agent before the Collector of Ahmednagar at his office on the 1st November 1880 in order that the claim may be enquired into and determined in accordance with the provisions of the said Act

ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT FOR THE YEAR 1878 79

Nos 181 200T dated Simla the 11th May 1880

RESOLUTION—By the Government of India Public Works Department

Read—

Letter No 763T, dated 15th January 1880 from the Director General of Telegraphs together with its enclosure the Administration Report of the Telegraph Department for the year 1878 79

RESOLUTION —The year under review has been one of great activity in Telegraph business The revenue of the Department has exceeded the working expenses (excluding interest charges) by Rs 6,08,246, the surplus of the previous year, which, till now, was the highest on record, was Rs 1,82,128

2 The net Capital expenditure during the year amounted to Rs 5,48 270, of which Rs 3,759 will be subsequently recovered The Capital Account which stood at the end of the year at Rs 3,35,61 872 (exclusive of Ceylon) is stated to include Rs 55,99,799 (or nearly one sixth of the whole amount) for abandoned lines buildings and stores The Government of India desires a report in explanation of the details of this latter sum

3 The Capital Account of the Ceylon Telegraphs is shown separately, as the management of these Telegraphs by the Indian Telegraph Department will cease in 1880

4 During the year 379 miles of line and 1,783 miles of wire were added to the system bringing the totals up to 18,589 miles of line and 44,578 miles of wire (including cables), the property of Government In addition to this, 6 723 miles of wire the property of Railway Companies, were maintained by the Telegraph Department

5 The total net expenditure on Revenue Account was Rs 29 70,607, the Revenue receipts (excluding Ceylon receipts) amounted to Rs 35 97,015

6 The foreign traffic, both "State" and "private" shews a small increase There is a large increase in "State" inland traffic attributable to the military operations in Afghanistan but in "private" inland traffic there has been a large decrease, owing to the cessation of the activity in the grain trade which sprang up during the famine This decrease is, however, not so large as was anticipated and there appears to be reason to hope that some increase to the revenue will be maintained There is again, a decrease in the "*pro forma*" message revenue amounting to Rs 24,686

7 The average speed of transmission of messages on the main lines has practically been maintained notwithstanding the increased traffic and in most cases it has been considerably increased

8 The interruptions to traffic have been also fewer and shorter than in previous years and the returns on this head compare favorably with the results attained in European systems

9 Owing to the great depreciation in the value of silver, the charge for messages to England was increased from Rs 2 8 to Rs 2 12 per word with a corresponding increase in the rates to other countries

10 The figures which accompany the Report do not agree exactly with those entered in the Finance Accounts The former shews the entire earnings of the Department during the year concerned, while the Finance Accounts include only the actual adjustments which have been made on account of those earnings The Administration Report also includes the rent realized from Telegraph buildings, and the cost of repairs to them by the Public Works Department Neither of these items is included under this head in the Finance Accounts

11 The Government of India has much satisfaction in thinking that the results of the year's working show that the Department possesses a very good staff very ably directed, and that a comparison of the figures with those of previous years reveals a gradual and steady reduction in cost of working combined with an equally steady growth of revenue which testifies to the care and ability with which the Department has been administered

ORDER — Ordered that copies of this Resolution and of the Report be forwarded to the Secretary of State to the Local Governments and Administrations noted on the margin to the Government of Ceylon and to the Commissioner in Sindh

Madras Bombay Bengal North Western Provinces and Oudh Punjab Central Provinces British Burma Assam Hyderabad Central India and Rajputana

Also, that a copy of this Resolution be forwarded to the Director General of Telegraphs for information and guidance

Also that a copy of this Resolution and of the Report and Appendices A B and F be forwarded to the Home Department of the Government of India for information and to the publisher of the *Gazette of India* for publication in the Gazette

Also to the Foreign Department for communication to the Chief Commissioner of Mysore and Coorg

J S TREVOR, *Major General, R E*

Offg Secy to the Govt of India

ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT FOR 1878 79

The results of the operations of the Department for the year 1878 79 shew a satisfactory progressive improvement

The total working expenses amounted to Rs 30,88,177 and the earnings to Rs 36 96,423 shewing a surplus of Rs 6 08 246,* as compared with the surplus of Rs 1,82 128 during the preceding year

The number of paid telegrams increased from 1,357 014 in 1877 78 to 1 371 721 in 1878 79, of which latter 1,173,851 were inland and 197,870 foreign

The miles of lines and wires (including cables) increased respectively from 18 210 and 42 795 to 18 589 and 44,578, and in addition 6 723 miles of wire not the property of Government, were maintained by the Department for the service of Railway Companies

The number of Departmental offices increased from 239 to 250 and at the close of the year 525 Railway Telegraph offices were technically supervised by the Department as against 484 during the preceding year

Notwithstanding the increase of traffic, the speed of transmission has in the case of all the main routes practically been maintained and in most of them considerably increased Details will be found at paragraph 20

The number of complaints received from the public in which this Department is concerned is slightly in excess of those received last year amounting to about 3 per cent against an increase of traffic of 1 08 per cent The increase is for non delivery only Complaints under the heads Error ' and Delay ' shew a decrease There is an increase in the number of complaints in which other Telegraph Administrations are concerned amounting to about 12 per cent The increase of traffic with other Administrations was under 6 per cent Details will be found further on

2 A clear idea of the progress that has been made year by year will be readily obtained from the following table and from diagrams which are annexed to this Report —

[illegible]	18 1 7	1872-73	1873 74	1 1- 5	18 6 6 1	[illegible]	1 7 8	1 8 9

REVENUE AND EXPENDITURE

3 The total net capital expenditure of the Department during the year amounted to Rs 5 48 270, of which Rs 3 759 on account of the Telegraph Lines in Cashmere will be recovered from the Maharajah

The Capital Account of the Department (excluding Ceylon†) at the end of the year stood at Rs 3,35,61,872, including Rs 55,99,799 for abandoned lines, buildings and stores

* After providing for the loss of Rs 18 162 sustained in working the Ceylon system of telegraphs
† Particulars of the Capital Account of Ceylon are shewn separately in Appendix A

4 The following is a brief Statement of Receipts and Expenditure on Revenue Account of the whole Department, including India and Ceylon, for the year 1878 79 —

	Rs	Rs	Rs	Rs
Expenditure in India and Ceylon				30 88 177
RECEIPTS	INDIA	CEYLON	TOTAL	
Revenue from paid Messages	29 63 569	95 817	30 59 386	
Receipts from State Railways	1 71 071	900	1 71 971	
Ditto Guaranteed Railways	2 55 386		2 55 386	
Claims from Guarantors &c	33 694	1 822	35 516	
Minor undertakings	16 850	482	17 332	
Miscellaneous	39 478	387	39 865	
TOTAL	34 80 048	99 408	35 79 456	
Pro formâ Message Revenue	1 16 967		1 16 967	
GRAND TOTAL	35 97 015	99 408	36 96 423	36 96 423
Net Profit for the year				6 08 246

5 The following is an abstract Revenue Account for India only with corresponding figures for 1877 78 —

EXPENDITURE	1877 78	1878 79	RECEIPTS	1877 78	1878 79
	Rs	Rs		Rs	Rs
Repairs to lines	2 80 248	2 77 397	Message Revenue earned	28 03 967	29 63 569
Repairs to buildings by Public Works Department	31 728	32 058	Receipts from State Railways for interest line maintenance technical supervision &c	52 503	1 71 071

Check Office	34,647	38 129			
Signalling	13 82 036	14 34 905	Claims from Guarantors	27 329	33 694
Tools and Plant	2 36 380	1 97 079			
Profit and Loss	3 149	197	Sales of Books Gazettes &c	16 469	16 850
Printing charges by Printing Department		2 488			
Absentee Allowances paid in England	1 43 475	90 470	Miscellaneous	10 192	39 478
			News free and other *pro formâ* Message Revenue	1 41 603	1 16 967
TOTAL EXPENDITURE	31 47 319	30 57 137			
DEDUCT—					
Value of printed forms supplied to Ceylon	5 023	1 023			
Share of General Charges debited to Ceylon	10 650	10 146			
Share of General Charges debited to Capital	1 22 416	75 361			
TOTAL DEDUCTION	1 38 089	86 530			
NET REVENUE EXPENDITURE	30 09 230	29 70 607			
NET PROFIT	2 11 652	6 26 408	TOTAL RECEIPTS	32 20 882	35 97 015

The increase of message revenue earned over that of the previous year (excluding Ceylon) is Rs 1 59 602 due wholly to increase in State messages

6 The receipts from Railways shew an increase over the previous year of Rs 2,05,435, of which Rs 1,18,568 are from State Railways and Rs 86,867

from Guaranteed Railways This increase is due chiefly to the claims for the previous year having been made out for nine months only

7 There has been a net decrease in the *pro formâ* message revenue of Rs 24 636

8 Summaries of the financial results obtained in working the Telegraphs in India and Ceylon separately from the commencement up to the end of the year 1878 79 will be found in Appendix A

TRAFFIC

9 A return of the number and value of Inland and Foreign Messages under the sub heads " State " and " Private " will be found in Appendix B the percentage being as follows —

Class	Inland		Foreign		Total	
	No	Value	No	Value	No	Value
State	15 27	24 33	0 24	1 42	15 51	25 75
Private	70 30	46 88	14 19	27 37	84 49	74 25
Total	85 57	71 21	14 43	28 79	100 00	100 00

Shewing the following absolute and proportionate increase over the result of the previous year —

Class of Messages	Actual Increase Inland No	Actual Increase Inland Amount	Actual Increase Foreign No	Actual Increase Foreign Amount	Actual Increase Total No	Actual Increase Total Amount	Actual Decrease Inland No	Actual Decrease Inland Amount	Actual Decrease Foreign Amount	Actual Decrease Total No	Actual Decrease Total Amount	Percentage Increase Inland No	Percentage Increase Inland Amount	Percentage Increase Foreign No	Percentage Increase Foreign Amount	Percentage Increase Total No	Percentage Increase Total Amount	Percentage Decrease Inland No	Percentage Decrease Inland Amount	Percentage Decrease Foreign Amount	Percentage Decrease Total No	Percentage Decrease Total Amount

		R		R		Rs
1877 78	1 6 013	4,84 034	1,23 021	4 10 (38	1 3 7 014	20 3 2
1878-79	212 451	7 87 45	1 16 870	1 641	1 371 21	30 9 3 6

INLAND TRAFFIC

11 In State messages there has been a considerable increase, due principally to the Military operations in Afghanistan There has been a falling off in private messages explained by the fact that last year's increase was abnormal owing to the famine in Southern India The decrease however was not nearly so great as was anticipated and budgetted for

The growth of the inland message traffic, State and private, since the introduction of the present tariff will be seen at a glance from the figures below —

YEAR	STATE						PRIVATE						TOTAL PAID MESSAGES					
	Number	Value	Percentage of number of messages compared with previous year		Percentage of value compared with previous year		Number	Value	Percentage of number compared with previous year		Percentage of value compared with previous year		Number	Value	Percentage of number of messages compared with previous year		Percentage of value compared with previous year

FOREIGN TRAFFIC

12 There has been a small increase in Foreign Traffic, State and Private The percentage of increase compared with previous years is shewn in the following figures —

YEAR	PERCENTAGE OF INCREASE COMPARED WITH PREVIOUS YEAR	
	No	Value
1873 74	12 72	7 33
1874-75	15 75	6 24
1875 76	8 87	8 21
1876-77	22 44	5 34
1877 78	38 14	27 28
1878 79	5 28	0 42

13 Appendix C shews the percentage of number of messages between India and places to the westward by each route for the past eight years The comparative results of the period under review and of the two previous years are as follows —

	1876 77	1877 78	1878 79
Viâ Suez	60 22	79 10	75 04
" Teheran	37 57	17 72	23 07
" Turkey	2 21	3 18	1 89

Details of the number and value of messages to, from, and through India by each route will be found in Appendix B

14 The following return corresponds with that given in paragraph 11 for inland traffic —

YEAR	STATE						PRIVATE						TOTAL					
	Number	Indian share of charge	Percentage of value compared with previous year		Percentage of number compared with previous year		Number	Indian share of charge	Percentage of value compared with previous year		Percentage of number compared with previous year		Number	Indian share of charge	Percentage of value compared with previous year		Percentage of number compared with previous year

15 Diagrams A and B give the number and value respectively of Inland and Foreign paid messages from year to year as far back as the record is available

CHANGES IN FOREIGN TARIFF

16 There were no changes of any importance in the rates for international messages, but owing to the continued depreciation in the value of silver the rate of exchange for adjustment of balances with Foreign Administrations was from 1st January 1879, changed from Rs 44 to Rs 50 per hundred francs This resulted in the charge per word from India to Europe being raised from Rs 2 8 to Rs 2 12, and in a corresponding increase in the rates to other countries

SIGNAL OFFICES

17 Appendix D is a classified abstract of signal offices according to the amount of traffic originating at each for the past seven years

18 Appendix E shews the number of offices in each division open at the end of 1878 79 The following were opened and closed during the year —

Opened	Date	Closed	Date
Khelat	27th May	Hubli	31st May
Mach	19th June	Coimbatore	7th ditto
Naraingungo	11th July	Beawar	1st ditto
Ngathineyoung	2nd September	Bhawalpur	31st ditto
Akote (re opened)	17th November	Cuddapah	27th June
Jumrood	21st ditto	Erode	27th ditto
Thull	9th ditto	Salem	27th ditto
Koorum Fort	25th December	Ongole	31st July
Ali Musjid	29th ditto	Inghai	28th October
Pegu	29th January	Sabathu	3rd ditto
Dhakka	20th ditto	Mittri	31st January
Lundi Kotul	15th ditto	Panadure	13th February
Peiwar	10th ditto	Bhurtpore	28th ditto
Gulistan Karez	9th ditto		
Kalatura	16th February		
Basawal	16th ditto		
Jellalabad	18th ditto		
Bagh	4th ditto		
Chaman	22nd ditto		
Nawalapitya	28th March		
Pachmarhi	24th ditto		
Peiwar Kotal	19th ditto		
Abdool Rahman	24th ditto		
Kandahar	31st ditto		

Number of offices open on 31st March 1878		239
ADD—Number of offices open during 1878 79	24	11
DEDUCT—Number of offices closed during 1878 79	13	
Number of offices open on 31st March 1879		250

COMPLAINTS.

19 In Appendix F will be found particulars of all the complaints received from the public during the year those in which this department was concerned being separated from those chargeable to Railway or Foreign Telegraph Lines

SPEED OF TRANSMISSION

20 The average time occupied in the transmission of messages over the long main routes during the years under review, and the two previous years were as follows —

	1876 77		1877 78		1878 79	
	H	M	H	M	H	M
Calcutta to Kurrachee	0	47	0	41	0	55
Kurrachee to Calcutta	0	44	0	26	0	29
Calcutta to Bombay	1	13	1	14	0	57
Bombay to Calcutta	1	13	1	15	0	59
Calcutta to Madras	1	51	2	28	1	22
Madras to Calcutta	1	56	2	20	1	25
Bombay to Madras	0	46	1	16	0	33
Madras to Bombay	0	48	1	8	0	38
Galle to Madras	3	8	5	6	3	27
Rangoon to Calcutta	11	49	7	41	2	32
Bombay to Kurrachee	0	47	0	43	0	41
Kurrachee to Bombay	0	47	0	28	0	31

A better idea of the improvement in speed will be obtained from Diagram C, which shews graphically the speed of transmission in each principal line for many years past

NEWS FREE MESSAGES

21 Reports of the state of the weather, of the arrivals of mail steamers &c exhibit a slight increase in number, but a considerable decrease in length and value, *viz*,—

	No	Value
		Rs
1877 78	7,358	78 966
1878 79	7 591	57,329
Increase	233	
Decrease		21 637

TRAFFIC WITH RAILWAY TELEGRAPHS

22 Appendix G shews the number and value of messages transferred to and received from State and Guaranteed Railways during the past six years A comparison of the figures of the period under report with those of the preceding two years shews the following result —

Particulars	1876-77			1877 78			1878 79		
	No	Value		No	Value		No	Value	
		Rs	A		Rs	A		Rs	A
Traffic exchanged with State Railways	21 049	30 582	7	28 985	32 339	14½	37 783	43 322	5 1/12
Traffic exchanged with Guaranteed Railways	75 260	77 205	8¾	96 225	93 372	15	94 453	95 952	0
TOTAL TRAFFIC EXCHANGED WITH RAILWAYS ..	96 309	1 07 788	0¾	125 210	1 25 712	13½	132 236	1 39 274	5 1/12

PRESS MESSAGES

23 The number and value of Press messages sent at reduced rates during the past six years by Reuter's Telegraph Company, and by other associations or individuals, are given in Appendix H

As compared with the previous year the number of messages has slightly decreased, but the value has increased as follows —

	Number less.	Value more. Rs
Messages sent by Reuter's Company	74	7,280
Do by others	66	138
TOTAL INCREASE IN VALUE		7,418

UNDELIVERED MESSAGES

24 The number of undelivered messages was 4,295 as against 4,064 in the previous year

The causes of non delivery were as follows —

Not found address insufficient	1,132
Not found at address given	1 400
Address changed in transmission	113
Left station, new address not known	275
Left India	120
Left for original station	848
Refused	87
Returned by Dead Letter Office	160
Addressee or the address given, unknown	54
Other reasons	111
	4 295

The increase is nearly entirely under the head "Not found at address given," a cause manifestly beyond Departmental control

INTERRUPTIONS ON DEPARTMENTAL LINES

25 Notwithstanding the increase of miles of line and wire, the following statement shows that there has been a decrease in both the number and duration of interruptions as compared with those of previous years The statement includes interruptions due to extraordinary causes, details of which are given further on —

	1877 78	1878-79
Total number of interruptions	386	350
Aggregate duration, hours	5790	4910
Average duration, hours	15	14
Interruptions for every 100 miles of wire	0 92	0 80

26 It may perhaps be interesting to contrast with these statistics those for one of the best appointed and best managed Telegraph systems in Europe, that of Germany *

Number of interruptions per 100 miles of wire

Germany		India		Average number of interruptions per mile of wire *more* in Germany than in India.
		Official year		
1876	18 4	1875 76	1 8	10 4 times more
1877	8 7	1876 77	1 18	7 37 " "
1878	6 25	1877 78	0 92	6 8 " "
1879	Information not available	1878 79	0 80	

The above is a great reduction on previous years, and is due in a great measure to the substitution of underground for aerial lines

27 The interruptions during the year due to extraordinary causes, and included in the above figures, were as follows —

April 1878 —Between Nowshera and Hoti Murdan, lasting 148 hours Span across the Cabul river washed away during heavy floods

Between Kohat and Bunnoo, lasting 576 hours Flying line across the river Koorum washed away by floods

* Taken from "The Electrician of the 15th of March 1879

SPEED OF TRANSMISSION

20 The average time occupied in the transmission of messages over the long main routes during the years under review, and the two previous years were as follows —

	1876 77		1877 78		1878 79	
	H	M	H	M	H	M
Calcutta to Kurrachee	0	47	0	41	0	55
Kurrachee to Calcutta	0	44	0	26	0	29
Calcutta to Bombay	1	13	1	14	0	57
Bombay to Calcutta	1	13	1	15	0	59
Calcutta to Madras	1	51	2	28	1	22
Madras to Calcutta	1	56	2	20	1	25
Bombay to Madras	0	46	1	16	0	33
Madras to Bombay	0	48	1	8	0	38
Galle to Madras	3	8	5	6	3	27
Rangoon to Calcutta	11	49	7	41	2	32
Bombay to Kurrachee	0	47	0	43	0	41
Kurrachee to Bombay	0	47	0	28	0	31

A better idea of the improvement in speed will be obtained from Diagram C which shews graphically the speed of transmission in each principal line for many years past

NEWS FREE MESSAGES

21 Reports of the state of the weather, of the arrivals of mail steamers &c, exhibit a slight increase in number, but a considerable decrease in length and value, *viz*,—

		No	Value Rs
1877 78		7 358	78 966
1878 79		7 591	57 329
	Increase	233	
	Decrease		21 637

TRAFFIC WITH RAILWAY TELEGRAPHS

22 Appendix G shows the number and value of messages transferred to and received from State and Guaranteed Railways during the past six years A comparison of the figures of the period under report with those of the preceding two years shews the following result —

Items	1876-77			1877 78			1878 79		
	No	Value		No	Value		No	Value	
		Rs	A		Rs	A		Rs	A
Traffic exchanged with State Railways	21 049	30 582	7½	28 985	32 339	14½	37 783	43 322	5 1/?
Traffic exchanged with Guaranteed Railways	75 260	77 205	8¼	96 225	93 372	15	94 453	95 952	0
TOTAL TRAFFIC EXCHANGED WITH RAILWAYS	96 309	1 07 788	0	125 210	1 25 712	13½	132 236	1 39 274	5 1/12

PRESS MESSAGES

23 The number and value of Press messages sent at reduced rates during the past six years by Reuter's Telegraph Company, and by other associations or individuals, are given in Appendix H

As compared with the previous year the number of messages has slightly decreased, but the value has increased as follows —

	Number less.	Value more. Rs
Messages sent by Reuter's Company	74	7,280
Do by others	66	138
TOTAL INCREASE IN VALUE		7,418

UNDELIVERED MESSAGES

24 The number of undelivered messages was 4,295 as against 4,064 in the previous year

The causes of non delivery were as follows —

Not found address insufficient	1,132
Not found at address given	1,400
Address changed in transmission	113
Left station, new address not known	275

Addressee or the address given unknown	54
Other reasons	111
	4 295

The increase is nearly entirely under the head "Not found at address given," a cause manifestly beyond Departmental control

INTERRUPTIONS ON DEPARTMENTAL LINES

25 Notwithstanding the increase of miles of line and wire, the following statement shews that there has been a decrease in both the number and duration of interruptions as compared with those of previous years The statement includes interruptions due to extraordinary causes, details of which are given further on —

	1877 78	1878-79
Total number of interruptions	356	350
Aggregate duration, hours	5790	4910
Average duration, hours	15	14
Interruptions for every 100 miles of wire	0 92	0 80

26 It may perhaps be interesting to contrast with these statistics those for one of the best appointed and best managed Telegraph systems in Europe, that of Germany *

Number of interruptions per 100 miles of wire

Germany		India		Average number of interruptions per mile of wire *more* in Germany than in India.
		Official year		
1876	18 4	1875 76	1 8	10 4 times more
1877	8 7	1876 77	1 18	7 37 " "
1878	6 25	1877 78	0 92	6 8 " "
1879	Information not available	1878 79	0 80	

The above is a great reduction on previous years, and is due in a great measure to the substitution of underground for aerial lines

27 The interruptions during the year due to extraordinary causes, and included in the above figures, were as follows —

April 1878 —Between Nowshera and Hoti Murdan, lasting 148 hours Span across the Cabul river washed away during heavy floods

Between Kohat and Bunnoo, lasting 576 hours Flying line across the river Koorum washed away by floods

* Taken from "The Electrician of the 15th of March 1879

July 1878—Between Attock and Peshawur, lasting 247 hours Span across the River Indus washed away by flood The river at Attock rose 55 feet 10 inches above ordinary level an occurrence not known for fifty years

August 1878—Between Umballa and Jullundur, lasting 226 hours, and between Jullunder and Umritsur, lasting 107 hours Caused by floods carrying away the railway bridges at the East Beyne 100 miles from Umballa, and near the Jullunder Railway Station, also at various other points

August 1878—Between Mooltan and Sukkur lasting 142 hours Heavy floods along the Indus Valley State Railway between Kotsamabu and Naushara Sangi and Rohri and also between Mirpur and Sarhad

November 1878—Between Vizagapatam and Coconada lasting 134 hours Caused by heavy storm blowing down trees, which fell on the line in 30 places between Coconada and Annavaram

December 1878—Between Vizagapatam and Coconada, lasting 212 hours Caused by the cyclone and floods of 6th and 8th December In some places the water rose higher than the tops of the supports

SIGNALLING ESTABLISHMENT

28 There were 855 departmental and 111 military telegraph masters and signallers on the strength of the establishment at the close of the year, as compared with 815 and 66 respectively on the 31st March 1878

The casualties among departmental telegraph masters and signallers have been 34, as per margin against 27 during the preceding year, a percentage of 3 97 against 3 30 of last year

Deaths	9
Dismissals	7
Resignations	10
Remanded to duty	1
Transferred to other Departments	3
Services dispensed with	2
Struck off unfit for duty	2
	34

The number of military signallers trained by the Department during the year to whom certificates of proficiency were given was 94 as against 21 last year Eighty military signallers were employed in departmental offices and 31 in purely military offices

ELECTRICAL

29 The office of Electrician was held by the late lamented Mr R S Brough, and also by Mr W P Johnston to the 31st December 1878, when the permanent incumbent, Mr L Schwendler, returned to duty and assumed charge

30 *Line Testing* The number of regular testing stations remains the same as last year *viz*, 20 Every year shews the high state of efficiency to which the practice of testing overland lines of telegraph has been brought in India the primary result being that the majority of the lines possess a degree of insulation and a carrying power that leave but little to be desired, and that faults in the line are accurately localized and speedily removed

31 *Insulator testing*, which has now for many years been established upon a firm basis still continues

32 *Duplex Working*—The split battery system continues to be employed on our lines, for the reason that no better system has yet been brought forward Although it would be hazardous in these days of invention to say that no better system will ever be produced, yet for efficiency, stability and simplicity our present system will not easily be surpassed

33 *Duplex arrangements* for the line from Akyab to Rangoon were manufactured and set up during the year

34 *Cables*—A considerable length of gutta percha covered wire was received during the year The bedding of Manilla hemp treated with tannin, and the protecting guards of iron wire, were put on by our own machines which continue to work perfectly

EXTENSIONS OF LINES AND WIRES AND LINE MAINTENANCE

35 Appendix I is a classified list of all telegraph lines, the property of this Department in India Burma and Ceylon on the 31st March 1879 The following are the total mileages of line, wire and cable contrasted with those existing on the same date in 1878 —

	Line	Wire	Cable
1877 78	18 210	42 687	108
1878 79	18,589	44 470	108
Increase	379	1,783	

In addition to the above, the Department maintained 1,942 miles of line and 6,723 miles of wire, the property of Railway Companies, particulars of which are given in Appendix J

36 The principal works executed in each division are as follows —

ARAKAN

37 The doubling of the wire, Calcutta to Rangoon and Elephant Point, begun last year, was completed during the year

BENGAL

38 A permanent two-wire line, 57½ miles in length, was constructed for the Bankipore-Gya State Railway New cables were laid across Channel Creek at Mud Point in the Hooghly River and at Mokameh in the Ganges In Calcutta, 9 miles of line and 37 miles of wire were erected for the Meteorological Department and for certain private firms, and instruments to work them were fitted up at fifteen different places in the city The telegraph lines in the Nulhatti and Calcutta and South Eastern State Railways were re-constructed The Central Office at Calcutta was connected by wire with the Railway Telegraph Offices at Howrah and Sealdah, and the latter station was connected with the Calcutta and South Eastern State Railway Office

The repairs to the East India Railway telegraph lines which were in progress at the close of the last official year were completed

BOMBAY

39 The only work of any extent in this division was the erection of an additional wire from Poona to Shahabad, 249 5 miles in length

DACCA

40 Two new cables were laid during the year, one across the Pudda river to replace that laid in 1875 the other across the Ganges at Sara A loop line was erected from Dacca to Naraingunge and an office opened at the latter place An additional wire was erected for 89 miles on the existing posts from Barrackpore to Parodha

MALABAR COAST

41 The line from Bangalore to Mysore, 85 miles, originally partly on Hamilton's ¾ standards and partly on stone pillars, was re constructed for the greater portion of the distance along the Bangalore Mysore State Railway, with Hamilton s whole standards and two wires

NAGPUR

42 A new 4 wire line for 11 miles was constructed along the Nagpur and Chatteesgurh State Railway from Nagpur to Kamptee A 3rd wire, 28½ miles in length, was erected on the supports of the main line from Kureli to the Pipariа Railway Station, and from the latter place a single wire line for 50½ miles was constructed to Pachmarhi

PUNJAB

43 A new single wire line, 118 miles, was constructed from Umritsur to Dalhousie A temporary line on bullies was erected from Lahore to Ferozepore An additional wire was erected between Jhelum and Pubbee, completing the 2nd wire between Lahore and Peshawur An additional wire was also erected between Umballa and Simla, and between Umritsur and Lahore

RAJPUTANA

44 The line from the Chumbul river to Gwalior, a distance of 36 5 miles, was dismantled and re constructed along the Scindia State Railway

SINDH

45 A second wire between Sukkur and Jacobabad, 50 miles, was completed and brought into circuit before the close of the year

BELUCHISTAN

46 The line Quetta to Khelat, 69 5 miles in length, was completed on the 24th of May

STATE AND GUARANTEED RAILWAY TELEGRAPHS

47 Appendix J is a return shewing the number of telegraph offices and extent of line and wire maintained for State and Guaranteed Railways together with the capital expended by this Department on behalf of each Railway

STORES AND WORKSHOPS

48 The following are the principal items of expenditure under this head during the year —

	Rs
Purchase of stores in India	1 20 102
London stores, including freight and landing charges	3 57,665
Workshop and Press	1,65 855
Store keeping	81 530
Stationery received from Superintendent of Stationery and value of printing done by the Superintendent of Government Printing without charge	15 752
TOTAL	7,40,904

49 Under the head of "Purchase of stores in India" Rs 16,033 are for military stores received without cost in previous years and now debited to this Department

50 The value of outturn from the workshops was Rs 3,51,527 and from the Press Rs 33,075, against Rs 3,63,446 and Rs 40,662 respectively during the previous year

51 The total value of stores received and issued during the year amounted to Rs 16,20,455 and the store keeping charges to Rs 81,530

CEYLON

52 Appendix A contains the usual summary of financial results of the Ceylon telegraphs from the 1st of January 1869, the date of their transfer to the Indian Government up to the end of the year 1878 79

53 There has been a very small capital outlay of Rs 131 during the year, and the total of such outlay by the Indian Government up to the end of the year stands at Rs 67,609 The net loss on working for the year amounts to Rs 18,162 and from the transfer in 1869 up to the end of the year, to Rs 2,22,008, exclusive of all interest charges

54 The following is an abstract of the Revenue Account for the years 1877 78 and 1878 79 —

Expenditure	1877 78	1878 79	Receipts	1877 78	1878-79
	Rs	Rs		Rs	Rs
Repairs of lines	20 142	12 613	Message Revenue earned	99 735	95 817
Repairs to buildings (Departmentally)	462	141	Receipts from Ceylon Railway for maintenance of line	900	900
Direction Accounts &c (share)	10 650	10 146	Miscellaneous	735	869
Superintendence ...	26 022	26 685	Claims from the Colonial Government under Guarantee		1 822
Line maintenance ...	11 169	10 457			
Signalling	54 236	51 [illegible]71			
Tools and Plant	2 785	4 701			
Value of printed forms supplied	5 023	1 023			
TOTAL EXPENDITURE	1 30 489	1 17 587	TOTAL RECEIPTS	1 01 370	99 408
DEDUCT— Share of Charges for Direction &c debited to Capital	405	17	NET LOSS	29 524	18 162
TOTAL REVENUE EXPENDITURE	1 30 894	1 17 570	TOTAL	1 30 894	1 17 570

55 The working expenses of the year are therefore less than those of the previous year by Rs 13 324 which occurs chiefly under Repairs, Signalling, and Printed Forms The charges for Repairs and Printed Forms in 1877 78 were exceptional The lines required heavy repairs in that year, and the stock of printed forms was written off with the view of keeping only a numerical account of such articles in future

There is a falling off in the message revenue of Rs 3 918

MILITARY OPERATIONS IN AFGHANISTAN

56 Detailed reports of the operations of the Telegraph Department in connection with the military advance into Afghanistan prior to the Treaty of Gundamuck will be found in the following appendices —

Appendix K —Report by Mr Officiating Superintendent S J Josephs in charge of Telegraphs with the Kurrum Valley Field Force

Appendix L —Report by Mr Officiating Superintendent C E Pitman, in charge of Telegraphs with the Kandahar Field Force

Appendix M —Report by Mr Officiating Superintendent S P W V Luke, in charge of Telegraphs with the Khyber Field Force

KURRUM VALLEY FIELD FORCE

57 The Government of India letter No 359T, dated 3rd October 1878, requested that arrangements might be made for the supply of 200 miles of semi permanent line for the Kohat Field Force

58 No time was lost in pushing up the stores to Kohat, and owing to the zeal and energy displayed by the Construction officer, Mr Assistant Superintendent N Jones, the line was completed and an office opened at Thull, 66 miles from Kohat, on the 8th November

59 Mr Jones was then relieved by Mr S J Josephs, Officiating Superintendent, to whom had been entrusted the charge of the military lines in this direction, and proceeded to Peshawur, where he constructed with equal celerity and success the short line from Peshawur to Jumrood

60 Mr Josephs was placed at the disposal of the General in Command, and under orders received from him, extended the line from Thull to Ali Kheyl by the 12th April, and eventually to Karatega, 170 miles from Kohat Offices were opened at —

Thull on the 8th November
Hazar Pir on the 26th December
Kurrum Fort on the 25th December
Peiwar on the 10th January
Peiwar Kotal on the 19th March
Ali Kheyl on the 2nd April

61 The only casualties with Mr Josephs' party were 2 muleteers murdered near Ali Kheyl

62 The line was constructed with great energy and judgment, and was maintained practically without interruption, and, after the early days of our occupation of the district but little difficulty was experienced from marauders The total length of working wire cut and carried away was 15½ miles—a large quantity certainly, but inconsiderable compared with our losses in the Khyber

63 Mr Josephs carried out the important duty entrusted to him with complete success and the value of his assistance was specially represented to Government by the General Officer Commanding

KANDAHAR FIELD FORCE

64 On the 3rd October 1878 the Government of India, by letter No 359T ordered arrangements to be made for the supply of 250 miles of line to run along the line of communication through the Murri Bugti country to connect Mittri with Rajunpore On the 22nd October this order was cancelled and instructions issued to send the material to Quetta for use if required

65 The difficulties experienced in getting these stores to Quetta were very considerable but were overcome by the great energy and zeal of Mr C E Pitman the Officiating Superintendent in charge of Telegraphs in Beluchistan

66 Pending the arrival of the stores at Quetta, Mr Pitman was engaged in making every possible preliminary arrangement for the possible extension to Kandahar, and accompanied the Agent to the Governor General to select a route and arrange for the protection of the line

67 To Gulistan Karez 40 miles, the line was completed on the 8th January Beyond this place its extension was not possible till the 17th February owing to the detention of the stores in the Bolan Between Gulistan Karez and Chaman 23 miles, the line was constructed in 5 days and an office opened on the 22nd February

68 On the 6th March Mr Pitman received authority to commence the line from Chaman towards Kandahar, a distance of 77 miles, and on the 31st March he opened the office in the citadel of Kandahar

69 The line although so rapidly constructed has worked without interruption, and only three known cases of wilful damage have occurred

70 On the 28th March Mr Pitman's working party was attacked by a band of marauders and Sub Inspector Mahomed Sidi of this Department and Sepoy Neek Mahomed of the Sappers were severely wounded and two camelmen slightly wounded

71 Mr Pitman's local knowledge and fertility of resource were invaluable and his conduct of the whole expedition was characterised by the zeal and energy for which he has always been conspicuous

72 Mr Pitman brings to notice the very great assistance he received from Mr Inspector J Hutchins Not alone as a Telegraph subordinate officer did Mr Hutchins distinguish himself, but he displayed a rare courage and devotion during the severe outbreak of cholera among the troops at Abdul Rahman which called forth the admiration of Major Clifford, the Road Commandant and the thanks of the Lieutenant General

KHYBER FIELD FORCE

73 On the 13th November 1878 the Military Department enquired as to the possibility of arranging for the construction of a line from Peshawur to Jumrood and subsequently on to Dhakka and on the same day a copy of Military Department letter to the Quarter Master General followed conveying the formal instructions of Government for the erection of a line to Jumrood to be advanced to the head of the Pass should it be entered and held The line was erected and office opened at Jumrood on the 21st November 1878

74 Complete arrangements were then made for a considerable advance and Mr Officiating Superintendent P V Luke was directed to proceed to

Peshawur with a strong staff for charge of the work He was instructed to report himself to the General Officer Commanding, and to push on the construction of the line as desired by him

75 From the 5th paragraph of Mr Luke's report (Appendix M), it will be seen that he was delayed at Jumrood from the 25th November to the 26th December on the latter date he received orders to advance, and within four days the line was erected to Ali Musjid and an office opened there

76 On the 8th January he received permission to make the attempt to extend his line to Lundi Kotal and succeeded in completing it and in opening the Lundi Kotal office five days later, *viz*, on the 12th January On the 20th January he had reached Dhakka and established the office there The remaining offices were opened —

Basawul on the 16th February,
Jellalabad on the 18th February,
Gundamuck on the 24th April,

and notwithstanding the enormous difficulties with which Mr Luke had to contend, communication was almost uninterruptedly maintained

77 Some conception of what these difficulties were will be gathered from Mr Luke's Report (Appendix M), which shews that, on a total distance of 108 miles of line, it was cut 98 times and 60 miles of the working wire were carried away and never recovered

78 The undertaking entrusted to Mr Officiating Superintendent Luke proved to be in some respects more onerous than that of either Mr Josephs or Mr Pitman It is impossible to over estimate the value of the tact he throughout displayed, or too highly to praise the zeal and devotion with which he applied himself to the execution of his difficult duty How well he succeeded will be apparent from a perusal of the preceding remarks and of his own report

79 The experience of this campaign has shewn conclusively the value of the system introduced by the late Director General, Major General D G Robinson, R E, and since largely extended, of spreading a knowledge of telegraphy throughout the Army, and employing soldiers as signallers in times of peace to fit them for this duty during military operations

80 With each of the advance columns the large majority of the signallers were soldiers, who on the whole, did the work really well

81 The total length of line constructed beyond the frontiers in connection with these operations amounted to 420 miles

PERSONAL

82 In the Direction the following changes occurred during the year —

Colonel R Murray Officiating Director General, was confirmed in the appointment of Director General

Mr A J L Cappel Officiating Deputy Director General, was confirmed in the appointment of Deputy Director General

Mr J H Lane, Officiating Director of Traffic, was confirmed in the appointment of Director of Traffic

Major H Mallock, Director of Construction proceeded on furlough on the 15th of April 1878 and Mr 1st grade Superintendent W R Brooke was appointed to officiate as Director of Construction during the absence of Major Mallock

83 The success of the Departmental operations is greatly due to the valuable assistance and invariable co operation I have received from the Deputy Director General Mr A J L Cappel To Mr J H Lane, Director of Traffic and Mr W R Brooke Officiating Director of Construction, my best thanks are due for their unremitting exertions and for the ability and success with which they have conducted the important duties of their respective offices as also to my Personal Assistant, Mr F G Teale, and to Major J Eckford R E Superintendent of Stores and Workshops, for the very efficient manner in which he has carried out the duties of his onerous charge

Messrs C B P Gordon and W K D'O Bignell have administered the large Divisions under their charge with great tact, skill and success

With scarcely an exception the officers of the Department in all grades deserve my cordial thanks for the excellence of their work acknowledgments no less due to the Signalling Establishment for loyal and good service under all circumstances

84 This Report cannot fitly close without an expression of the deep sense of the loss the Department has sustained by the death from cholera on the 3rd April 1879 of one of its most distinguished young officers, Mr R S Brough, lately Officiating Electrician, whose great ability and attainments high sense of duty, and singleness of purpose had won for him the respect and regard of all associated with him

R MURRAY *Colonel*
Director General of Telegraphs in India

CALCUTTA
The 1st December 1879

FIELD OPERATIONS

No 326—His Excellency the Right Hon'ble the Viceroy and Governor General in Council has high gratification in directing the publication of the following despatch from Lieutenant General Sir D M Stewart K C B reporting the success of Her Majesty's arms at Ahmad Khel on the 19th April and in the neighbourhood of Ghazni on the 23rd April 1880

2 The Governor General in Council fully appreciates the enduring value of these successes which are no less attributable to the skilful direction and decision of the Commander than to the courage and endurance of the troops under his orders It will be the Viceroy's pleasing duty to bring the services of Sir Donald Stewart and his force to the marked notice of Her Majesty's Government and to request that they may be submitted to the Crown for that full and gracious recognition which Her Majesty never withholds from loyal and brave service

3 Meanwhile on his own part and on the part of the Government of India, the Earl of Lytton

tenders to Lieutenant General Sir Donald Stewart and to all who served under his orders his sincere and grateful thanks for the distinguished and valued service they have rendered to their country

---

Kabul

No 2145A dated Simla, 19th May 1880

From MAJOR GENL G R GREAVES C B Adjutant General in India,

To the Secy to the Govt of India, Military Dept

I have the honor, by direction of the Commander in Chief to forward for the information of the Government of India the accompanying despatches from Lieutenant General Sir D M Stewart K C B reporting the engagements at Ahmad Khel on the 19th April and in the neighbourhood of Ghazni on the 23rd April and in doing so, I am to express His Excellency's sense of the admirable manner in which the operations under Sir Donald Stewart including the march to Ghazni and the engagements now reported, have been conducted

2 The whole of the arrangements for the march which has terminated so successfully were excellent and in a country deserted by its inhabitants, where supplies are scarce and transport difficult everything proceeded with a regularity which showed how well and carefully the preparations had been made

3 In regard to the engagement at Ahmad Khel Sir Frederick Haines feels sure that the Government will concur with him and Sir Donald Stewart that the conduct of the troops was beyond praise and will consider that great credit is due to Sir Donald Stewart and to the officers under him for the judicious dispositions and successful handling of the men under their command in circumstances of exceptional difficulty, when attacked by a large number of desperate men entirely reckless of their own lives

4 The action near Ghazni though of minor importance, was well carried out, and resulted in a considerable loss to the enemy, with only a few casualties on our side

5 The plans of the engagements are in course of being copied, and will be transmitted when completed

---

Field Operations

No 5L dated Kabul 5th May 1880

From LIEUT GENL SIR D M STEWART K C B Commanding the Ghazni Field Force

To the Adjutant General in India.

I have the honor to report, for the information of His Excellency the Commander in Chief in India, that on the 19th April the troops under my command encountered and defeated an enemy holding a position at Ahmad Khel some twenty three miles south of Ghazni The enemy's strength was estimated at 1000 horse and from 12,000 to 15 000 foot

2 For several days previous a hostile gathering had been observed marching on our right flank, at a distance of about eight miles, and it was supposed that the intention of the leaders was to take part in the resistance to be expected at Ghazni itself Meanwhile, the country from Khelat i Ghilzai forward was deserted by its entire population so that not only was the supply of the troops arranged for with difficulty, but it was scarcely possible to obtain intelligence of the character of the opposition that might be offered

3 On the morning of the 19th April the Field Force marched at daylight from the halting ground of Mushaki in the following order —

19th Bengal Lancers 300 sabres		Leading brigade under the command of Brigadier General C H Palliser C B
A B R H Artillery six 9 pr guns		
19th Punjab Native Infantry 47 [illegible]		
Field Force head quarters { 1 2 60th Rifles 63 rifles; 1 25th P N I 85; [illegible] 19th B L 50 sabres		
No 4 and 10 Companies Bengal Sappers and Miners 80 rifles		
59th Foot	496 rifles	Under the command of Brigadier General R J Hughes
3rd Goorkha Regiment	289	
2nd Sikh Infantry	367	
G 4th Royal Artillery	Six 9 pr guns	
6 11th Royal Artillery	{ Two 40 [illegible]; Two 3 [illegible] howitzers	
2nd Punjab Cavalry	349 sabres	

Field Hospitals

Ordnance and Engineer Field Parks

Treasure

Commissariat

Baggage

2 60th Rifles	443 rifles	Under the command of Brigadier General R Barter
15th Sikhs	5[illegible]	
25th Punjab Native Infantry	980	
11 11th R A (Mountain Battery)	S[illegible] 7 pr guns	
1st Punjab Cavalry	310 sab	

the length of the entire column in order of march being about six miles

4 About seven miles from camp the enemy was observed in position three miles in advance of the head of the column, when the two leading brigades were disposed as follows —

The three batteries of artillery being in column of route upon the road the infantry of Brigadier General Hughes' brigade was advanced to the left, in line with the leading battery, one troop of the 19th Bengal Lancers being detached to scout on the left flank along a range of low hills terminating in the enemy's position the remainder of the cavalry was formed to the right of the guns in flat country stretching for some three miles as far as the Ghazni river, and the 19th Punjab Native Infantry, the two companies of Sappers and Miners with the Lieutenant-General's escort, were placed in reserve

5 At 7 45 A M orders were sent to Brigadier General R Barter to bring forward one half of the infantry of his brigade and to release two squadrons of the 1st Punjab Cavalry to join the Cavalry Brigade then placed under the command of Brigadier General Palliser, C B

6 The advance was ordered at 8 o'clock, and when the column was within a mile and a half of the enemy's line A B, Royal Horse Artillery and G 4th Royal Artillery moved out to positions immediately to the right of the road, No 6 11th, Royal Artillery coming into action on a knoll 1500 yards in rear the infantry (59th Foot, 3rd Goorkha Regiment, 2nd Sikh Infantry), under the command of Brigadier-General Hughes being formed for attack on the left of the field batteries while the 19th Punjab Native Infantry furnished one company as escort to G 4th Royal Artillery, and the 19th Bengal Lancers detached a squadron as escort to A B Royal Horse Artillery The equipment of the sapper companies, entrenching tools of infantry regiments &c had, meanwhile been placed under shelter and in rear of No 6 11th, Royal Artillery

7 At 9 o'clock, and before the intended attack of the position was developed the crest of the range occupied by the enemy was observed to be swarming with men along a front of

nearly two miles a body of horsemen that formed the enemy's right outflanking the left of our line

8 The guns had scarcely opened fire when in an incredibly short space of time an enormous mass of men with standards formed on the hill top a considerable number of horsemen riding along the ridge with the intention of sweeping to the rear of our line to attack the baggage From the central mass out rushed successive waves of swordsmen on foot stretching out right and left and seeming to envelop the position The horsemen turned the left now strengthened by a squadron of the 19th Bengal Lancers and pouring down two ravines which formed a V struck the Lancers before they could charge forcing the leading squadron to its right and rear while the 3rd Goorkha regiment the infantry of the left formed rallying squares The situation during this temporary success of the enemy was rendered critical as the squadron could not be rallied till it had passed to the right of the line of infantry then hotly pressed and giving way

9 The onslaught of fanatic swordsmen was at this time so rapid and was pushed with such desperation that during the few minutes which followed it became necessary to place every man of the reserve in the fighting line the two upper companies with half a battalion of the 19th Punjab Native Infantry reinforcing the left while a half battalion of the 19th Punjab Native Infantry with the two companies [illegible] on the Lieutenant-General's escort supported the guns on their left The enemy however continued to push on and approached within a few yards of the guns when the whole of their [illegible] being expended both batteries were withdrawn a distance of 200 yards The gallantry with which the batteries maintained their ground till the last moment and the orderly manner in which their retirement was effected reflect the greatest credit on officers and men

At this time the infantry of the right was forced back and the position was taken up two guns of G-4th Royal Artillery being detached to the left centre whither the remainder of the battery was subsequently moved

The 2nd Punjab Cavalry having formed the escort with A-B Royal Horse Artillery and the remainder of the regiment moved to the left of the line the 19th Bengal Lancers and two squadrons of the 1st Punjab Cavalry being pushed to the right towards the river while a well directed shell from the 40 pounder guns with [illegible] 11th Royal Artillery checked the forward movement of the enemy's horsemen round our left flank

10 The fighting lasted for an hour during which the troops under Brigadier-General Barter had come up and reinforced the right centre

11 At 10 o'clock [illegible] the "cease fire" to be sounded the enemy's attack having been effectually defeated their entire body spreading broadcast over the country The necessity for protecting efficiently the large baggage and baggage train formed in rear of the column forced me to retain the cavalry to cover the right flank and pursuit was checked The regiments on the right had, however been closely engaged

12 The troops halted two hours during which time the dead were buried and the wounded received necessary attention At 12 o'clock however, the entire force with its baggage in close formation, moved forward and passed over the enemy's position completing a march of seventeen miles to Nani where camp was pitched My advanced cavalry entered Ghazni next day

13 The casualties during the engagement amounted to —killed 17 wounded 124 of whom nine were officers More than a thousand dead bodies of the enemy were counted on the field and their loss is estimated at from 2,000 to 3,000

14 Taking into consideration the character of the attack led as it was by swarms of fanatics determined to sacrifice their own lives the conduct of the troops engaged was beyond praise

15 I now desire to bring to the notice of His Excellency the Commander-in-Chief and of the Government the excellent service performed on this occasion by Brigadier-Generals R J Hughes and C H Palliser, C B, on whose brigades the brunt of the action fell The resolute firmness with which the key of the position was held by the 2nd Sikh Infantry and the [illegible] Regiment under Brigadier-General Hughes' direction when the right of the line was pushed back is evidence of that officer's soldierlike qualifications

The judicious and vigorous manner in which the cavalry was handled in the open country on the right of the line reflects the highest credit on Brigadier-General Palliser, C B I am much indebted to Brigadier-General Barter for the rapidity with which he brought up his brigade a distance of six miles from the rear although the infantry portion of this reinforcement did not come into action until the enemy were in full flight the celerity of advance enabled me to follow up our success by making a forward movement of importance

To Lieutenant-Colonel E F Chapman Deputy Adjutant and Quarter Master General I am much indebted for the able assistance which he uniformly afforded me in his responsible office My thanks are also due to Major A C Hancock Assistant Adjutant General Captain A C [illegible] Assistant Quarter Master General and Captain L [illegible] Bishop Deputy Assistant Quarter Master General whose zeal and activity merit high commendation At the most critical period of the action I observed Captain [illegible] engaged in the fighting line and I believe that the gallant example he set the men by advancing towards the enemy and [illegible] shooting down one of the most forward of them had the very best effect on the soldiers

I have to thank Colonel A C Johnson Royal Horse Artillery commanding the Royal Artillery for the admirable disposition of the batteries under his command

The arrangements for the immediate care of the wounded reflect the highest credit upon Deputy Surgeon-General A Smith, C B the Principal Medical Officer with the Force and the exertion of the medical staff [illegible] my warm acknowledgment

To Captain [illegible] M [illegible] officiating Commanding Royal Engineer Major C Cowie, R A Commissary of Ordnance and Captain R E C A [illegible] Deputy Judge Advocate I am much indebted for the ready assistance they have always given me in their respective departments Captain [illegible] has moreover been most useful to me as an orderly officer in action

My Aide-de-Camp Captain N P Stewart Bengal Staff Corps has performed his duties to my entire satisfaction and I desire to thank him as well as Lieutenant J L Dickie, R E,

Superintendent of Army Signalling, for their services in conveying my orders

To Captain W V Ellis Provost Marshal as well as to Captain W A Lawrence General Transport Officer and his assistants I am under special obligations for it was by their unremitting attention that the enormous mass of transport animals and followers was kept under control during the action As the baggage and train were massed within a short distance of the fighting line any confusion among them would have been most calamitous and would probably have led to a serious disaster

Owing to Captain C I Hughes Bombay Staff Corps Deputy Assistant Commissary General having been incapacitated by an accident the duties of Principal Commissariat Officer with the force devolved on Lieutenant B I I Reilly Bombay Staff Corps My thanks are due to him and the officers temporarily employed with the Commissariat Department for their exertions in supplying the force under very difficult circumstances

To Major C B Euan Smith C S I the Chief Political Officer with the Force who was in attendance on me during the action I am under the deepest obligations The tact displayed by this officer in his relations with the chiefs and people with whom we were brought into contact calls for my warmest approbation

Major Smith was ably assisted in his important duties by Major R C R Clifford 2nd Punjab Cavalry an excellent and energetic officer of great merit who also acted as my orderly officer during the day

The attentions to the wounded of the Reverend T L J Warneford and the Reverend Father J Allen Roman Catholic Chaplain deserve special mention it affords me much pleasure to bring their services to notice

I would submit for the favorable consideration of His Excellency the Commander in Chief the names of the following officers commanding batteries and regiments whose services have been brought prominently to notice by their respective Brigadier Generals —

Major H deC Warter commanding A B Royal Horse Artillery

Major Sir J W Campbell *Bart* commanding G 4th Royal Artillery

Major J A Tillard commanding No 6 11th Royal Artillery

Major N H Harris commanding No 11 11th Royal Artillery

Lieutenant Colonel C S Maclean C commanding the 1st Punjab Cavalry

Colonel T C Kennedy C B commanding the 2nd Punjab Cavalry

Lieutenant Colonel J J Collins commanding the 2 60th Rifles

Lieutenant Colonel G R Hennessy commanding the 15th Sikhs

Lieutenant Colonel J W Hoggan commanding the 25th Punjab Native Infantry

Lieutenant Colonel J J Boswell commanding the 2nd Sikh Infantry

Colonel H H Lyster V C commanding the 3rd Goorkha Regiment

Lieutenant Colonel A Copland commanding the 19th Punjab Native Infantry

Captain I I Brown R E commanding No 10 Company Sappers and Miners

Lieutenant I Haslett, R E commanding No 4 Company Sappers and Miners

Lieutenant A Davidson 2 60th Rifles, commanding the Lieutenant General's escort

The following officers are also favorably mentioned by Brigadier Generals commanding brigades —

Major M H Nicolson Bombay Infantry Brigade-Major 2nd Infantry Brigade

Lieutenant F Stevenson 19th Bombay Native Infantry Captain L L Bishop 3rd Goorkha Regiment	Orderly officers to Brigadier General Hughes

The gallant behaviour of Lieutenant and Adjutant S Watson 59th Foot and of Sub Lieutenant H M Twynam 59th Foot is brought specially to notice

Major C C Bird 1st Punjab Cavalry Brigade-Major Cavalry Brigade

Lieutenant W E G Forbes 2 60th Rifles Lieutenant A C Batten 2nd Punjab Cavalry Lieutenant C H Lyn R E	Orderly officers to Brigadier General Palliser C B

Field Operations

No. 8L, dated ... 1880

From LIEUT.-GENERAL SIR D. M. STEWART, K.C.B., Commanding ... Ghazni Field Force,

To the Adjutant General in India

On the 22nd April when the force under my command was encamped at Ghazni the presence of an enemy in a position some six miles south east of camp was reported by cavalry patrol and a reconnaissance made.

2. On the return of the reconnoitring party orders were issued for the march of the following troops an hour before daylight on the morning of the 23rd to dislodge the enemy:—

A B R H A ... 11-11th R A ... 2-60th Rifles ... 19th B ... 25th ... 2nd Sikh ... 1st ... Cavalry ... 2nd ... — ... C... R B... ... Brigadier-General ...

3. The movement was carried out as ordered and the enemy were surprised. Brigadier General Palliser however judged the enemy's position to be too strong to attack and reported accordingly by heliograph to Field Force Head Quarters. I then advanced a half battalion of the 59th Foot and six companies of the 3rd Goorkhas to reinforce Brigadier General Palliser; however did not consider himself justified in making the attack with the troops then at his disposal and withdrew to a position on a ridge some 2,500 yards short of the villages of Shalez and Arzu which were held by the enemy. I consequently moved forward with the following troops:—

... Brigadier General ...

the protection of the camp being entrusted to Major ... R.A., who had at his disposal—

...

with the usual standing guards, a half battalion of the ...th Punjab Native Infantry having been detached at daylight to guard the gates of the city.

4. At 11 o'clock I assumed command and the troops were formed for attack, the horse artillery and cavalry with the 1st Infantry Brigade being disposed on the right, from which side the attack on the village of Shalez was delivered,—the remainder of the troops advancing from the left.

5. The advance was ordered at 11-40 and both villages were in our possession at 12-30, the horse artillery and cavalry being pushed forward in pursuit of the enemy.

6. The enemy's loss was estimated at 400 men, the casualties on our side being 2 killed and 8 wounded.

7. I would bring to the favorable notice of His Excellency the Commander-in-Chief the conduct of the troops employed. My thanks are due to Brigadier-General ..., to officers commanding batteries and regiments, and to the officers of the staff, all of whom were present on the occasion.

Return of Killed, Wounded and Missing of Lieutenant-General Sir Donald Stewart's Division at the attack on the Village of Arzu, 23rd April 1880.

No 327 —The Governor General in Council has much pleasure in directing the publication of the following correspondence and despatches regarding the operations of the force under the command of Major General J Ross c b on the 24th 25th and 26th April in the neighbourhood of Shekabad —

Kabul
Field Operations

No 6937 K dated Simla 1st June 1880

From COLONEL ALLEN JOHNSON Secretary to the Government of India Military Department

To the Adjutant General in India

I am directed to acknowledge your letter No 2158A dated the 19th May 1880 forwarding by direction of the Commander in Chief a despatch from Lieutenant General Sir F S Roberts, K C B V C C I E transmitting reports from Major General J Ross, C B detailing the operations of the force under his command on the 24th 25th and 26th April in the neighbourhood of Shekabad

2 The Governor General in Council having read these reports with much interest desires me to express his full concurrence in the Commander in Chief's opinion that the operations and the manner in which they were carried out reflect much credit on Major General Ross and the officers and troops under his command

Kabul

No 2158-A dated Simla 19th May 1880

From MAJOR GENERAL C R GREAVES C B Adjutant General in India

To the Secretary to the Govt of India Military Dept

I have the honor by direction of the Commander in Chief to forward for the information of the Government of India the accompanying despatch from Lieutenant General Sir F S Roberts K C B V C C I E transmitting reports from Major General Ross C B detailing the operations of the force under his command on the 24th 25th and 26th April in the neighbourhood of Shekabad

2 These reports describe in Sir Frederick Haines opinion well organized and well and successfully carried out minor military operations, which reflect much credit on Major General Ross and the officers under his command while the behaviour of the troops engaged leaves nothing to be desired His Excellency has therefore great pleasure in submitting them for the favourable consideration of Government

3 The sketch referred to will be transmitted hereafter

No 1451 dated Kabul, 4th May 1880

From LIEUT GENL SIR F S ROBERTS, K C B V C C I E, Commanding the Kabul Field Force

To the Adjutant General in India.

I have the honor to forward a report from Major General Ross C B commanding the 2nd Division Kabul Field Force detailing the operations of the force under his command on the 24th 25th and 26th instant

I would call attention to the judicious manner in which Lieutenant Colonel Rowcroft and Major Combe respectively carried out the operations entrusted to them on the 25th instant

My acknowledgments are also due to Major General Ross C B

No 2 C dated Camp Saidabad 26th April 1880

From MAJOR GENERAL J ROSS C B Commanding the 2nd Division Kabul Field Force

To the Deputy Adjutant and Quarter Master General, Kabul Field Force

I have the honor to report for the information of the Lieutenant General commanding that on the afternoon of the 24th instant some 200 or 300 horsemen said to be well armed and equipped, debouched from the spurs west of Shekabad and threatened a working party of the Sappers and Miners which was employed near that village, under cover of two companies of the 4th Goorkhas, in improving the road and making it available for heavy guns

2 It was reported to me that they were moving round with the apparent intention of cutting off the retreat of this party to camp so I at once despatched a squadron of the 3rd Bengal Cavalry and a troop of the 9th Lancers under Major B Cracroft 3rd Bengal Cavalry towards Shekabad, followed by a wing of the 23rd Pioneers under Lieutenant Colonel H Collett

On the approach of our cavalry the enemy made off into the hills again and as it was getting late and nothing more could then be done the parties returned to camp

4 During the night numerous camp and beacon fires were observed on the high ridges distant some four or five miles north west of camp

5 Captain J W Ridgeway the Political Officer sent out spies to gain information regarding the assemblage and the following morning reported to me that Abdul Ghafur of Langar and Alam Buland, of Rustam Khel (he who recently fired on Captain the Hon'ble C Dutton Assistant Quarter Master General when out reconnoitring) were the chief instigators of the gathering

6 Early in the morning on the 25th instant groups of men and several standards were visible on the spurs and ridges and later on our piquets were fired upon Captain Ridgeway then got news that the enemy had burnt a Kuchi village the previous evening because the men declined to join them He also got information that several bodies had assembled on the spurs over Shekabad

7 I determined to send out two parties —one* to proceed direct against the enemy occupying the ridges north west of camp and the other† to go *via* the Shekabad road and attack the left of the enemy s position as soon as the direct attack had developed itself

* 2 guns Hazara Mountain Battery, 2 companies 29th Foot, Wing 4th Goorkhas, 1 troop 3rd Bengal Cavalry

† 3 companies 24th P N I, ½ troop 3rd Bengal Cavalry

8 Both columns left camp at about 11 A M the former under the command of Lieutenant Colonel F F Rowcroft 4th Goorkhas and the latter under Major B A Combe Deputy Assistant Quarter Master General who happened to be the senior officer with it

9 Colonel Rowcroft s party got engaged with the enemy at about 11 45 A M and he soon succeeded in driving them from point to point the advance of his skirmishers being covered by a well directed fire from the two guns of the Hazara Mountain Battery

10 The country was steep rugged and difficult and the enemy held on tenaciously to several strong positions but they were eventually turned out by Colonel Rowcroft s able dispositions They then retired to the extreme high point of the ridge and it seemed useless to continue the pursuit

11 During Colonel Rowcroft s advance *tom toming* and beating of drums was heard and bodies of the enemy were seen assembling on a *kotal* at the end of a valley leading up nearly due west from camp and fearing that an attempt might be made to cut off or harass the retreat I sent for a reinforcement of two guns of No 6 8th Royal Artillery and a wing of the 24th Punjab Native Infantry On the arrival of this party about 1 P M I detached two companies to Colonel Rowcroft s support and disposed of the rest across the valley so as to watch the gorge

12 In the meantime the Shekabad party under Major Combe had turned into the hills and attacked the enemy s left and succeeded in driving them back to the higher ridges

13 Brigadier General C J S Gough C B V C who had been watching the movements from camp very judiciously sent two guns of No 6 8th Royal Artillery and the other wing of the 4th Goorkhas on to the high hill lying west of camp (marked "Signal Hill" in the sketch) in order to prevent any advance of the enemy along the ridge leading from the *kotal* towards camp on which several parties had already collected but they were soon dispersed by the fire of the guns from the valley below and from this hill

14 At about 3 P M as the enemy had got beyond range I gave directions for Colonel Rowcroft s force to withdraw its retirement being covered by the parties in the valley and on the ridge By degrees the troops were drawn off not an attempt being made to follow them up or to fire a shot, and by 6 P M all had returned to camp

15 It is difficult to say what number of the enemy there were, but Lieutenant-Colonel Rowcroft estimates the total strength to have been from 1200 to 1500 men, but many of these were never engaged at all, being on peaks and ridges well out of fire

16 The enemy must have suffered severely Colonel Rowcroft's party counted thirty six corpses on the ground and Major Combe s four The latter officer took one wounded man prisoner, and saw some five or six more, whom he left on the ground A number of guns swords, pistols, and one standard were captured and I think the total casualties could not have been less than 150 killed and wounded

17 Our loss was singularly small —one Goorkha only having been killed and four men very slightly wounded

18 I have much pleasure in being able to speak in the highest terms of the able manner in which Lieutenant Colonel Rowcroft carried out the attack and of the steadiness of the men both of the 29th Foot and the 4th Goorkhas who worked intelligently and controlled their fire very well

The fire of the Hazara Mountain Battery guns was excellent and the screw guns made some capital practice at long ranges

Major Combe speaks very highly of the spirited manner in which the 24th Punjab Native Infantry acted throughout the attack

19 Lieutenant Colonel Rowcroft mentions the following officers who accompanied him and gave every assistance —

Captain the Hon ble C Dutton Assistant Quarter Master General

Captain A Broadfoot Hazara Mountain Battery

Major R G Woodthorpe R E Survey Department

Captain J W Ridgeway Political Officer

Major J Hay commanding the wing of the 4th Goorkhas.

Captain C M Stockley commanding the detachment of the 29th Foot

Second Lieutenant J I Govan 29th Foot who shot down a *ghazi* who had killed one of the Goorkhas

Lieutenant H M Sandbach R A Hazara Mountain Battery

Major C W Willock commanding the troop of the 3rd Bengal Cavalry

20 Major Combe Deputy Assistant Quarter Master General who commanded the Shekabad party is deserving of praise for the good judgment he displayed in bringing his force into co operation with the main attack just at the proper time He mentions having received valuable assistance from Captain P H Wallerstein commanding the three companies of the 24th Punjab Native Infantry and also from Lieutenant L J F Bradshaw of the same corps who led the advance company in the attack

---

No C Camp Saidabad 27th April 1880

From MAJOR GENERAL J ROSS C B Commanding the 2nd Division Kabul Field Force

To the Deputy Adjutant and Quarter Master General, Kabul Field Force

In continuation of my letter of the 26th instant I have the honor to report that the signallers on the hill above camp heliographed yesterday morning that the enemy was assembling on the ridges beyond them, and appeared to be advancing

2 I at once sent up two guns of the Hazara Mountain Battery and a wing of the 4th Goorkhas

under Captain E P Mainwaring 4th Goorkhas, to occupy Signal Hill, whilst Brigadier General C J S Gough C B V C, moved out with two guns of No 6 8th Royal Artillery a wing of the 2 9th Foot, and a wing of the 23rd Pioneers round the north side of the hill and up a valley leading off to the west

3 The guns of No 6 8th Royal Artillery in the valley and of the Hazara Mountain Battery on Signal Hill commenced shelling the various points held by the enemy who were very soon dislodged and retired along the ridge bordering the southern side of the valley to the *kotal* at the west end and thence up a very rocky slope to a high peak on the north

From this point they were also shelled and Brigadier General Gough's force advanced without opposition and occupied this high peak also a few shots at long distances only being fired upon him

4 The course taken by his column is marked in the sketch in blue

5 The guns of both No 6 8th Royal Artillery and the Hazara Mountain Battery made splendid practice and the enemy must have suffered considerably as some eight or nine dead bodies and several wounded men were found on the hills

6 The force returned to camp without any opposition and this morning there is no sign of an enemy on the ridges The Political Officer reports that Abdul Gafur has decamped from Langar

---

No 328 — The Right Hon'ble the Viceroy and Governor General in Council has much pleasure in directing the publication in the *Gazette of India* of the correspondence and despatches regarding the operations at Charasiah under the command of Brigadier General H T Macpherson, C B V C and Colonel F H Jenkins, C B, on the 25th April, 1880

Kabul

Field Operations

No 6956 K dated Simla, 3rd June 1880

From COLONEL ALLEN JOHNSON Secretary to the Government of India, Military Dept

To the Adjutant General in India.

I am directed to acknowledge your letter No 2327 A dated the 25th May 1880 forwarding for submission to the Government of India reports describing the operations of the troops under the command of Brigadier General H T Macpherson C B V C and Colonel F H Jenkins C B, A D C at Charasiah, on the 25th April 1880

2 I am to request that you will inform the Commander in Chief that the Governor General in Council entirely concurs with His Excellency as to the excellence of the arrangements made for the defence of his position by Colonel Jenkins and the ability promptitude and judgment in attack displayed by Brigadier General Macpherson

3 The Governor General I am to state shares with Sir Frederick Haines his admiration of the gallantry and steadiness evinced by the troops on this as on all other occasions

Kabul

No 2327 A dated Simla, 25th May 1880

From MAJOR GENERAL C R GREAVES C B Adjutant General in India

To the Secretary to the Govt of India Military Dept

I have the honor by direction of the Commander in Chief to forward for submission to Government the accompanying reports describing the operations of the troops under the command of Brigadier General H T Macpherson C B V C and Colonel F H Jenkins C B, at Charasiah on the 25th April 1880

2 His Excellency concurs with Sir Frederick Roberts as to the excellent arrangements made for the defence of his position by Colonel Jenkins, and as to the ability judgment and promptitude in attack displayed by Brigadier General Macpherson and begs to bring these officers services on this occasion prominently to the notice of Government

3 It is further a source of great gratification to Sir Frederick Haines to refer to the gallantry and steadiness shown by the troops engaged

4 The usual nominal returns of casualties have been called for and these with the sketches referred to in the despatches which are being lithographed will be forwarded hereafter

J I I O [illegible] n

No 151 dated Camp [illegible] Logar Valley 11th May 1880

From L [illegible] G [illegible] SIR F S ROBERTS K C [illegible] V C C I E Commanding C [illegible] K [illegible] l Field Force

To the Adjutant General in India

I have much pleasure in submitting for the information of His Excellency the Commander in Chief the accompanying reports from Brigadier General H T Macpherson C B V C and from Colonel Jenkins, C B A D C to the Queen commanding the Corps of Guides, descriptive of their operations at Charasiah on the 25th of April last

2 I beg to bring to His Excellency's notice the excellent arrangements made by Colonel Jenkins

for the defence of his position when he found the enemy's numbers increasing and the success which attended his efforts to preserve the baggage animals from the long range fire of the enemy

3 The dispositions made by Brigadier General Macpherson C B V C display skill and judgment and the promptitude with which that officer attacked and in conjunction with the troops under Colonel Jenkins C B drove off the enemy with heavy loss to them deserves my cordial acknowledgments It affords me great pleasure to bring the valuable services of Brigadier General Macpherson and Colonel Jenkins to His Excellency's most favorable notice

4 I would also remark on the gallantry and steadiness of the troops engaged and on the excellent spirit they displayed during a long and exhausting day

5 The doubtful attitude of the Kohistanis made it impossible for me to detach permanently from Kabul a force of any considerable strength but as Charasiah could be easily reached from Kabul and as speedy communication by means of the heliograph could be kept up with Colonel Jenkins I considered that his force was amply sufficient to hold its own in case of attack until reinforcements could be despatched and in this decision I was borne out by the circumstances that actually occurred

6 Had I arrived sooner on the ground after the termination of the engagement I should have made the troops bivouac there for the night but finding as I did soon after leaving Sherpur that Brigadier General Macpherson had ordered the tents and baggage of Colonel Jenkins force back to Sherpur and knowing that the troops had had a severe day I considered it expedient to allow them to return Moreover the enemy never ceased their flight until they had reached the further end of the Logar valley and the decisive character of their defeat prevented therefore any impression which otherwise might have arisen that our withdrawal to Sherpur was in any way compulsory

7 The following officers are reported as having done good service on this occasion —

Lieutenant Colonel G H Parker commanding the 92nd Highlanders

Lieutenant Colonel R B P P Campbell commanding the Corps of Guides

Lieutenant Colonel F M Armstrong commanding the 45th Native Infantry

Lieutenant Colonel C Stewart commanding the Cavalry of the Corps of Guides

Major G S White commanding a wing of the 92nd Highlanders

Major G Swinley commanding No 2 Mountain Battery

Major F C Kennedy Deputy Assistant Quarter Master General

Captain L C Singleton 92nd Highlanders

Captain A H Turner 2nd Punjab Infantry Political Officer

Captain P F C Jarvis 67th Regiment Brigade Major

Captain A D McGregor 92nd Highlanders Orderly Officer

Captain W Hill commanding the detachment of the 2nd Goorkhas

Captain M A Alves Royal Engineers

Lieutenant the Hon'ble J S Napier 92nd Highlanders

Lieutenant J H Wodehouse F A, Royal Horse Artillery

Lieutenant S Grant Royal Engineers

Lieutenant E F Ramsay 92nd Highlanders.

Lieutenant C H Manners Smith, Deputy Assistant Quarter Master General

Surgeon J Lewtas, M B Corps of Guides

Surgeon J J Morris, M D 92nd Highlanders

Ressaldar Major Ghúlám Nakshband Khan, late 19th Bengal Lancers Political Officer

Subadar Mahábír Bhist, 2nd Goorkhas

Subadar Shér Singh, Corps of Guides

Dated Kabul 30th April 1880

From BRIG GENL H T MACPHERSON C B., V.C., Comdg 1st Brigade Kabul Field Force,

To the Deputy Adjutant and Quarter Master General, Kabul Field Force

I have the honor to report, for the information of Lieutenant General Sir Frederick Roberts K C B, V C, commanding the Kabul Field Force, that I marched from Sherpur at 9 o clock A M on the 25th instant, to Charasiah, with orders to bring in Colonel Jenkins force which was engaged and if possible to drive off the enemy

2 The troops which marched from Sherpúr under my command are specified in the margin, 104 rifles of the 2nd (Prince of Wales' Own) Goorkhas joined the column at the Bala Hissar under Captain W Hill and subsequently a troop of the 3rd Punjab Cavalry under Lieutenant L S H Baker as well as two screw guns under Lieutenant A J Liddell R A

N M [illegible] Battery 4 guns.
[illegible]
45th [illegible] 635 [illegible]

3 I left two companies of the 45th Sikhs to hold the Sang i Nawishta pass which commands the road to Kabul and on reaching the low ridge which crosses the road at right angles about a mile from its mouth I obtained a good view of the position of the force under Colonel Jenkins I observed that he had struck his camp and was standing on the defensive facing south west, the left and rear of his position protected by some high hills which he had crowned the baggage drawn up at the base of the hill in his rear, and the enemy with whom he was actively engaged, formed in a complete semi circle round him This made me press on

4 When nearing Charasiah, which consists of a number of fortified villages and orchards situated under the high ridge of mountains which separate the Chardeh plain from the Logar valley, I directed Captain Hill 2nd Goorkhas to search the enclosed country that lay between my column and the enemy As it was irrigated land the travelling was almost heart breaking but the little men struggled through, and had got to the fringe of willows as the head of the column reached the open country about one thousand yards from the centre of the position of Colonel Jenkins' force

5 My first order on assuming command was to send their baggage into Sherpur, so as to free all hands for action

6 An examination of the position made me resolve to attack the left horn of the enemy's semi circle (which lay exposed to me from the direction of my advance from Kabul), as, I presumed if I could roll him up on that flank his centre would be completely uncovered

7 At this time Colonel Jenkins met me, and represented that with some assistance, he could make a forward movement

8 As I considered that a counter attack under an officer of Colonel Jenkins' ability would strike with great effect, as soon as my right attack was

developed I ordered three companies of the 45th Sikhs, under Lieutenant Colonel F M Armstrong, to reinforce the left wing of the 92nd Highlanders and the Guides

9 Meanwhile, the four mountain guns, under Major G Swinley, and the head quarters wing of the 92nd Highlanders, under Lieutenant Colonel G H Parker, had been moving forward the former to come into action at about 1100 yards and the 92nd to form in order of attack and prolong to the left of the Goorkhas, who were already engaged

10 The enemy's standards were dotted in considerable numbers over the terraced field that trend south from the forts and orchards already described One of these standards was conspicuous from its central position and gay colours and I sent Captain McGregor 92nd Highlanders my orderly officer to point it out to Captain Hill as his object

11 The two guns of the Royal Horse Artillery under Lieutenant J H Wodehouse and Major Swinley s battery were now making very effective shooting on the enemy The head quarters wing of the 92nd Highlanders had advanced so as to enfilade them and the Goorkhas supported on their extreme right by a detachment of the 45th Sikhs, making good use of the terraces had got within 400 yards of the objective point

12 As the advance was fairly covered by the fire of the artillery and by the fire of the 92nd particularly by volleys from a company under Captain R I Darvall who had taken possession of a large mound I sent Captain R E C Jarvis 67th Regiment Brigade Major to order the Goorkhas (who had been given two minutes rest to recover their wind) to assault the position without firing

13 Captain Hill calling to his men that the General expected the regiment to capture the flag they sprang up with a cheer rushed on pressing the enemy (who now broke), and captured the standard

14 This was the signal for a general falling back of the Afghans A fire however being opened from the orchards these were rushed at once and the enemy after suffering severely, abandoned the whole of the left of their position, making for the hills to the north under the fire of our guns

15 Their centre was now quite exposed and Colonel Jenkins at this juncture delivered the left attack with great spirit, the Guides and the 45th gained the high hill in their front the wing of the 92nd being in the centre of the whole line

16 The afternoon was spent in pursuit The head quarters wing of the 92nd, the 2nd Goorkhas and a detachment of the 45th Sikhs cleared all the hills to the north and west until not a man was visible and the guns of the Royal Horse Artillery and the Guide Cavalry under Lieutenant Colonel Stewart pursued for four miles towards Logar

The whole force reformed on the site of the camp at 4 P M, and marched to Sherpur

17 I wish to testify to the admirable arrangements Colonel Jenkins had made for the protection of his position

That officer mentions particularly the assistance he received from—

- Lieutenant-Colonel F M Armstrong 45th Sikhs
- Lieutenant-Colonel R B P P Campbell Corps of Guides
- Lieutenant-Colonel G Stewart Corps of Guides
- Major G S White 92nd Highlanders
- Captain M A Alves Royal Engineers
- Lieutenant C H Manners Smith Deputy Assistant Quarter Master General

And I beg to express my thanks to—

- Lieutenant Colonel G H Parker 92nd Highlanders
- Major R C Kennedy Deputy Assistant Quarter Master General
- Captain R E C Jarvis 67th Regiment Brigade Major
- Captain A D McGregor 92nd Highlanders Orderly Officer
- Lieutenant S Grant Royal Engineers
- Captain A H Turner Political Officer

18 For some special mark of honor I would bring to favorable notice Captain I C Singleton 92nd Highlanders and Captain W Hill 2nd Goorkhas Both these officers commanded the first line of their respective regiments and led the attack in a most determined manner in storming the orchards

19 Lieutenant Colonel Parker makes favorable mention of Lieutenant I I Ramsay for his conduct in bursting open the doorway of a house in which a number of the enemy had taken refuge and were preparing to make a stand He relates the circumstance in the following terms —

* * * "A party of the enemy who had been firing at them were seen to enter a building and on Lieutenant Ramsay s rushing up he found the place locked He immediately ordered one of his party to blow the lock off by discharging his rifle into it which was done and forcing an entrance they killed six of the enemy

Lieutenant Colonel Parker further brings to notice the name of Lieutenant and Adjutant C W H Douglas who he states was most energetic throughout the whole of the operations

I beg also to submit the following extract from Captain Hill s report —

* * * *

"One man however was making good his escape when Subadar Mahabir Bhist (in spite of his thirty four years service) pursued the man and after racing for about 300 yards came up with him and in a hand to hand conflict cut him down with his sword I would beg to bring the gallant conduct of the Subadar to the favorable notice of the Brigadier and also to mention that throughout the day Subadar Mahabir Bhist was as untiring in his careful handling of his men as he was forward and gallant whenever opportunity offered

With reference to the above I would bring the name of Subadar Mahabir Bhist specially to the notice of the Lieutenant General for favorable consideration

20 I enclose a report from Colonel Jenkins and other documents which are enumerated in the accompanying schedule

The enemy's loss in killed is estimated at 200 Native reports add 50 to this Their strength was from 4,000 to 5,000

No 194, dated Sherpur 28th April 1880

From COLONEL F H JENKINS C B Aide de Camp to the Queen Commanding a Column

To the Assistant Adjutant General 1st Division Kabul Field Force

I have the honor to submit, for the information of Lieutenant General Sir F S Roberts K C B, V C, commanding the Kabul Field Force the following report of the operations of the column which marched from Sherpur on the afternoon of the 20th instant towards Logar

	BRITISH			NATIVE		
	Officers	Non-commissioned officers and men	Total	Officers	Non-commissioned officers and men	Total
F A Royal Horse Artillery	1	41	42			
92nd Highlanders	9	266	75			
Guides Cavalry	4		4	8	251	259
Infantry	7		7	14	600	614
TOTAL	21	307	328	22	871	873

2 The first march was to a place about a mile beyond Bini Shahr and on the 21st we went on past Charasiah and encamped near the village of Chihildaktaran

3 On my arrival at this place I learnt that the news of our advance had reached Muhammad Hasan Khan the ex Governor of Jellalabad who had started with a force of about two thousand men to attack Major General Ross' column and that he had returned and was then at Muhammad Agha or Kuti Khel two villages about twelve miles ahead of us on the Logar road

4 On the 22nd the column halted and I sent Lieutenant Colonel G Stewart with a party of the Guides Cavalry round by the village of Musai and on to the Logar road A picquet of the enemy on the Sum i Daldal Kotal was seen by this party and also by our infantry picquets posted on a high hill about a mile south east of camp Jabar Khan the headman of Gamrán also sent me word that Muhammad Hasan Khan was collecting men to oppose our advance

5 I sent a messenger across the hills to Major General Ross and endeavoured but without success, to establish heliographic communication with his column

6 On the 23rd and 24th the column remained halted About 2 A M on the 25th I got a letter from the headman of Gamrán saying that the enemy had advanced as far as Safed Sang but that they were not going to attack us that night I sent this letter into Sherpur and requested Lieutenant Colonel R B P P Campbell to get the Infantry of the Guides which was nearest the hill under arms I also sent a party of the Guides Cavalry down the Logar road

7 When the day broke we saw the enemy advancing over the hill on our left flank and also coming from the Aubazak villages beyond Chihildaktaran, so as to threaten our right flank at the same time the party of Guides Cavalry in our front became engaged with men coming down the Logar road and retired slowly before them

8 I ordered the tents to be struck and the baggage, under Lieutenant C G Robertson 8th Foot of the Transport Department, to retire under the shelter of a small hill in rear of the camp On this hill I placed half a company of the Highlanders and a company of the Guides under Lieutenant R B Adams,—the whole being under the command of Lieutenant the Hon'ble J S Napier of the 92nd

9 A small ruined fort to the west of this hill was occupied by twenty of the Guides under Lieutenant M C Cooke Collis and in another small fort on our right flank I placed a similar party of the Guides under Subadar Shér Singh Sheltered behind this fort was a troop of the Guides Cavalry under Lieutenant G K Daly

10 In the meantime Major White had extended two companies of the 92nd under Captain P I Robertson to cover his front in line with two companies of the Guides under Captain F D Battye while three companies of the Guides, under Captain A G Hammond, covered the left flank These dispositions were carried out without hurry or confusion

11 The enemy seemed at first to be about three thousand in number but reinforcements reached them during the day They attacked our front and both flanks simultaneously and commenced an effective fire from Martini rifles Sniders and Enfields which was replied to by our men while the two guns of F A Royal Horse Artillery, under Lieutenant J H Wodehouse came into action And I take this opportunity of saying that their fire was very steady and well aimed and that the conduct of that officer and of the non commissioned officers and men under his command was such as to reflect credit on the battery to which they belong

12 As soon as the sun got high enough I sent a heliogram to the station on the Shahr Darwaza to say that I was attacked and was told in reply that a reinforcement under Brigadier General Macpherson had started from Sherpur

13 About eight o'clock finding that the artillery horses were getting hit I ordered the guns to retire about 400 yards but I was compelled to keep the Guides Cavalry exposed to fire all day, because I had only a very small reserve of infantry to meet a sudden rush against our position

14 This state of things continued all the morning The enemy brought their standards up to within one and two hundred yards of our men on the front and right but could not be induced by their leaders to make an effective charge

15 About half past one I saw the skirmishers of Brigadier General Macpherson's force coming up between us and Charasiah I went to the General and after pointing out the position of the enemy to him said that if I could have a few companies to support the Guides, I could clear the front and left of our position

16 The General ordered Lieutenant Colonel F M Armstrong with three companies of the 45th Sikhs to join our force

17 As soon as Brigadier General Macpherson's skirmishers came up abreast of us our line advanced and drove the enemy right off the ground In ascending the steep hill to the left, the Guides came under the fire of some of the enemy posted in rocky ground on their left flank

Lieutenant Colonel Armstrong therefore, inclined to his left and cleared this part of the hill I am greatly indebted to him and the fine regiment he commands for the assistance afforded us

18 Directly the line moved forward, the Guides Cavalry under Lieutenant-Colonel Stewart, supported by the two guns of F A, Royal Horse Artillery advanced and pursued the enemy nearly up to the Sum i Daldal Kotal, the cavalry cutting down those who fled by the plain, while the guns made excellent practice at parties of men who were being driven over the top of the hill by the infantry

19 I beg to bring Lieutenant Colonel Stewart to the favorable notice of the Lieutenant General He showed great ability during the engagement, and his knowledge of the language and the country were most useful during the whole time the column was out

20 No enemy remained in sight at 4 P M and the force returned to Sherpur under Brigadier General Macpherson s orders

21 The Lieutenant General will see from the enclosed returns that scarcely any damage fell on the camp followers and transport animals and that the enemy gained no advantage over us at any time I wish to acknowledge that this is due to the excellent conduct of the troops and to express my thanks to Lieutenant-Colonel R B P P Campbell who commanded the Corps of Guides, and to Major G S White who commanded the half battalion of the 92nd Highlanders

22 I enclose a sketch of the country by Lieutenant C H Manners Smith Deputy Assistant Quarter Master General with the column to whom I am much indebted, as I am also to Captain M A Alves, Royal Engineers

23 The loss of the enemy was severe There were twenty five bodies lying in one place close to the front of our position, others were found scattered about the hills and the cavalry killed twenty nine on the plain beyond As the fighting lasted some time many of the dead and wounded had been carried off before we advanced but two badly wounded men were brought back to Kabul where they are now under treatment in the dispensary, and others were left to the care of the villagers

24 The wounds received by our men were generally severe being principally from Martinis and Sniders I fear that several of the wounded will die in spite of the great attention paid to them by Surgeon J Lewtas of the Guides and Surgeon J J Morris of the 92nd Highlanders

25 I ought not to close this report without mentioning the name of Ressaldar Major Ghulam Naksband Khan, Sirdar Bahadur who was sent with the column as a political officer and rendered most valuable service

I

PUBLIC WORKS DEPARTMENT

NOTIFICATIONS

Simla, the 4th June 1880

No 169 —*Resolution*—By the Government of India Public Works Department, No 1174G, dated Simla the 4th June 1880

Read again—

Resolution in the Public Works Department, No 303G dated 30th January 1880

Resolution —In the Resolution now read again, it was decided to abolish temporary promotions in the Engineer Establishment from grade to grade within a class These promotions involved no

change of duty or increase of responsibility The sole object of their being made was the improvement of the pay of officers But in practice it has been found impossible in some Administrations to regulate their publication and notification with promptitude and cases have occurred in which officers have been called upon to refund large sums of money These and other objections render the abolition of temporary promotion imperative except from class to class

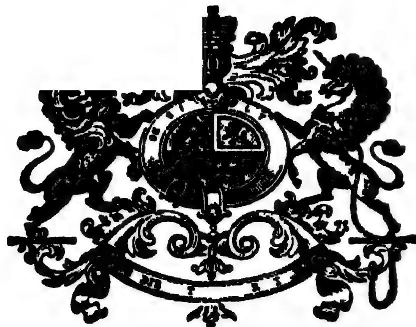
In sanctioning the measure however it was not the intention of the Governor General in Council to retard promotion permanently or to injure the pecuniary prospects of the officers affected In order, therefore to restore promotion to the former standard, but on a more satisfactory basis the Governor General in Council is pleased to decide subject to the approval of the Secretary of State that an addition shall be made to the permanent number of officers in each of the higher grades of Executive Engineers and the 1st Grade of Assistant Engineers so as to allow of the promotion of a number of officers from the junior grades of those classes corresponding to the normal number of officers on furlough The numbers to be added in the several lists to the grades indicated will be published in a separate order

Order —Ordered that this Resolution be published in the *Gazette of India* for general information

No 170 —Captain W A J Wallace R E Executive Engineer 1st Grade Engineer in Chief and Manager Northern Bengal State Railway is transferred to the Revenue Establishment of State Railways in Class I grade 3, with effect from the 16th November 1879

No 171 —Captain W S S Bissett R E, Class II of the Revenue Establishment of State Railways is promoted to Class I grade 3, with effect from the 1st January 1880 and confirmed in his appointment as Manager, Rajputana State Railway *vice* Captain F Firebrace R E appointed Under Secretary to the Government of India in the Public Works Department

No 172 —Mr H Dangerfield, Class II of the Revenue Establishment of State Railways, is confirmed in his appointment as Manager of the Holkar and Sindia Neemuch Railways *vice* Captain W S S Bissett R.E, appointed to the Rajputana State Railway



No 173 —Mr H M Mathews Superintending Engineer 3rd Grade temporary rank Engineer in Chief and *ex officio* Manager of the Rangoon and Irrawaddy Valley State Railway is transferred to Class I grade 3 of the Revenue Establishment of State Railways, with effect from the 1st November 1879

No 174 —With reference to Public Works Department Notification No 265 of 18th June 1879 published in the *Gazette of India* of the 21st idem sanctioning in accordance with section 4 of the Indian Railway Act of 1879 the use of locomotive engines or other motive power and carriages and waggons to be drawn or propelled thereby on certain Railways the Governor General in Council is pleased to sanction the extension of the provisions of that Notification to the Railway belonging to the Commissioners for making improvements in the Port of Calcutta

No 175 —To fill vacancies existing in the Engineer Establishment of the Public Works Department Railway Branch the following promotions are made —

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[The publication]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 21st May, 1880 and is hereby promulgated for general information —

ACT No X OF 1880

An Act to declare the law in force in certain lands annexed to the Multan District

Preamble.

WHEREAS the lands occupied by the Indus Valley State Railway and the works, premises and stations thereof, within the limits of the Baháwalpur State which have been ceded to the British Government in full sovereignty by that State have been declared by the Governor General in Council to be subject to the Lieutenant Governorship of the Panjab and have by the Lieutenant Governor of the Panjab been annexed to the Multan District,

and whereas it is expedient that the law in force in the said lands should be the same as the law in force in the Multán District It is hereby enacted as follows —

Enactments in force in Multan District to apply.

1 All enactments which on the second day of September 1879 were in force in the Multán District and not in the said lands shall be deemed to have come into force in the said lands on that day

PART V

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[First publication]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 31st May, 1880, and was referred to a Select Committee —

No 8 of 1880

A Bill to exempt certain persons and property from Municipal taxation

Preamble

WHEREAS it is expedient to empower the Governor General in Council to exempt from taxation certain persons and property in municipalities, It is hereby enacted as follows —

Power to exempt from taxation.

1 Notwithstanding anything contained in any enactment for the time being in force the Governor General in Council may by an order in writing prohibit the levy by a Municipal Committee of any tax—

(a) on any person subject to the Army Discipline and Regulation Act, 1879 or the Indian Articles of War or

(b) on any property of Her Majesty

The Governor General in Council may by a like order rescind any such prohibition

"Municipal Committee" defined.

2 In this Act 'Municipal Committee" includes a Municipal Corporation or a body of Municipal Commissioners constituted by or under the provisions of any enactment for the time being in force

STATEMENT OF OBJECTS AND REASONS

BY the twenty fourth section of the Cantonments Act 1880 the Governor General in Council is empowered to prohibit the levy of any tax in a cantonment or to exempt any person or class of persons from the operation of any tax leviable there

2 This power was conferred chiefly with a view to the exemption of military men in cantonments situate within the limits of municipalities from certain descriptions of municipal taxation There are however cases in which owing to the want of accommodation in cantonments or to some other cause military men are compelled to reside within the limits of a municipality but out of cantonments In such cases the power in question is inapplicable and it was accordingly proposed by the Select Committee on the Cantonment Bill that the defect should be supplied by a provision to be inserted in the Bill for the control of Municipal taxation for the introduction of which leave had then been granted

3 As however that Bill is not at present to be proceeded with it has been thought desirable to make the necessary provisions in a separate Bill and the present Bill has accordingly been prepared for this purpose

4 The Bill also provides for the exemption of Government property from municipal taxation, recent experience having shown such a power to be necessary

The Hon'ble Rivers Thompson C S I

Major General the Hon'ble A Fraser, C B, R E

The Hon'ble J Gibbs C S I

The Hon'ble Saiyad Ahmad Khan, Bahadur, C S I

The Hon'ble B W Colvin

The Hon'ble C Grant

His Highness Ragbir Singh, G C S I, C I E, Rajá of Jheend

NEW MEMBER

His Highness RAJA RAGBIR SINGH took his seat as an Additional Member

EXEMPTION FROM MUNICIPAL TAXATION BILL

The Hon'ble MR GRANT introduced the Bill to exempt certain persons and property from municipal taxation and moved that it be referred to a Select Committee, consisting of the Hon'ble Sir E Johnson, the Hon'ble Messrs Gibbs and Colvin and the Mover He said that at the last meeting of the Council, in asking for leave to introduce the Bill he explained that it had been found necessary to insert in the Cantonment Act lately passed, No III of 1880, a section empowering the Governor General in Council to exempt certain persons or classes of persons and property from municipal taxation in military cantonments Those powers had been taken in order to protect military officers and men from certain forms of taxation such as taxes on salaries and professions, which in their case were thought inappropriate, and to prevent municipalities from raising income at the public expense by taxing Government property In order to carry out those objects a notification was issued by the Governor General which he would read to the Council as it would show the nature of the proceedings which might be taken under the present Bill It was as follows —

" In exercise of the power conferred by section 24 of Act No III of 1880 (The Cantonments Act), the Governor General in Council is pleased to declare that in any cantonment situated in British India which may have been or may in future be brought under the operation of a Municipal Act the following classes of persons shall, when on duty in such cantonment, be exempted from the operation of taxes of the following kinds (namely) —

" *Classes of persons to be exempted*

(*a*) Regimental officers non commissioned officers and soldiers, medical or veterinary officers, and warrant officers on military duty

(*b*) Royal Engineers in the Public Works Department

(*c*) Officers of the Staff Corps and Indian Army and warrant officers of the Army employed in the Military Branch of the Public Works Department

A

(d) Officers and warrant officers of the Army staff and of Army departments, such as the Commissariat, Ordnance or Pay Department

"*Taxes from the operation of which exemption is granted*

(1) Municipal taxes on salaries

(2) Municipal taxes on professions trades, callings, offices or appointments

(3) Municipal taxes on horses, mules or ponies kept for military duty

(4) Municipal, ferry or road tolls on animals or vehicles kept or used for military duty

"2 In further exercise of the power conferred by the same section the Governor General in Council is pleased to prohibit the levy in any cantonment in British India of any municipal tax whatsoever on public property animals or vehicles

"3 In this order the expressions 'municipal tax' 'municipal taxes' and 'municipal tolls' include any tax or toll imposed by virtue of the provisions of a Municipal Act under the operation of which any cantonment may have been or may in future be brought"

The interests of military officers and men and public property in cantonments, having been thus guarded it became necessary for the sake of fairness and uniformity, to extend similar immunities to military officers and men obliged to live outside cantonments, and to protect public property wherever it might be found within municipal limits It was with those objects that the present Bill had been drawn, and the measure was of so simple a character, that it required no detailed exposition

The Motion was put and agreed to

The Hon'ble Mr Grant moved that the Bill be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit

The Motion was put and agreed to

VACCINATION BILL

The Hon'ble Sayyad Ahmad Khan moved that the Hon'ble Mr Gibbs be added to the Select Committee on the Bill for giving power to prohibit inoculation and to make the vaccination of children in certain municipalities and cantonments compulsory

The Motion was put and agreed to

The Council adjourned *sine die*

Simla, The 31st May, 1880

GOVERNMENT OF INDIA

DEPARTMENT OF FINANCE AND COMMERCE

REPORT OF THE OPERATION OF THE POST OFFICE OF INDIA FOR THE YEAR 1878 79

Extract from the Proceedings of the Government of India, Department of Finance and Commerce —No 980 (Separate Revenue—Post Office), dated 5th June 1880

Read—

Report of the operation of the Post Office of India for the year 1878 79

RESOLUTION —The administration of the Post Office during the year was successful, and a steady rate of progress was maintained The charges for the carriage of books and patterns and for insurance of inland parcels and letters, and the extra charges for insufficiently paid parcels were reduced, a system of granting certificates of posting of unregistered articles at a charge of half an anna was also introduced

The effect of the abolition of the charge for redirection postage, and of the introduction of the insurance and value payable systems, was not fully felt till the year 1878 79 The first resulted, as was anticipated, in a considerable loss of revenue which was fully compensated by the gain in administrative *efficiency* and public convenience

The insurance system is evidently appreciated, the total value of the articles insured during the fifteen months of its existence being Rs 3 96,19 505, with a total of fees collected of Rs 1 36 786 while only Rs 25 092 were paid as compensation for the loss of insured articles The value payable system is not as yet largely employed by the public, but its use is steadily increasing

Certain reforms decided on by the Universal Postal Union in the course of the year came into operation only with the commencement of the year 1879 80

The war in Afghanistan caused a sudden strain on the resources of the Department but notwithstanding special difficulties arising out of the exceptional demand for cattle and the occurrence of disease among both horned cattle and horses the arrangements for the conveyance of correspondence to the front were, on the whole satisfactory

The number of post offices increased by 285, of letter boxes by 323, and of village postmen by 131

Covers carried by the Post Office increased by 2 39 per cent but newspapers decreased by 6 57 per cent This decrease must be viewed in connection with the increase of 11 33 per cent in the previous year—an abnormally large increase, for which special reasons existed in the interest in European news connected with the Russo Turkish war, and in the famines in Madras and Bombay The number of newspapers carried is still considerably in excess of that given for 1876 77

The operations of the Dead Letter Office were satisfactory for though about the same proportion of covers passed through that office as in the previous year, a smaller proportion remained finally undisposed of

The net revenue from the Foreign Parcel Post again showed an increase from Rs 97,277 to Rs 1,09,717 The rapid development of this branch of the parcel traffic is indicated by the following figures, extracted from paragraph 35 of the Report —

Years	No of parcels
1873 74	21,923
1874 75	25 563
1875 76	35,819
1876 77	45 325
1877 78	59 095
1878 79	69,534

The exchange of letters with the United Kingdom has increased by 5 9 per cent, and of newspapers by 3 5 per cent, while that of books and patterns has decreased by 12 5 per cent This decrease is accounted for partly by the increased use of the parcel post for the conveyance of books, and partly on the assumption of a depression of trade either in books or patterns, or both

The proportion of revenue collected in cash continues to decrease, the extended use of the embossed half anna envelopes as exhibited in the following table, having contributed materially to this result —

Years	No of half anna envelopes	Value Rs
1872 73	99 391	3,106
1873 74	2 613 195	81 662
1874 75	5 804 140	1 81 380
1875 76	11,046 066	3,45,190
1876 77	17,915 653	5 59 864
1877 78	25 163 257	7 86 352
1878 79	30 872 300	9,64 759

The demand for these envelopes will, if the present rate of increase continues, soon exceed the maximum annual supply of 35 712 000 envelopes for which the present contract with Messrs De La Rue & Co provides

The financial results, though contrasting unfavorably with those of the previous year, are not unsatisfactory the net revenue after deducting postal expenditure proper, is Rs 12 63 563, or after deducting other expenditure which, though not charged in the postal accounts is fairly debitable to the Post Office Rs 1 27 898 The reduced surplus is mainly due to the reductions of postage and the abolition of reduction charges

The following statement extracted from paragraph 78, exhibits in an interesting manner the general progress of the operations of the Post Office —

Year	Comparison of number of letters and newspapers those of 1855 56 being represented by 100	Comparison of revenue for corresponding years, that of 1855 56 being represented by 100	Comparison of expenditure that of 1855 56 being represented by 100
1855 56	100	100	100
1867 68	207	237	161
1870 71	257	235	175
1873 74	328	284	184
1876 77	368	345	196
1877 78	387	378	206
1878 79	394	390	222

The thanks of the Government of India are again due to Mr Monteath for his able administration of the Department The officers of the Department mentioned* in paragraphs 79 to 81 have also earned the approval of Government by their loyal and zealous services in connection with the war in Afghanistán, or in other special directions

* Colonel W M Lane Mr S S Sullen Mr F Hodgkinson Mr F J Jordan Mr T H Cornwall Mr C Lawler Mr W T Van Someren Mr I Sheridan Mr W A Sutherland Mr C Codburn Mr C W Creswell Mr Dinshaw Jijibhai and Pundit Sundar Lal.

Ordered that this Resolution be communicated to the Director General of the Post Office of India, and that the Report and the Resolution be published in the Supplement to the *Gazette of India*

ANNUAL REPORT

ON THE

OPERATIONS OF THE POST OFFICE OF INDIA

FOR THE YEAR

1878-79.

No 11573 dated 30th March 1880

From—A M Monteath Esq *Director General of the Post Office of India*,

To—The Secretary to the Government of India Department of Finance

I have the honor to submit the Annual Report on the Operations of the Post Office of India during the year 1878 79

GENERAL POSTAL UNION

2 Six more countries were admitted into the General Postal Union during the year, as shewn in the list below —

Countries belonging to the General Postal Union on the 1st April 1878

Great Britain	Russia	Spanish Colonies in—
Germany	Servia	America and
Austria	Sweden	Oceania
Hungary	Switzerland	Dutch Colonies in—
Belgium	Turkey	America and
Denmark	British India	Asia
Egypt	French Colonies	Portuguese Colonies in—
Spain	British Colonies including—	Asia
United States of America	Trinidad	Africa and
France	Bermuda	Oceania
Greece	Jamaica	Danish Colonies in—
Italy	Guiana	America.
Luxembourg	Ceylon	Brazil
Norway	Straits Settlements	Japan
Holland	Labuan	Persia.
Portugal	Mauritius	
Roumania	Hongkong	

Countries admitted to the General Postal Union during the year

Argentine Republic	Canada	Newfoundland
British Honduras	Falkland Isles	West Coast of Africa.

3 The General Postal Union now comprises nearly all the principal countries in the world the only important exceptions being the British Colonies of Australasia and South Africa

4 A new international postal treaty termed the Convention of Paris was signed on the 1st of June 1878 whereby the Postal Union was continued for an indefinite period with provision for an international Congress at least every five years The next Congress was fixed to be held at Lisbon in 1884

5 The new convention, although signed as above stated during the year under report did not come into actual operation till the commencement of the following year (1st April 1879) but this is perhaps the best opportunity of referring to such of its provisions as involved changes of public interest These may be enumerated as follows —

(1) The introduction of international post-cards, which before was optional, was made compulsory

(2) The rates of postage were fixed on standards somewhat lower than those previously existing the result being a reduction of the Indian rates as shewn below

		Former rates	Revised rates from 1st April 1879.
Viâ Southampton	Letters	5 annas per half ounce	3 annas per half ounce
	Newspapers	1 anna per 4 ozs	1 anna per 4 ozs
	Books &c	1½ annas per 2 „	1 2 „
Viâ Brindisi	Letters	6 annas per ½ oz	5 annas per ½ oz
	Newspapers	2 4 ozs	2 , 4 ozs
	Books &c	2½ 2	2 2

(3) The limit of weight of books &c, was raised from 1 kilogramme (2lbs 3 ozs) to 2 kilogrammes (4lbs 6 ozs)

(4) Insufficiently paid articles other than letters were allowed to pass under conditions of taxation similar to those in force for letters

(5) The name was changed from that of General Postal Union to that of Universal Postal Union

SEA COMMUNICATION WITH EUROPE

6 Although the sea communication with Europe is not part of the Indian Inland Post to which this report refers, it is usual to give here some information respecting its cost All the sea postage collected by India is handed over to the British Post Office and, when this as well as the British collections have been deducted from the total cost of the service, the balance or net cost is charged in equal shares upon Great Britain and India The actual payments are made on estimate before the accounts are completed, but in the figures given below (up to 1876 77) there have been entered instead the adjusted amounts, i e, the amounts found ultimately to be properly debitable to each year

	£	
1869 70	73 110	Adjusted amounts as explained above The increase in 1876 77 and following years was caused by the reduction of postage carried out on 1st July 1876 when India entered the Union.
1870 71	69 150	
1871 72	68 110	
1872-73	61 072	
1873 74	54 770	
1874-75	57 170	
1875 76	63 125	
1876 77	66 685	
1877 78	70 000	The adjustments for these years have not been received from London The amounts shewn are estimated.
1878 79	70 000	

7 There were no instances of material delay in the arrival of the European mails In fact, the delays beyond contract time were altogether only four in number as shewn on the margin

Name of the Vessel.	Due date and hour for arrival at Bombay	Actual date and hour of arrival at Bombay	Number of hours late H.	M
Mongolia	14th November 1878 6 P M	15th November 1878 5-55 A M	11	55
Malwa	19th December 1878 6 P M	19th December 1878, 7-45 P M	1	45
Hydaspes	26th December 1878 6 P M	27th December 1878 7-50 A M	13	50
Bangalore	9th January 1879 6 P M	9th January 1879 10-25 P M	4	25

LOCAL STEAM SERVICES

8 The changes made during the year in the Local Steam Services have been made the subject of remarks opposite the entries affected thereby in the following statement —

By the British India Steam Navigation Company

(1) Fortnightly communication between Calcutta and Kyouk Phyoo *viâ* Chittagong, and Akyab with a four weekly extension to Sand way during the fair season

(2) Fortnightly communication between Calcutta and Rangoon *viâ* Akyab

(3) Weekly communication between Calcutta, Rangoon and Moulmein

(4) Four weekly communication between Calcutta Singapore and intermediate ports

(5) Fortnightly communication between Moulmein and Singapore *viâ* Penang and Malacca

(6) Fortnightly communication between Madras Rangoon and intermediate ports on the north east coast

(7) Weekly communication between Calcutta and Bombay touching at intermediate ports on the Coromandel and Malabar Coasts

(8) Semi weekly communication between Bombay and Karachi with a weekly continuation to the Persian Gulf

(9) Four weekly communication between Aden and Karachi

Nos 1 to 9 are under the control of the Post Office by which a subsidy of Rs 7 25 000 per annum is paid

No 5 was changed from January 1879 into a weekly service the additional trips being performed by the Company on its own account and not under contract

No 6 was changed under like conditions from April 1878 into a weekly service

No 9 was also changed under like conditions into a fortnightly service, but after a trial of five months the change was abandoned

(10) Four weekly communication between Calcutta and Port Blair, with extensions to Camorta and Rangoon.	No 10 is under the control of the Military Department, the consideration given being not in the form of subsidy but of guaranteed rates for the transport of Government stores

By other Agencies

(11) By the Irrawaddy Flotilla Company a weekly communication between Rangoon Mandalay and intermediate ports with a monthly extension to Bhamo, the subsidy being Rs 5 000 per mensem (12) By the Irrawaddy Flotilla Company a semi weekly communication between Rangoon and Bassein on a monthly subsidy of Rs 1 500. (13.) By the Burmese Steam Tug Company a fortnightly communication between Moulmein Tavoy and Mergui on a monthly subsidy of Rs 1,500	Nos 11 to 13 are under the control of the Chief Commissioner of British Burmah, the Post Office contributing a portion (Rs 500 per mensem) of the subsidy for No 12 No 11 was made the subject of a new contract but without any material change in the service
(14.) By Jardine Matheson & Co (of Hongkong) and Apcar & Co (of Calcutta) a monthly communication between Calcutta the Straits and Hongkong, the dates of departure being regulated primarily with reference to the Calcutta opium sales	No subsidy for No 14
(15) By the Euphrates and Tigris Steam Navigation Company a communication thrice a month between Bussah and Bagdad	No 15 is under the control of Her Majesty's Secretary of State for India the subsidy is £300 per mensem

The small service maintained by the Government of Ceylon, between Point Calimere on the Indian side and Kankesanturai on the Ceylon side was also continued

9 The Sea Services maintained by the British India Steam Navigation Company were performed with substantial regularity except on the Bombay and Calcutta line The contract allows considerable latitude in the way of stoppage at intermediate ports on that line, which is not one of those maintained primarily for postal requirements the time table accordingly shews not the contract time but the anticipated average duration of each voyage, and the deviations from the time table in the current year did not go beyond what was allowable under the contract

CHANGES OF INLAND RATES OF POSTAGE.

10 The changes of inland rates of postage carried out in the latter part of last year included the important measure of abolishing re direction postage and reference is made to it again in this year's report because it is the first year in which the full financial effect of that measure was felt Other changes were made during the year under report of which the following are the chief *viz* —

1 A reduction of the rate chargeable on books and patterns from 1 anna to ½ anna for 10 tolas articles other than books and patterns being excluded from the list of allowable contents	With effect from the 1st April 1878
2 Insufficiently paid packets formerly charged at letter or parcel rates were made chargeable with only double of the deficiency	Ditto ditto.
3. Certificates of posting granted for unregistered articles at a charge of ½ anna each	Ditto ditto
4 Reduction of insurance rates from one half to one quarter per cent	With effect from the 1st August 1878

11 The first of these measures involved a considerable sacrifice of revenue both on private and official correspondence The Calcutta Trades Association subsequently urged a reduction of the minimum parcel rate to provide cheap transit by post for the small articles of merchandize which formerly enjoyed the same privilege as books and patterns but it has not as yet been deemed advisable by the Government to admit a further reduction of revenue

12 The reduction of the insurance rates was the result of the first six months' experience of the system of insuring inland parcels and letters This important additional postal facility will form the subject of remarks in a separate section of this report (see paragraphs 52 to 56)

IMPORTATION OF DUTIABLE ARTICLES BY POST

13 The extent to which the practice of importing dutiable articles by post had grown having been brought to the notice of the Government of India an order was issued under date the 7th March 1879, directing the strict enforcement of the clauses of the Indian Post Office Act applicable thereto In the Bombay Post Office fifty one letters were challenged and made over to the Custom House Authorities, of which forty one were found to contain dutiable articles

CREATION OF A NEW POSTAL CIRCLE FOR EASTERN BENGAL

14 Intimation was given in the report of the previous year of the formation of the province of Behar into a separate postal circle and it has now to be added that Eastern Bengal, with Dacca as its centre was formed into a separate Circle during the year under report When the postal operations in a province become too much for the personal supervision of the officer in direct administrative control, it is the custom in this Department not to supplement his staff but to lessen his jurisdiction, and hence it is that record is made from

time to time of the fact of the creation of a new postal Circle Even with the transfer in late years of Assam, Behar and Eastern Bengal from the control of the Post Master General of Bengal the Bengal Circle still holds the foremost place, as respects amount of work, among the postal Circles in India

OTHER DEPARTMENTAL CHANGES

15 During the year under report an important revision was made of the staff of Postal Inspectors with the view of meeting the increased demands resulting from the ever growing number of post offices and amount of correspondence The opportunity of a favourable financial position (as shewn in the previous year's report) was also taken of increasing the number of Railway Parcel Sorting Offices The sorting of letters and newspapers is performed on almost all Railway lines in travelling offices but for parcels it would be impossible to make similar provision without great expense and hence it becomes necessary to select convenient places on the main lines where parcels can be stopped in transit for the purpose of being sorted The constant extension of the railway system makes it necessary from time to time to revise the arrangements for such work and this was done during the year under report

There was also an extensive revision of departmental system with the object of reducing labor Besides the ordinary growth of correspondence new work in the way of insurance, &c, had been undertaken and the opportunity was availed of for carrying out various important measures of the character above described Such changes always involve trouble and expense at first, in the provision of revised forms and other working material

POSTAL ARRANGEMENTS FOR INDIAN TROOPS DESPATCHED TO MALTA AND CYPRUS

16 The despatch of Indian troops to Malta, and ultimately to Cyprus in the summer of 1878 involved the organization of special postal arrangements for the despatch and delivery of mails and this was successfully done by the despatch with the expeditionary force of a fully equipped postal establishment

AFGHAN WAR

17 The war which broke out in November 1878 with the Ameer of Cabul caused a sudden strain upon the Postal Department not only beyond but within, the limits of its ordinary operations

18 It was called upon to make emergent provision for a large increase of the Goods and Passenger Services between Jhelum and Peshawar as well as to create new services of a similar kind between Rawalpindi and Thull These operations were rendered especially difficult by the enormous demand which sprang up on all sides for draught cattle of every description and still more so by the sudden appearance of rinderpest among the bullocks carrying off some 300 head actually on the line besides diminishing the supply in the adjoining districts Glanders also broke out among the horses spreading rapidly over the whole line and necessitating summary preventive measures in the way of destroying all affected animals

19 The trans frontier operations were also extensive

20 Beyond Peshawar a horsed line of communication was opened to Daka Jalalabad and then as the camp advanced to Gundamak After the first week or two the working of this line was quite satisfactory

21 In the Kurram Valley arrangements were made for maintaining communication between Thall and Ali Kheyl by means of a horse post These arrangements were from the first satisfactory

22 But the most serious part of the operations was in the direction of Beloochistan A horsed tonga service was established from Sukkur to Jacobabad but beyond that point all the way to Quetta and Kandahar the Department had to rely entirely on the Political Authorities Even the horsemen of the Belooch Guides who had formerly carried the mails between Jacobabad and Quetta could no longer be spared for that service It was months before this part of the service could be got into anything like order and that only by the strenuous efforts of the Political and Military authorities combined

23 Special arrangements had also to be made on the Railway lines for disposing of correspondence for the front There were three distinct lines of transit and yet a large proportion of the correspondence contained nothing but the addressee's name and regiment, and often in the case of Medical Transport and other Officers there was nothing but the name Officers had to be specially equipped at selected points for the sole purpose of collecting information about the destination and progress of officers and troops and by this means and the free use of printing in the revision of lists from day to day, this part of the work was eventually mastered in a satisfactory way

24 I shall refer in the appropriate place (paragraph 79) to those officers whose exertions are especially deserving of notice in connection with the operations above referred to

SECTION I—POST OFFICES, LETTER BOXES AND VILLAGE POSTMEN

	Number at close of 1877-78	Number at close of 1878-79	Increase
Post Offices	4,107	4,392	285
Letter boxes	5,809	6,132	[illegible]
Village postmen	2,212	2,676	434

25 The usual statistics under this head will be found in Appendix I, of which an abstract is given on the margin The increase is large, but it must be remembered that for the two previous years there had been considerable restriction owing to financial pressure

SECTION II —POSTAL LINES

Year.	Railway	Mail cart, horse and camel line	Runners and boats.	Sea.	Total
1877 78	7,339	8 781	[illegible] 177	1 [illegible]97	57 [illegible]
1878 79	8 123	8 269	32 8[illegible]5	13 [illegible]87	[illegible]
Increase	78				
Decrease		512	2[illegible]		9

26 In Appendix II will be found the usual statistics of postal lines The abstract on the margin shews that the total increase in railway mileage almost exactly balanced the decreases under the other heads

27 The principal Railway extension was that of the Indus Valley State Railway (Mooltan to Kotri 508 miles) and this with various smaller extensions *viz*, on the Northern Bengal State Railway (47 miles) on the Neemuch State Railway (50 miles), on the Western Rajputana State Railway (35 miles) and on the Dhond Munmad State Railway (145 miles) make up the considerable total of 78[illegible] miles

28 The decreases under the other heads were for the most part due to the abolition of lines superseded by the railway Besides this there was the abolition of the horse and camel line across the desert of Sind between Ahmedabad and Hyderabad which as well as other smaller decreases were balanced by some new lines opened in Sind and by a series of lines opened for military purposes in the Punjab

SECTION III —CORRESPONDENCE

Year.	Letters	Newspapers	Parcels	Book Packets and [illegible]	Total
1877 78	[illegible]	[illegible]	909 [illegible]	1 [illegible]	[illegible]
1878 79	118 [illegible]	10 276 [illegible]0	[illegible] 01	2 02[illegible] 7[illegible]8	131 8[illegible] [illegible]8
Increase	510 7[illegible]		[illegible]	106 744	[illegible] 073 188
Decrease		7[illegible]68			
Percentage of increase	3 0		9 7	10 77	2 39
Percentage of decrease		0 57			

29 The correspondence returns for the year are shewn in Appendix III of which an abstract is given on the margin The general percentage of increase compares unfavorably with the results of previous years, as will be seen from the following abstract —

	Percentage of correspondence, increase
1875 76	2 88
1876 77	2 57
1877 78	5 13
1878 79	2 39

30 As observed in the report of last year (paragraph 19) a time of famine affects the Post office during the actual currency of the dearth by stimulating correspondence in connection with the transport of grain the remittance of money &c It is not therefore, to be wondered at that the stimulus given in 1877 78 should leave the following year now under report with a less than usual increment as compared with the results of its predecessor That this is the cause of the reduced rate of progress is apparent from the fact that while other postal circles shew a fair average progress in the amount of correspondence the Bombay and Madras Circles in which the famine prevailed shew actual decreases

31 It will be observed also that newspapers which shewed an unusual expansion of no less than 11 33 per cent in 1877 78 have this year gone down somewhat in number This fluctuation will be more apparent from the following figures —

	No of Newspapers
1876-77	9 880 [illegible]
1877 78	10 [illegible]
1878 79	10 276 990

It must be remembered that the statistics of correspondence are based on enumerations made in only one week of each half year, so that temporary fluctuations may produce an exaggerated effect on the returns It is possible perhaps that the operation of Act IX of 1878 (an Act for the better control of publications in oriental languages) may have had something to do with the fluctuation now under notice

32 A further analysis of the returns relating to letters is given on the margin The growing habit of prepaying letters instead of sending them unpaid is very noticeable This change is most marked in the correspondence of natives and is partly due to the extended use of embossed envelopes since the cost of such envelopes was reduced (in 1873) to the value of the stamps borne by them Although the increasing habit of prepayment does not improve the postal revenue it has always been regarded as an object to encourage the habit, and the Indian Post Office has now for years been content to do so, not

Year.	Paid	Unpaid	Registered	Total
1877 78	79 568 823	[illegible] 7[illegible] 919	46 [illegible]94	115 089 338
1878-79	84 324 076	31 429 552	2 845 [illegible]81	118 [illegible]99 609
Increase	4 755 25[illegible]		99 [illegible]67	3 [illegible]10 27[illegible]
Decrease		1 314 [illegible]67		
Percentage of increase	5 98		3 62	3 05
Percentage of decrease		4 10		

merely at the loss of the higher unpaid rate of postage but of the cost of the envelopes for which nothing is charged in addition to the value of the embossed stamps

33 The unusual extent to which during the year under report unpaid letters have been supplanted by paid letters is also partly due to steps which were taken for expediting the delivery of paid letters

34 The correspondence returns include under the head of parcels not only inland parcels, but also foreign parcels, and it is usual to give separate statistics respecting the latter in the following form —

FOREIGN PARCELS

Parcel Exchanges	Total number of parcels		Average weight of each parcel				Net revenue derived by the Indian Post Office after deduction of Custom duty and sums due to P and O Company	
	1877 78	1878 79	1877 78		1878 79		1877 78	1878 79
	No	No	lbs	ozs	lbs	ozs	Rs	Rs
With United Kingdom								
To India	38 389	46 369	6	1 01	5	11 53	73 469	81,762
From India	17 614	18 968	2	11 63	2	12 50	18 943	20 812
	56 003	65 337	5	0 22	4	13 88	92 412	1 02 574
With Continent of Europe								
To India	881	1,025	6	14 81	6	15 87	1 756	2,057
From India	1 811	1 955	4	3 31	4	12 56	2 444	2 960
	2 692	2 980	5	1 13	5	8 78	4 200	5 017
With Ceylon Aden & Straits								
To India*	55	208	1	14 41	1	13 83	20	162
From India	345	1 009	3	4 71	3	7 79	645	1 964
	400	1 217	3	1 64	3	3 35	665	2 126
TOTAL	59 095	69 534	5	0 07	4	13 88	97 277	1 09,717

35 The development of this branch of the parcel traffic has been rapid especially in late years as will be seen from the following figures, commencing with the year in which the Foreign parcel post was started —

	No of parcels.
1873 74	21 923
1874 75	25 563
1875 76	35 819
1876 77	45,325
1877 78	59 095
1878 79	**69 534**

36 The correspondence entered on the margin of paragraph 29 was disposed of as follows —

Sent out for delivery	131,899 268
Received back undelivered	5 418 138
Balance actually delivered	126 481,130
Sent to Dead Letter Offices	2 865 742
	129 346 872

Note —Of the number received back undelivered some are subsequently delivered under re issue the remainder being sent to Dead Letter Offices

The actual delivery continues to bear the same proportion (97 per cent) to the total as in the two preceding years

* This does not include parcels from the Straits to India respecting which no information is available

37 Foreign correspondence is included in the general correspondence statistics referred to in paragraph 29 but on the margin will be found a separate statement respecting it The exchange of *letters* with the United Kingdom has increased by 5 9 per cent that of *newspapers* has increased by 3 5 per cent and that of *books* and *patterns* has decreased by no less than 12 5 per cent This large decrease in the exchange of books and patterns is made up of a decrease of 5 7 per cent on the homeward route and of 14 3 per cent in the outward route The relatively large decrease of books and patterns on the outward route is manifestly due to the cheaper means of transmission afforded by the parcel post in which the charge on *outward* book parcels was reduced by one half in the preceding year Indeed the foreign parcel post return prove this to be the case But there remains a decrease of about 5 per cent common to both routes (homeward and outward) which can be accounted for only on the assumption of a depression of trade either in books or patterns or both

Note —The fig[illegible]

38 The statistics of exchange with foreign Europe shew a similar result *i e*, an increase (14 per cent) in letters and a decrease (15 7 per cent) in other articles

39 It may be mentioned here that the statistics of exchanges with foreign Europe for next year will be the same as those for this year as it was decided by the Paris Convention that statistics should be taken only every two years

40 The statistics relating to the working of Dead Letter Offices are given in Appendix IV of which the following is an abstract —

Dead Letters			NUMBER		PERCENTAGE	
			1877 78	1878 79	1877 78	1878-79
Total number of articles received in Dead Letter Offices			2 781 026	2 865 742		
	1877 78	1878 79				
DEDUCT—						
Articles issued by Dead Letter Offices for delivery to the addressees or senders and received back again as undeliverable	131 596	146,972				
Articles transferred to other Dead Letter Offices	607 5?5	645,426	71? 1?1	792 398		
Net receipts to be disposed of by the Dead Letter Offices			2 0?? ?72	2 073 344	100	100
Articles disposed of by the Dead Letter Offices less the proportion of articles returned undelivered — Disposed of by re direction to addressees			197 819	211 226	9 70	10 19
Articles disposed of by the Dead Letter Offices less the proportion of articles returned undelivered — Disposed of by return to senders			1 171 1??	1 226 217	57 ?8	59 14
Articles undisposable and deposited as dead			60? 170	635 901	32 ?2	30 67

41 The work of Dead Letter Offices being either to find out the addresses or to return the correspondence to the senders, the measure of efficiency is the proportion of total receipts so disposed of This proportion is on the increase year by year

42 The statistics of the sales of postage stamps are contained in Appendix V (ordinary stamps) and Appendix VI (service stamps), of which an abstract is given below —

	Ordinary Postage Stamps	9 pie labels	½ anna envelopes	1 anna envelopes.	¼ anna labels	1 anna labels	2 anna labels	4-anna labels	6 anna labels	8 anna labels	12 anna labels	1 rupee labels.	Gross value
		Rs	Rs	Rs	Rs	Rs	Rs	Rs	Rs	Rs	Rs	Rs	Rs
1877 78	Value of each kind of stamps sold	22 311	7,86 352	8 591	13 97 862	2 91 838	2 43,507	7 39 963	3 74 066	1,79 223	63 634	1,51,275	42 61 622
	Proportion of each to whole value of stamps sold	52	18 45	20	32 80	6 92	5 72	17 36	8 78	4 21	1 49	3 55	100
1878-79	Value of each kind of stamps sold	23 471	9 64 759	9,494	13 15 292	3 05 233	2 54 653	7 74 175	4 35 661	2 52 869	80 409	2 31,311	46 47 327
	Proportion of each to whole value of stamps sold in previous year	55	22 64	22	30 86	7 16	5 98	18 17	10 22	5 93	1 89	5 43	109 05

	Service Postage Stamps	9 pie labels	½ anna labels	1 anna labels	2 anna labels	4-anna labels	8 anna labels	Gross value.
		Rs	Rs	Rs	Rs	Rs	Rs	Rs
1877 78	Value of each kind of stamps sold	891	2 70 666	6 41,483	1 11 421	1,35 132	1 25,552	12,85,145
	Proportion of each to whole value of stamps sold	07	21 06	49 91	8 67	10 52	9 77	100
1878-79	Value of each kind of stamps sold	375	2 83 125	6 44 692	1 03 427	1 28 400	1 03 505	12,63 524
	Proportion of each to whole value of stamps sold in previous year	03	22 03	50 17	8 05	9 99	8 05	98 32

43 The only point in connection with these figures upon which remark is called for is the continued increase of the sale of ½ anna embossed envelopes Below will be found a statement shewing the sale of these envelopes in recent years

Sale of ½ anna envelopes

	No	Value
		Rs
1872 73	99 391	3 106
1873 74	2 613 195	81 662
1874 75	5 804 140	1 81,380
1875 76	11 016 060	3 45 190
1876 77	17 915 653	5 59 864
1877 78	25 163 257	7 86 352
1878 79	**30 872 300**	**9 64 759**

44 It was in 1873 that the Government decided to offer the envelopes for sale at the value of the stamps borne by them the object being to induce the native public to use envelopes of a proper size and texture instead of the small flimsy covers in which they were accustomed to place their letters These covers were generally little more than the size of a finger so that the addresses were always crowded and sometimes written on both sides Over these crowded addresses were impressed the various office stamps and thus an address originally difficult to read became almost illegible before arrival at destination It was to obviate this great inconvenience that the Government decided to sell the envelopes at the value of the stamps borne by them This practically reduces the postage rate by the cost of the envelope, but the object in view fully warranted the sacrifice

45 The maximum annual supply of envelopes under the present contract with De La Rue & Co is 74 400 reams or 35 712 000 envelopes so that the sale of the year under report came but little short of the maximum The manufacture is now going on at the maximum rate and it remains to be seen whether the demand will be met thereby

46 The proportion of revenue collected in cash and stamps for the last few years is shewn below —

	1873 74	1874 75	1875 76	1876 77	1877 78	**1878 79**
	Rs	Rs	Rs	Rs	Rs	Rs
Total postage revenue	100	100	100	100	100	**100**
Cash	31 23	31 [illegible]	30 97	30 71	29 33	**26 62**
Proportion derived from ordinary stamps	51 50	52 08	52 37	52 29	53 87	**57 30**
Proportion derived from service stamps	17 27	16 69	16 66	17 00	16 80	**16 08**

47 The large increase this year in the proportion collected by the sale of ordinary stamps is due partly to the marked increase of paid letters (as compared with unpaid letters) already noticed in paragraph 32 but mainly I think to the fact that the prepayment of insured parcels is compulsory The introduction of the insurance system has thus had the indirect effect of largely increasing the proportion of revenue collected in stamps The insurance fees are also accounted for by Post Masters in stamps, but this is a comparatively small item

SECTION IV—DISTRICT POSTS

48 As explained in previous reports the District Posts have for their primary object the conveyance of official correspondence between police and revenue stations in the interior of districts where the general wants of the locality are not such as to call for the provision of postal facilities by the imperial post The cost of such arrangement is defrayed in some cases by local cesses and in others by Imperial grants The Administration is in every case under the Local Government but under arrangements carried out between 1861 and 1878 the Local Officers of the Imperial Post are now everywhere employed by the Local Governments as managers of the District Posts When a District Post Office attains to a fair proportion of private correspondence and fulfils certain prescribed conditions about self support, it is deemed eligible for transfer to the Imperial Post and the District Post funds thus set free become available for extending District Post facilities The District Post thus acts as a pioneer to the Imperial Post, and its use in this way is most important

49 Owing to the extension of Imperial Post operations during the year under report, there was a considerable transfer to it of offices from the District Post and some time naturally elapses before the complement of the District Post is restored It thus happens that the returns shew fewer District Post Offices at the close of the year under report than in the previous year But the mileage of District Post lines is greater

50 The correspondence conveyed by the District Post has decreased by over 10 per cent as compared with the previous year and this is partly attributable to the transfer of offices to the Imperial Post and partly to the cessation of operations connected with famine relief

51 The usual figures relating to District Posts are given below These figures are always more or less incomplete and liable to error, owing to their being compiled through so many different channels and from accounts kept in different ways under different Local Governments —

Names of Postal Circles		Number of District Post Office and Receiving Houses	Number of District Post village postmen and postmen	Number of District Post letter boxes	Distance in miles of District Post lines	Local cess	Grant from Imperial Revenue	Expenditure	Articles received from the Imperial and District Posts for delivery by the District Posts	Articles posted in the District Post for despatch to the Imperial or District Post	Articles returned by the District to the Imperial Post undelivered	Percentage of those returned on the total number received for delivery by the District Post
						Rs	Rs	Rs	No	No	No

(a) Including 270 letter boxes in charge of village headmen not shewn in the Return for 1877 78
(b) The distance in the rainy season amounted to 661 miles in 1877 78 and 741 miles in 1878 79
(c) Including contributions from Provincial and Local Funds in the Central Provinces and Berars
(d) Including Rs 720 contributed from the District Improvement Fund in Assam
(e) Excluding Rs 21 882 paid from the Imperial revenues on account of pay of village postmen and postmen attached to District Post Offices
(f) Including the annual subsidy paid from the District Dâk Fund for the maintenance of the Dera Ismail Khan and Chickawatni hill cart line in the Punjab.

SECTION IV A—INSURANCE AND VALUE PAYABLE SYSTEMS

52 It has been deemed appropriate to give a place among the regular sections of the report to the measures named above because separate notices of them will probably be found useful in future reports as well as in this one

53 Both of the measures referred to were introduced towards the close of the preceding year, so that the year under report is the first complete year of their existence

54 The Insurance system had its origin in a desire to separate between the valuable and non valuable portion of the mails From the time when currency notes were introduced in India, the use of the letter post for transmitting them increased and as the practice grew it became a source of danger to the entire mail for a thief would steal many letters in the hope of finding notes in one of them Various attempts were made to check the evil Unregistered letters manifestly containing notes were ordered to be registered and charged on delivery with a double registration fee and a special organization under Mr [illegible] Smith of the Punjab Police was arranged with the view of checking the growing evil The result however was a conviction that the proper direction for such effort was that of inducing a separation of the letters containing notes from those which did not contain them A plan was accordingly laid before Government for the transmission under insurance of currency notes presented at the Post Office for that purpose but the Government considered that such a measure might favor wrong expectations regarding the cashing of notes so transmitted The larger scheme of insurance for all kinds of valuables was then [illegible] and introduced the rates of insurance being based in the first instance on a scale of about ½ per cent which was subsequently reduced to a scale of about ¼ per cent

55 The working of the Insurance system up to the close of the year under report may be exhibited as follows —

	Value insured — Letters	Value insured — Parcels	Value insured — Total	Insurance fees
	Rs.	Rs	Rs.	Rs
1877 78—				
Last quarter being the commencement of the system	6 [illegible] 20	18 60 131	25 26 511	13 930
1878 79—				
First quarter	9 00 11	42 60 125	51 60 636	27 652
Second quarter *during which* the insurance rates were reduced to a scale of about ¼ per cent	14 32 831	52 07 818	[illegible] 30 [illegible]	23 [illegible]
Third quarter	[illegible]	[illegible] 58 01	[illegible] 83 11[illegible]	26 51[illegible]
Fourth quarter	1 43 [illegible]	1 13 [illegible]	1 [illegible]	45 8 6
TOTAL	[illegible] 38 0[illegible]	[illegible] 18 110	[illegible]	1 36 [illegible]

56 During the whole period (15 months) above referred to the compensation paid for losses after deducting the recoveries of lost property amounted to only R[illegible] 1[illegible] 201 and even if losses occurring in that period but not made the subject of compensation till the following year were to be added the total amount would not exceed R[illegible] [illegible]

The total losses without deducting recoveries as well as the recoveries and other deductions are shown on the margin

	R	A	P
Losses by department [illegible]	1 [illegible]	0	9 [illegible]
Ditto by highway [illegible]	[illegible]	[illegible]	0 [illegible]
Ditto by highway robbery [illegible]	11 [illegible]	8 1[illegible]	0
	31 [illegible]	8	8 [illegible]
Value of property recovered	[illegible]	[illegible]	[illegible]
	11[illegible] 1		[illegible]
Claims not preferred		0	[illegible]
	[illegible] 1		[illegible]

57 *Value payable System*—Reference will now be made to the Value payable system It was based on the general plan of system which had found much favor in Germany and other countries of the Continent under which the sender of a parcel could declare the value of the contents for realization from the addressee in view to the subsequent payment to him of the amount so realized less a postal commission Under this system the German [illegible] had carried parcels in 1874 of the value of over [illegible]½ million sterling while in the Austrian [illegible] the value carried in the same year was nearly [illegible]½ million sterling

58 The Value payable system commenced to work in India in a very small way but it has gone on increasing since as will be seen from the following figures —

	No. of parcels	Value [illegible]	Commission
1877 78—			
Third quarter being the commencement of the system (only one month December 1877)	3[illegible]	Rs 81[illegible]	Rs 19
Fourth quarter	3[illegible]8	5 [illegible] 8	1[illegible]6
1878-79—			
First quarter	81[illegible]	13 [illegible]	409
Second quarter	1 61	2[illegible] [illegible]18	[illegible]05
Third quarter	2 4[illegible]	5[illegible] 118	1 [illegible]08
Fourth quarter	2 8[illegible]6	4[illegible] [illegible]	1 1 [illegible]
TOTAL	7 821	1 3[illegible] 830	4 137

59 The idea of extending the Value payable system to parcels coming from the United Kingdom gave rise to strong opposition on the part of the Trades Associations, and the idea was eventually abandoned

SECTION V—MISCELLANEOUS

60 *Security taken from Post Office Servants*—The usual statement of operations connected with the security fund is given below —

Receipts	Number of Employés: First half year	Number of Employés: Second half year	Amount of Subscription: First half year	Amount of Subscription: Second half year	Amount of Subscription: Total	Charges	Amount
			Rs	Rs	Rs		Rs
Balance					1 01 551	(a) *Pensionable*—	
Interest on balance @ 3¾ per cent for 1878 79					3 808	Sums decreed against the fund	975
						Refunds to subscribers	338
						Cost of establishment	1 080
						Total	2 393
(a) *Pensionable*—							
Imperial	6 013	6 212	6 013	6 212	12 225		
District	309	279	309	279	588		
Total	6 322	6 491	6 322	6 491	12 813		
(b) *Non pensionable*—						(b) *Non pensionable*—	
Imperial	10 168	10 639	5 084	5 320	10 404	Sums decreed against the fund	695
District	3 422	3 195	1 711	1 597	3 308	Cost of establishment	1 080
						Rewards to persons who gave information leading to important results in Post Office robbery cases	228
Total	13 590	13 834	6 795	6 917	13 712	Total	2 003
						Total charges	4,396
						Balance at credit	1 27 488
GRAND TOTAL					1 31 884	GRAND TOTAL	1,31 884

61 As explained in previous reports the taking of security from Post Office employés under a system of subscription controlled departmentally was introduced to meet a great want Private Guarantee Associations demanded enormous premia and when the European Assurance Guarantee Society in which many postal officials were secured failed in 1872 the opportunity was taken of organizing a departmental system

62 The subscription rate for pensionable subordinates is 1 rupee half yearly and that for non pensionable subordinates 8 annas half yearly but the former class are entitled to the ultimate refund on a rateable calculation of all subscriptions in excess of actual expenditure, while the latter (non pensionable) class who pay at the lower rate are not entitled to any refund Hence it comes that the Government holds a certain amount returnable to one class of subscribers, and also a surplus not returnable to the other class of subscribers The balance so divided is shown below —

	1877-78	1878 79
	Rs	Rs
Total balance	1 01 551	1,27,488
Returnable portion	46 253	58,407
Non-returnable portion	55 298	69,081

63 It may be explained here that the receipts and charges of the so called security fund appear in the ordinary yearly accounts of the department under the heads of revenue and charges The security fund is not a fund properly so called but merely a calculation designed to shew separately the financial results of the system and especially the amount which the Government holds itself responsible to refund under the prescribed conditions It was intended at one time to bring compensation payments for losses of insured articles under this head of account, but it has been deemed better on the whole to exhibit separately the losses accruing under the Insurance system This has already been done (see paragraph 56)

64 *Complaints from the public*—There were 5 517 complaints made by the public in the year under review, as compared with 5 33) in the previous year The number left pending at the end of the year was less by 146 than the corresponding number in the previous year

This accounts in part for the increased number of complaints acknowledged to be well founded This increase is also partly accounted for by what happened in Calcutta where the presence for a time of two dishonest postmen (eventually convicted) gave rise to a large increase (53) of well founded complaints There was also an increase of well founded complaints in the Punjab, connected chiefly with the trans frontier operations during the war

65 The following is an analysis of complaints relating to articles of value in the last two years —

	Ordinary letters		Registered letters		Parcel		TOTAL	
	1877 78.	1878 79	1877 78	1878 79	1877 78	1878 79	1877 78	1878 79
I —Cases in which the enquiry showed either that the loss had not occurred or that the loss had not occurred through fault of postal officials	153	166	144	167	105	187	402	520
II —Cases in which the postal establishment was proved to be in fault or in which there was strong ground for believing it to be so	150	183	9	59	72	99	317	341
III —Cases in which no definite conclusion was arrived at	578	611	28	14	108	135	714	760
TOTAL	881	960	267	240	285	421	1 433	1 621

The figures given above include all complaints made about insured articles under the system of insurance of which the year under report is the first complete year

66 *Convictions and departmental punishments* —The number of legal convictions and departmental punishments will be found detailed in Appendix VIII of which the following is an abstract —

	1877 78	1878 79
Number of legal convictions	171	213
Number of cases punished departmentally	95	85
Total	266	298

The increased detection of crime is due mainly to the fact that under the Insurance system the chances of detection are much greater than formerly

67 In the annual report for 1876 77 reference was made to the exposure of a series of frauds committed by a gang of forgers who operated by bribing postal officials in order to get access to letters passing in transit through the post The information so obtained enabled them to perpetrate many successful forgeries on native bankers Another gang of the same kind was discovered in Central India during the year under report They operated in Neemuch and Oodeypur bribing the sorting clerk of the Neemuch Post Office They were however soon discovered and all three forgers together with their postal accomplice were convicted and punished

68 *Highway robberies* —The usual abstract of highway robberies is given on the margin to which is attached a summary of the total highway robberies in each year since 1871 72 It will be seen that the large increase last year caused by the famine has been only partially reduced during the year under report The fact that in 1876 77 the robberies in Madras and Bombay aggregated only 7, whereas in the year under report they aggregated 24, shews where the great bulk of the excess lies

Highway Robberies

	1877 78			1878 79		
	British Territory	Foreign Territory	Total	British Territory	Foreign Territory	Total

Village Postmen	313	2 357
Total	28 975	29 636

72 The usual abstract shewing the strength of the postal establishments is given on the margin The details for each circle are given in Appendix IX

SECTION VI —NON POSTAL BRANCHES OF THE DEPARTMENT

73 The number of Government Carrying Agency Offices for goods at the close of the year under report was two in excess of the previous year's number, one office (Agra) having been

closed, and three (Kohat, Thull and Solan) opened The Carrying Agency lines were augmented during the year under report by an important military branch from Rawalpindi to Thull They consisted at the close of the year of a line from Calcutta to Jhelum (rail), and onwards to Peshawar (bullock train), with branches to Fattehgarh (bullock train) Gwalior (partly rail and partly bullock train), Moradabad (rail), Mussoorie Roorkee and Landour (bullock train) Simla (bullock train), Ferozepore (bullock train), Mooltan (rail), Sialkot (bullock train) Murree (bullock train) and Thull (bullock train)

74 The passenger services on mail cart lines were increased during the year under report by the extension of the Kalka line to Simla and by new lines from Peshawar to Jumrood Kohat to Thull and Sukkur to Jacobabad —all these new lines having been required in connection with the military operations on the frontier The passenger services comprised at the close of the year lines from Jhelum to Peshawar (with branches to Sialkot Murree Thull and Jumrood), from Amritsar to Pathankote Umballa to Simla, Bareilly to Ranibagh and Sukkur to Jacobabad

SECTION VII —FINANCIAL RESULTS

75 The following figures represent the financial results in the usual form —

Review of Financial Results

	1877 78	1878 79
PURELY POSTAL SERVICE	Rs	Rs
Receipts, including sale of Service postage stamps	(*a*) 72 97 171	74 72 592
Ditto excluding ditto ditto	60 11 035	62 09 575
Disbursements	(*b*) 60 82 701	65 57 308
Net revenue, including sale of Service postage stamps	12 11 167	9 15 284
NON POSTAL BRANCHES		
Bullock Train		
Receipts	(*c*) 7 13 016	11 05 540
Disbursements	(*d*) 6 03 017	8 04 250
Surplus	1 10 029	3 01 290
Punjab Military Van Dak		
Receipts	2 29 863	2 70 621
Disbursements	2 00 227	2 23 632
Surplus	29,636	46 989
Passenger Service on Mail Cart Lines		
Receipts	86 121	97 586
Disbursements	86 121	97 586
Contract subsidies to local steamers employed to a large extent on general and military considerations but paid entirely through the Post Office as a matter of convenience		
Disbursements	7 08 515	7 12 000

(*a*) The difference of Rs 7 158 between this and the figure entered in the report for 1877 78 is owing to the omission of value payable items from this statement These items do not form part of the receipts and disbursements as they represent money collected in one place for payment in another

(*b*) The difference of Rs 4,953 is on account of value payable items as explained above

	1877 78	1878 79
	Rs	Rs
(*c*) Purely bullock train	6 01 587	8,02 855
(*d*) Postal charges debited to bullock train	1 430	1 395
Total	6 03 017	8 04 250

These results may be summarized briefly as follows —

	1877 78	1878 79
	Rs	Rs
A net revenue in the purely Postal Department of	12 11,167	9,15,284
A net surplus in the Bullock Train Department of	1 10,029	3,01 290
A net surplus in Punjab Military Van Dâk of	29,636	46,989
Total	13,54 132	12,63,563

76 But there is another list of items chargeable against the Post Office although not shewn in the accounts, and this will be found on the margin. Taking the total net revenue as given in paragraph 75 at Rs 12 63,568, and deducting the total of the items in this list, we find a net profit of Rs 1,27 898 for the year under review, being less by Rs 89 610 than the corresponding figure for last year.

	1877 78	1878 79
	Rs	Rs
Cost of stationery supplied by the Superintendent of Stationery	25 816	33 370
Railway service estimated at — 1877 78: Rs 4 17 443; 1878 79: Rs 4 17 413. Less actual payments — 1877 78: 51 698; 1878 79: 1 47 099. Net — 1877 78: 3 65 745; 1878 79: 2 70 314	3 66 000	2 70 000
English stores	1 78 612	1 74 470
Value of service rendered to the Post Office by the Government Press	48 000	27 341
Rent of Government buildings	2 07 000	2 15 384
Estimated postal share of Local Mail subsidies	2 03 854	2 42 548
Gratuities	2 505	6 126
Leave allowances paid in Great Britain	10,191	5 122
Pensions granted during the year aggregating in annual value Rs 15 665 capitalized at 10 166 years' purchase (15 665 × 10 166 =) Rs 1 59 234	87 047	1 59 234
Total	11 36 024	11 35 665

77 The year under report has been a very special one in many ways. It followed two years of financial pressure when the extension of operations had been much curtailed; it is compared with a year in which correspondence was specially stimulated by the famine operations (as explained in paragraph 30); it has borne the full force of the reductions of postage (notably the abolition of redirection charges) carried out in the last quarter of the preceding year; it commenced with a list of fresh reductions of postage (see paragraph 10) of considerable financial importance; and it had to bear the cost of a series of important departmental revisions (described in paragraph 15).

SECTION VIII —GENERAL REVIEW OF PROGRESS

78 The usual comparison of correspondence revenue and expenditure from the year 1855 56 onwards will be found on the margin.

Year	Comparison of number of letters and newspapers with that of 1855 56 being represented by 100	Comparison of amount of postage receipts with that of 1855 56 being represented by 100	Comparison of expenditure with that of 1855-56 being represented by 100.

SECTION IX —NOTICES OF POST OFFICE OFFICIALS

79 Among the officers specially connected with the postal operations in Afghanistan and Beluchistan, I would mention the following: Colonel W M Lane, Post Master General of the Punjab, upon whom devolved the control of all the operations; Mr S S Sullen, Superintendent of the Passenger and Bullock Train Services between Jhelum, Peshawar and Thull, for indefatigable work in managing the line during a severe pressure of work notwithstanding the presence of epidemic disease both among the bullocks and horses; Mr E Hodgkinson, Officiating Chief Inspector of Sind, upon whom devolved the first organization of the Jacobabad line; Mr F J Jordan, Inspector and Superintendent, to whose energy was due the organization of a good horse post from Peshawar to Daka and ultimately to Gundamuk under circumstances which obtained for him the deserved commendation of the Military Authorities; Mr J H Cornwall, Inspector, and Mr C Lawder, Superintendent, Beluchistan; and Mr W T Van Someren, Inspector and Superintendent in the Kurram Valley, for postal arrangements which from the first gave full satisfaction.

80 Although not serving beyond the frontier, the Railway Travelling Post Office establishment bore to a large extent the real brunt of the postal work connected with the war, and among that establishment I would specially notice Mr P Sheridan, Chief Superintendent, and his Assistants Messrs W A Sutherland and C Goodburn.

81 Among the others brought to notice in the reports of the several Post Masters General, the following have been selected for mention here: in *Madras* Mr G W Creswell, Inspector, for promptly establishing postal communication between Rajahmundry and the disaffected Rumpa country when the forces proceeded to the scene of disturbance; in *Bombay*, Mr Dinshaw Jijibhai, for good service with the expeditionary force sent to Malta and Cyprus; and in the *North Western Province* Pundit Sundar Lal, Supernumerary Inspector, for the successful prosecution of the gang of forgers (referred to in paragraph 67).

A M MONTEATH,

Director General of the Post Office of India

APPENDIX No I

Statement showing the number of Post Offices and Letter Boxes opened and Village Postmen entertained during the year 1878-79, and the total number that stood at the end of the Official Years 1877 78 *and* 1878 79

(b) The difference of Rs. 4,953 is on account of value-payable items as explained above

GOVERNMENT OF INDIA

HOME, REVENUE AND AGRICULTURAL DEPARTMENT

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 1ST JUNE 1880

GENERAL REMARKS.—Rain was plentiful in British Burma and Mysore and general in Assam, Bengal and Madras. In Bombay, Berar, the Central Provinces, Central India, the North Western Provinces and Oudh, Rajputana and the Punjab the rain that fell was light and more or less partial. In Bengal cultivation has been impeded in places by rain. Autumn sowings are progressing satisfactorily. Agricultural prospects and the public health continue generally good.

Later telegrams to the Meteorological Reporter appear to show that the monsoon had set in on the Malabar coast, in Burma and at the mouth of the Hooghly by the 2nd current.

Presidency or Province and District	Rainfall for week preceding	State of agricultural prospects
Madras—(June 2nd)		
Bellary	1·21 (average of twelve stations)	*Ragi* 28·3; standing crops generally good
Kurnool	·97 (average of eight stations)	*Ragi* 31·39
Ganjam	1·01 (average of thirteen stations)	*Ragi* 32·14

Notifications by High Court, Comptroller General &c

NOTICE TO MARINERS

No 7 of 1880

INDIA—BAY OF BENGAL

RIVER HOOGHLY

Discontinuance of Exhibition of Maroons from the Light-Vessels

Notice is hereby given that the burning of maroons from the light ships of the River Hooghly will be discontinued after the 1st December 1880, and that these signals will then be burnt only from the Pilot brigs

Also, that during the time the *Intermediate* light vessel is not on her station (*i e*, from 1st December to 31st January), the Lower Gaspar light-ship will, from sunset to sunrise, burn a blue light at the hour, in addition to the one now burnt at the half hour

These changes will not affect the order in which the bluelights or rockets are exhibited from the other light ships

By Direction of the Government of India,

R C CARRINGTON,
In charge of Office,

for A DUNDAS TAYLOR, *Comdr (late I N)*

DEPARTMENT OF FINANCE AND COMMERCE

NOTIFICATIONS

Simla, the 8th June 1880

No 1187—*Rules regarding the rank and allowances of Natives of India appointed to offices in Her Majesty's Civil Service of India, in accordance with the Rules framed under Act 33 Vic, Cap 3*

1 (*a*) A Native Civil Servant is a member of the Covenanted Civil Service in the Presidency to which he belongs and, ordinarily ranks in that Service, according to the date of his appointment to an office in the Covenanted Civil Service his name being entered in the Civil List accordingly

(*b*) But if an Officer is appointed to an office in the Covenanted Civil Service upon the ground of his proved merit and ability or professional attainments, the Governor General in Council may, upon the recommendation of the Local Government, assign to him superior rank in the Service

2 The pay of an office when held by a Native Civil Servant shall be as nearly as convenient two thirds of what it would be if the office were held by a Covenanted Civil Servant appointed in England, less the subscription paid by such a Servant on account of his Annuity

[Note—Thus the proportion of the pay of a Native Civil Servant to the gross pay of a Covenanted Civil Servant appointed after competitive examination in England, will be as nearly as convenient, 64 per cent]

3 The Subsistence Allowance of a Native Civil Servant when out of employ is as follows —

	Rs
To an Officer who has rendered not more than eight years Active Service as defined in Section 1 (*a*) of Part II of Supplement A of the Civil Pension Code	250
To an Officer who has rendered more than eight, but less than twelve years such Active Service	320
To an Officer who has rendered not less than twelve years such Active Service	400

4 The rules for the Pension and Leave of a Native Civil Servant are contained in the following additions to the Civil Pension and Leave Codes :—

CIVIL PENSION CODE

Section 2 (*j*)

Page 2

Add—

and includes a Native Civil Servant.

(*y*) A Native Civil Servant is a Native of India appointed to an office in the Covenanted Civil Service in accordance with the Rules framed under Section 6, Act 33 Vic. Cap 3

SUPPLEMENT A

Page 115

After "COVENANTED CIVIL SERVANTS" *insert*—

PART I

CIVIL SERVANTS APPOINTED BY THE HONOURABLE EAST INDIA COMPANY, OR AFTER COMPETITIVE EXAMINATION IN ENGLAND BY HER MAJESTY'S SECRETARY OF STATE FOR INDIA

Page 120

Insert the following after Section 9 —

PART II

NATIVE CIVIL SERVANTS

Section 1 —In this Part—

(*a*) "Active Service" means Active Service in the Covenanted Civil Service and includes—

(1) Time spent on duty

(2) Any period, not exceeding two years, spent on probation in India

(3) Privilege Leave of Absence

(4) Subsidiary Leave of Absence

(5) Time passed in India, out of employ on Subsistence Allowance

Section 2 —Except with the special sanction of the Governor General in Council, a Native Civil Servant who has reached the age of fifty five years shall not be appointed either substantively or officiating to a new office or be permitted to retain any office which he has held, either substantively or officiating, for five years

Section 3 —The pension of a Native Civil Servant shall in no case exceed the following limits, namely—

	Rs
After an Active Service of not less than 25 years	5,000
Ditto ditto ditto 30	6,000

All the rules in this Part are subject to these maxima

Section 4 (*a*) —On his resignation of the service being accepted after not less than 25 years Active Service a Native Civil Servant is entitled to a Retiring Pension of half his Average Salary during the three last years of his Active Service

(*b*) A Native Civil Servant who, upon a medical certificate in the form prescribed in Section 63 of the Code, is permitted to resign the service before he has completed 25 years Active Service, is entitled to Invalid Pension as follows —

(1) After an Active Service of less than ten years—Gratuity of one month's pay for each year of Active Service

(2) After an Active Service of not less than ten years—Pension of Rs 1,500 a year plus Rs 150 for each complete year of Active Service in excess of ten

Section 5 (*a*) —A Native Civil Servant removed from the Service under Section 2, after an Active Service of less than 25 years, is entitled to a Superannuation Pension

(*b*) On reaching the age of 55 years a Native Civil Servant may retire upon a Superannuation Pension

(*c*) The amount of a Superannuation Pension is the same as that of an Invalid Pension

Section 6 (*a*) —A Native Civil Servant who filled a pensionable office before his admission to the Covenanted Civil Service, may at his option, count his whole pensionable service and receive a consolidated pension, made up as follows —

(1) That proportion of the pension to which he would have been entitled under Sections 4 and 5 if his whole service had been passed in the Covenanted Civil Service which his Active Service bears to the whole of his qualifying service

(2) That proportion of the pension to which he would have been entitled if his whole service had been in the Uncovenanted Service, which his previous service bears to the whole of his qualifying service

(*b*) If such Native Civil Servant is entitled to gratuity only, his gratuity shall be calculated as if his whole service had been passed in the Covenanted Civil Service

Section 7 —The procedure upon an application for pension and upon the payment of pension is that described in Rule 1 under Section 6 of Part 1 of this Supplement and Chapters XVI and XVII of the Code respectively

CIVIL LEAVE CODE

SECTION 2

Page 135

Add to Clause (*a*)—

In Supplement C but not elsewhere, it includes a Native Civil Servant

Add the following Clause to this Section —

(*aa*) A "Native Civil Servant" means a Native of India appointed to an office in the Covenanted Civil Service, in accordance with the Rules framed under Section 6, Act 33 Vic , Cap 3

SECTION 3

Page 111

Insert—

Native Civil Servants—Supplement B B

Page 233

Add—

SUPPLEMENT B B

NATIVE CIVIL SERVANTS

Section 1 —In this Supplement—

"Average Salary" means Average Salary for a month calculated for so much of the three years immediately preceding the day on which a Native Civil Servant gives up office as he has passed on duty or on privilege or examination leave Average Salary in excess of Rs 1,400 a month is not reckoned

"Service" means all qualifying service whether rendered in the Covenanted Civil Service or otherwise, and includes periods spent on leave with allowances

Section 2 —During leave on Medical Certificate in excess of 15 months at one time or of 30 months in all and during Subsidiary Leave following such excess leave a Native Civil Servant is entitled to a quarter of his average salary During any other Leave excepting Privilege Leave, Examination Leave, or Extraordinary Leave an officer is entitled to half his average salary

Provided that the leave allowances of an officer shall in no case exceed his actual salary when he was last before on duty

Section 3 —Leave on Medical Certificate may be granted for three years in all, but not for more than two years at one time

Section 4.—An Officer may take either Leave on Private Affairs, or Furlough, as follows, but not both these kinds of Leave:—

(*b*) Leave on Private Affairs may be taken, first, after not less than six years' service and, thereafter at intervals of not less than six years. The duration of Leave on Private Affairs must not exceed six months at one time.

(*c*) Furlough, not exceeding two years in all, may be taken, first, after not less than ten years' service and, thereafter at intervals of not less than eight years. The duration of Furlough must not exceed one year at one time unless it be taken for the first time, after not less than eighteen years' service, when it may extend to two years.

Section 5.—Subsidiary Leave, Privilege Leave, and Examination Leave may be granted to a Native Civil Servant under Chapters VI, VII and VIII of the Code.

Section 6.—The Local Government may grant Extraordinary Leave without allowances at its discretion. Subject to the provisions of Section 10 there is no limit to the length or frequency of Leave under this Section, and it may be granted in continuation of any leave with allowances excepting Privilege Leave.

Section 7.—Leave taken by a Native Civil Servant before his appointment to an office in the Covenanted Civil Service shall, for the purpose of calculating the Leave admissible to him under this Supplement, be treated as Leave taken under this Supplement.

Section 8.—Leave on Private Affairs or Furlough may not be granted in continuation of any Leave except Subsidiary Leave; but any Leave granted under these Rules may be retrospectively changed for any other kind or amount of Leave which might at first have been granted. If a Native Civil Servant absent on Privilege Leave, Leave on Private Affairs or Furlough takes extension of Leave on Medical Certificate the whole of his absence must be treated as Leave on Medical Certificate.

1. Extraordinary Leave cannot be changed retrospectively into Leave on Medical Certificate; but Leave on Medical Certificate may be given in continuation of Extraordinary Leave.

Section 9.—A Native Civil Servant who has reached the age of fifty-five years is not eligible for any Leave, excepting Privilege Leave. Leave, other than Privilege Leave, granted to a Native Civil Servant before his fifty-fifth birthday cannot extend beyond that date.

Section 10.—If a Native Civil Servant is absent without leave, or remains absent after the end of Leave (excepting Privilege Leave, in which case a week's grace is allowed), he vacates his appointment, and, after five years' continuous absence from duty, whether with or without leave, a Native Civil Servant ceases to belong to the Public Service.

1. A Native Civil Servant who takes Leave other than Privilege Leave or Examination Leave has no claim to return to the particular appointment from which he took Leave.

Section 12.—The procedure upon Application for Leave is that prescribed in Chapter XIV of the Code.

SUPPLEMENT B.

RULE XXIV.

Page 232.

Add—

including a Native of India appointed to an office in the Covenanted Civil Service in accordance with the Rules framed under Section 6, Act 33 Vic., Cap. 3.

CHAPTER II.

Page 269.

Add—

Section 9A.—The pay of an office held by a Native Civil Servant is, unless otherwise specially ordered, 64 per cent. of what would be the gross pay of the office if it were held by a Covenanted Civil Servant appointed after competitive examination in England.

The 12*th June* 1880.

No. 1055.—The Governor General in Council has empowered Babu Ishan Chandra Basu, M.A., Assistant to the Comptroller General, to sign Promissory Notes for the Secretary to the Government of India.

No. 1188.—In continuation of Notification No. 960, dated 5th June, notice is hereby given that Loan Certificates with coupons payable to bearer will hereafter be issued, at the option of holders, in exchange for scrip receipts granted under clause 15 of Notification No. 461, dated 11th May 1880, published in the *Gazette of India Extraordinary* of the same date, or for Promissory Notes issued under the same Notification.

As some delay may occur in the preparation of such Loan Certificates and in needful preliminary legislation, it is impossible to fix the exact date on which they will be ready; but no avoidable delay will be allowed in their preparation.

No. 1190.—In exercise of the powers conferred by Section 22 of the Sea Customs Act, 1878, the Governor General in Council has fixed for Iron Rice Bowls on import into British India the following valuation in lieu of the valuation fixed by Notification No. 71C, dated 6th March 1880, *viz.*, Rs. 4 per set of ten, Rs. 2 per set of six.

This Notification shall have effect from and after the 15th instant.

R. B. CHAPMAN,

Secy. to the Govt. of India.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[Second publication]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 31st May, 1880, and was referred to a Select Committee —

No 8 of 1880

A Bill to exempt certain persons and property from Municipal taxation

Preamble. WHEREAS it is expedient to empower the Governor General in Council to exempt from taxation certain persons and property in municipalities, It is hereby enacted as follows —

Power to exempt from taxation. 1 Notwithstanding anything contained in any enactment for the time being in force, the Governor General in Council may by an order in writing, prohibit the levy by a Municipal Committee of any tax—

(a) on any person subject to the Army Discipline and Regulation Act, 1879, or the Indian Articles of War, or

(b) on any property of Her Majesty

The Governor General in Council may by a like order rescind any such prohibition

"Municipal Committee" defined. 2. In this Act "Municipal Committee" includes a Municipal Corporation or a body of Municipal Commissioners constituted by or under the provisions of any enactment for the time being in force.

STATEMENT OF OBJECTS AND REASONS.

BY the twenty fourth section of the Cantonments Act 1880 the Governor General in Council is empowered to prohibit the levy of any tax in a cantonment or to exempt any person or class of persons from the operation of any tax leviable there

2 This power was conferred chiefly with a view to the exemption of military men in cantonments situate within the limits of municipalities from certain descriptions of municipal taxation There are, however cases in which owing to the want of accommodation in cantonments or to some other cause, military men are compelled to reside within the limits of a municipality but out of cantonments In such cases the power in question is inapplicable and it was accordingly proposed by the Select Committee on the Cantonment Bill that the defect should be supplied by a provision to be inserted in the Bill for the control of Municipal taxation for the introduction of which leave had then been granted

3 As however, that Bill is not at present to be proceeded with, it has been thought desirable to make the necessary provisions in a separate Bill, and the present Bill has accordingly been prepared for this purpose

4 The Bill also provides for the exemption of Government property from municipal taxation, recent experience having shown such a power to be necessary

GOVERNMENT OF INDIA

HOME REVENUE AND AGRICULTURAL DEPARTMENT

NOTICE ON THE GROWTH OF THE CORN TRADE OF ANTWERP

Some thirty years ago the production of breadstuffs in Belgium generally exceeded the demand for home consumption We exported Belgian grain occasionally and after the repeal of the corn laws in England pretty regularly Imports of foreign grain took place only on a notable scale in case of a failure of crops and on the whole our grain business was quite unimportant

This could however hardly be otherwise

The corn trade had until then been prevented from developing by injudicious legislative interference The measures which were decreed in turn for the protection of the producer and of the consumer proved fatal to both The sliding scale imported from England into France and Belgium acted as a prohibition of imports and combined with prohibitions of exports which were always impending whenever there was a serious apprehension of scarcity introduced an element of uncertainty into every transaction connected with the corn trade which produced a disinclination on the part of the merchant to import and discouraged production beyond the wants for home consumption

Railways and other artificial means of communication were still in a relatively rudimentary state and the cost of transport of such a cumbrous article as grain to any great distance was enormous The development of industrial life was stunted by the protective system flourishing everywhere the working classes were mostly poor and indifferent consumers the growth of population slow

The economical reforms inaugurated in England and imitated on the continent rather timidly at first but by and by at a more rapid pace especially since the conclusion of the commercial treaty between France and England in 1860 wrought a complete change in this situation

We witnessed then a marvellous increase of the industrial activity and of the international exchanges, railways were constructed canals dug, rivers regulated ships and steamers built and their machinery improved capital was rapidly accumulating and credit expanding wages were rising and the population fast increasing The home production of cereals grew more and more insufficient, first in the United Kingdom afterwards elsewhere and the corn trade acquired gradually that volume which is one of the greatest marvels of the age

Belgium was one of the first countries on the continent that adopted the free trade policy of England and although the reforms were not here so rapid nor so sweeping the effects were hardly less wonderful than in the United Kingdom Among the many benefits we reaped from the reduction of tariffs not the least important was the development of the corn trade

which promoted besides by the eminently favorable topographical position of **Antwerp** made rapid progress.

As we stated above we had as good as no regular corn trade some thirty years ago and ANTWERP has now already become one of the largest corn markets of Europe. This fact is of so recent a date that it may not be so generally known abroad as it would seem desirable for this market. Some statistics about the growth of this trade and a few remarks respecting its prospects of future progress may therefore be a welcome contribution. To offer some is the object of this notice and we should be happy if, by rousing or stimulating the attention of shippers it could in any measure promote the direct intercourse especially between distant corn growing centres and our port.

What our trade was formerly and what it has become in the relatively short space of time which has elapsed since the inauguration of the free trade era will be best shown by the comparison of our imports in the ten years from 1845 to 1853 and in the last ten years which we give in the two following tables:—

Imports of Cereals into Antwerp from 1844 to 1853

Year	Wheat	Rye	Barley	Oats	Maize	TOTAL
	Hect	Hect	Hect	Hect	Hect	Hect
1844	101 090	67 [illegible]30	3[illegible]1 230	19 500	—	54[illegible]

Average total importation 10 years 1844 53 all grain 1 0[illegible] 174 hect
10 1870 [illegible]9 8 540 080
Total importation of grain in 1879 **16 352 777**

The above figures speak so eloquently for themselves that we need scarcely comment upon them. They supply also ample proof of the exact truth of our assertion that Antwerp has really become one of the largest corn markets of Europe. The following comparison of our last year's imports with those of Liverpool and London undoubtedly the two largest emporiums of the European corn trade will render that fact evident:—

Imports of Foreign Wheat in 1879

Liverpool	London	Antwerp
Qtrs 3 845 721 —	Qtrs 2 855 128 —	Qtrs 2 857 389 — (hectol 8 257 845)

This comparison shows that our imports of foreign wheat were last year fully as large as those of London and inferior to those of Liverpool by only qtrs 98[illegible] 858. But this inferiority to Liverpool even is only apparent. In fact while in England the population lives exclusively on wheaten bread, in Belgium and still more so in Germany, our principal customer, a good deal

of rye is still consumed To get a correct view of the matter it seems to us that all grain serving for human food ought to be compared We would then have to add to our above imports of wheat, hect 2 993,584 = qtrs 1 035 581 of rye of which article the import is *nil* in Liverpool This will make our total qtrs 3,892 973 wheat and rye against qtrs 3 81? 721 imports of wheat into Liverpool or a surplus of about qtrs 50 000 in our favor Such argument may also be justified on the ground that the substitution of wheat for rye is progressing rapidly in Germany and that the consumption of the latter grain will very likely soon become there as trifling as it is already in Belgium In future the imports of wheat will therefore be correspondingly increased at the expense of rye

Our trade as shown by our imports in the years from 1870 to 1879 and especially by those of last year is already sufficiently important to be worth the while of shippers in all corn growing centres to compete for a share of it But they will have the more rea on for doing so if they consider that this trade is as yet only in an early stage of its development and that it bids fair to increase still very considerably In fact Antwerp is not only the commercial emporium of Belgium it is also the most favorably situated port for a large part of Germany and France A glance at the map will show that our market extends far beyond our southern and eastern frontiers and comprises large territories with dense industrious and wealthy populations which may be considered as our natural customers No other continental port except Rotterdam and that only as far as the navigation on the Rhine is concerned can in the e qu n te compete successfully with us What we have said in the beginning of this notice of the transformation of commerce and industry applies in every respect to these countries Our trade with them has augmented considerably especially since the annexation of Alsace Lorraine to Germany which secured for us the cheapest, because it is the shortest railway route to these provinces and Switzerland The consequent accession of trade is one of the chief reasons of the enormous increase of our corn imports (*a*)

That this trade will go on developing there is no doubt The progress realised until now was obtained under a system of partial free trade We may reasonably hope to enjoy one day the blessings of complete commercial freedom What might then be the expansion of our trade? There is certainly every reason to believe that it would develop in a similar manner as the British corn trade has done since 1846 when the great economical reform of Sir ROBERT PEEL was completed by the repeal of the corn law It may therefore be interesting to give here some statistics concerning this trade

We extract from M Culloch's supplemental note to Adam Smith's Wealth of Nation the following table of the imports of wheat and flour of the 12 years ending 1846 —

Imports of Wheat and Wheat Flour into the United Kingdom during each of the 12 years ending 1846

183?	Qtr 1 ? 8	1839	Qtrs ?C315 ?	1843	Qtr 941 30
1836	1(8(17	1840	1 ??3 3?3	1844	1 100 3?1
183? (*b*)	1 8 1	1841	40? ? 1	184? ( )	8
1838	1 11 160	181?	?1J	1846 (*d*)	1 13((8?

Th[illegible] Qt 1 334 304
A[illegible] 15
[illegible] 186[illegible] 1873 [illegible] 10 736 110
[illegible]

From a comparison of our above tables of imports for the years of 1841 to 1853 and 1870 79 it will be observed that a similar growth has taken place in our trade

The average of our imports in the former period was [illegible] C 3 376
and in the latter 4 330 043
thus an increase of [illegible] f 1 7

If such an increase has been realised under much less favorable circumstances than those which existed in the United Kingdom what would be our progress if our trade were allowed to develop freely?

Every experienced merchant will perceive at once the immense margin for expansion still existing here

There is however another stimulus which has come into play quite recently and which may in the end prove more powerful than all the internal causes which favored the development of the international corn trade in the past

A good deal of uneasiness has been created in agricultural circles by the enormous importation of foreign grain especially from America, in 1878 in spite of the low prices then ruling The question has been earnestly discussed since whether the old European agricultural system will be able to stand the competition of the large new and cheaply producing countries fore most of which stand the United States This competition was not very dangerous as long as the cost of transport was so heavy that only with pretty high prices ruling in Europe an extensive import from such distant countries could take place But now that railways have been so

(*a*) A l g Alsace and Lorraine were French [illegible] es, [illegible] the French [illegible] which [illegible] tage and [illegible] petit [illegible] difficult [illegible] ged immediately after [illegible]
(*b*) In 1837 [illegible] crops were considerably d[illegible]
(*c*) First appearance of the potato disease
(*d*) The worst [illegible] record

extensively constructed and freights have become so much reduced by the building of large sized vessels and steamers all supplied with improved machinery there can hardly be any doubt that whenever crops are abundant in such new countries (and they will very likely always be so in one or the other) a large supply of grain from thence may be expected even at such moderate prices as were current in 1878. It must not be lost sight of that the United States will very likely not remain the only country producing grain on an immense scale. Canada seems to have good prospects in this respect. In India and Australia the production is fast increasing, and last not least the River Plate States bid fair to become soon an important source of supply.

Very competent authorities in Europe(1) have contended that unless the old European agricultural system be entirely reformed the landed interest is threatened with complete ruin and that protective duties and even much higher ones than those recently introduced in Germany would be quite unavailing to prevent this. The exclusive growing of corn is condemned and the substitution of green crops combined with cattle breeding and the industries connected therewith is recommended. This would imply a large reduction of the European production of grain and a corresponding increase of foreign imports.

From the foregoing we think we may safely draw the conclusion that the continental corn trade is more and more deserving the full attention of grain shippers in all parts of the world and that of all the European continental markets where an extensive and regular business in grain may be done, the most important is incontestably **Antwerp**.

GOVERNMENT OF INDIA

HOME REVENUE AND AGRICULTURAL DEPARTMENT

RE ARRANGEMENT OF THE FIRST FOUR GRADES OF EXTRA ASSISTANT COMMISSIONERS IN THE PROVINCE OF ASSAM

No ..3 dated Simla the 28th May 1880

RESOLUTION—By the Government of India Home Revenue and Agricultural Department

The Governor General in Council is pleased to sanction the following re arrangement of the first four grades of Extra Assistant Commissioners in the Province of Assam namely —

First grade one appointment on Rs 600 per mensem
Second grade two appointments on Rs 500 per mensem
Third grade four appointments on Rs 400 per mensem
Fourth grade four appointments on Rs 300 per mensem

ORDER —Ordered that a copy of this Resolution be forwarded to the Department of Finance for information in continuation of endorsement No 16F dated the 11th ultimo and that the Resolution be published in the *Gazette of India*

GOVERNMENT OF INDIA

PUBLIC WORKS DEPARTMENT

REVENUE REPORT OF IRRIGATION WORKS IN THE NORTH WESTERN PROVINCES FOR THE YEAR 1878 79

Nos 112 12 I dated Simla the 25th May 1880

RESOLUTION—By the Government of India Public Works Department (Civil Works—Irrigation)

Read—

Letter No 1616A dated 30th December 1879 from the Secretary to the Government of the North Western Provinces Public Works Department Irrigation Branch and its enclosures being the Irrigation Revenue Report of the North Western Provinces for the year 1878 79 and a Resolution by His Honor the Lieutenant Governor reviewing the Report

OBSERVATIONS —The operations of the year under review show better results than even those of the previous year. The aggregate area irrigated was

(1) A [illegible] this subject [illegible] Landwirthschaft und Administrator der Gut wirthschaft [illegible] Emil Strauss

1 736,651 acres, larger by 275,225 acres than the area obtained in 1877 78 and 294 733 acres larger than that of 1868 69, which was the largest area obtained previous to 1877 78 A portion of the increase on the Ganges Canal was due to the opening of extensions, the water rate on which it is stated, amounted to Rs 9 771, but the area of this irrigation is not given The irrigation from the Lower Ganges Canal commenced in the year under review and amounted to 16 695 acres The irrigation from the Agra Canal was not so extensive as in the previous year, but the prospects of this canal are still very favorable

The value of crops irrigated by the canals is estimated at Rs 6 81 47 506

The net revenue (direct and indirect) yielded by the works amounted to Rs 38,62 282 and exceeded the interest charge for the year by Rs 18 16 454

The balance of interest charges at debit of the works at the close of the year was Rs 50 97 192 and there is every prospect that this debt will be cleared off in the course of a few years

2 The investigations as to loss of water by absorption and evaporation referred to in previous reports are not mentioned in the report under review The results formerly given were for the Ganges Canal only A comparison of the results of such investigations on other canals would be instructive in showing what effect if any on the amount of absorption is due to section of canal channel and velocity of current The loss of water between the distributary head and the field especially in village channels is also a matter of much importance for investigation

3 The traffic on the navigable canals shows little improvement The rates of carriage of goods on the Ganges Canal for the last two years are given in a table at paragraph 7 of the Superintending Engineer's Report but the weights carried at these rates are not stated In the report for the ensuing year it should be mentioned what obstructions to navigation if any still exist on the Ganges Canal One is referred to in the Report under review namely the intermittent supply in the Cawnpur Branch but it is not known whether the bridges have all been raised to the required height or whether the measures for the reduction of the velocity of the current in the main canal have been carried out in full The steady increase in the salt traffic from Muradnuggar to Cawnpur is a hopeful sign

4 It is noticed that the demands outstanding show a considerable reduction

5 In paragraph 1 of the Chief Engineer's Report the total expenditure to end of 1878 79 on Irrigation Works in the North Western Provinces from loan money on which the Government of India pays interest, is shown at Rs 2 80,78 025 but the correct amount as recorded in the Finance and Revenue Accounts of the Government of India is Rs 2,82,32,840 as follows —

	R
Total outlay to end of 1878 79	2,81 91 300
Deduct outlay on the abandoned Eastern Ganges Canal	61 460
Net Total	282 32 840

6 In the Finance and Revenue Accounts of the Government of India a debit and credit of Rs 2052* and Rs 2230† respectively were taken into account No mention has been made of them in the report This omission is probably due to the preparation of the report prior to the receipt of intimation of these adjustments

* Charges for ...	R
Ganges Canal	18
Agra	113
Eastern Jumna Canal	52
Total	20 2
† Amount of ... Ganges Canal	2 30

7 The condition and prospects of the canals in the North Western Provinces appear to be very satisfactory

---

ORDER —Ordered that a copy of this Resolution and of the Report and Resolution by the Local Government be forwarded to the Secretary of State

and to the Finance and Commerce and the Home, Revenue and Agricultural Departments of the Government of India for information

Also that copy of this Resolution be forwarded to the Government of the North Western Provinces and Oudh Public Works Department Irrigation Branch for information and guidance and to the Local Governments and Administrations noted in the margin in the Public Works Department Irrigation Branch for information and to the Foreign Department for communication to the Government of Mysore

[illegible] Bengal [illegible]

Also that this Resolution and the Resolution of the Local Government be published in the Supplement to the *Gazette of India*

J CROFTON MAJOR GENL, R E,
Depy Secy to the Govt of India

N [illegible] (No [illegible] 18[illegible])

RESOLUTION By His Honor the Lieutenant Governor North Western Provinces

The Lieutenant Governor has read with great interest and satisfaction the record of the good work done by the irrigation canals of the North Western Provinces which is contained in the Chief Engineer's review of their working during the past year of drought

2 The very large area irrigated (more than [illegible],00 square miles) shows with what diligence and care the Superintending and Executive Canal Officers distributed the limited volume of water which was available for the supply of the various canals and what a marked effect their unsparing and self denying exertions must have had in mitigating the drought and scarcity of the year

3 The Lieutenant Governor has much pleasure in recording his hearty acknowledgment of these exertions and in bringing to the notice of the Government of India the good service rendered to him during a season of the greatest anxiety and public distress by Mr Christian Anderson the Officiating Chief Engineer of the Irrigation Department in these Provinces and the officers under his orders

4 The table C given in para [illegible] of the Chief Engineer's review shows to what a satisfactory financial position the canals of the North Western Provinces attained during the year under review and that they were not only invaluable from an administrative point of view in aiding the Government to ward off the effects of famine but financially remunerative also It must however be remembered that this satisfactory financial position has been reached under the stimulus of severe drought and that the state of affairs set forth in the Chief Engineer's review is exceptionally prosperous We may not unreasonably hope now for a return to years of good rainfall when the expenses of canal maintenance will unavoidably increase and the revenues decrease The prudence of avoiding too sanguine an estimate of the progress of any of the new canals may be seen from the returns of the Agra Canal of which the revenue has fallen off owing to causes over which the irrigation officers had no control notably epidemic fever and the timorous suspicious nature of the cultivators

5 It is well that these facts should be borne in mind and ideas of the large capacities of irrigation canals as a source of revenue tempered with moderation and the recollection of recurring cycles of maximum rainfall when floods are most destructive and canal water is a drug in the market

LEGISLATIVE DEPARTMENT

NOTIFICATION

Simla, the 19th June 1880

No 11 — The following statutes are published for general information —

43 VIC, CHAPTER 3

An Act to amend the law relating to the salaries and allowances of certain offices in India, and for other purposes relating thereto

[15th March 1880]

Be it enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal and Commons, in this present Parliament assembled and by the authority of the same as follows —

Short title

1 This Act may be cited as The Indian Salaries and Allowances Act 1880

Power to regulate certain allowances for equipment, &c

2 It shall be lawful for the Secretary of State in Council of India from time to time to fix, alter or abolish the allowances for equipment and voyage of the several officers specified in the first schedule to this Act, or any of them

Power to regulate certain ecclesiastical salaries

3 It shall be lawful for the Secretary of State in Council of India from time to time to fix and alter the salaries, and to fix, alter or abolish the allowances of the Bishops and Archdeacons of Calcutta Madras and Bombay, or any of them

Provided that nothing in this section shall affect the salary or allowances of any person who is such Bishop or Archdeacon at the passing of this Act

Charges on Indian revenues not to be increased

4 Nothing in this Act shall authorise the imposition of any additional charge on the revenues of India

Repeal of enactments in second schedule

5 The enactments described in the second schedule to this Act are hereby repealed to the extent in that schedule mentioned

SCHEDULES

First Schedule

The Governor General of India and the Members of his Council

The Governors of Madras and Bombay and the Members of their Councils

The Commander in Chief of the Forces in India

The Commanders in Chief of Madras and Bombay

The Bishops and Archdeacons of Calcutta, Madras and Bombay

Second Schedule

53 Geo 3 c 155 in part.

An Act for continuing in the East India Company for a further term the possession of the British territories in India, together with certain exclusive

privileges for establishing further regulations for the government of the said territories, and the better administration of justice within the same, and for regulating the trade to and from the places within the limits of the said Company's charter

In part, namely —

Section eighty nine, from "and the said Court of Directors" to the end of the section

An Act for defraying the charge of retiring pay, pensions and other expense of that nature of His Majesty's forces serving in India for establishing the pensions of the bishops archdeacons and judges for regulating ordinations and for establishing a Court of Judicature at Bombay

4 Geo 4 c 71 in part

In part, namely —

In section three the words "and to any such Archdeacon who shall have exercised in the East Indies or parts aforesaid for ten years the office of Archdeacon," and the words "or Archdeacon" at the end of this section

An Act for effecting an arrangement with the East India Company and for the better government of His Majesty's Indian territories till the thirtieth day of April, one thousand eight hundred and fifty four

3 & 4 Will 4, c 85 in part

In part namely —

Section seventy six from "and the said Court of Directors" to the end of the section, and section ninety one

43 Vic Chapter 9

An Act to provide during twelve months for the Discipline and Regulation of the Army

[19th March 1880]

Whereas the raising or keeping a standing army within the United Kingdom of Great Britain and Ireland in time of peace unless it be with the consent of Parliament, is against law

And whereas it is adjudged necessary by Her Majesty and this present Parliament that a body of forces should be continued for the safety of the United Kingdom and the defence of the possessions of Her Majesty's Crown and that the whole number of such forces should consist of one hundred and thirty one thousand eight hundred and fifty nine men including those to be employed at the depôts in the United Kingdom of Great Britain and Ireland for the training of recruits for service at home and abroad but exclusive of the numbers actually serving within Her Majesty's Indian possessions

And whereas it is also judged necessary for the safety of the United Kingdom and the defence of the possessions of this realm that a body of Royal Marine forces should be employed in Her Majesty's fleet and naval service under the direction of the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral aforesaid

And whereas the said Marine forces may frequently be quartered or be on shore or sent to do duty or be on board transport ships or merchant ships or vessels, or ships or vessels of Her Majesty, or other ship or vessels or they may be under other circumstances in which they will not be subject to the laws relating to the government of Her Majesty's forces by sea

And whereas no man can be forejudged of life or limb, or subjected in time of peace to any kind of punishment within this realm by martial law, or in any other manner than by the judgment of his peers and according to the known and established laws of this realm, yet nevertheless, it being requisite for the retaining all the before mentioned forces, and other persons subject to Military law, in their duty, that an exact discipline be observed, and that persons belonging to the said forces who mutiny or stir up sedition, or desert Her Majesty's service or are guilty of crimes and offences to the prejudice of good order and Military discipline be brought to a more exemplary and speedy punishment than the usual forms of the law will allow

And whereas the Army Discipline and Regulation Act 1879 will expire—

42 & 43 Vic c 33

(a) in the United Kingdom, the Channel Islands and the Isle of Man on the thirtieth day of April, one thousand eight hundred and eighty and

(b) elsewhere in Europe, inclusive of Malta, also in the West Indies and America, on the thirty first day of July one thousand eight hundred and eighty, and

(c) elsewhere, whether within or without Her Majesty's dominions, on the thirty first day of December, one thousand eight hundred and eighty

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons in this present Parliament assembled, and by the authority of the same as follows —

Short title.

1 This Act may be cited for all purposes as The Army Discipline and Regulation (Annual) Act, 1880

Army Discipline and Regulation Act (42 & 43 Vic c 33) to be in force for specified times

2 The Army Discipline and Regulation Act, 1879, shall be and remain in force until the dates hereinafter mentioned, and no longer unless otherwise provided by Parliament that is to say —

(1) within the United Kingdom, the Channel Islands and the Isle of Man from the thirtieth day of April one thousand eight hundred and eighty to the thirtieth day of April one thousand eight hundred and eighty one, both inclusive, and

(2) elsewhere in Europe inclusive of Malta, also in the West Indies and America from the thirty first day of July, one thousand eight hundred and eighty, to the thirty first day of July, one thousand eight hundred and eighty-one, both inclusive and

(3) elsewhere whether within or without Her Majesty's dominions, from the thirty first day of December, one thousand eight hundred and eighty, to the thirty first day of December, one thousand eight hundred and eighty one, both inclusive

42 & 43 Vic c 33

The Army Discipline and Regulation Act, 1879, while in force shall apply to persons subject to Military law, whether within or without Her Majesty's dominions

A person subject to Military law shall not be exempted from the provisions of the Army Discipline and Regulation Act, 1879, by reason only that the number of the forces for the time being in the service of Her Majesty, exclusive of the Marine forces is either greater or less than the number hereinbefore mentioned.

42 & 43 Vic c 33

3 There shall be paid to the keeper of a victualling house for the accommodation provided by him in pursuance of the Army Discipline and Regulation Act, 1879, the prices specified in the schedule hereto

Prices in respect of billeting 42 & 43 Vic c. 33

SCHEDULE

Accommodation to be provided.	Maximum price
Lodging and attendance for soldier where hot meal furnished	Twopence halfpenny per night
Hot meal as specified in Part I of the second schedule to the Army Discipline and Regulation Act 1879	One shilling and one penny halfpenny each
Where no hot meal furnished lodging and attendance and candles vinegar salt and the use of fire and the necessary utensils for dressing and eating his meat	Fourpence per day
Ten pounds of oats twelve pound of hay and eight pounds of straw per day for each horse	One shilling and ninepence per day
Lodging and attendance for officer	Two shillings per night

NOTE —An officer shall pay for his food.

43 VIC, CHAPTER 10

An Act to enable the Secretary of State in Council of India to raise money in the United Kingdom for the purpose of paying off or redeeming debentures of the East Indian Railway Company

[19th March 1880]

Whereas by virtue of the East Indian Railway Company Purchase Act 1879 the undertaking of the East Indian Railway Company, and all other the property of the said Company save and except as therein mentioned, have been transferred to and vested in the Secretary of State in Council of India, hereinafter called the Secretary of State subject to such debts and liabilities as have been incurred by the said Company to the East India Company or to any person or persons with the sanction of the East India Company or of the Secretary of State, and to interest on such of the said debts as carry interest

42 & 43 Vic c 206

And whereas among such debts and liabilities are included the principal moneys and interest secured by the debentures mentioned in the schedule hereto

And whereas the principal moneys secured by the said debentures amounting in all to two million nine hundred and fifty thousand pounds, will become payable at the respective times specified in the said schedule

And whereas it is expedient that provision should be made for paying off or redeeming the said debentures as and when the principal moneys secured thereby become payable

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons in this present Parliament assembled, and by the authority of the same, as follows —

1 It shall be lawful for the Secretary of State at any time or times to raise in the United Kingdom for the service of the Government of India such sum or sums of money not exceeding in the whole two million nine hundred and fifty thousand pounds as may be required for the purpose of paying off or redeeming the principal moneys secured by the debentures specified in the schedule hereto, such sum or sums to be raised by the creation and issue of bonds, debentures or capital stock bearing interest or partly by one of such modes and partly by another or others

Power to Secretary of State to raise money not exceeding £2,950,000

2 All bonds issued under the authority of this Act may be issued under the hands of two members of the Council of India and countersigned by the Secretary of State or one of his under secretaries, or his assistant under secretary and shall be for such respective amounts payable after such notice, and at such rate or rates of interest, as the Secretary of State may think fit

As to issue of bonds

3 All debentures issued under the authority of this Act may be issued under the hands of two members of the Council and countersigned as aforesaid for such respective amounts and at such rate or rates of interest as the Secretary of State may think fit and shall be issued at or for such prices and on such terms as may be determined by the Secretary of State

As to issue of debentures

4 All debentures issued under the authority of this Act shall be paid off at par at a time or times to be mentioned in such debentures respectively and the interest on all such debentures shall be paid half yearly on such days as shall be mentioned therein and the principal moneys and interest secured by such debentures shall be payable either at the treasury of the Secretary of State in London or at the Bank of England

As to repayment of principal and interest of debentures

5 All or any number of the debentures issued under the authority of this Act and all right to and in respect of the principal and interest moneys secured thereby shall be transferable by the delivery of such debentures, and the coupons for interest annexed to any debenture issued under the authority of this Act shall also pass by delivery

Debentures and coupons to be transferable by delivery

6 Any capital stock created under the authority of this Act shall bear such a rate of interest as the Secretary of State may think fit and such capital stock may be issued on such terms as may be determined by the Secretary of State, and any such capital stock may bear interest during such period, and be paid off at par at such time as the Secretary of State may prescribe previously to the issue of such capital stock

Interest &c of capital stock

7 In case of the creation and issue of any such capital stock there shall be kept either at the office of the Secretary of State in London or at the Bank of England books wherein entries shall be made of the said capital stock and wherein all assignments or transfers of the same or any part thereof shall be entered and registered and shall be signed by the parties making such assignments or transfers or if such parties be absent by his her or their attorney or attorneys thereunto lawfully authorized by writing under his her or their hands and seal to be attested by two or more credible witnesses and the person or persons to whom such transfer or transfer shall be made may respectively underwrite his her or their acceptance thereof and no other mode of assigning or transferring the said capital stock or any part thereof or any interest therein shall be good and available in law and no stamp duties whatsoever shall be charged on the said transfers or any of them

Transfer books of such capital stock to be kept

8 The whole amount of the principal moneys to be charged on the revenues of India under this Act shall not exceed two million nine hundred and fifty thousand pounds

Amount to be charged on revenues of India

9 Upon or for the repayment of any principal money secured under the authority of this Act the Secretary of State may at any time borrow or raise by all or any of the modes aforesaid all or any part of the amount of principal money repaid or to be repaid and so from time to time as all or any part of any principal money under this Act may require to be repaid but the amount to be charged upon the revenues of India shall not in any case exceed the principal money required to be repaid

Power to raise money for payment of principal money

10 All bonds and debentures to be issued under this Act and the principal moneys and interest thereby secured and all capital stock to be issued under this Act and the interest thereon shall be charged on and payable out of the revenues of India in like manner as other liabilities incurred on account of the Government of India

Securities &c to be charged on revenues of India

11 The provisions contained in section four of the Act of the session holden in the fifth and sixth years of King William the fourth chapter sixty four with respect to the composition and agreement for the payment by the East India Company of an annual sum in lieu of stamp duties on their bonds and the exemption of their bonds from stamp duties shall be applicable with respect to the bonds and debentures to be issued under the authority of this Act as if such provisions were here repeated and re-enacted with reference thereto

Provisions as to composition for stamp duties on East India bonds extended to bonds and debentures issued under this Act

12 All provisions now in force in any wise relating to the offence of forging or altering or offering uttering disposing of or putting off knowing the same to be forged or altered any East India bond, with intent to defraud, shall extend and be applicable to and in respect of any debenture or bond issued under the authority of this Act

Forgery of debentures and bills to be punishable as forgery of East India bonds

13 This Act shall not prejudice or affect any power of raising or borrowing money vested in the Secretary of State at the time of passing thereof

Saving borrowing powers of Secretary of State

14 Any capital stock created under this Act shall be deemed to be East India Stock within the Act of the twenty second and twenty third Victoria, chapter thirty five section thirty two, unless and until Parliament shall otherwise provide and any capital stock created under this Act shall be deemed to be and shall mean India Stock within the Act of the twenty sixth and twenty seventh Victoria chapter seventy three, anything in the said last mentioned Act to the contrary notwithstanding

Stock created under this Act to be deemed East India Stock

15 The provisions contained in the third section of the Act of the thirty-third and thirty fourth Victoria, chapter ninety-three, and all other enactments in the said Act relating to or affecting such provisions shall be extended and be applicable to any capital stock created under this Act

Sec 3 &c of 33 & 34 Vic c 93 extended to capital stock created under this Act.

16 The provisions contained in the Act of the thirty fourth and thirty fifth Victoria, chapter twenty nine shall be extended and be applicable to all capital stock issued or to be issued by the Secretary of State under the authority of Parliament

34 & 35 Vic c 29 extended to all capital stock issued by the Secretary of State under the authority of Parliament.

17 This Act may be cited as the East India Loan (East Indian Railway Debentures) Act, 1880

43 VIC, CHAPTER 11

An Act to make Powers of Attorney and requests for Transmission of Dividend Warrants by Post relating to India Five per centum Stock applicable to India Four per centum Stock

[*19th March* 1880]

Whereas in accordance with the conditions under which India five per cent stock has been issued the Secretary of State in Council of India has given notice that it is his intention to redeem that stock at par on the fifth day of July, one thousand eight hundred and eighty

And whereas the said Secretary of State has offered to holders of India five per cent stock in exchange for such stock and in lieu of repayment in cash, a like amount of India four per cent stock bearing interest from the fifth day of April one thousand eight hundred and eighty, together with the payment on the fifth day of July, one thousand eight hundred and eighty of one pound ten shillings per cent on the amount of stock exchanged so as to make up a sum equal to interest thereon at the rate of five pounds per cent per annum for the half year ending on the fifth day of July, one thousand eight hundred and eighty

And whereas it is expedient that powers of attorney and requests for transmission of dividend warrants by post relating to India five per cent stock should be made to extend and apply to India four per cent stock

Be it therefore enacted by the Queen's most Excellent Majesty by and with the advice and consent of the Lords Spiritual and Temporal and Commons, in this present Parliament assembled and by the authority of the same as follows —

Short title

1 This Act may be cited as India Stock (Powers of Attorney) Act 1880

Powers of attorney for sale and transfer of India five per cent stock to apply to India four per cent stock

2 Every power of attorney in force at the time of the passing of this Act for the sale and transfer of any India five per cent stock shall unless it be legally revoked or become void remain in force for the purpose of enabling the attorney or attorneys therein named or referred to to receive and give receipts for any principal sum of such India five per cent stock and to sell and transfer any India four per cent stock that may be accepted in exchange for such five per cent stock and to receive the consideration money and give receipts for the same

Powers of attorney for receipt of dividends on India five per cent stock to apply to India four per cent stock

3 Every power of attorney in force at the time of the passing of this Act for the receipt of dividends on any India five per cent stock shall unless it be legally revoked or become void, remain in force for the purpose of enabling the attorney or attorneys therein named or referred to to receive the dividends to accrue on India four per cent stock and also to receive the said payment of one pound ten shillings per cent on India five per cent stock which will become payable on the fifth day of July, one thousand eight hundred and eighty

Requests for post of dividend warrants in respect of India five per cent stock to apply to India four per cent stock

4 Every request for the transmission of dividend warrants by post relating to India five per cent stock in force at the time of the passing of this Act or which may hereafter be made in pursuance of the Act of the 34th and 35th Victoria Chapter 29 shall, unless it be legally revoked or become void extend and apply to India four per cent stock as if the stock mentioned in such request were therein described as India four per cent stock

PART V

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[Third publication]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 31st May 1880 and was referred to a Select Committee —

No 8 of 1880

A Bill to exempt certain persons and property from Municipal taxation

Preamble

WHEREAS it is expedient to empower the Governor General in Council to exempt from taxation certain persons and property in municipalities It is hereby enacted as follows —

Power to exempt from taxation

1 Notwithstanding anything contained in any enactment for the time being in force the Governor General in Council may by an order in writing prohibit the levy by a Municipal Committee of any tax—

(*a*) on any person subject to the Army Discipline and Regulation Act 1879 or the Indian Articles of War or

(*b*) on any property of Her Majesty

The Governor General in Council may by a like order rescind any such prohibition

Municipal Committee defined

2 In this Act "Municipal Committee" includes a Municipal Corporation or a body of Municipal Commissioners constituted by or under the provisions of any enactment for the time being in force

STATEMENT OF OBJECTS AND REASONS

By the twenty fourth section of the Cantonments Act 1880 the Governor General in Council is empowered to prohibit the levy of any tax in a cantonment or to exempt any person or class of persons from the operation of any tax leviable there

2 This power was conferred chiefly with a view to the exemption of military men in cantonments situate within the limits of municipalities from certain descriptions of municipal taxation There are however cases in which owing to the want of accommodation in cantonments or to some other cause military men are compelled to reside within the limits of a municipality but out of cantonments In such cases the power in question is inapplicable and it was accordingly proposed by the Select Committee on the Cantonment Bill that the defect should be supplied by a provision to be inserted in the Bill for the control of Municipal taxation for the introduction of which leave had then been granted

3 As however that Bill is not at present to be proceeded with it has been thought desirable to make the necessary provisions in a separate Bill and the present Bill has accordingly been prepared for this purpose

4 The Bill also provides for the exemption of Government property from municipal taxation, recent experience having shown such a power to be necessary

GOVERNMENT OF INDIA

PUBLIC WORKS DEPARTMENT

REVENUE REPORT ON IRRIGATION WORKS IN AJMERE AND MHAIRWARRA FOR THE YEAR 1877 78

No 13 I I dated Simla 2 Jun 1880

RESOLUTION—By the Government of India Public Works Department

Read—

Letter No 317S dated 18th November 1879 from the Agent Governor General for Rajputana, and its enclosure being the Revenue Report on Irrigation Works in Ajmere and Mhairwarra for the year 1877 78

OBSERVATIONS —The Revenue Report now received was prepared and despatched before the orders of the Government of India on the report for the previous year were issued, so that the information then called for is not fully furnished in the present report It is understood that a Committee has been convened under the orders of the local Administration to consider the questions then raised

2 The year under review was one of deficient rainfall so much so that the tanks were not even filled for the rabi irrigation The revenue is Rs 11 587 less that that of last year, and though the working expenses were reduced by nearly Rs 8 000 a deficit is shown of Rs 9 189 The direct financial result was thus a failure but it is nevertheless satisfactory that the scanty rain that fell was so far utilised by the works, without which latter the position would have been far more serious

3 The demand for water from the new tanks appears to be continually increasing and so far the prospects of these works appear to be favorable, but as yet the interest charges amount to Rs 39,571 while the revenue realised falls short of the working expenses by Rs 2 799

4 It is satisfactory to note that every effort is being made to reduce the working expenses, these have been increasing largely on the old tanks while on the new tanks, though they have already been somewhat reduced, they are still extremely high

5 From the remarks in paragraph 19 of the report, to the effect that the old tanks had paid their expenses with large surplus profits before they were transferred to the charge of the Public Works Department, and that since that date they have been unremunerative, it would appear that the old system, under which there was hardly any special establishment employed for the maintenance of the tanks, which were looked after mostly by the tehseel officials, was financially preferable to the Public Works control, and that the professional supervision of late years has been a mistake The Government of India would be glad to know whether this is the case it may be that improvements effected since the works came under the present system of management have not been clearly exhibited, nor full credit given to the works for their effects on the land revenue, which is confessedly mainly dependent on them

6 The additions to capital during the year are stated at Rs 65,195 bringing up the total to the end of the year to Rs 14,38,892 But the charges for interest on the construction cost of the tanks have been included in the capital outlay, as detailed in table A paragraph 2, of the Report The interest charges should according to the orders in force, be kept separate, and not added to the capital outlay

7 In paragraph 5 of the Report it is stated that the capital expenditure on the tanks is entirely from the "ordinary" funds It has apparently been lost sight of that Rs 1,86 980 of the total outlay were expended previous to 1874 75 from the Productive Public Works funds (then called "extraordinary"), and that permission to write back this amount to "ordinary' has been refused under the orders of the Right Hon'ble the Secretary of State

8 Future Revenue Reports of these works should be accompanied by a map showing the positions of as many of the works as possible

---

ORDER —Ordered, that a copy of this Resolution be forwarded to the Governor General s Agent and Chief Commissioner of Rajputana for information and guidance

Also, that copy of the Resolution and of the Report be forwarded to the Governments of Madras Bombay Bengal North Western Provinces and Oudh and the Punjab, in the Public Works Department Irrigation Branch, for information

Also, that copy of the Resolution and of the Report be forwarded to the Home, Revenue and Agricultural Department, and to the Department of Finance and Commerce for information

Also that copy of the Resolution be published in the Supplement to the *Gazette of India*

J CROFTON, *Major General, R E,*
Deputy Secretary to the Government of India

GOVERNMENT OF INDIA

HOME, REVENUE AND AGRICULTURAL DEPARTMENT

UTILIZATION OF CITY REFUSE AS MANURE

No 11o1 dated Poona the 31st March 1880

MEMORANDUM—By J H E HART Esq C E Superintending Engineer for Irrigation

Submitted for the information of Government in the Public Works Department, Irrigation, with a copy of this office No 5026, dated 12th November 1879, and Government Resolution No 3222, dated 20th November 1879 (General Department)

2 The Superintending Engineer for Irrigation is induced to draw the special attention of Government in the Irrigation Department to the importance of the information furnished in these reports by the officers of the Poona Municipality on the subject of the use of poudrette as a manure

3 The précis of correspondence, circulated under Government Memorandum (General Department) No 2633, dated 31st August 1875, shows that the

use of poudrette was up to that time almost entirely unknown in this Presidency, except on a restricted scale in a few places

4 The development of the revenue realised by the Poona Municipality from the sale of poudrette, since the opening of the Mutha Canals, is of great importance The manure supplies a want essential to any great extension of garden cultivation and the revenue realised by the Municipality is so considerable that it may fairly be hoped other Municipalities will make some endeavour to turn to account the sewage of their towns more especially in places like Sholápur, Karar, Sátára, &c, situated in the vicinity of large irrigation works It is believed that at the instigation of Mr Burke the manufacture and sale of poudrette has been taken in hand by the Sholápur Municipality within the last few years, and with satisfactory results Detailed reports on the subject might be asked for

5 It appears from the papers that originally a system of preparing the poudrette by heating the night soil in furnaces was experimentally tried at Poona but was subsequently abandoned as being too elaborate The "sun drying process was then resorted to and the result is approved both by sanitary and medical officers and by the purchasers It may be noted that this process is almost exactly that described as followed in Násik, *vide* the precis referred to in paragraph 3

6 The following are some of the most important matters on which information is obtainable in connection with the manufacture and sale of poudrette in Poona —

Population of city 90,436

Night soil 41 cart loads = 575 cubic feet per day This shrinks in drying to 430 cubic feet

Street sweepings 65 to 75 cart loads = 1 950 cubic feet per day When burnt and sifted produce is 300 cubic feet of ashes

Poudrette 430 cubic feet of night soil mixed with 300 cubic feet of ashes produce 730 cubic feet of poudrette per day or 266 150 cubic feet per annum

The price realised is 1 rupee per cubic yard or 27 cubic feet The annual value of the poudrette is thus Rs 9 870 at current rates This is incorrectly stated by the Secretary Poona Municipal Committee as Rs 4 934

The cost of conveying night soil and sweepings to the depôt is shown as Rs 11 736 The cost of manufacturing the poudrette is stated as Rs 6 264 The cost of conveyance has of course to be incurred in any case The manufacture of the poudrette will yield a very handsome profit to the Municipality The Municipal Secretary notes that the price of the manure is susceptible of increase and the cost of manufacture of reduction

The revenue from the sale has increased from Rs 766 in 1874 75 to Rs 7,438 during the first 9 months of the current year (1879 80)

7 The remarks in paragraph 10 of the Secretary's letter are worthy of particular attention He states that 5 years ago cultivators 'would not touch the poudrette" and " could not be induced to take it away at even a nominal charge At the present moment the outturn of manure is not enough to keep pace with the demand, and it has become necessary to take special precautions that the poudrette is not taken away in its raw state, which the cultivators sometimes attempt to do They frequently pay for manure to the Municipality from 4 to 6 months *in advance* in order to ensure a timely supply "

8 The Superintending Engineer recommends that Mr Plunkett s letter and the report by Mr Narso Ramchandra, Secretary, Poona Municipal Committee, be printed and copies circulated to all Presidents of Municipalities and to Cantonment Committees Also that the papers be printed in the *Government Gazette* Copies might also be furnished to the Government of India, *vide* Government Resolution (General Department) No 850 of 23rd March 1880, and to the Inspector General of Prisons

No 96 dated Poona Municipal Office the 14th January 1880

From—A H Plunkett Esq City Magistrate and Chairman Poona Municipality
To—The Collector and President Poona Municipality

With reference to Government Resolution No 3222 of the 20th of November last in the General Department I have the honor to report that the following sums were realised by the sale of poudrette manufactured by the Poona Municipality during the past five years —

Year	Approximate quantity manufactured in cubic feet	Amount realised in Rupees	Remarks
1874 75	60,000	766	All sold during the year
1875 76	90,000	1,3[illegible]8	
1876 77	120,000	2,632	
1877 78	150,000	2,810	About 2,500 cubic feet remained unsold
1878 79	2[illegible]0,000	1,356	About 100,000 cubic feet remained unsold The selling price was increased 50 per cent
1879 80 (up to 1st January 1880 9 months)	200,000	[illegible],438	About Rs 2,300 were obtained from the sale of old stock

2 The mode of preparing the poudrette advocated by Rao Bahadur Professor Keru Luxman Chhatre in his report (copy of which is appended for ready reference),* was abandoned as too elaborate and expensive after a very short trial The mode now adopted is described in the accompanying report of the Municipal Secretary

* Not printed

3 I beg to remark that the present mode of preparing the poudrette has the approval of the medical profession and the Sanitary Commissioner of Bombay and to add that the value of the poudrette as a manure is recognised by the agricultural classes the demand for it being steadily on the increase since the opening of the Mutha Canals

Report on the disposal of the night soil of the City of Poona and its preparation into poudrette

The process adopted may be called the "sun drying process" It consists in exposing night soil in shallow beds covered with ashes to the sun to dry, and when perfectly dried in heaping it away to be sold to agriculturists for manure

Night soil

2 About forty four card loads of night soil are daily collected in the city and carted out to a depot at the village of Dhankawari 2½ miles away to the south of the city from its extreme limits Twenty two carts each of a capacity of 18 cubic feet are employed They make two trips a day They are barrel shaped (5 9 long and 2 diameter) and are perfectly air tight They have a mouth for filling on the top at the fore end covered with an air tight trap lid and an opening at the left end at bottom for emptying, covered by a close fitting short piston which is worked up and down by a screw worked from the top of the cart

3 The carts are taken away three fourths full, each containing about thirteen cubic feet of matter The space left vacant is required partly for the location of the gas which is generated in the night soil when exposed to the sun and stirred by the jolting of the carts and partly for preventing the night soil from spilling or overflowing as it rises while fermenting and while the gas is produced

4 The night soil collected is in a semi liquid state, as a great quantity of water used by people for ablution mixes with it from which it cannot be separated About 575 cubic feet of such soil is collected daily

Ashes

5 Street and house sweepings collected from the dust bins of the city are carted out and burnt into ashes, which are afterwards carted out to the depôt

referred to in paragraph 2 above The carts are of open box form, 5 feet long, 3 feet broad and 2 feet deep, which make a capacity of 30 cubic feet 25 carts are employed, and they make three trips daily Allowing for stoppages accidents &c, about 65 cart loads of sweepings, consisting of house ashes, stable litter sweepings, and a quantity of road dust and brickbats are taken out daily The total refuse thus taken out is about 1,950 cubic feet When burnt, it is reduced to $\frac{2}{13}$ths of its bulk, or about 300 cubic feet of pure ashes

Deodorisation

6 At the depot beds are formed with a floor made of moorum or other hard substance to receive the night soil, the beds are 18 feet square and 1 foot deep A layer of ashes one inch thick is first spread over the floor of the beds night soil is then poured on about 5 inches deep, and is covered over with a layer of ashes also an inch deep It is then allowed to remain for 24 hours in the sun during the fair season and for three days under sheds during the rainy season The night soil is after the lapse of the time mentioned above stirred and well mixed with the ashes spread above and below it, and a fresh layer of the latter ½ inch thick put on when it is allowed to lie for three days further in the fair season and eight days during the rains The mixture is then again stirred, taken out of the beds and spread on dry open ground exposed to the sun to complete its drying It is then stored in heaps for sale, and is in dry weather fit for immediate use

7 In the rainy season the drying has occasionally to be done under cover and consequently the process occupies as many as 12 days, whereas in the cold season it takes six days and in the hot season only four days

Remarks

8 Experience has shown that ashes form the most efficient and cheapest deodoriser of the noxious gases generated from night soil, and the depôt when there is no uncovered night soil in it is free from stinks at a distance of 50 yards on its windward and not more than 150 yards on its lee ward side, provided always that the supply and use of ashes is sufficient

9 It will be observed that 575 cubic feet of semi liquid night soil is obtained daily from the city, and only 300 cubic feet of ashes that is the latter is a little over one half of the former Experience has shown that to ensure thorough deodorisation complete freedom from stink, and the best poudrette, the proportion of ashes to night soil should be about equal and the Municipality are trying to augment their collection of ashes to the required quantity

Poudrette

10 The manure prepared in this manner is much valued by cultivators and is in great demand Applications for the manure have been increasing since the opening of the Mutha Canals, and consequent extension of wet cultivation Five years ago, agriculturists would not touch the poudrette then prepared, and could not be induced to take it away at even a nominal charge At the present moment the outturn of manure is not enough to keep pace with the demand, and it has become necessary to take special precautions that the poudrette is not taken away in its raw state which the cultivators sometimes attempt to do They frequently pay for manure to the Municipality from four to six months *in advance* in order to ensure a timely supply

11 The poudrette manufactured by the Municipality is clean and free from brickbats, broken glass and other rubbish or common earth This is secured by the ashes being sifted before being mixed with night soil

12 It may not be out of place here to quote a paragraph from a letter No 618 T, dated 8th November 1879, from the Sanitary Commissioner of Bombay, on the mode of preparing the poudrette now followed by the Poona Municipality —

"Before the depôt is removed it is only fair to place on record that hitherto its management reflects the highest credit on all concerned I have visited it often and unexpectedly, and remembering how rude are the means as they generally are in India, I can answer for it that every process is very carefully conducted"

Quantity manufactured

13 Five hundred and seventy five cubic feet of semi liquid night soil and 300 cubic feet of ashes are collected daily at the depot and mixed together The night soil shrinks in drying to ⅗ths its bulk or about 430 cubic feet The daily outturn of poudrette is therefore 430+300=730 cubic feet, or 266,450 cubic feet in the year

Financial results

14 Before concluding this report, it will be of interest to note the financial results of this branch of work of the Poona Municipality—

41 cart loads of night soil conveyed daily to the depôt by 22 pairs of bullocks at Rs 24 per pair with driver per month cost per annum	Rs	6 336
60 to 75 cart loads of street sweepings conveyed daily to the depot by 25 pairs of bullocks at Rs 18 per pair with driver per month cost per annum		5,400
Cost of sifting refuse, burning, preparing ashes, mixing night soil and preparing poudrette per annum		2,664
Maintenance of sheds and beds at the depôt per annum	,	900
Repairs to night soil and refuse carts, per annum	,	2 500
Tools plant and contingencies		200
Total cost per annum	Rs	18 000

15 The poudrette is now sold at 27 cubic feet forming 96 ordinary iron baskets full for a rupee, the annual revenue from the 266,450 cubic feet of poudrette prepared is Rs 4,934, say 5,000

16 There is thus at the present moment a net loss to the Municipality of Rs 13,000 per annum It should be borne in mind that the Municipality would have as its first duty to remove the night soil and refuse of the city in some way or other what therefore has been mentioned as a net loss to the Municipality is only what it costs them to get rid of the filth of the city in the best manner possible The price of poudrette is yet susceptible of increase and the cost of preparing it of decrease, and it is possible that the cost to the Municipality might be reduced in three or four years to Rs 7,500 only by reducing charges from 18 000 to 15 000, and increasing sale proceeds of poudrette to Rs 7,500 The sale of poudrette will thus pay half the cost of the removal from the city of its night soil and street and house sweepings

NARSO RAMCHANDRA,
Secretary, Poona Municipal Committee

MARINE DEPARTMENT

Simla, the 25th June 1880

ALLOWANCES

No 34 —MESSING—

In supersession of Marine Notification No 9 of 11th May 1877, the Right Honble the Governor General in Council is pleased to notify the following rates of table money payable for the entertainment of high functionaries their suites &c on board Indian Government vessels The rates are intended to cover all charges for messing including wine &c —

Class	Passengers	Allowance per diem: For males	For females	For children of both sexes: Between 16 and 7 years	Under 7 years
	Captain's Table	Rs A P	Rs A P	Rs A P	Rs A P
I	Viceroy and Governor General of India	68 0 0 for the first 7 days, 14 0 0 afterwards	9 0 0	5 0 0	4 0 0
	Each individual composing the suite	14 0 0 for every day			
II	Governors and Commander in Chief	4[illegible] 0 0 for the first 7 days, 12 0 0 afterwards	8 0 0	4 0 0	3 0 0
	Each member of their suite	12 0 0 for every day			
III (a)	Lieutenant Governors and Bishops	[illegible] 0 0 for the first 7 days, 1[illegible] 0 0 afterwards			
	Each member of their suite	12 0 0 for every day			
(b)	Members of Council [illegible] Secretaries to Government	31 0 0 for the first 7 days, 12 0 0 afterwards			
IV	Political Agents	12 0 0 for the first 14 days, 8 0 0 afterwards			

NOTE —The [illegible] embarking under special circumstances when travelling as ordinary passengers the rates [illegible] will be allowed

2 When the Viceroy a Governor or Commander in Chief proceeds in a ship on a tour which requires him to disembark at various ports the higher rate a day will, in general, only be paid for the

seven days' entertainment following his first embarkation If there are special reasons for repeating this payment, the officer in command of the vessel may represent the circumstance to the official entertained for consideration, and, if subsequently necessary to the Government of India in the Marine Department

3 When more than one distinguished person is embarked at the same time, the person of the highest rank is to be paid for according to the scale and the other or others only at the rate of Rs 14 or Rs 12 a day per head, as the case may be

4 The periods for which the rates are to be paid shall commence on the day on which the first and shall terminate on that on which the last dinner is taken on board

5 Should a passenger for whom provision is made under competent authority not embark or having embarked subsequently disembark or be transferred to another ship the mess will be entitled to half the allowance, to cover the expenses incurred in making the necessary preparations No deduction is to be made from the allowance for the time passengers may land at intermediate places for their own pleasure

6 When any official is ordered a passage the officer commanding the vessel will inform such passenger of the rate authorized for his entertainment and arrange for payment of the amount before the passenger leaves the ship if possible or upon his certificate by the Indian Government treasury at the port of disembarkation, or at the nearest chief port as the case may be

7 Should the passenger not be satisfied with the statement of the commander of the vessel as to the class in the scale under which he is required to pay the matter is to be at once referred to the authority ordering the passage In the event of the latter officer agreeing with the passenger the rate specified by the commander of the vessel should be paid and the circumstances reported to the Government of India in the Marine Department

8 Civil and military officers will be liable to deduction for messing under existing rules

No 35—In continuation of Marine Notification No 31 of the 25th June 1880 the Right Hon'ble the Governor General in Council is pleased to rule that the following rates of table money shall be payable to Commanders of all Indian Government vessels for the entertainment on board such vessels of British Commissioned Officers and of Civil Officers with rank not lower than that of Deputy Magistrate Deputy Collector or Extra Assistant Commissioner together with their families and servants when such officers travel as ordinary passengers and not under the special rules laid down in the above order —

	R	A	P	
Officers (Civil or Military)	4	0	0	per diem
Lady or female child of 10 years and upwards	3	0	0	
Children of 2 and under 10 years of age	2	0	0	
Children under 2 years of age	F			
European servants male or female	2	0	0	
Native servants	0	3	0	

2 The above rates are exclusive of the charges for liquors, &c Officers will be liable to deduction for messing under existing rules

APPOINTMENTS

No 36—Under instructions from the Right Hon'ble the Secretary of State for India the appointment of Rear Admiral J Bythesea R N V C, C B, C I E, as Consulting Naval Officer to the Government of India in the Marine Department will cease from the 30th June 1880

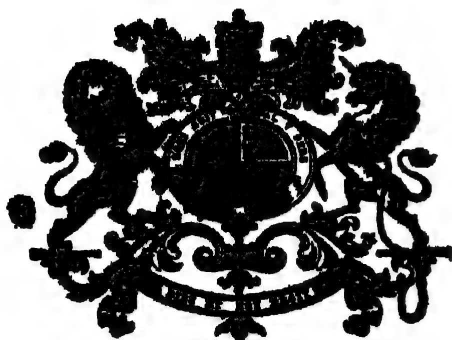
HOME, REVENUE AND AGRICULTURAL DEPARTMENT

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22ND JUNE 1880

GENERAL REMARKS —Heavy rain fell during the week in British Burma, Bengal and Assam, in parts of the two lastmentioned provinces some injury to the crops has resulted In Madras Mysore and Coorg, the Central Provinces, and the North Western Provinces and Oudh the rain was more or less general, but, in most places, slight In Bombay little rain fell, except at Kanara, where the fall was heavy, and in Berar and Hyderabad, Central India, Rajputana, and the Punjab there was also little or no rain In parts of Madras, Bombay Hyderabad Central India, Rajputana, and the Punjab the want of rain is felt, and autumn sowings have been retarded

General prospects continue fairly good on the whole

Presidency or Province and District.	Rainfall for week preceding	State of agricultural prospects
Madras— (June 23rd)—		
Bellary	59 (average of ten stations)	*Ragi* 27 0 standing crops generally good
Kurnool	39 (average of four stations)	*Ragi* 33 0
Ganjam	1 76 (average of four teen stations)	*Ragi* 32 22
Kistna	16 (average of two stations)	*Ragi* 34 26
Chingleput (Madras)	52 (average of nine stations)	*Ragi* 22 42 wet and dry crops harvested to small extent
Coimbatore	22 (average of five stations)	*Ragi* 24 01 crops generally fair harvest of *cholum cumboo* and gingelly in five taluks—outturn ½ to ¾
Tanjore	71 (average of six stations)	*Ragi* [illegible] 04 crops generally good
Madura	14 at Dindigul	*Ragi* [illegible]6 02
Malabar	4 66 (average of four teen stations)	*Ragi* 19 7
Travancore	13	
		General Remarks —General prospects fair but rain much needed in Kistna, Kurnool and Chingleput
Bombay— (June 23rd)—		
Kurrachee		Weather cloudy high monsoon winds rain holds off river at Kotri on 21st 13 feet 5 inches against 9½ feet on same date last year rice crops in Ghorabari suffering from attacks from tortoises and crabs small pox in three measles in one fever in three and cattle-disease in one taluka
Hyderabad		Rice cultivation has suffered in the Badin taluka from *kallar* fever of mild type in three talukas cattle disease in Sakrand taluka small pox in three talukas river nearly 4 feet higher on 21st than on same date last year
Ahmedabad		Preparations progressing weather occasionally cloudy public health good
Baroda		Sky overcast monsoon anxiously awaited public health good prices steady
Surat		Rain awaited fever in three talukas
Násik	*Nil*	High winds drifting clouds prices rising prospects in Ghât villages and Igatpuri bad
Colaba (Bombay)	17	Total rainfall 4 56 being 11 72 below average average abnormal temperature 3 warm vapour in air normal abnormal wind changed gradually from west north west on the 16th to north north east on the 22nd
Poona	14 at Bhimthadi	Crops suffering from want of rain
Ahmednagar	A few cents at Jamkhed and Sheogaon	Sowing of *mung* and *urid* delayed prices rising public health good
Sholapur	*Nil*	*Kharif* sowing retarded from want of rain public health good
Dharwar	43	Sowing of rice partially completed more rain necessary fever in seven and cattle disease in three talukas
Kanara	9 79 at Karwar maximum at Honore 10 13 minimum at Halyal 23	Rice cultivation continues plants healthy fever and cattle disease prevail
Rajkot		Weather hot; health good
		General Remarks —Scarcely any rain, except in Kanara *kharif* sowings delayed in consequence fever in several districts



Presidency or Province and District	Rainfall for week preceding	State of agricultural prospects
Bengal— (June 23rd)—		
Chittagong	13 40 heavy rain at Cox s Bazar	Weather rainy and cloudy state and prospects of crops generally favourable cattle disease in some parts
Dacca	3 36	Prospects of crops good public health good
24-Pergunnahs (Calcutta)	4 18 excessive rain in Barripore	Early rice and jute plants promising transplanting of late rice going on rivers fall public health generally good
Moorshedabad	2 10 rain general	Prospects of crops good fever in some thanas of Sadr otherwise public health good
Rajshahye	5 03	Heavy rain in Nattore subdivision has done considerable injury to *boro* rice sessamum and jute standing crops in other thanas doing well public health good
Burdwan	3 96	Crop prospects good public health fair
Rungpore	4 57	Weather hot and cloudy prospects of crops favourable public health good
Bhagalpur	53	Ploughing and sowings progressing favourably
Purneah	3 51	General complaints of too much rain rivers from north all in flood autumn crops in low lands much damaged winter rice almost planted out health fair
Patna	5 96	Prospects of crops favourable
Durbhunga	3 47	Sowing of autumn crops and paddy in progress, both coming up well prices stationary some fever at head quarters
Hazaribagh	59	Weather seasonable and warm sowing of autumn and winter crops continues food grains cheap general health good
Cuttack	Sufficient rain	Prospects of crops good
		General Remarks —Seasonable rain all over the province during week prospects of crops generally favourable except that in some places early rice and jute injured by excessive rain transplanting of late rice begun in some districts in Behar and Chota Nagpur ploughing and sowing in full progress and in Orissa still going on in parts public health generally continues good prices reported stationary in some districts
N W P and Oudh—		
Benares (June 22nd)	Heavy rain on the night of 21st	All appearance of rains having set in cholera decreasing prices stationary
Allahabad („)	Slight and partial showers	Rains appear to have broken this morning cholera deaths increased to 74 in some centres otherwise very healthy wheat 20½ seers course rice 19 seers unhusked *dhan* 27¾ seers
Gorakhpur (21st)	45	Weather very cloudy but continues unusually hot wind east *kharif* sowings commenced cholera disappearing health good
Jhansi („ 23rd)	*Nil*	Heat intense small pox amongst cattle continues prices rising
Agra (22nd)		Heat intense hot westerly winds health good cattle-disease continues
Bareilly (23rd)	*Nil*	Sky overcast more or less throughout week health good young sugarcane promising grain somewhat dearer
Meerut ( )	Slight rain	Heat continues clouds gathering prices unchanged
Kumaun (21st)		Rains appear to have set in some fever prospects of *kharif* crop good prices unchanged wind variable
Lucknow (23rd)	1 4	Barley 30 seers
Partabgarh (21st)	Partial showers	Atmosphere close sky cloudy
Sitapur (23rd)	*Nil*	Fast wind and cloudy occasional cases of cholera still occur general health good
Fyzabad („)		Rain anxiously looked for fields being prepared for *kharif* public health fair
		General Remarks —Rain though slight has fallen in most districts and the regular monsoon appears to have broken the weather however still continues unusually hot and close prospects are still good and generally prices remain unchanged general health continues good but while cholera has decreased in Gorakhpur it has increased somewhat in Allahabad and has also appeared in Sitapur cattle-disease continues in Agra and Jhansi
Punjab— (June 22nd)—		
Delhi		Fever continues prices fluctuating
Hissar		Heat great agricultural operations in abeyance for want of rain prices rising health fair

HORACE BELL,
Engineer in Chief

ORDERS BY THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY

The following changes in the Regulations in Arts, Law, Medicine and Engineering having been sanctioned by the Senate and approved by His Excellency the Governor General in Council, are published for general information —

The following foot-note has been appended to the marginal note to the Entrance Certificate (Appendix A) —

> It is in the power of the Syndicate to refuse to recognize any school unless it is certified by a Government Inspector of Schools as having been in existence since the 1st of March next preceding the Examination and as qualified to teach up to the Entrance Standard

In paragraph 9 of the Regulations for Honours in Arts, the words 'History of Philosophy' have been substituted for the words 'Natural Theology' and the words "(a) Natural Theology" for the words "(a) History of Philosophy"

In paragraph 9 of the Regulations, for the words 'the Syndicate shall notify, three months before the examination, the portions of the subjects of Chemistry and Botany in which candidates shall be examined,' the following words have been substituted —

> The Syndicate shall notify three months before the Examination the portions of Botany in which candidates shall be examined

For the words 'on the first Monday in December" in paragraph 1 of the Regulations for the Entrance Examination, for the words 'on the morning of the fourth Monday after the examination' in paragraph 7 of the same Regulations for the words 'on the first Monday in December' in paragraph 1 of the Regulations for the F A Examination for the words 'on the morning of the fourth Monday after the examination' in paragraph 7 of the same Regulations for the words "in the first week in January,' in paragraph 1 of the Regulations for the Bachelor of Arts Examination for the words "on the morning of the fourth Monday after the examination," in paragraph 7 of the same Regulations, for the words 'in the first week in February' in paragraph 1 of the Regulations for Honours in Arts" for the words 'on or before the 31st day of December," in paragraph 4 of the same Regulations, for the words "on or before the 1st of January' in paragraph 2 of the Regulations for the examination for the degree of Master of Arts for the words 'in the first week in January,' in paragraph 1 of the Regulations for the degree of Bachelor in Law for the words "in the first week in March' in paragraph 1 of the Regulations for the examination for Honours in Law, for the words "in the last week of March," in paragraph 1 of the Regulations for the License in Medicine and Surgery, and in paragraph 1 of the Regulations for the degree of Bachelor in Medicine, for the words "in the first week of April," in paragraph 1 of the Regulations for the degree of Doctor in Medicine, for the words "in the first week of May," in paragraph 1 of the Regulations for the License in Civil Engineering, and in paragraph 1 of the Regulations for the degree of Bachelor in Civil Engineering, and for the words 'in the first week of June,' in paragraph 1 of the Regulations for Honours in Civil Engineering, the following words have been substituted —

> At such time as the Syndicate shall determine the date to be approximately notified in the calendar for the year

REVENUE REPORT OF IRRIGATION WORKS IN BENGAL FOR THE YEAR 1878 79

No 143 5 I dated Simla the 4th June 1880

RESOLUTION—By the Government of India Public Works Department

Read —

Letter No 4966I A dated 30th December 1879 from the Government of Bengal in the Public Works Department, and its enclosures being the Revenue Report of Irrigation Works in Bengal for the year 1878 79 and a Resolution by His Honor the Lieutenant Governor reviewing the operations

OBSERVATIONS —The Capital outlay on irrigation works during the year was Rs 28 32 279, and the total debit to the end of the year on Capital account excluding indirect charges, was Rs 4,93,10 013, made up as follows —

	R
Orissa canals	1 83 08 173
Midnapore ,	73 29 941
Hidgellee Tidal canal	17 72 699
Sone canal	2 07 74,097
Total Productive Public Works	4 81 84 910
Imperial Ordinary	8 33 353
Provincial	2 91,750
GRAND TOTAL	4,93,10,013

2 The amount of interest payable by the Bengal Government to the Imperial Treasury is shown in paragraph 6 of the Chief Engineer s review, as follows —

	Rs
On Capital Productive Public Works	21 20 416
other than Productive Public Works	39 091
TOTAL	21 59 507

Interest has been calculated on the Capital outlay on works not included as Productive Public Works but the expenditure on which was defrayed from Imperial funds in accordance with the orders of the Government of India, but it has lately been decided that no interest is payable by the Government of Bengal on these works as they have been abandoned

3 The expenditure of Rs 13,507 on canal plantations has been entered as a separate item distinct from the Capital outlay of the canals concerned With reference to this, the attention of the Government of Bengal is invited to Government of India Public Works Circular No 77 A—G, dated 10th November 1879

4 The Capital outlay on Productive Public Works is shown under the head Provincial The attention of the Bengal Government is invited to the orders conveyed in Government of India Public Works Circular No 11, dated 7th January 1880, issued subsequently to the preparation of the report under review

5 The improvement in the financial prospects of the Bengal canals which commenced in the previous year, is shown by this report to have been continued during the year under review

Orissa canals—The total irrigated area in Orissa was 143,175 acres against 119,012 acres in the previous year while 111,250 acres were charged with water rate against 98,195 acres in 1877 78, and this increase has occurred although the rainfall amounted to 52 32 inches while in the previous year it was 45 inches only The additional distributaries the want of which was noticed in last year's review, were not commenced pending the submission of the estimates which are still under preparation

Midnapore canals—On the Midnapore canals the area irrigated was 58,731 acres against 19,819 in the previous year, of this area, 57,751 acres were under lease for four or five years and the irrigated area was it is stated subsequently increased to 96,000 acres most of which was leased for four or five years This is probably the maximum limit of the irrigating capacity of the works without the proposed storage reservoirs There was a large area of unauthorized irrigation during the year under review from these canals due, apparently to the imperfect state of the distributary system for the remedying of the latter provision will be made in the revised estimates now under preparation

Sone canals—On these canals the irrigated area shows a decrease from 241,790 acres in 1877 78 to 197,018 acres in 1878 79, the greater portion of the difference being in the rubbee crop owing, it is stated, to losses of crops in the previous rubbee having made the cultivators doubtful of the success of irrigation, the losses having been chiefly due to excess of water given to the crops consequent on inexperience in artificial irrigation The development of sugar cane cultivation on these canals is remarkable the area under this crop amounted to 19,621 acres against 9,891 in the previous year and the export of unrefined sugar from Shahabad by the East Indian Railway shows still more clearly the extent to which the production has already increased During the last years the exports were—

	Mds
1877	307,311
1878	485,069
1879	461,399

the largest export in any of the five preceding years having been only 56,868 maunds

6 *Navigation*—The traffic on the *Orissa* canals shows an increase over that of the previous year though compared with the increase in length of navigable line on which tolls were levied the increase is not so great as might have been expected the length of canal in operation during the year having been 153 miles or an increase of 30 miles while the tonnage on which tolls were levied amounted to 129,646 tons against 105,257 tons in the previous year But on the other hand it must be considered a hopeful sign that the diminution in traffic was comparatively so small, the demand for rice for Madras having abnormally developed the traffic in 1877 78

During the year by the completion of the Gobri navigable branch of the Kendrapara canal navigable communication was opened between Cuttack and

Chandballee. A regular passenger service was carried on very successfully for a portion of the year in spite of difficulties from shoals in the Chota Brahmunee. An extension of the Gobri canal connecting with the river below these shoals is in contemplation. When this is opened a considerable traffic may be expected on this line.

On the *Hidgellee Tidal canal* the traffic continues to increase, the tonnage amounting to 164,687 against 151,426 in the previous year.

On the *Midnapore* and *Sone canals* navigation is in its experimental stage. The results already attained, however, hold out fair prospects of success, as experience is gained of the best class of vessels and mode of working.

The cost of carriage by boat on the Sone canals was 5·88 pies per ton per mile, including tollage. This for a commencement may be considered a fair rate, but it is too high to attract a large traffic.

7. The cost of maintenance of the canals generally is still very high. On the Sone canals it is stated to be mainly due to the quantity of silt deposit brought in during the flood season. This might to a certain extent be probably obviated by admitting only surface water when the river water is heavily charged with silt. The experiment at any rate is worth trial.

8. The financial results calculated on the earnings of the year are on the whole very satisfactory as compared with those of former years. The aggregate earnings and net balance after deducting working expenses as shown by the booked accounts, differ from those given by the Chief Engineer thus:—

	Chief Engineer Rs	Booked accounts Rs
EARNINGS—		
Orissa	2,13,873	2,35,318
Midnapore	1,77,970	1,72,597
Tidal	60,060	60,793
Sone	5,90,165	6,71,135
	10,42,068	11,39,843
NET BALANCES—		
Orissa	4,786	—3,172
Midnapore	5,131	—239
Tidal	36,880	37,013
Sone	2,19,961	3,00,631
	2,66,758	3,34,233

These statements should have been compiled in communication with the Examiner, Public Works Accounts, and any differences should be adjusted or explained before the submission of the report in future years.

9. The unrealized balance on the Orissa canals at the close of the year was very large, amounting to Rs. 80,237, out of a total demand of Rs. 2,01,911, but arrangements have been made which will probably secure better results in the future.

10. The calculations of the duty obtained from the water in irrigation are still very unreliable, but it is satisfactory to notice that efforts are being made to obtain the requisite data. The subject is a most important one in forming a judgment on the efficiency of the canal administration, as well as in the calculation of probable results from future schemes.

11. In future reports a statement of the approximate value of the irrigated crops should be given similar to those which accompany the annual reports from the North-Western Provinces and the Punjab. For the Midnapore system a statement is given in which the value is estimated at Rs. 21,72,952, but the subject is not noticed in the reports on Orissa or the Sone.

12. The Government of India endorses the Lieutenant-Governor's expressions of approval of the ability and valuable public services of the late Chief Engineer of the Irrigation Department, Colonel (now Major General) Haig, who for eight years devoted abilities of no common order, with unremitting assiduity to the improvement of the work entrusted to him, as testified by every Lieutenant-Governor under whom he served.

ORDER.—Ordered, that copies of this Resolution and of the Report and its accompaniments be forwarded to the Secretary of State, and to the Finance and

Commerce, and the Home, Revenue and Agricultural Departments for information.

Also, that a copy of this Resolution be forwarded to the Government of Bengal for information and guidance.

Also that copies of this Resolution and of the Report be forwarded to the Local Governments and Administrations noted in the margin, in the Public Works Department, Irrigation Branch, for information.

The Governments of Madras, Bombay, the North Western Provinces and Oudh and the Punjab.
The Chief Commissioners, Central Provinces and British Burmah.
The Resident at Hyderabad.
The Agents to the Governor General for Central India and Rajputana.

Also, to the Foreign Department for communication to the Chief Commissioner of Mysore.

Also that this Resolution, the Resolution of the Bengal Government, and the Chief Engineer's Report, with a few selected statements, be published in the Supplement to the *Gazette of India*.

J CROFTON, *Major Genl., R E.,*
Depy. Secy. to the Govt. of India.

Extract from the Proceedings of the Lieutenant Governor of Bengal in the Public Works Department, Irrigation Branch,—No. 4874 I. A., under date the 19th December 1879.

Read—

The Canal Revenue Report for the year 1878-79 and the note by the Chief Engineer on the same.

The Capital outlay on irrigation works during the year under review was Rs. 28,34,204, and the total outlay under this head amounted to Rs. 4,93,73,192, of which Rs. 4,82,47,938 have been expended on productive works, the balance, Rs. 11,25,254, is the expenditure on works other than productive, but for which capital accounts are kept, divided into "ordinary" charged to Imperial funds, Rs. 8,33,504, and "ordinary" charged to Provincial funds, Rs. 2,91,750.

The amount of interest for 1878-79 payable by the Government of Bengal to the Imperial treasury is Rs. 21,59,507.

The receipts of the year amounted to Rs. 8,51,133 against Rs. 4,94,772 in the year 1877-78.

The following statement shows the revenue for each project from the several sources, as compared with that of the two previous years:—

		Receipts 1878-79	Receipts 1877-78	Receipts 1876-77
		Rs.	Rs.	Rs.
Orissa canals—				
Water-rates		1,16,416	1,17,818	40,378
Navigation		57,012	33,841	22,881
Miscellaneous		8,546	9,445	11,298
	TOTAL	1,82,001	1,61,107	74,557
Midnapore canal—				
Water-rates		85,014	53,483	61,160
Navigation		77,340	1,06,917	67,951
Miscellaneous		8,356	9,693	7,876
	TOTAL	1,70,710	1,70,093	1,36,987
Hidgellee canal—				
Navigation		59,723	60,971	44,572
Miscellaneous		1,070	1,309	464
	TOTAL	60,793	62,280	45,036
Sone canals—				
Water-rates		3,73,312	59,651	59,761
Navigation		29,332	26,774	4,852
Miscellaneous		34,982	14,867	8,567
	TOTAL	4,37,626	1,01,292	73,180
	GRAND TOTAL	8,51,133	4,94,772	3,29,760

The great increase in the revenue of the year is mainly due to the fact that the Sone canals have been brought more fully into operation The receipts from irrigation would, however, have been much greater had a larger proportion of the assessments been realized In Orissa and Midnapore most of the demand falls due on the 1st of February, but little time was therefore left for collecting the revenue before the end of the financial year On the Sone canals the non realization of the large outstanding balance of Rs 3,04 411 was due to delay in the preparation of the demand statements, unsatisfactory measurements, and the destruction of a large part of the rubbee crops by insects, on account of which considerable remissions will have to be made It is satisfactory to be able to state, with regard to the first two causes, that a great improvement has taken place, and that of the arrears, upwards of 50 per cent have since been realized

The working expenses amounted to Rs 8,05,610, against Rs 7,02 857 in 1877 78 and Rs 5 97 960 in 1876 77 The increase is wholly on the Sone, and is mostly due to the additional length of canal and distributaries brought into operation

The areas assessed for water rates, compared with those of the former year, are as follow —

			1877 78	1878 79
			Acres	Acres
ORISSA	Khurreef		95 088	105 500
	Rubbee		3,071	5 517
	Perennial		336	233
		TOTAL	98,495	111 250
MIDNAPORE	Khurreef		19 550	58 607
	Rubbee		269	124
	Perennial			
		TOTAL	19 819	58,731
SONE	Khurreef		107 087	99 961
	Rubbee		124 812	77 430
	Perennial		9 891	19 6[illegible]
		TOTAL	2[illegible]1 7[illegible]0	197 018
		GRAND TOTAL	360 101	366 999

The increase in the assessed area under the Orissa canals was 12,755 acres, besides which 11,567 acres were irrigated free of charge on the newly opened second and third ranges of the High Level canal Also 20 350 acres on the lower portions of the Kendrapara and Patamoondee canals received surplus water and could not be assessed thus the total area watered was 113 167 acres, against 109,000 acres in 1877 78 The success attending the irrigation operations in Orissa has in a great measure been due to the energy and ability of Mr Wylly the Deputy Revenue Superintendent who has been ably assisted by his subordinates and by the engineering staff Of the 105,500 acres no less than 94,492 acres were leased for five years under the following conditions —

(1) That the whole irrigable khurreef area of the village must be included

(2) That the assessment be based on former measurements, or on the cadastral survey maps when available

(3) That the rate for flow irrigation be Re 1 8 and Re 1 for lift per acre To those not taking out leases for five years, or only desirous of using water for portion of a village, the charge to be Rs 3 for flow and Rs 2 for lift per acre

The great increase in the irrigated area in Midnapore, *viz*, from 19 819 acres in 1877 78 to 58,731 acres in 1878 79, is attributed partly to a deficiency of rain in the early part of the khurreef season, and partly to the fact that canal water is thoroughly appreciated by the people with whom long leases are popular During the last khurreef season the area irrigated has reached the unprecedented figure of 96,000 acres, most of which has been leased for four and five years

On the Sone canals the falling off in the khurreef area irrigated is due to the rainfall of August and September 1878 having been so much heavier than in the corresponding period of 1877, it is also partly due to the higher water-rate of Rs 2 8 per acre, against Re 1 in 1877, when orders were given to save as much of the crops as possible irrespective of the returns The falling off in rubbee is attributed to the destruction of a large portion of the crops of 1877 78 by insects, and to heavy rain in the cold season which followed an injudicious application of excess irrigation Both these causes doubtless hindered the cultivators from taking water for the rubbee crops in 1878 79 as freely as they did in the previous year

19 624 acres of sugarcane were irrigated in 1878 79, against 9 891 in 1877 78 The increase is important, as the rate is Rs 5 per acre The following statement of the exports of *jaggery* from Shahabad by the East Indian Railway during the past eight years, gives some idea of the great increase of sugarcane cultivation in that district since the construction of the canals and the introduction by Messrs Burrows, Thomson, and Mylne, of Bihia, of their simple and handy mill for extracting the juice —

Year	Maunds of jaggery exported
1872	51,107
1873	42 919
1874	28 170
1875	56 863
1876	51,19[illegible]
1877	3,07 241
1878	4,85 669
1879	1 61 599

A system of three year leases, based on differential rates for rubbee and khureef crops was introduced last year on the Sone canals, but with little success The object, as stated by the Chief Engineer in paragraph 65 of his report, "was to avoid the continually recurring measurements of the irrigated " areas annual application for water and other harassing details but this was " entirely frustrated when the people sowed rice on rubbee lands, rubbee on rice " lands and sugarcane on both It is clear that no lease based on crops for a " term of years can possibly be satisfactory The unit of assessment must be "the land It is believed that an arrangement of this sort would be generally " popular and measures will be adopted to introduce the system " The Lieutenant Governor concurs in this view of the question, and will be glad to see the system of long leases for large areas, which has proved so successful in Orissa and Midnapore, introduced on the Sone canals also

The construction of village channels by the people is a matter of great importance on the Sone canals On this depends in a great measure the spread of irrigation Messrs Burrows, Thomson and Mylne have constructed 60 miles on their estates at Bihia in Shahabad From other zemindars in the same district 112 applications for village channels have been received, and Rs 10 675 have been deposited for their construction Much difficulty is however experienced in obtaining the consent of proprietors through whose lands the channel must pass and the law has in most cases to be put in force

The revenue from navigation has somewhat fallen off from that of the last year, which on the Midnapore and Hidgellee canals was quite exceptional on account of the great demand for food grains for the Madras famine The following statement shows that on the whole there has been a steady advance —

Year	Toll Collections				
	Orissa	Midnapore	Hidgellee	Sone	Total
	Rs	Rs	Rs	Rs	Rs
1872 73	10 041	20 994	14,454		45,492
1873 74	18 577	34 101	27 978		80 659
1874 75	21 412	44 886	52 209		1,18,507
1875 76	16 377	51 810	22 540		90 727
1876 77	22,881	67 6[illegible]1	41 572	4 859	1,39,9[illegible]6
1877 78	33 811	1 00 917	60 971	26,774	2,28 506
1878 79	57 012	77,340	59 723	29 332	2 23,437

The increase in Orissa is due to the enhancement in the tollage rates as explained in the Chief Engineer's note, paragraph 27 On the Sone canals, though there was an increase of tollage amounting to Rs 2,558 only, the private traffic increased by Rs 10,353 with a corresponding diminution in carriage of materials for the work The latter figure of course is the true test of the extent to which the canals are appreciated by the public

During the year steam navigation was started on the Kendrapara canal in Orissa, between Chandbally and Cuttack, on the Midnapore canal, between Calcutta and Midnapore, and on the Patna canal in Behar, between Dinapore and Baroon, near Dehree In Orissa the experiment has proved most successful, the little steam launch *Pioneer* having cleared all her working expenses and shown a profit of Rs 7,466 The steamers employed on the other canals were not well adapted for the traffic, and have worked at a loss but the steady increase in the receipts has fully warranted the continuance of the service and when the new steamers now under construction, are brought into use, no doubts are entertained of their success

No revenue has as yet been derived from plantations, but a large number of trees have been planted out on all the canals, and in the course of a few years it is expected that a considerable profit may be derived from them

A sugar mill has been established on the Arrah canal, to utilize the water at one of the falls to the extent of 50 horse power for which Rs 3,750 per annum is to be paid A small experimental flour mill has also been erected on the Buxar canal It is hoped that this beginning may lead to an extended use of the vast power available on the canals, and at the same time prove a valuable source of revenue

The results of the irrigation operations of the year, as shown in paragraph 98 of the Chief Engineer's note, cannot be considered otherwise than very satisfactory "The receipts have exceeded the working expenses by "Rs 43,523 and thus *for the first time* irrigation in Bengal has shown a profit "which would have been greater had the outstanding balances been collected Calculated by the earnings of the canals, the surplus of the year's operations "would be Rs 2,66,758 as follows —

		Rs
Orissa canals		4,783
Midnapore do		5,131
Hidgellee do		36,880
Sone do		2,19,961
	Total	2,66,758

The report by the Deputy Revenue Superintendents in Orissa and Midnapore give full information regarding the working of the system in this district The reports of the Superintending Engineers of the Orissa South West, and Sone Circles are very complete, but especially deserving of notice is that by Mr Odling, Executive Engineer of the Arrah Division Referring to the 71th paragraph of the Chief Engineer's note the Lieutenant Governor observes that the Commissioner of Patna, in the last paragraph of his report has prominently brought forward certain defects in the system in vogue on the Sone canals and quoted some disparaging remarks made by one of the collecting officers It is to be regretted that he did not also notice the marked improvement reported by the same officer and seeing that the shortcomings referred to had at the time he wrote, been to a great extent remedied the necessity for quoting from a previous letter in which they had been noticed is not apparent

The Lieutenant Governor fully appreciates and highly commends the great interest taken by Mr Edgar, the Collector of Shahabad, in all matters connected with irrigation in his district He has given close attention to the subject and afforded many valuable suggestions for the better working of this system, which will, it is believed, ultimately lead to a great development in the revenue

The Government of Bengal is responsible for the payment of the interest on the large sums which have been expended on the irrigation works in

the province it is of great importance therefore that all the officers, in any way connected with the canals, should exert themselves to the utmost for the development of the revenue, both by judiciously encouraging the spread of irrigation and by keeping down the expenses of working and revenue establishments

In January last Colonel (now General) Haig, R.E., Chief Engineer and Joint Secretary in this Department, retired from the service The Lieutenant Governor desires now to place on record his appreciation of the conscientious and able manner in which he performed his duties Sir A Eden has always received from him the most valuable assistance, and it is mainly due to him that the position of irrigation in Bengal is now more promising than it ever was before

The Lieutenant Governor greatly regrets the loss which the service has sustained by the retirement of Mr Walker Superintending Engineer, whose able management of the Orissa work for many years is deserving of the highest commendation He also fully endorses the remarks made by the Chief Engineer in the last paragraph of his note regarding the officers therein mentioned viz, Major Heywood, R E, Superintending Engineer, Mr Odling and Mr Fouracres, Executive Engineers, and Messrs Douglas and Inglis, Assistant Engineers

By order of the Lieutenant Governor of Bengal,

H C LEVINGE, *C E*,
Jt Secy to the Govt of Bengal
P W Dept, Irrgn Branch

REVENUE REPORT

Note on the Canal Revenue Reports for the year 1878 79 by H C LEVINGE, ESQ, C E, *Chief Engineer, Bengal, Irrigation Branch*

	Rs
The capital outlay on irrigation works in Bengal in 1878 79 was	28,34,204

In the four previous years the capital outlay was as follows —

	Rs
1874 75	49 97 142
1875 76	42 11 204
1876 77	33 93,328
1877 78	24,15,318

2 The total capital invested up to the end of the year amounted to	4,93,73,192

viz —

	Rs
Productive public works	4,82,47,938
Ordinary work for which capital accounts are kept and the cost of which has been charged to Imperial funds	8,33,504
Ditto ditto ditto to Provincial funds	2,91,750
	4,93,73,192

3 The items composing the outlay are as follow —

Projects	Outlay During the year	Outlay To the end of the year
CAPITAL OUTLAY	Rs	Rs
PRODUCTIVE PUBLIC WORKS		
Orissa project	5,57 644	1 83 38 546
Midnapore canal	2 78 168	73 29 911
Hidgellee Tidal canal		17,83 905
Sone project	17 10 506	2 07,95 546
TOTAL	(a) 25 46 318	(a) 1 82 47,938
WORKS OTHER THAN PRODUCTIVE PUBLIC WORKS		
1 Works in abeyance—		
Inhoot project	— 482	5 31 425
Hooghly	—382	(b) 1 42 577
2 Work suspended—		
Damoodur project		1 59 502
3 Works in progress—		
Tojooty project	(c) 42 092	42,092
Sarun	2 36 151	2,36 151
Canal plantations	13 507	13 507
TOTAL	2 87 886	11,25 254
GRAND TOTAL	28 34 204	4 93 73 192

(a) Includes capitalized abatement of land revenue Rs 1 925 during the year and Rs 60 128 to the end of the year
(b) Includes Rs 151 on account of capitalized abatement of land revenue
(c) Includes Rs 1 052 expended from contributions

4 The following table shows the total receipts working expenses and charges for interest for the year 1878 79, as compared with the four previous years —

	1878 79	1877 78	1876 77	1875 76	1874 75
	R	R	Rs	R	R
Receipts from all sources	8 51 133	4 94 772	3 29 760	2 30 431	2 17 [illegible]
Working expenses	8 05 610	7 02 857	5 97 960	5 29 490	3 61 [illegible]
Net revenue	45 523	—2 08 085	—2 68 200	—2 99 059	—1 43 [illegible]
Charges for interest	21 64,747	20 39 713	19,12 094	17 40 118	15 12 [illegible]
TOTAL DEFICIT	21 19 224	22 47 798	21 80 294	20 39 174	16 56 [illegible]

5 The following are the details of the charges for interest for 1878 79 —

	Rs
Productive public works	21 20 416
Works other than productive public works of which the expenditure was charged to Imperial Ordinary funds	39 091
Works other than productive public works of which the expenditure was charged to Provincial funds	5 240
	21 64 747

6 The amount of interest for 1878 79 payable by the local Government to the Imperial treasury is Rs 21 59,507

7 The total accumulated debt on account of interest and unpaid working expenses to the end of the year amounted to Rs 1 53 89 005 viz —

	Rs
Working expenses	15 27 607
Interest	1 38 61 398

c

8 The total expenditure by the Irrigation Department during the year 1878 79 was—

	Outlay Rs
Imperial Ordinary	
Agricultural for which no capital or revenue account is kept	4 38 957
Provincial	
Capital productive public works	25 44,393
Provincial Ordinary	
Ordinary productive public works, ie expenses of working and maintenance	8,05 610
Works for which capital and revenue accounts are kept, but which are not classed as productive	2,78 834
Agricultural for which no capital and revenue accounts are kept	12 416
Total Provincial Ordinary	11 26 860
Grand Total Imperial and Provincial	41 10 210
Tuccavi outlay	(a)2 18 553
Contributions	32 349
Total outlay	43,61 112

In addition to the above outlay the Irrigation Branch spent in Orissa from the budget grants of the General Branch of the Department, Rs 63 016 on the improvement of the tidal creeks and Rs 1 55 610 on roads, buildings and other works

(a) Includes Rs 1 335 amount of outlay by buildings and road branch

9 The following table shows the areas irrigated in the three circles as compared with those of the three previous years —

1878 79	105,500	5,517	233	111,250	61 98*

* These are the mean of observations at Cuttack and Marsaghai

14 There was therefore an increase in the assessed area of 12,755 acres Besides the above 11,567 acres were irrigated from the second and third ranges of the High Level canal, for the first time utilized for the supply of water which was given free of charge for one year only Also 20,358 acres, according to

statements submitted by the Executive Engineer were irrigated, mostly on the lower parts of the Kendrapara and Patamoondi canals, by surplus or over flow water which for want of proper distributaries or drainage, could not be charged for thus the total area irrigated amounted to 113,175 acres, against 109,000 acres in 1877 78 A question has been raised by the Officiating Collector of Cuttack Mr Nolan, as to the legality of the practice hitherto in vogue in Orissa of assessing lands which, though they may clearly have benefited by the use of canal water, have been irrigated without previous application by the cultivator or otherwise than through a village channel The subject is under consideration

15 The year opened with an outstanding balance of Rs 28 796 on account of water rates and miscellaneous canal revenue while the assessments falling due within the year amounted to Rs 1 76 115 making a total demand of Rs 2 04 911 Of this amount, Rs 1 21,804 were collected and Rs 2,831 remitted or written off as irrecoverable, leaving a balance of Rs 80,237 at the close of the year In explanation of this large balance, Mr Wylly, the Deputy Superintendent states that "when it is considered nearly 80 per cent of the total demand of the year only fell due on the 1st of February, or two months before the expiration of the official year, and that Government sanction to the entertainment of middlemen was not received until December (too late to make suitable arrangements for the year under report), the decrease (in the collections) will not, I hope, be deemed very unsatisfactory " The middlemen referred to by Mr Wylly are influential villagers appointed to collect water rates on a commission of 5 per cent The cost of revenue establishment has therefore been increased, but Mr Wylly hopes by their means to collect in each year over 90 per cent of the assessments

16 The rainfall at Cuttack was 52 32 inches, against 43 inches in 1877 78 and an average of nearly 55 inches for 22 years There was nothing abnormal in the season and though the rainfall of September and October was somewhat below the average, it was greater than in the corresponding months of 1877

17 Under these circumstances the spread of irrigation, as above mentioned, cannot be considered otherwise than most satisfactory, but much of the success attending the operations is due to the energy and ability of Mr Wylly the Deputy Revenue Superintendent, who has most successfully continued the working of the system so favorably commented on in the report of last year He has been ably assisted by his subordinates and the engineering staff

18 The increase of 2 313 acres in rubbee and perennial irrigation is probably due to sanction having been accorded to the use of canal water without previous application The Deputy Revenue Superintendent is, however, not hopeful of any material increase in this respect

19 The execution of five year leases, to which allusion was briefly made in the report of last year, was sanctioned on the following conditions —(1) That the whole irrigable khurreef area in the village must be included (2) that the assessment be based on the measurements of former years or on the cadastral survey maps where available, (3) that the rate for flow irrigation be Re 1 8 and for lift Re 1 per acre To those not taking out leases for five years or only desirous of using water for portion of the village, the charge to be Rs 3 for flow and Rs 2 for lift per acre The statement in the 11th paragraph of the Deputy Revenue Superintendent's report shows the assessments as follows —

	Acres
For five years at Re 1 8 per acre	94,942
Unauthorized irrigation assessed at Re 1 8 per acre under Section 79 of Act III of 1876	5,866
At penalty rates under the same section	4,692
TOTAL KHURREEF	105,500
Rubbee	5,750
TOTAL	111,250

Explanation regarding the imposition of the rate of Re 1 8 per acre for unauthorized irrigation and Rs 3 penalty rate is given in the 16th paragraph of the Deputy Revenue Superintendent's report

20 The statements in the 5th and 6th paragraphs of the Superintending Engineer's report show the length of canal and distributaries, the area irrigable and irrigated from each, and the increase and decrease of irrigation during the year as compared with the previous year From this it appears that in all the canals, except the Patamoondi, some progress has been made The area irrigable from the Kendrapara canal includes 20,000 acres from the Gobri, which was opened during the year. This branch and the Patamoondi, neither of which have as yet been provided with distributaries or drainage channels, command 105,000 acres, of which a large proportion consist of low lying tracts, until quite recently, under tidal influence It cannot be expected that irrigation will be resorted to from the lower portion of the canals, except in years of drought, until the system of distributaries and drainages is complete Without them it is practically impossible to restrict the water to the leased areas, and when surplus water finds its way to unleased lands, or drainage channels, from which it is raised by cross dams on to the adjoining fields, the canal officer at once reports such lands or fields as irrigated unauthorizedly Some correspondence has taken place between the revenue and canal officers on this subject which has resulted in the Chief Engineer calling on the Superintending Engineer for reports on the whole subject of escapes from the canals and distributaries for the purpose of more efficiently regulating the supply, and to discharge the surplus water into the regular and well defined drainage channels of the country The question is being considered, and the estimates for the necessary works will be included in the revised estimates of the project under preparation

21 The Deputy Revenue Superintendent in the 12th paragraph of his report sums up the result of the irrigation in Orissa as follows —

(1)—That about 35 per cent of the irrigable area has been brought under long lease and that on this revision of assessment by the survey maps, this percentage will probably rise to over 50 per cent, of the area commanded

(2)—That whenever drainage has been completed nearly the whole area commanded has been leased for but that with imperfect drainage and absence of distributary channels the progress made on the lower portion of the Kendrapara, including the Gobri and Patamoondi canals, is still most unsatisfactory

22 The question of flow and lift irrigation is dealt with by the Superintending Engineer and Deputy Revenue Superintendent in paragraphs 6 and 14 of their reports respectively The result is shown to be that while the area under irrigation in 1877 78 has increased from 98,495 acres to 111,250 acres in 1878 79, lift irrigation has fallen from 9,077 acres to 6,335 acres

23 The cadastral maps have been brought into use with good results as shown by the Deputy Revenue Superintendent in paragraph 17 of his report, from which it appears that the area assessed according to these maps is 30 per cent in excess of the areas entered in the leases

NAVIGATION

24 The canals in operation and the toll collections were as follow —

Canal	Length of canal open	Toll collections	Collection per mile
	Miles	Rs	Rs
Toldunda	27	1,811	67
Kendrapara	39	28,389	728
Gobri	15	8,046	536
High Level, Range I	33	11,858	359
Do do II	12½	6,195	495
Do do III	6½	748	115
TOTAL	133	57,042	421

The collections in previous years were —

	Rs
1877 78	33,841
1876 77	22,881
1875 76	16,377
1874 75	21,412
1873 74	18,577
1872-73	10,014

25 The revenue from navigation is thus shown to have greatly advanced In May 1878 the Gobri canal, a branch 15 miles in length, leading to the river Brahminee, was opened for traffic, and from the 1st of October 1878 tolls were levied on boats using the second and third ranges of the high level canal The following statement shows the traffic and earnings during 1878 79 as compared with 1877 78.—

Year	Length of canal open	Number of boats	Tonnage	Value of cargo	Tollage
	Miles	No	Tons	Rs	Rs
1877 78	103	12,484	105,?57	53,12 548	32,866
1878 79	133	14 042	129,616	40,79,504	62 343
Difference	+30	+1,558	+24,389	—12 33,044	+29 477

26 It will be seen that, although there has been comparatively a diminution in traffic and a considerable reduction in the value of the cargo, caused probably by the reaction which followed the great demand for rice during the famine in Madras, the tollage was nearly doubled This was caused principally by the enhanced rates levied since the 1st November 1878, partly also by the increased length of canal opened for traffic

27 The rate of toll on the Orissa canals was two pies per ton mile, while on the Midnapore canal it was three pies, but owing to the different description of boat in use on the latter, the tollage on the actual cargo comes to 6 pies per ton mile It was therefore decided to double the tolls on the Orissa canals from the 1st November to 1st July, leaving them as formerly during the rainy season when the rivers are in competition with the canals The figures in paragraph 25 show how the change has favorably affected the receipts from navigation, but it is impossible to say as yet if the enhancement of the tolls has really affected the amount of traffic That this has fallen off is certain, but the falling off commenced two months before the tolls were doubled, and it must be remarked that a similar decrease occurred in the Midnapore canal traffic where the tolls remained unchanged The probability therefore is that the falling off is due to the cessation of demand for grain for Madras, and this fact seems to be established by the figures in the following tabular statement giving the particulars of traffic, from which it will be seen that the reduction in tonnage is chiefly in articles of food —

	Tonnage of cargo		Value of cargo	
	1877 78	1878 79	1877 78	1878 79
	Tons	Tons	Rs	Rs
Articles of food	50,6?7	12,054	34,57,378	28,36,605
Stimulants	64	19	39 240	14 000
Clothing	3?7	48	42 016	27 840
Staples of manufacture	1 232	1 225	2,85,707	2 59,890
Building materials	8 719	8 708	3,03,120	3,35,057
Live stock	19		580	
Fuel	302	418	5,803	1,241
Cooking utensils and domestic implements	142	130	3,647	1,520
Miscellaneous	24 828	33 949	11,34,791	5,51 773
Total	86 260	66,581	52,72,285	40,27,926

28 During the year the steam launch *Pioneer*, one of the old gun boats which had been in use on the Ganges during the mutiny in 1857 58, was employed in towing passenger barges between Cuttack and Chandbally The experiment has proved most successful, as she cleared the sum of Rs 7,466, over and above the working expenses, in about nine months, notwithstanding that for the first month or two she worked at a loss, and that navigation was much impeded by the shoals in the Chota Brahminee The profits

do not appear in the revenue accounts, as they are included in the suspense account of the whole fleet, the earnings of which amounted during the year to Rs 2 285 A new steamer is now being built in the Cuttack workshops for the Cuttack and Chandbally line It is intended to complete the Gobri canal to Hansooa on the river Brahminee, when this is opened, it is believed that there will be a large traffic both in passengers and goods

29 The total revenue from all sources for the last two years was as follows —

	1877 78	1878 79
	Rs	Rs
Water rates	1,17,818	1 16,416
Navigation	33 844	57 042
Miscellaneous	9,415	8 546
TOTAL	1 61 107	1 82 004

From this it will be seen that the increase of revenue is due entirely to navigation, the irrigation receipts having been less than those of the previous year But Mr Wylly has shown that the irrigated area had increased by 12,755 acres, representing Rs 20,889 of revenue so that the falling off in the water rate receipts is only apparent, and is simply due to the outstanding balances of the years having been Rs 28,796 and Rs 80,237 respectively, as explained in paragraph 15 *ante*

30 The abstract of miscellaneous receipts, as given in the statement in the 13th paragraph of the Superintending Engineer's report, is not very satisfactory The largest item, Rs 2 672, is for rents of buildings Revenue from plantations show but a poor result, but it is hoped that in this item there will soon be a marked improvement

31 The working expenses for the year amounted to Rs 2,39,090, *viz*,—

	Rs	Rs
Maintenance		2 04,017
Irrigation establishment	27 598	
Navigation ditto	7 445	
		35 043
TOTAL		2 39 090

The receipts therefore fell short of the expenses by Rs 57 086

32 In the statement in paragraph 12 it was shown that the earnings of the year were Rs 2,43 873, the working expenses being Rs 2,39,090 as above Calculating in this way, there would be a profit of Rs 4,783, and there appears to be every probability of this being the last year of deficit

33 The following tables show the receipts and working expenses for the past seven years —

RECEIPTS

YEAR	Water rates	Navigation	Miscellaneous	TOTAL
	Rs	Rs	Rs	Rs
1872 73	19,071	10,014	7 508	36 623
1873 74	17,412	18,577	7,846	43 835
1874 75	20,382	21,412	6 691	48,485
1875-76	20,330	16,377	8,783	45,490
1876 77	40,378	22,881	11,298	74,557
1877 78	1,17,818	33,844	9,445	1 61,107
1878 79	1,16,416	57,042	8,546	1 82,004

WORKING EXPENSES

Particulars	1872 73	1873 74	1874-75	1875 76	1876 77	1877 78	1878 79
	Rs	Rs	Rs	Rs	Rs	Rs	Rs
1 *Maintenance*—

Tools and plant		683	18 070	5 823	11 688	8 231	17 238
Profit and loss	30						
Refunds of revenue						41	623
Total maintenance	1 90 466	84 756	1 55 717	1 76 180	1 87 130	1 76 837	2 04 047
2 *Revenue management*—							
Irrigation establishment	41 382	38 607	35 016	25 785	21 696	33 223	27 598
Navigation ditto	6 154	5 828	5 694	5 653	5 835	6 012	7 445
Total revenue management	47 536	44,435	40 710	31 438	27 531	39 235	35 043
Total working expenses	2 38 002	1 29 191	1 96 427	2 07 618	2 14 661	2,16 072	2 39 090

34 The reduction in cost of irrigation revenue management is very satisfactory The percentage was reduced from 53 73 in 1876 77 to 28 2 in 1877 78, and in the year under review to 23 7 per cent The increase in navigation establishment is due to the extension of the canals, the Gobri and the second and third ranges of the high level canals having been opened for traffic during the year

35 The following tables show the cost of maintenance of the canals and distributaries, as compared with the two previous years —

MAINTENANCE OF CANALS

Year	Length of canal open	Cost of maintenance	Cost per mile
	Miles	Rs	Rs
1876 77	114	65,778	577
1877 78	166	65,639	395
1878 79	181	87,714	484

MAINTENANCE OF DISTRIBUTARIES

Year	Length of distributary open	Cost of maintenance	Cost per mile
	Miles	Rs	Rs
1876 77	554	23 653	42¾
1877 78	587	17,567	30
1878 79	587	26,303	44⅘

The excess cost of maintenance of canals in 1878 79 over that of the previous year is mostly due to the increased expense of keeping down the weeds in the canals which, during the year, had not been closed for repairs, whereas, in 1877 78, they had been laid dry for silt clearance, the growth was consequently unchecked in the hot weather of 1878 Some excess was also caused by the increased cost of the earth work for repairs of the banks, the earth having been carried from a distance, instead of, as in former years, from the silted canal bed during the closure On the Kendrapara canal the cost of weed-clearing alone amounted to Rs 470 per mile, while on the high level and Machgong canals it was Rs 292 and Rs 170 respectively The introduction of a simple machine for weed clearing is much to be desired, and some experiments in this direction will shortly be made The increased cost of maintaining distributaries is due

to additional repairs to earth work and masonry works which were absolutely necessary to keep them in an efficient state Some of the repairs of the distributaries from the Machgong canal, which should have been executed in 1877 78, were postponed till 1878 79, hence the increased charge under that head from Rs 38 per mile in the former year to Rs 61 per mile in 1878 79

36 No measurements of the quantity of water escaping from the canals having been kept, it is impossible to say what has been the duty of the water used for irrigation Orders have recently been received from the Government of India on the subject, and from the commencement of the irrigating season of 1880 81 observations will be recorded

37 Experiments on irrigated rice crops have been continued in the year The results obtained by Mr Macmillan, Executive Engineer, Mahanuddy Division, give the following —

	Paddy Mds	Straw Mds
Irrigated per acre	30	41¼
Unirrigated ditto	20½	30¼

showing that there were in favor of irrigation 9½ maunds of paddy and 11 maunds of straw At 10 seers per rupee for the former and 5½ maunds per rupee for the latter, the value of the produce of an acre of rice would be increased by irrigation by Rs 11 8, and after deducting the water rate of ⅛ per acre, the profit to the cultivator would be Rs 10 The results obtained by Mr Rhind on the Brahminee Byturnee Division are very different The increased yield due to irrigation is stated by that officer to be as follows —

	Paddy Mds	s	c	Straw Mds	s	c
First class land	3	12	4	4	22	7
Second ditto	3	19	4	4	23	9
Third ditto	2	39	9	5	15	8

At the same rates the profits (after deducting the water rates) would be—

	Rs
First class land	2 65
Second ditto	2 80
Third ditto	2 46

No explanation regarding this discrepancy between the results of the experiments in the two divisions has been offered, but it will be seen from the report of last year that the balance in favor of irrigation in the Mahanuddy Division was said to be 16 89 maunds of paddy, and 6 25 in the Brahminee Byturnee Division in that year The difference is very nearly proportional to that shown in the year under notice

MIDNAPORE CANAL

38 The capital, interest and revenue accounts of this canal are shown below —

			Deficit	2,126	2 57,607

39 The total debt for unpaid working expenses and interest amounted for the year to Rs 3 26,659 and up to the end of the year to Rs 27,19,853

40 The expenditure on the canals and the earnings are given in the following table and show a profit of Rs 5,134 —

REVENUE ACCOUNT—(EARNINGS)

Expenditure	Amount	Earnings	Amount
	Rs		Rs
Works	1,09,211	Water rates	88 777
Establishment	50 512	Navigation	76 090
Tools and plant	13 083	Miscellaneous assessments by Deputy Collector	13 000
		Ditto recoveries	103
Total	1,72 836	Total	1 77 970
Profit	5,134		

41 During the year 39,118 acres were leased for irrigation in addition to 19,301 acres in 1877 78 The total area irrigated was 58,731 acres, of which 57,751 acres were under lease for four and five years, and the remaining 980 acres for one year In 1877 78, 19 818 acres were irrigated, or about ⅓ of the area watered in the year under report This favorable result is attributable partly to the fact that canal water is now thoroughly appreciated by the people with whom long leases are popular, and partly to a deficiency of rain in the beginning of the khurreef season, only 7¾ inches having fallen at Midnapore between the 1st of June and the 25th of July, against an average for that period of 22 inches After the 25th July, however, timely rain fell, and eventually nearly the average annual quantity was registered

42 The Superintending Engineer has shown in his report that the duty of the canal water in the early part of the season, when the country was dry, was only 58 acres irrigated per cubic foot of supply, the discharge of the canal being 701 22 cubic feet per second and the area irrigated 41,000 acres, or 1 66 acres per cubic foot per diem, but the duty, taking the average of the year, was, under the Midnapore weir 78 acres per cubic foot, and under the Panch koora weir, 122 acres, but on account of some uncertainty regarding the discharge, these results must be received with caution It is quite certain that very much better results would have been obtained if the canal had been cut to the full dimensions in the first reach This work will be carried out this season and in fact it has become imperatively necessary to do so, as the irrigated area has this year reached the unprecedented figure of 96,000 acres, most of which has been leased for four and five years

43 The total demand for water rates and miscellaneous revenue, inclusive of arrears of previous years, amounted to Rs 1,31,932, of which Rs 93,262 were realized and Rs 5,393 remitted during the year, leaving a balance of Rs 33,277 The assessments for water rates amounted to Rs 88,777, of which

Rs 62,717, or about 70 per cent, were collected in the year As mention was made in the report of last year of the unsatisfactory state of the collections, it will be as well to show by the following comparative statement that a marked improvement has taken place in this respect in the year under review —

Year	Assessments	Recoveries	Balance outstanding at end of year	Percentage of recoveries to assessments
	Rs	Rs.	Rs	Rs
1874 75	1,17 069	67,145	49,874	57
1875 76	87,789	25,576	61 713	29
1876 77	49,156	4 703	44 453	9
1877 78	29,960	7,961	21 999	26
1878 79	88,777	62,717	26,060	70

44 The miscellaneous revenue which amounted in the year to Rs 13,000 is composed of the following items —

	Rs
Land rent	5 171
Produce of canal banks	5,293
Fisheries	905
Miscellaneous	1,631
TOTAL	13,000

The following statement shows the assessments and collections under this head, as compared with previous years —

Year	Assessments	Collections	Balance
	Rs	Rs	Rs
1875 76	5,828	2,827	3 001
1876 77	7 789	4,931	2 858
1877 78	8 349	6 302	1 902
1878 79	13,000	5,940	7 060

The increase in miscellaneous revenue is very satisfactory, the outstanding balance is, however, large, but as the greater portion of the demand is payable with the water rates, the tehsildars could spare but little time from the latter to attend to the realization of the former before the year came to a close It is reported that on the 30th June the balance was reduced to Rs 5,000

45 The navigation revenue of the Midnapore canal, which rose in 1877 78 to the unprecedented figure of Rs 1,06 917, was reduced during the year to Rs 77,340 This falling off was due to the cessation of the demand for rice for export to Madras, and also to accidents and closures on the canal, but the steady increase in the traffic will be seen from the following figures —

Year	Tollage Rs
1870 71	11 781
1871 72	12 985
1872 73	20 994
1873 74	34,104
1874 75	44 886
1875 76	51 810
1876 77	67,651
1877 78	1,06,917
1878 79	77,340

46 The canal revenues for the year were as follow —

	Rs
Water rates	85 014
Navigation	77 310
Miscellaneous	8,356
TOTAL	1,70,710

47 The working expenses were—

	Rs	
Maintenance	1,50,807	
Revenue management	22,029	
Refunds of revenue		
		1,72,836
DEFICIT		2,126

48 The following table shows the details of revenue and working expenses of the year, as compared with those of previous years —

RECEIPTS.

YEAR	Water rates	Navigation	Miscellaneous	TOTAL
	Rs	Rs	Rs	Rs
1872 73	23,556	20,994	6,714	51 264
1873 74	35,823	34,104	2,711	72,638
1874 75	67,015	44,386	4 316	1,16,217
1875 76	52,791	51,810	6 505	1,11,109
1876 77	61,160	67,651	7,876	1,36,987
1877 78	53,483	1 06,917	9,693	1,70,093
1878 79	85,014	77,340	8 356	1,70,710

WORKING EXPENSES

	1872 73	1873-74	1874-75	1875-76	1876-77	1877 78	1878-79
	Rs.	Rs	Rs	Rs	Rs	Rs	Rs.
I —Maintenance, viz ,—							
Works and repairs	62,584	88,486	92,185	1,13,225	1,09,509	1,41,334	1,09,211
Establishment including direction and accounts	9 705	15,474	19,125	26 398	27,662	33 006	28 513
Tools and plant			714	1,164	9,714	6,117	13,083

Navigation do	5 133	5 896	7,097	7,119	7 149	7,151	7,227
TOTAL REVENUE MANAGEMENT	14,449	16,597	18,103	23,612	24,391	23,340	22 029
III —Refunds of Revenue						17	
TOTAL WORKING EXPENSES	86,998	1,20,557	1,30,427	1,67 399	1 71,279	2,03,814	1,72,836

49 It will be observed that, notwithstanding the large increase in the area irrigated and the amount of the collections during the year, the cost of the irrigation establishment has been reduced The percentage in 1876-77 and 1877 78 was 28 and 30 respectively, while in 1878-79 it was 17 4 only

50 The following statements show the cost of maintenance and repairs of the canal and distributaries, as compared with previous years, after deducting certain items enumerated by the Superintending Engineer in the 7th paragraph

of his report, which are properly chargeable to capital and special heads of revenue —

MIDNAPORE CANAL

Year	Length of canal open	Cost of maintenance	Cost per mile
	Miles	Rs	Rs
1872 73	24	26,543	1,106
1873 74	48	42,144	878
1874 75	48	56,281	1,172
1875 76	48	63 303	1 319
1876 77	48	65,343	1 361
1877 78	48	77 521	1 615
1878 79	48	59,787	1,246

DISTRIBUTARIES

	Miles	Rs	Rs
1872 73	103	7 012	68
1873 74	116	7 251	50
1874 75	178	8,917	50
1875 76	228	13 176	58
1876 77	251	25 026	99½
1877 78	255	22 726	89
1878 79	251	20 903	82

The reduction in expenditure on maintenance is satisfactory, but there is still room for improvement

51 The state of the traffic during the last seven years is shown in the following tables —

CANAL TRAFFIC

Description	Unit	1872 73	1873 74	1874 75	1875 76	1876 77	1877 78	1878 79

52 During the year the steamer *Midnapore* was started for passenger traffic between Calcutta and Daman on the river Roopnarain a distance of

36 miles, or half way to Midnapore, but she is ill adapted for the work and constantly under repair Though at first she worked at a loss, latterly the revenue has exceeded the expenditure Some interesting particulars of the relative rates of speed in the canal and open water of the river will be found in the 35th and 36th paragraphs of the Superintending Engineer's report The new paddle steamer and barge built for this line has been completed At the trial trip she attained an average of 7 7 miles per hour in the canal, when put regularly to work and the journey from Midnapore to Calcutta can be performed in one day there is little doubt of the success of the passenger traffic

53 Experiments on the yield of the rice crop grown on irrigated and unirrigated lands have been continued by both the Executive Engineer and the Deputy Canal Revenue Superintendent The results obtained by the former may be briefly stated as follows —

		Paddy	Straw	Rainfall
		Mds	Mds	Inches
Under the Midnapore weir	Irrigated	23 24	61 40	
	Unirrigated	15 32	31 30	
Difference in favor of irrigation		7 92	30 10	53 1[illegible]
Under the Panchkoora weir	Irrigated	33 43	60 17	
	Unirrigated	28 62	54 03	
		4 81	6 14	42 9[illegible]
Hidgellee unirrigated		23 63	39 70	64 01

Statements on the subject in greater detail will be found in the report by the Superintending Engineer, who shows by comparison with the yield in 1876 when a full crop was obtained without irrigation, 'that irrigation may be credited at Midnapore with a gain of 1½ maunds of paddy and 18 maunds of straw over and above that obtained in the best year on unirrigated ground In the irrigated areas under the Panchkoora weir, the difference in favor is 4 maunds paddy, the straw, however, being deficient as compared with that obtained from unirrigated land '

54 The results obtained by the Deputy Revenue Superintendent were different He divided the irrigated portion of the country to be experimented on into three equal zones—the first being that nearest the distributary, and the third the most distant—and selected certain fields in each In this way the following results were obtained —

AVERAGE YIELD OF CROPS

		Irrigated crops per acre	Unirrigated crops per acre	Difference in favor of irrigation per acre
		Mds	Mds	Mds
Midnapore weir	First zone	21 45	18	3 45
	Second do	19 50		1 50
	Third do	17 50		— 50
Panchkoora weir	First zone	32 71	26 06	6 65
	Second do	36 28		10 22
	Third do	32 62		6 56

No explanation is offered why the yield of an irrigated acre in the third zone under the Midnapore weir is less than that of an unirrigated acre, or why the yield in the second zone under the Panchkoora weir is so much greater than that of either the first or second The discrepancies in this set of experiments as well as between those of the Executive Engineer and the Deputy Revenue Superintendent, show that the results must be received with caution

HIDGELLEE TIDAL CANAL

55 The capital, interest, and revenue accounts are given below —

CAPITAL ACCOUNT

	Outlay during the year	Outlay to end of year
	Rs	Rs
Works		12,66 239
Establishment		4,49 790
Tools and plant		57,585
		17,73 614
DEDUCT—Receipts on capital account		915
		17,72 699
ADD—Capitalized abatement of land revenue		11 206
		17 83 905

INTEREST ACCOUNT

	Rs
Interest to end of previous year	6 05,992
Ditto of the year	80 268
Total interest to end of 1878 79	6 86 260

REVENUE ACCOUNT—(ACTUALS)

	Expenditure			Receipts	
	During the year	To end of year		During the year	To end of year
	Rs	Rs		R	Rs
Works (maintenance)	16 599	1 70 412	Water rates		2 611
Establishment	6 581	61 480	Navigation	59 723	3 13 775
Tools and plant		4 103	Miscellaneous	1 070	5 659
TOTAL	23,180	2 35 995	TOTAL	60 793	3 22 045
Surplus	37,613	86 050			

56 If the revenue from this canal be calculated from the earnings instead of actual receipts of the year, the account will stand as follows —

REVENUE ACCOUNT—(EARNINGS)

	Expenditure		Earnings
	Rs		Rs
Works (maintenance)	16,599	Navigation	58 990
Establishment	6 581	Miscellaneous	1 070
Tools and plant		TOTAL	60 060
TOTAL	23 180		
Surplus	36 880		

57 The tonnage on this canal increased from 151,426 in 1877 78 to 164 687 in 1878 79, the tollage however, diminished from Rs 60 971 to Rs 59,723

58 The revenue from the Hidgellee canal, as compared with that of the previous year, will be seen from the following figures —

Year	Revenue	Working expenses	Balance
	Rs	Rs	Rs
1877 78	62 280	30,564	31 716
1878 79	60,793	23 180	37 613

The surplus of the year, Rs 37,613 represents a profit of 2 10 per cent on the capital of Rs 17,83,905

59 The reduction in the cost of working expenses is due to the fact that no silt clearance was found to be necessary during the year The expenditure on maintenance amounted to Rs 572 3 per mile of canal, against Rs 774 8 in the previous year

60 The details of the traffic from 1872 73 are given in the following tables —

COMPARISON OF TRAFFIC

	Unit	1872 73	1873 74	1874-75	1875 76	1876 77	1877 78	1878 79

Total revenue management	76,144		
III—Refund of Revenue	270		
TOTAL WORKING EXPENSES	3,70,504		
Profit	2,19,961	TOTAL	5,90,465

				Rs	A	P
* Sugarcane	19 624 acres at Rs	5	=	98 120	0	0
Khurreef and rubbee (flow)	159 255	2 8	=	3 98 137	8	0
Ditto ditto (lift)	18 139	1 10 8	=	30 231	10	0
		TOTAL		5 26,489	2	0

The above profit represents nearly one per cent on the capital expenditure of Rs 2,08,00,000 to end of 1878-79

63 The following is a comparative statement of the irrigated areas assessed in 1877-78 and 1878 79 —

YEAR	Khurreef	Rubbee	Sugarcane	TOTAL
	Acres	Acres	Acres	Acres
1877 78	107 087	124,812	9,891	241,790
1878 79	99 964	77,430	19 624	197,018
DIFFERENCE	—7,123	—47,382	+9 733	—44 772

The falling off in the khurreef is due to the rainfall in August and September 1878 having been so much heavier than in the corresponding period of 1877, the mean fall over 25 stations in 1878 and over 5 stations in 1877 having been 15 55 and 7 27 inches respectively It is also partly due, no doubt, to the higher water rate of Rs 2 8 per acre, against Re 1 in 1877, when the orders were to save as much of the crops as possible without reference to returns The falling off in rubbee is due to the destruction of a large portion of the crops of 1877 78 by insects, and to heavy rain in the cold season which followed an injudicious application of excess irrigation Experience will soon teach the people, who are as yet unaccustomed to the use of canal water, that the rubbee crops will not stand such heavy floodings as they that year applied Both the above mentioned causes doubtless hindered the cultivators from taking water for the rubbee crops in 1878 79 as freely as they did in the previous year

64 The great increase in the area of sugarcane irrigated is very satisfactory Within the last few years—since in fact the canals have been constructed—the area of this crop under cultivation has enormously increased, especially in the district of Shahabad The facilities given to the growth of the plant by the canal water and to the expression of the juice by the handy little mills invented by Messrs Thomson and Mylne of Beheea, have no doubt been the cause of this increase, which will be more clearly seen from the following figures extracted from statement P of the Superintending Engineer's reports, showing the exports of *jaggery* from Shahabad by the East Indian Railway during the past eight years —

YEAR	Mds
1872	51 107
1873	42 919
1874	28,170
1875	56 863
1876	51 195
1877	3 07 211
1878	4 85 669
1879	4 61 399

It is much to be regretted that the supply of water in the Sone falls so low in the months of April, May, and June that but a limited area of sugarcane can be watered

65 The system of leasing for three years alluded to in paragraph 48 of last year's report, has not proved successful and has been abandoned The terms offered were as follow —

(1)—For khurreef the rate per acre to be Re 1 8, but no lease to be given for any area less than the whole irrigable area of the village

(2)—For rubbee the rate to be Rs 2 4 and the area to be leased must be at least half the gross irrigable area

The object with which the three year lease system was introduced was to avoid the continually recurring measurements of the irrigated areas, annual applications for water, and other harassing details, but this was entirely frustrated when the people sowed rice on rubbee lands, rubbee on rice lands, and sugarcane on both It is clear that no lease based on *crops* for a term of years can possibly be satisfactory The unit of assessment must be the land It is believed that an arrangement of this sort would be generally popular, and measures will be adopted to introduce the system

66 Comparison of the area leased, that is, for which application for water was made, and actually measured and assessed for water rate in 1878 79, is given below —

Crop	Area leased	Area irrigated	Excess irrigated
	Acres	Acres	Acres
Khurreef	73,033	99,964	26,931
Rubbee	48,397	77,430	29,033
Sugarcane	10,475	19,624	9,149
Total	131,905	197,018	65,113

67 The area irrigated under the different canals and executive divisions is shown in the following table —

Division	Canal	Khurreef	Rubbee	Sugarcane	Total
		Acres	Acres	Acres	Acres
Arrah	Arrah	74,827	44,002	14,424	133,253
Buxar	Main Western, Buxar	18,260	23,382	5,071	46,716
Eastern Sone	Patna, Main Eastern	6,877	10,046	126	17,049
	Total	99,964	77,430	19,624	197,018

68 The proportion of flow to lift irrigation is as 90 8 to 9 2, but under the Arrah canal, which has been longest open, 25 per cent of the rubbee was irrigated by lift The percentage under the other canals was very much smaller as will be seen from the Executive Engineer s reports This seems to point to the fact that as experience is gained there is an increased tendency to lift irrigation for the rubbee crop

69 The following figures showing the areas commanded by the different canals in 1878 79 and actually irrigated are interesting —

	Canals					Total
	Arrah	Western Main	Buxar	Eastern Main	Patna	
	Acres	Acres	Acres	Acres	Acres	Acres
Area for which water can be given	413,530	18,660	206,388	12,080	271,830	922,488
Do actually irrigated 1878 79	133,253	46,716		17,049		197,018
Percentage of area irrigated to area commanded	32.27	20.75		6.00		21.35

The distributaries from the Patna canal were opened during the year for rate payable irrigation In the previous year water was given from this canal free of charge The total length of all the canals and distributaries from which irrigation can be given is 217½ and 918¾ miles respectively

70 The spread of irrigation is to a great extent dependent on the construction of village channels A good example has been set on the estate of Messrs Burrows, Thomson and Mylne, of Behea, by whom 60 miles of channel have been neatly and well constructed and 16 miles more are in hand The cost per mile is said to have been Rs 270 In the Arrah and Buxar Divisions 142 applications have been received from zemindars, and Rs 10,675 have been deposited by them, for the construction of village channels But little progress has, however, been made, for reasons given by the Executive Engineer, Arrah Division, who states that "the proprietors of land through which such channels pass invariably offer the most obstinate resistance to the alignment originally selected and to any modification of it that is proposed " In the Buxar Division 16 channels, aggregating 13 miles, have been mostly completed On the east of the Sone, in the districts of Gya and Patna, very little has yet been done towards the construction of village channels There is, however, not the same

necessity for them there as in Shahabad, as the ridges of the country on which the distributaries are aligned are closer together and very well defined

71 The rules framed in October 1878 under the Bengal Irrigation Act have been carefully revised, and fresh instructions to the officers engaged in canal revenue work have been issued

72 The cadastral survey of the irrigable area under the canals east of the Sone in Gya and Patna, as well as that under the Arrah canal and its branches, has been completed The survey of the area commanded by the Buxar canal lying to the west of the river Kao in Shahabad has not been undertaken, as the cost 9 annas per mile nearly, has proved so high that it has seemed expedient to wait until it is seen from practical experience how far it is desirable to extend it The total area surveyed by the Revenue Survey Department is 1,808 400 square miles at a total cost of Rs 6,49,315, or Rs 359 0 10 per mile To this must be added Rs 29,419 for the survey of 46 5 square miles by the officers of this department previous to 1874 75, when the Revenue Survey Department took the work in hand The total expenditure on the survey of 1,855 square miles has been therefore Rs 6,78,734 Tabular statement M2, attached to the Superintending Engineer's report, affords some interesting results of the work done by the Revenue Survey Department in the five years 1874 75 to 1878 79 It will be seen from this that in 3,240 villages surveyed there were 4 026,315 fields aggregating 1,157,379 acres, so that each field averaged 287, or a little over ¼ acre The maps have been plotted to a scale of 32 inches to a mile and are well executed Besides these maps, sheets to a scale of four inches to a mile, in which the village maps are combined, have been prepared, and will be most useful in laying out village channels With the maps *khusrahs* have been issued showing the area of each field and holding with the cultivators' names The maps will shortly be brought into use, and next year it will be possible to say how far they will have proved useful and economical

73 The outstanding balance on account of water rates at the commencement of the year amounted to Rs 81,341, and the demand for the year to Rs 6 06,821, making a total of Rs 6,88,162, of which Rs 3,73,312* were collected and Rs 10,439 remitted, leaving an outstanding balance of Rs 3,04,411, of which upwards of 50 per cent has since been collected. That so large a balance should have remained uncollected at the end of the year is due to several causes—(1) late period at which demand statements were sent to the Collector, (2) measurements not being satisfactory, (3) cultivators having lost much of their rubbee crop of 1877 78 by the ravages of insects, and being unable in consequence to pay up the water rate On this latter account considerable further remissions will have to be made

	Rs
* Western Main canal series	3 64 112
Eastern ditto ditto	9 200
TOTAL	3 73 312

74 The Commissioner, in the 7th paragraph of his report, quoting from that of Deputy Collector Baboo Gunganath Roy, enumerates seven items of defects in the present system which, in the opinion of the latter, have retarded the progress of the collections, but the same Deputy Collector also states that the remissions on account of wrong assessments amounted to Rs 1,873 only, but at the same time he says that "further relinquishments may be looked for" It must, however, be noted that the wrong assessments referred to by the Commissioner have for the most part been caused by the non-attendance of the village putwaris at the measurements, and the consequent difficulty of obtaining correct information regarding boundaries and the right persons to be assessed It will be understood from perusal of the several items mentioned by the Commissioner that this department can hardly be held responsible for such defects when no authorized village headman or putwari is present to give the necessary information The defects in the system have since been, to a great extent, remedied, the Collector having taken steps to appoint a better class of men as putwaris, and to compel their attendance during the measurements That much improvement has taken place may be inferred from the 15th paragraph of the report of the Deputy Collector abovementioned, who states that "the demand statements for water given in 1878 79

received, so far as has been seen of them, appear to be reliable documents, free from the defects so conspicuous in the demand statements for the previous year"

75 The navigable canals in operation and the amount of total collections for the year are shown in the following statement —

CANAL	Length of canal open	Toll collections	Collections per mile
	Miles	R	Rs
Main Western	22	4 706	211
Arrah	65	6 056	93
Patna	87	18 570	213
TOTAL	174	29 332	168

76 The collections in each year since the opening of the canal are as follow —

1876 77	4 852
1877 78	26 774
1878 79	29 332

77 The state of the traffic during the past three years is shown below —

	Unit	1876 77	1877 78	1878 79
Number of miles open at end of year	Miles	84	171	174
Toll collections	Rs	4 852	26 774	29,332
Rate of tolls per mile	"	58	156	167
Boats including empties	No	2 421	8 693	6 878
Measured tonnage of boats, excluding empties	Tons	26 010	81 897	66 380
Estimated value of cargo	Rs	4 04,399	12 79,257	26,98 511

78 The above figures represent the total traffic in each year inclusive of carriage of stores and materials for the works, which has decreased in the last year, as the works have been drawing towards completion The Superintending Engineer in his report has shown that there has been a very considerable increase in the private traffic on the canals as follows —

There was an increase in tollage receipts on private traffic of	Rs	10 353
There was an increase in number of boats engaged in private traffic passed through the canals of	No	1,463
There was an increase in tonnage of boats employed in private traffic of	Tons	17,271
There was an increase in value of private cargo of	Rs	13,78 715

These figures and not the general results, Mr Walker justly remarks, "are the best tests of the extent to which the canal irrigation is appreciated by the general public" The increase cannot be considered otherwise than satisfactory

79 During the year the tollage rates on stone, kunkur, brick, and coal and empty boats were reduced by one half, as a tentative measure, the reasons for doing so, and the results so far, are given in the Superintending Engineer's report (page 13)

80 The following statement shows the classification of goods, exclusive of materials for the works —

	1876 77	1877 78	1878 79
	Tons	Tons	Tons
Articles of food	813	11,415	9,019
Stimulants	21	760	1,143
Clothing	17	78	591
Staples of manufacture	13	988	4,878
Building material	153	2,765	7,387
Live stock			
Fuel		957	1,949
Cooking utensils and other domestic implements		290	1,059
Miscellaneous	910	6,497	14,415

81 The Superintending Engineer, at pages 14 and 15 of his report, gives some interesting particulars regarding the details of the traffic on the canals It appears that salt is the principal article of food carried, that of 2,271 boats which plied on the Patna canal with private goods, 1,251 passed through the outfall lock into the Ganges, and that the number of outgoing boats almost exactly balanced the number entering the canal Of this 731 paid tollage on the whole length of the canal, and return freights, consisting of oil seeds hides lime mill stones &c were generally obtained The tollage on rafts of bamboos and poles amounted to one eighth of the private traffic One hundred and fifty nine boats with passengers passed through the outfall lock of the Patna and Arrah canals which is encouraging for the future The average cost of conveying 100 maunds of goods by these canals for a distance of one mile is 1.80* anna while the cartage rate of the district is 10 annas

	A
* Toll line	1.20
[illegible]	.60
Total	1.80

82 During the past year attempts have been made to start steam navigation on the canals, and for some months last cold weather the steamer *Sir Arthur Cotton*, a launch built by Messrs Thornycroft in England was kept running twice a week up and down the Patna canal The vessel is not adapted for the work required, and, as expected she did not pay her working expenses but the satisfactory increase of passengers and goods carried, fully warranted the continuance of the experiments and it is hoped when the new steamer at present under construction is ready, that goods and passenger traffic on the canals will be worked with advantage to the revenue of the canals and to the requirements of the district It is in contemplation to construct several steamers for the navigation of the Arrah Buxar, and Patna canals The cost will be that of the hulls and fittings only as there are four powerful locomotives which were used for the conveyance of stone to the weir, when under construction available for them These locomotives being of four feet gauge, are useless for any railway in India

83 The miscellaneous revenue for the year amounted to Rs 34,982 as follows —

	Rs
Miscellaneous receipts by sale of water	330
Water supply to towns	199
Receipts from plantations	39
Ditto from other canal produce	893
Rents of buildings	6,259
Do of lands	4,082
Do of fisheries	110
Fines	2,060
Profits on sales from workshop manufacture	9,759
Miscellaneous and other receipts	11,251
Total	34,982

Rents of land and income from plantations will probably increase, but on the other hand sales of stock manufacture in the Dehree shops will surely dwindle down to a low figure when the division is abolished

84 The Superintending Engineer, at page 17 of his report, has given a detailed statement of the trees on all the canals which now amount to 114,13[illegible] of sorts During the year 56,965 young trees were planted out from the nurseries The cost of maintenance has been about two annas per tree, and about 40 per cent are sufficiently grown to be beyond the reach of cattle

85 A contract for seven years has been entered into with the Shahabad Sugar Company for a supply of water at the second fall of the Arrah canal at Nasrigunge, equivalent to 50 horse power, for which they are to pay Rs 75 per horse power per annum after the second year On the Buxar canal a small experimental flour mill of an inexpensive description has been erected, and it is hoped, now that a beginning has been made, that a new source of income will be established for the Sone canals by utilizing the immense horse power of the water available at the falls

86 The revenue from all sources and the working expenses for the last two years were as follow —

	1877-78	1878-79
Receipts—	Rs	R
Water rates	59,6[illegible]1	3,73,31[illegible]
Navigation receipts	26,7[illegible]1	[illegible]9,33[illegible]
Miscellaneous	11,567	[illegible]1,98[illegible]
TOTAL	1,01,29[illegible]	4,[illegible]7,[illegible]
LESS REFUNDS OF REVENUE	[illegible]50	[illegible]70
TOTAL RECEIPTS	1,00,[illegible]12	4,37,[illegible]
Working expenses—		
Maintenance (including establishment)	[illegible]10,8[illegible]8	2,91,081
Irrigation establishment	3[illegible],562	60,1[illegible]
Navigation ditto	8,[illegible]67	9,[illegible]71
TOTAL WORKING EXPENSES	[illegible]51,6[illegible]7	3,70,[illegible]28
SURPLUS	—1,51,11[illegible]	[illegible]7,12[illegible]

87 The irrigation establishment, which does not include any share of engineers and subordinates' salaries, is made up of the following items The percentage of each on the total collections is shown in the adjoining column —

	Amount	[illegible]
Permanent and temporary establishments such as zilladar ameens, and measurement [illegible] patrols &c	Rs 16,089	[illegible]
Establishments employed under the Collector	13,400	[illegible]
Headmen's fees	[illegible],681	1[illegible]
	66,1[illegible]	1[illegible]

88 If we suppose the whole water rate of the year, Rs 5,26,189 to have been collected, and a proportionate increase of the Collector's establishment to be added as well as the full charge of 10 per cent for headmen's and putwaris' fees, the account will stand thus —

	Amount	[illegible] on collections
Permanent and temporary establishments, such as zilladars ameens, measurement khalasies, patrols, &c	Rs 16,089	8[illegible]
Collector's establishments	18,901	3[illegible]9
Headmen's and putwaris' fees	52,619	10 00
TOTAL	1,17,63[illegible]	[illegible]2 34

89 Headmen's fees form a heavy charge against the revenue Under the rules in force during the year 4 per cent was payable to the headmen for work in connection with water distribution and 4 per cent for collecting the rates Two per cent was also payable to putwaris for attending at the measurements, copying the *perchas* for the cultivators, &c There does not appear to be any probability of reducing these charges for some time to come

90 The cost of navigation revenue establishment amounted, during the year, to 34 per cent on the toll collections It must be remembered however, that the khalasies working the locks also regulate the water supply at the falls, a portion of their salary is therefore properly chargeable to irrigation revenue

91 The cost of maintenance, Rs 2,94,084, is made up of the following items —

		Rs	Rs
1	Maintenance and repairs		2,34 812
2	Establishment (direction and account)	12,185	
	Proportion of engineers and subordinates' salaries	12 776	
			51,961
3	Compensation for damage to crops &c		1 260
4	Tools and plant		3 051
	Total		2 94 081

92 Mr Walker has entered very fully in his report into the details of cost of maintenance Distributed under the four main heads of outlay, the expenditure on works has been as follows —

		Rs
1	Head works	31 192
2	Main canals	1 48 194
3	Distributaries	46 695
4	Drainage	5 731
	Total	2 31 812

93 The repairs to the weir across the Sone, which is 12,461 feet in length, constitute the bulk of the work on the headworks The cost of maintenance has been Rs 2 744 per running foot The cost of repairs to under sluice shutters was Rs 2 per foot run

94 The cost of repairs for each mile of canal, as given by Mr Walker is as follows —

Division	Canals	Length of Canal	Total cost of repair	Cost of repair per mile	Bottom width of canal
		Miles	Rs	Rs	Feet
Arrah	Main Western	9	49 077	5,453	180
	Arrah	65	37 845	582	86 to 47
Buxar	Main Western	12	10 377	865	124
Eastern Sone	Main Eastern	4	12 377	3,095	180 to 100
	Patna	79	38,522	488	84 to 47
	Total	169	1,18 198		

95 The high cost of maintaining the Main Western and Eastern canals is due to the great expense incurred in removing the immense quantity of silt deposited near the heads during the freshes The short length over which the cost of this item is distributed causes the incidence of charge on each mile to appear excessive There is no possibility of preventing this great deposit of silt, which is proportional to the volume of water entering the canals during the freshes It was known that such would occur, and provision for its removal by dredging was made in the estimates In Mr Walker's report (page 4) full particulars of the cost of each item of repairs is fully stated

96 The cost of repairs to distributaries was as follows —

Division	Canal from which distributaries are taken off	Distributaries with particulars	Length of distributaries under repair	Total cost of repairs	Cost per mile
			Miles	Rs	Rs
Arrah	Arrah	Bebea (branch canal)	30	8 527	284
		Doomraon (ditto)	40	13,721	343
	Arrah and Main Western	Ordinary	410	16,137	39⅓
Buxar	Buxar	Branch canal and ordinary	48½	8 310	171⅓
		Total	528	46,695	

The Bebea and Doomraon branch canals are 30 and 40 miles in length respectively, and the Chowsa branch in the Buxar Division is 40 miles long They carry from 500 to 600 cubic feet per second in full supply The cost of maintenance of these lines and of the ordinary distributaries as shown in the above statement must be considered moderate

97 No very reliable particulars of the duty of the water on the Sone canals can be given, as the water escaping at the end of the canals and distributaries was not measured The Superintending Engineer, in the 7th page of his report, gives some information on the subject, taken from the report of the Executive Engineer Arrah Division He says—"The average duty during a month of very scanty rainfall (the fall in October being only 0 21 inch over the whole of Shahabad) is stated to have been 55 acres to each cubic foot of discharge The most diverse results, however, were obtained in the different sub divisions in October, from which the foregoing was obtained as Mr Odling shows in his report Thus in the Nasrigunge sub division the duty was only 50 acres, while in the Lethan distributary the irrigation over an area of 10,212 acres gave so high a value to the cubic foot unit as 94 acres nearly"

Measures will be adopted for determining the escape water from each channel in the current year with the object of arriving at a more correct result than has hitherto been possible

GENERAL REMARKS

98 The results of the irrigation operations of the year are, on the whole satisfactory The receipts have exceeded the working expenses by Rs 45,523, thus *for the first time* Bengal irrigation has shown a profit which would have been greater had the outstanding balances been collected Calculated by earnings of the canals, the surplus on the year's operations would be Rs 2,66,758 as follows —

		Rs
Orissa	canals	1 [illegible]83
Midnapore	do	5 131
Hidgellee	do	36 880
Sone	do	2 19 961
	Total	2 66 758

99 For the spread of irrigation in Orissa we must look to the extension of the distributaries and the completion of the canal system In Midnapore the limits to which irrigation can be expected to extend have been nearly reached, further development must depend on the construction of reservoirs in the hills to supplement the supply in the river Cossye On the Sone canals the eventual increase of the irrigated area is certain, but the rapidity with which it is likely to be developed will be dependant, in a great degree, on the seasons and the amount of the rainfall, much will also depend on the speedy construction of village channels, and it is expected that the introduction of a satisfactory system of leases for long periods will have a most beneficial effect

100 It is much to be regretted that Mr Walker, the Superintending Engineer of the Sone Circle, has been compelled by ill health to retire from the service This officer had been in charge of the Orissa Circle since 1869 up to the commencement of the current year, when he was transferred to the Sone Circle in the hopes that the drier climate of Behar would prove beneficial to his health, but unfortunately this has not been the case and he now retires from the service His able management of the work in Orissa left nothing to be desired, and the admirable report hereto annexed shows that he had thoroughly grasped, and made himself master of the details of the system on the Sone canals

101 It is difficult when all the officers of the department have performed their duties in a praiseworthy manner to make any selection, but I would specially mention Major Heywood, R E, Superintending Engineer, whose supervision of the South Western Circle has been very satisfactory, and Mr Odling, Executive Engineer, Arrah Division of the Sone Circle, who has devoted himself to the revenue work with the best results His report attached hereto *in extenso* shows how thoroughly he has mastered the details of his duties Mr Fouracres, the Executive Engineer of the Workshop Division, continues to exercise his inventive talents for the benefit of the work, his new dredger having proved to be one of the most successful and useful machines of the sort ever yet constructed Of the Assistant Engineers, Messrs Douglas and Inglis (both from Cooper's Hill) have distinguished themselves in the revenue management of their sub divisions in the Arrah Division

H C LEVINGE, C E

Chief Engineer, Bengal, Irrigation Branch

RAILWAY TRAFFIC

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE 4th QUARTER OF 1879

Circular No 18R Simla, the 12th June 1880

Read again—

Public Works Department Circular No 24R, dated 31st July 1879

Read also—

Returns of Accidents to trains &c on the open lines of Railway in India for the quarter ending 31st December 1879

OBSERVATIONS —The number of accidents to trains rolling stock permanent way, &c decreased from 711 in the corresponding quarter of the previous year to 594 or by 117 with an increase of 128 miles in the open length of railway and of 81 381 in the train mileage The decrease appears to be due to the elimination from the present returns of minor accidents on the East Indian Railway which were previously included in the returns The number of miscellaneous accidents on this line is shown as 2 against 115

2 There was an increase of 19 accidents on the Oudh and Rohilkhund Railway, 16 on the South Indian, 37 on the Punjab Northern, 25 on the Indus Valley and 20 on the Rajputana and a diminution of 15 on the Eastern Bengal 32 on the Sind, Punjab and Delhi, 13 on the Madras, 37 on the Great Indian Peninsula, and 20 on the Rangoon and Irrawaddy Valley Railways

3 On the Oudh and Rohilkhund Railway the increase chiefly took place under "Goods trains or parts of goods trains, engines, &c, leaving the rails," and "trains running over cattle on the line" on the South Indian under "goods trains &c leaving the rails" and "trains running through level crossing gates" on the Punjab Northern under "failure of machinery &c and failure of couplings and on the Rajputana under "failure of couplings

4 On the Eastern Bengal Railway the cattle accidents decreased from 10 to 2

5 On the Sind Punjab and Delhi the decrease appears to have mainly taken place under "goods trains, &c leaving the rails," "trains running over cattle on the line and miscellaneous accidents

6 On the Great Indian Peninsula Railway the accidents from goods trains, &c leaving the rails" diminished from 9 to 2, and those from trains running over cattle" from 14 to 3 In the corresponding quarter of 1878 there were 7 cases in which couplings had failed; no such accidents have been reported for the quarter under review

7 On the Rangoon and Irrawaddy Valley State Railway the machinery &c of engines failed in one instance only against 10 and the number of cases of trains running over obstructions on the line was *nil* against 6 in the 4th quarter of 1878

8 The casualties resulting from accidents to trains &c, show a very large increase There were 22 passengers killed and 49 injured against 3 injured and one servant killed and 10 injured against 1 killed and 5 injured In one accident alone which occurred to a mail train on the Madras Railway on 31st October 1879, 22 passengers were killed and 46 passengers and 2 servants injured A detailed account of this accident is given in the Appendix to the Returns

9 There were 18 collisions between "passenger trains" and "goods or mineral trains, engines and vehicles standing foul of the line by which 2 Railway servants were injured; 26 collisions between goods trains or parts of goods trains resulting in 1 servant killed and 2 injured; 7 collisions between light engines; 7 cases of passenger trains or parts of passenger trains leaving the rails; 89 cases of goods trains or parts of goods trains, engines, &c., leaving the rails; 14 cases of trains or engines travelling in the wrong direction through points; 2 cases of trains running into stations or sidings at too high a speed; 104 cases of trains running over cattle on the line; 14 cases of trains running over obstructions; 19 cases of trains running through gates at level crossings; and 12 cases of bursting of boilers or tubes, &c., of engines. There were 47 failures of engine machinery by which three servants were injured; 1 of tyres; 1 of wheels; 10 of axles; and 54 of couplings by which one servant was injured. There have also been reported 10 cases of broken rails; 3 cases of flooding of permanent way; 9 cases of slips in cuttings and embankments by which twenty-two passengers were killed and forty-six passengers and two servants injured; 64 cases of fire in trains; 8 cases of fire at stations or involving injury to bridges or viaducts; and 25 miscellaneous accidents by which three passengers were injured.

10 All the 3 cases of flooding of permanent way took place on the Rangoon and Irrawaddy Valley State Railway. Of the 10 cases of broken rails 7 were on the Northern Bengal and 3 on the Muttra Hathras; of the 12 cases of bursting of boilers or tubes of engines 1 was on the Eastern Bengal and 11 on the Sind, Punjab and Delhi; and of the 9 cases of slips in cuttings or embankments 6 were on the Madras and 3 on the South Indian.

11 The number of goods trains or parts of goods trains, engines, &c., leaving the rails was the largest on the Oudh and Rohilkhund Railway; cattle accidents and fires in trains on the Indus Valley; failures of machinery of engines on the Punjab Northern; and failures of couplings on the Rajputana.

12 The casualties to passengers from causes other than accidents to trains, &c., were 10 killed and 15 injured, of whom 1 was killed while getting out of a train in motion; 2 injured whilst crossing the line at stations; [illegible] killed and 8 injured by falling out of carriages during the travelling of trains; and 3 killed and 5 injured through other causes.

13 Of other persons killed and injured by running trains, &c., 1 was injured whilst passing over the line at level crossings; 28 killed and 6 injured whilst trespassing on the line; 8 were suicides, and 7 were killed and 1 injured from miscellaneous causes.

14 The accidents to servants in the employ of Railways or of contractors whilst performing duties connected directly with the transit of passengers and goods from causes other than accidents to trains, &c., consisted of 34 killed and 78 injured. Of these 1 was killed and 11 injured during shunting operations; 2 killed and 9 injured by falling off engines, vans, wagons, &c.; 1 injured by coming in contact with overbridges, &c., during the travelling of trains; 1 killed by coming in contact whilst shunting with vehicles, &c., standing on adjoining lines; 3 killed and 8 injured whilst getting on or off trains, engines, &c.; 2 killed and 3 injured whilst loading, unloading, shunting; 1 injured whilst braking, spragging or chocking wheels; 2 injured whilst working at cranes or capstans; 3 injured whilst working on the permanent way or in sidings; 7 killed and 1 injured whilst walking along the line on the way home or to work; 8 killed and 4 injured whilst walking, crossing, or standing on the line; 1 killed and 1 injured whilst passing between vehicles; 1 killed and 7 injured whilst attending to the machinery of engines, cleaning them, &c.; 1 injured whilst attending to gates at level crossings; 2 killed and 1 injured by falling off ladders, scaffolds, platforms, &c.; 1 injured by the falling of lamps, wagon door, timber, weights, &c.; 2 killed and 9 injured whilst coupling or uncoupling wagons; and 4 killed and 15 injured from miscellaneous causes.

15 The following table exhibits the total numbers of persons killed and injured from causes connected with the working of trains, as compared with those in the previous corresponding quarter —

	Fourth quarter 1878		Fourth quarter 1879	
	Killed	Injured	Killed	Injured
Passengers				
From causes beyond their own control	2	4	22	49
„ misconduct or want of caution	4	13	10	18
Servants				
From causes beyond their own control	7	19	3	24
misconduct or want of caution	31	59	32	64
Others				
Whilst passing at level crossings	2			1
Trespassers including suicides	30	5	31	1
Other persons	5	3	12	3
Total	81	103	110	160

16 In addition to the above 21 persons are reported to have been killed and 20 injured in yards workshops &c and 85 passengers to have met death in carriages and at stations from causes unconnected with the working of trains

RESOLUTION —The attention of the Director General of Railways should be called to the large number of failures of couplings on the Punjab Northern and Rajputana State Railways These were at the rate of 115 and 50 per million train miles respectively whereas the average on all other lines did not exceed 1 6 per million train miles

The Governments of Madras Bombay Bengal the North Western Provinces and Oudh and the Punjab
The Chief Commissioners Central Provinces Assam and British Burmah
The Resident at Hyderabad
The Agents to the Governor General for Rajputana Central India, and Beluchistan
The Director General of Railways
The Consulting Engineer to the Government of India for Guaranteed Railways

ORDER —Ordered, that this Resolution be communicated to the Governments Administrations and Officer noted in the margin for information together with copies of the returns compiled

Ordered also that these papers be forwarded to the Foreign Department for communication to the Chief Commissioner of Mysore and Coorg and that copies be forwarded to the Secretary of State for the information of Her Majesty's Government

Ordered further that this Resolution with the Abstract Returns, be published in the Supplement to the *Gazette of India*

FRED FIREBRACE, *Captain R E*

Under Secretary

TABLE No I

GENERAL TOTAL

NUMBER of PERSONS reported during the Fourth Quarter of 1879 as KILLED or INJURED on the several RAILWAYS open for Traffic in INDIA distinguishing between PASSENGERS RAILWAY SERVANTS and OTHER PERSONS and distinguishing also in the case of the two former Classes, between ACCIDENTS happening from Causes beyond their own Control, and ACCIDENTS happening otherwise

APPENDIX

Extract from Reports &c on an accident which occurred to a mail train on the Madras Railway on 31st October 1879

Letter No 185 dated 10th November 1879 from the Magistrate of Arcot &c

PARA 46 The Government will perceive from the evidence above briefly summarised that on the morning of the 31st ultimo the 10 15 A M train from Jalarpet, while proceeding at its ordinary rate of speed between Arkonam and Chinnamapet and at a distance of about two miles from the latter station, was suddenly checked in its career in such manner that the engine and tender with the three vehicles immediately behind it were thrown off the rails Their wheels sank deeply into the embankment, whereby they were brought to a sudden stop The cause of this check and stoppage was unquestionably a dangerous slip which occurred in the embankment apparently at the very moment the engine passed over the spot The immediate consequence of this stoppage was that the four second class carriages immediately behind (which were then filled with a party of Sappers and Miners, their Non Commissioned Officers and families) rushed violently into the cavity caused by the slip, fell over on to their sides, and were smashed to pieces That this was the case is evidenced by the condition of the train as it was found immediately after the accident The engine and tender with the first two trucks had passed completely over the spot where the slip occurred so also had the brake van at the time when it was impaled by the rail Then the line being broken there was nothing to keep the second class carriages on the permanent way The couplings appear to have snapped at this moment and the disaster with its terrible loss of life was complete The sketch plan (Q) furnished by the Consulting Engineer showing the position of the various carriages he found at the place of the accident appears fully to bear out this opinion of mine One of the theories put forward to account for the complete wreck of the train is that the brake van No 17 when impaled by the rail became fixed immovably, and stopped dead in full career and that by the block it occasioned the second class carriages immediately behind it were thrown pell mell, down the embankment It was contended that if the couplings had held on, and the train had passed a little further along the line the accident would have been of a comparatively trivial nature and would certainly not have been attended with such a loss of life I am not myself of opinion that the stoppage of the brake van can be regarded as the real cause of the smash of the carriages, for, if it were true that the passage of the train was blocked by the brake van when impaled by the rail, we might reasonably expect to find the van itself seriously damaged by the impact of the second class carriage that was coupled to it This however was not the case The back panels of the van are hardly injured at all, while the upper left hand corner of the roof is slightly broken, as if it had come in contact with some part of the second class carriage as it shot off the embankment (*vide* photograph marked C 1) The opinion that I formed after a careful inspection of the scene of the accident is that the embankment where the slip occurred was on the point of giving way at the moment the train came up The pressure and vibration caused by the heavy engine caused the bank, then saturated with water, to burst out as the wheels of the engine passed The two trucks next behind the engine were lighter than the other vehicles and they in consequence got across all right Then, however, the outer rail, which had become detached from the fish plate appears to have started up and impaled the brake van No 17 as it passed over the slip and, whether the couplings had held on or not, in the absence of the rail it seems to me that it was impossible for the carriages to have escaped the slip The Consulting Engineer's sketch shows that two of the carriages appear to have turned broadside on, and, as stated by Mr Trevithick the Locomotive Superintendent, they received the blow of the carriages following them at a part where they were least able to sustain it To this no doubt is to be ascribed the heavy loss of life and serious injuries sustained by the passengers I am not of opinion that the material of which these carriages is composed was in any way rotten or defective As will be seen by reference to the photographs, two of them had passed very recently through the Railway workshops where they were put into thorough order They were old carriages certainly but there is nothing whatever to show that they were in any way unserviceable Falling as they did and receiving at their weakest part the charge of a number of heavy carriages travelling at a high rate of speed the very strongest railway conveyances must I think have yielded to the pressure

---

Extract paragraphs 1 to 6 and 8 to 24 of a Note by the Deputy Consulting Engineer for Railways Madras on the accident to the South West mail train Madras Railway on the 31st October 1879

On the morning of the 31st October last the 10 15 A M mail from Beypore to Madras left the rails near the 38th mile Three carriages, in which were travelling a detachment of the Queen s Own Sappers and Miners *en route* to Burmah were completely wrecked, and many others were injured beyond repair the engine and all but one vehicle were derailed nineteen passengers were killed on the spot or died at the scene of the accident and fifty were more or less seriously injured, of whom three have since died.

2 Among the killed were the wife (European) and child of Sergeant Terry of the Queen s Own Sappers and Miners and the child of Sergeant Price among those injured were Sergeants

Price, Terry and Roberts Mrs Roberts and Mrs Price, and Mr Smith of the Police Department With the exception of one Company's servant and Mr Smith the sufferers all belonged to the detachment of Sappers and were travelling in the three leading second class carriages immediately behind the leading brake

3 The slip in the embankment where the accident happened took place between the 16th and 17th posts in the 39th mile, about five miles to the east of Arkonam Station

4 The line is here on the straight and the train approached the slip on a falling gradient of 1 in 352, at a speed, according to the driver of about 30 miles an hour

5 The train to which the accident happened (the south west mail) left Arkonam Station on the 31st October at 4 30 A M a quarter of an hour behind time, and was thus composed —

Engine and Tender, S C	68	
Cattle Wagon	No 34	
Carriage Truck	„ 13	
Brake van	„ 17	
Second class (Sappers)	34 36 29—their order not known

Double Saloon	A 29	
Brake	12	
Composite carriage	B 32	
Second class (night)	C 64	
Double Saloon	A 30	
Post Office Van	C 17	
Third class	D 164	
Do	D 168	
Brake		

Sixteen vehicles in all

6 It appears from the evidence that the driver observed nothing unusual until he suddenly felt a cant of his engine to the left and immediately afterwards knew that it was derailed and stopped The moon was nearly at the full, but rain was falling at the time

* * * * *

8 The engine was derailed towards the south in the direction opposite to that of the failure of the bank the off rail, which was found to be two feet out of its proper position, in the direction of the slip lay under the engine but little out of correct level the near rail also slewed lay canted bent, and dragged out of the bowl sleepers, outside the near wheels The cow catcher had been broken and carried away a fragment being caught and held by the reversing gear

The steam was shut off the lever not reversed brakes not on The leading wheels of the engine have been since examined and found in gauge, the tyres are marked as if from running over chairs and the driving axle is slightly bent

9 The tender was derailed similarly to the engine with a large hole punched in the rear end by the buffer of the cattle wagon following and another smaller hole by the coupling hook the buffer of the cattle wagon was still caught and held inside the tender the joint of the off rail beneath the tender was broken, the rails being slewed two feet towards the slip

10 The cattle wagon had its leading head stock smashed and its rear head stock and end stove in it was derailed to the off side and the near hind wheel was deeply embedded in the mid tract ballast The rut thus formed being well defined and representing it is believed the distance run by this vehicle after derailment, was 20 feet in length The off rail was here also slewed two feet out of line

11 The carriage truck was derailed, like the last vehicle to the off side the off hind wheel remaining still on the rail The rear head stock was damaged and the foot board injured, otherwise this vehicle and its freight appeared unhurt the off rail on which remained the off hind wheel, was slewed two feet here also

12 Brake van No 17 was derailed the off forewheel being nearly mid track, and the near forewheel buried in the ballast the general direction of the van being at a considerable angle to that of the line The near rails had for some distance (probably at least two rails length) in front of the van been forcibly turned inwards, and dragged somewhat beyond mid track The end rail on the near side the fish plates having parted at the joint immediately behind the van, had transfixed the van passing over the axle which it deeply scored through the floor, the partition and the end, outside which it protruded This was apparently caused by the van running at the time on the slipping bank, with its axle below normal rail level The front head stock of this van appeared to have been completely severed by the force with which it struck the rail the rear head stock bears clearly the mark of a buffer head upon it, but was comparatively uninjured, as was also the body end of the van The off rail was here slewed only six inches towards the slip It is noteworthy that either the rail that transfixed the van or the van itself must have been out of its normal position to the extent of nearly three feet it was doubtless the van

13 As there was an interval of one rail length between the brake van and the carriage truck, I infer that the engine ran this length only, after the transfixed brake-van had stopped

the length of the mud track though indicating that the cattle waggon ran about the same distance after derailment Why the engine should have been derailed except in consequence of the slew of the permanent way above described is not clear the broken joint could not be reached for careful examination at the time and passed out of sight afterwards and the near rail and fastenings were so disturbed by the circumstances of the derailment as to afford no safe grounds for any theory on the subject It seems quite certain that the engine and two leading waggons passed safely over the slip indicating that up to that time the permanent way was in good order

14 In rear of brake van No 17 and still coupled to it hung over the near buffer head the head stock and fragments of the side pieces of the leading second class carriage

15 Within a distance of 11 feet from the van lay piled two bottom frames and all else that remained of the three leading second class carriages each (roughly) 20 feet in length I infer from the positions that the carriage C 36 was the rear carriage of the three

16 Alongside of this wreck and partly on it lay C 56 the leading vehicle of the real portion of the train which apparently left the rails at the break and losing speed in the bank mounted the wreck of the second class vehicles The end of this carriage C 56 was completely stove in it would seem therefore that it was still following C 36 when that carriage was stopped and upset

17 Two rail on the near side in rear of brake van No 17, and beneath the wreck of the second class carriages had been carried out of the line almost up to the brake van the off rails still in position being strangely contorted at the joints by the disturbance of the tie bars One fish plate with three bolts in it, their nuts sheared off with the bolt ends was found by me and a second fish plate bearing a wheel mark was brought to me subsequently but the remaining six fish plates of the four broken joints (three in the near and one in the off rail) are not forthcoming

18 The double saloon A 29 with front end smashed in, lay canted on its side, with its wheels still attached to it

19 Brake No 52 lay canted on its side its body partly resting on the framing of the composite carriage in rear of it its rear wheels severed from its framing by the wheels and axles of the composite which lay over them The body of the composite had it would appear, been struck above the head stock by the brake van All that remained of the composite carriage B 32 (about one compartment out of three), rested partly upon its own framing and partly upon that of the (night) second class the body of which had slid upon its framing With this exception the night second class although fully derailed was comparatively undamaged

20 The double saloon A 30 though derailed and canted was comparatively undamaged

21 The rest of the vehicles except the rear brake, were derailed and slightly canted The rear brake still remained on the rails

22 I am led to infer from the appearance that the engine and two following vehicles kept the rails at least to within two rails length of their final position, that the near rails parted owing to the weight of the train upon them while unsupported or owing to the bearing of the fish bolts immediately before brake No 17 reached the rail that transfixed it that the three second class carriages were turned over on to their sides at the break each one following and mounting the other that the other carriages ran off consecutively as they came to the break some few at the end of the train being derailed by the shock of the sudden stoppage

I believe the depression of the near rails, owing to the slip in the embankment not to have exceeded two feet the near rails at either side of the break being but little out of level

23 The new portion of the embankment on the north side, where the slip took place was very soft and surcharged with water a hole at almost any part of the slip made by probing at once commenced to fill with water and the old embankment at the slip and adjacent to it was excessively soft the formation at one point not very far from the slip having worked up through the ballast to the surface

24 At a distance of seven telegraph posts from the scene of the accident on the same morning a second and far worse slip took place (it is said spontaneously) Here three rails were left unsupported and hanging the face of rupture being nearly vertical and the clay that slipped having a consistency little better than grease

FOREIGN DEPARTMENT

NOTIFICATIONS.—JUDICIAL

Simla, the 2nd July 1880

No 100 I-J.—Whereas His Highness the Gaekwar of Baroda and His Highness the Dewan of Palanpur have granted to the British Government full jurisdiction within those portions of land which have been assigned and made over by them

respectively for the purposes of the Western Rajputana State Railway. In exercise of such jurisdiction and of the powers conferred by sections 4 and 5 of Act XXI of 1879 (The Foreign Jurisdiction and Extradition Act 1879) and of all other powers enabling him in this behalf the Governor General in Council is pleased to issue the following notification —

1 (a) The Huzur Deputy Collector for the time being of Ahmedabad shall exercise the powers of a Magistrate of the first class as described in Act X of 1872 (The Code of Criminal Procedure) within such portion of the aforesaid land as are within the limits of the State of Baroda

(b) The Native Assistant for the time being to the Political Superintendent in Pahlanpur shall respectively exercise the powers of Magistrate of the first class as described in Act X of 1872 (The Code of Criminal Procedure) within such portions of the aforesaid land as are situated within the limits of the State of Pahlanpur

Provided that in any case in which the complainant (if any) and all the accused persons are not British subjects it shall be in the discretion of the said Deputy Collector and the said Assistant respectively to decline to exercise the powers hereby conferred on them

2 (a) The Sessions Judge of Ahmedabad and the High Court of Judicature at Bombay shall respectively exercise the powers of a Court of Session and High Court as described in Act X of 1872 in respect of all offences over which jurisdiction is exercised by the said Deputy Collector within the aforesaid lands and

(b) The Political Superintendent for the time being in Pahlanpur and the Commissioner of the Northern Division Bombay Presidency shall respectively exercise the powers of a Court of Sessions and High Court as described in Act X of 1872 in respect of all offences over which jurisdiction is exercised by the said Assistants respectively within the aforesaid lands

3 The administration of the police within all the aforesaid land shall be delegated to the District Superintendent of Police Ahmedabad who shall exercise the same police powers as may be exercised by a District Superintendent of Police under any law for the time being in force in British territory in subordination to the Huzur Deputy Collector of Ahmedabad and to the Political Superintendent in Pahlanpur within such portions of the said lands as are situate in the States of Baroda and Pahlanpur respectively

4 The said District Superintendent of Police, Ahmedabad shall (except in the cases mentioned in the proviso to clause 1 of this Notification) exercise the powers of a Magistrate of the second class as described in Act X of 1872 in subordination to the said Huzur Deputy Collector of Ahmedabad and the said Political Superintendent in Pahlanpur within such portions of the aforesaid lands as are within the limits of the States of Baroda and Pahlanpur respectively

No 101 *I J*—With reference to the preceding Notification the Governor General in Council in exercise of the powers conferred by section 6 of Act XXI of 1879 (The Foreign Jurisdiction and Extradition Act 1879) is pleased to appoint—

(a) the Cantonment Magistrate for the time being of Ahmedabad being a European British subject to be a Justice of the Peace within such portions of the said lands as are within the limits of the State of Baroda and

(b) the Cantonment Magistrate for the time being of Deesa being a European British subject to be a Justice of the Peace within such portions of the said lands as are within the limits of the State of Pahlanpur

and to declare that the High Court of Judicature at Bombay shall be the High Court to which such Justices of the Peace shall commit European British subjects for trial

No 102 *I J*—With the consent of the Rao of Sirohi His Excellency the Viceroy and Governor General in Council is pleased to extend the following Acts to Abu and Anadra —

The Code of Criminal Procedure, Act X of 1872

The Code of Civil Procedure, Act X of 1877

The Indian Limitation Act XV of 1877

The Indian Stamp Act I of 1879

POLITICAL

The 28th June 1880

No 183 *C P*—Subject to the confirmation of Her Majesty's Government His Excellency the Viceroy and Governor General in Council is pleased to recognize the appointment of Mr Jacob Steiner as Acting Consul for the Netherlands at Bombay

The 2nd July 1880

No 2134-F *P*—Whereas the Governor General of India in Council has power and jurisdiction within the tract of land noted in the margin In exercise of such power and jurisdiction and of the powers conferred by sections 4 and 6 of Act XXI of 1879 (The Foreign Jurisdiction and Extradition Act 1879) and of all other powers enabling him in this behalf the Governor General in Council is pleased (a) to appoint the Political Officer for the time being in charge of the aforesaid tract and the Officer for the time being in Command of Her Majesty's Forces within the aforesaid tract respectively being European British subjects to be Justices of the Peace within the aforesaid tract and (b) to direct that the Chief Court of the Punjab shall be the Court to which such Officers shall commit European British subjects for trial

Khyber Pass [illegible] way

No 2135 *F P*—Whereas the Governor General of India in Council has power and jurisdiction within the tract of land noted in the margin In exercise of such power and jurisdiction and of the powers conferred by sections 4 and 5 of Act XXI of 1879 (The Foreign Jurisdiction and Extradition Act 1879) and of all other powers enabling him in this behalf, the Governor General in Council is pleased to issue the following notification —

[illegible]

1 The Political Officer for the time being in charge of the aforesaid tract shall exercise the powers described in section 36 of Act X of 1872

(The Code of Criminal Procedure) and the powers of a Magistrate of the District as described in the same Act within the aforesaid tract

2 The Assistant Political Officer for the time being within the aforesaid tract shall exercise the powers of a Magistrate of the first class as described in Act X of 1872 within such tract

3 The Officer Commanding for the time being the Corps of Jezailchis within the aforesaid tract shall exercise the powers of a Magistrate of the second class as described in Act X of 1872

4 The Officer for the time being in Command of Her Majesty's Forces within the aforesaid tract shall exercise the powers of a Court of Session as described in Act X of 1872 within such tract

Provided that for the purposes of the exercise of the jurisdiction hereinbefore conferred the said Act X of 1872 shall be read subject to the following modifications —

(*a*) The Court of Sessions may take cognizance of any offence as a Court of original criminal jurisdiction without the accused person being committed to it by a Magistrate

(*b*) No appeal shall lie from any order of the Sessions Judge

(*c*) The functions of the High Court as a Court of reference and revision shall be discharged by the Governor General in Council

(*d*) All other functions of the High Court shall be discharged by the Court of Sessions

(*e*) Trials before the Court of Sessions may in the discretion of the Sessions Judge be conducted without the aid either of a Jury or Assessors

(*f*) Whenever the Sessions Judge deems it essential for the maintenance of tranquillity that a sentence of death legally passed by him should be executed forthwith he may order such sentence to be executed without the confirmation of the Court of Reference

Provided also that in any case in which the complainant (if any) and all the accused persons are not British subjects it shall be in the discretion of the said Political Officer, the said Assistant Political Officer the said Officer Commanding the Jezailchis, and the said Officer Commanding Her Majesty's Forces respectively to decline to exercise the powers hereby conferred on them

FIELD OPERATIONS

No 383 — The Right Hon'ble the Governor General in Council is pleased to direct the publication of the following correspondence and despatches relating to the operations carried on in Besud, between the 19th and 24th May last —

From COLONEL ALLEN JOHNSON, Secretary to the Government of India, to the Adjutant General in India,—(No 7200 K, "Field Operations," dated Simla the 30th June 1880)

I am directed to acknowledge the receipt of your letter No 2751 A, dated the 12th instant forwarding the despatches describing the operations of the force under the command of Brigadier General Doran in Besud between the 19th and the 24th May last and to intimate, with reference thereto that the Right Hon'ble the Governor General in Council entirely concurs in the opinion expressed by His Excellency the Commander in Chief as to the judicious and successful manner in which these operations were carried out by Brigadier General Doran and the officers and men under his command

---

From MAJOR GENERAL C. R. GREAVES, C B, Adjutant General in India to the Secretary to the Government of India Military Department,—(No 2751 A, "Kabul," dated Simla, 12th June 1880)

I have the honor, by direction of the Commander in Chief, to forward for submission to Government, the accompanying despatches relating to the operations of the troops under the command of Brigadier General J Doran, C B, in Besud on the 19th May 1880 and following days

2 His Excellency concurs with Sir Donald Stewart and Major General Bright as to the judicious and successful manner in which these operations were conducted by Brigadier General Doran and the officers and troops under his command

3 The sketch referred to and the usual return of ammunition expended, which has been called for, will be forwarded hereafter

---

From MAJOR GENERAL R O BRIGHT, C B, Commanding the Khyber Line Force to the Chief of the Staff Kabul,—(No 99, "Field Operations," dated Safed Sang, 29th May 1880)

I have the honor to forward for the information of the Lieutenant General Commanding the accompanying account by Brigadier General Doran, C B, of the successful operations carried out by the troops under his command in Besud on the 19th instant and following days

The difficulties of the operations were increased by the Kabul river having risen in flood and carried away the bridge, so rendering it necessary for the crossing to be made by rafts and in the case of cavalry by swimming The way this was effected by the Central India Horse both going and returning reflects great credit on that corps

The dispositions for the attack of the enemy's position were, it appears to me, judicious, admirably carried out by the troops and most entirely successful in result

I consider great credit is due to Brigadier General Doran, C B, and his staff officer, Major H P Pearson

The conduct of all engaged left nothing to be desired, and I would bring prominently to the Lieutenant General's notice the excellent service performed by Lieutenant Colonel Martin and the men of the Central India Horse, and also the conspicuous gallantry displayed by Lieutenant (Local Captain) Kilgour Her Majesty's 5th Fusiliers and Colour Sergeant Woods, in storming the tower and killing five men inside in single combat

---

From LIEUTENANT GENERAL SIR D M STEWART, K C B, Commanding in Northern Afghanistan to the Adjutant General in India,—(No 2031, "Field Operations," dated Kabul 2nd June 1880)

I have much pleasure in endorsing the favorable opinion expressed by Major General Bright, C B, on the operations conducted by Brigadier General Doran, C B, in Besud from the 19th to the 24th May, 1880

From BRIGADIER GENERAL J DORAN, C B, Commanding 2nd Section, Khyber Line Force to the Deputy Adjutant General Khyber Line Force Safed Sang,—(dated Fort Sale, Jellalabad, 27th May 1880)

I have the honor to forward herewith an account of the recent military operations in Besud

2 For some time past that district, lying on the left bank of the Kabul river and directly opposite Jellalabad, had been threatened by a gathering of Safis and others under the leadership of Mullah Khalil, his following comprising men from the Dara i Nur and villages in the Kunar valley, north of Besud The beginning of this movement was reported to you by telegram on the 9th instant, and, as I anticipated that the gathering might eventually have to be dispersed by force, I halted on that day the 5th Fusiliers, then on their march to Safed Sang At the same time I directed that rafts should be prepared for the passage of the Kabul river the bridges over the two northernmost branches having been carried away some time before

3 On the 12th May I was informed by Major Prothcroe, Political Officer at Jellalabad, that Mullah Khalil with 1000 men, had arrived at Nargal, and contemplated a descent upon Besud so soon as he should have collected more followers to his standards On the 13th May, I should have thrown a small force of infantry across the Kabul had rafts been ready They were completed by the 14th, and that evening 200 bayonets of the 1st and 4th Madras Native Infantry crossed the river and occupied the fort of Dabela, which had been placed at my disposal by the Khan of Jellalabad

4 On the afternoon of the 15th, Major G Tyndall, 1st Madras Native Infantry, commanding the troops in Besud reconnoitred as far as Kalu Khan's fort in view to reporting on the route our force would take This report was forwarded to you By this time Mullah Khalil's following was reported to be upwards of 1200 strong, and to have reached Islampur It was also stated that the people of Shewa Shigi, and the neighbouring villages had expressed their intention of turning out to bar Mullah Khalil's way to the entrances into Besud by the Tokchi and Paikob Tangis On this date the 15th, I considered it advisable to cross some cavalry That afternoon 55 sabres of the Central India Horse effected the passage by swimming across the northern branch of the Kabul 150 yards wide at this point, and with a current of between five and six miles an hour A separate report was sent you on this subject here I need only say that 55 horses and 25 ponies swam the river, and, with all the baggage, saddlery, &c , of the troop, were in Besud within the hour, no casualty or even hitch having occurred

5 On the 17th news was brought that the enemy had advanced to Kalatik, and had sent small parties to hold the Paikob and Tokchi Tangis A cavalry reconnoissance that afternoon verified the latter report, our sowars being fired at from both *tangis* They stated that the former was held by about 100 men, the latter by about 500, and that villagers in the neighbourhood had told them that 1000 more of the enemy under Mullah Khalil had reached Shigi On this day, the 17th, the 12th Foot arrived at Jellalabad *en route* to India, with two guns of No 1 (Kohat) Mountain Battery for service Being very short of infantry, I stopped the regiment

6 On the morning of the 18th I sent the mountain guns and 200 of the 5th Fusiliers across the river, and that afternoon 200 of the 12th Foot—all that were available in that corps—and another troop of the Central India Horse To day too, I learnt that the enemy might possibly number four or five thousand men, and that we might have to take the fort of Abdul Khel, then held by them Not considering the small force at my disposal equal to cope successfully with such numbers, probably holding a very strong position on the heights as well as the fort, I applied to the Major General for five to six hundred more infantry In reply I was told to attack next day

7 Accordingly, next day, the 19th instant having left a few men in Dabela Kila I proceeded with the force as per margin to carry out my instructions We left Dabela Kila at 1 30 A M , and reached Kalu Khan's fort at about 6, when I halted the troops and went forward to reconnoitre

No 1 Mountain Battery 2 guns under Lieutenant F R Thackeray R A 1st Battalion 5th Fusiliers 175 bayonets under Lieut Colonel T Rowland 1st Battalion 12th Regiment 183 bayonets under Lieut Colonel C J C Sillery Central India Horse 79 sabres under Lieut Colonel C Martin 1st Madras Native Infantry 92 bayonets, and 4th Madras Native Infantry 92 bayonets, both under Major G Tyndall 1st Madras Native Infantry

8 In order fully to understand what follows, a brief description of the country is necessary Besud is a very small district lying in the angle between the Kabul and Kunar rivers It is bounded on the north by a range of hills separating it from the plain called the Dasht i Gamberi and from the rich valley of the Kunar There are three main *tangis*, or passes, through these hills, the Marúf on the west, the Tokchi on the east along the right bank of the Kunar river, and the Paikob, about two miles west of the Tokchi, and separated from it by a high hill running north and south, and about four miles in length The Tokchi Tangi is passable by infantry in single file, and cavalry can lead through it, though with

some risk, as the path at one place is along a wooden aqueduct, four feet wide, overhanging the Kunar river The Paikob Tangi presents no difficulties The only portions of Besud that troops can act in are strips on the banks of the two rivers and the slopes at the foot of the range of hills The whole of the centre of the district is at this season under rice cultivation, and is an expanse of standing water and marsh, intersected by numerous deep watercourses, with ditches branching from them in all directions To reach the foot of the hills the troops had to follow the left bank of the Kabul river for upwards of a mile, and then strike in single file along a winding path through swamp but bridged over watercourses, which eventually brought them out on the slopes towards the north west corner of Besud, whilst the enemy were known to be towards the north east corner Hence it followed that our force was compelled to act upon a line perpendicular to its base (Dabela Kila and the bridge head), and to leave this uncovered The enemy's left was as near our base as was our own right —the marsh lying between the flanks of both forces and the bridge head It must, however, be borne in mind that, though this swamp was an obstacle that our troops could not pass, its difficulties were not insurmountable by an irregular enemy knowing every path and bye way in the country, and unencumbered with animals It appeared to me quite probable that the enemy might detach a portion of their force to seize the bridge head and attack Dabela Kila, so, having no troops to spare from my column, I sent back word to the officer commanding at Jellalabad to place the two guns of C 3rd Royal Artillery at once in position on the right bank of the Kabul to cover the bridge-head, and to hold the latter in strength with troops from his garrison As will be seen presently, the enemy were bent upon carrying out the very movement I was anticipating

9 At about a mile to the east of Kalú Khan's fort a small and isolated hill rises out of the plain to a height of about fifty feet Ascending this with a small escort, I saw the enemy in position about fifteen hundred yards distant They were in line facing west, numbered 2000 men with eighteen standards, and occupied some ruined forts and walled enclosures in the plain Their right was in an old fort, distant about 500 yards from the base of the hills In front of this was a dry ditch held by them in some force Their left was in Bulandgarh, a village on the edge of the marsh, and along their line were banks, dry ditches, mounds and broken ground, affording excellent cover

10 Having satisfied myself as to their position, I directed Colonel F Dawson, 1st Madras Native Infantry, the next senior officer to myself, to bring up the troops and to place them in close formation behind and under cover of the hill, for the enemy were beginning to move in considerable numbers to their left, and I was anxious not to check a manœuvre which drew them from the hills I learn from the Political Officer that, as a matter of fact, they were absolutely ignorant that we had sufficient troops in Besud to take the offensive, and that they were even then on their way to the bridge head and Dabela Kila, which latter they believed to be held by eighty men This accounts for their leaving the very strong position on the *tangis* from which, later on, they were cut off by our cavalry The Khan of Jellalabad and some of his retainers were with me on the hill, also three or four officers and some sowars We were seen by the enemy and mistaken for a reconnoitring party As soon as they had taken ground some distance to their left, and had halted on descrying our troops, concealment was no longer possible and I directed Colonel Dawson to form line of attack This he did by extending a company each from the 5th Fusiliers on the left, the 1st Madras Native Infantry in the centre, and the 12th Foot on the right The second companies of these corps were in support, and the third of the British troops, with the company of the 4th Madras Native Infantry, in reserve The reserve company of the 5th Fusiliers was in *echellon* on the left, the cavalry line to the left rear of that again, to cover any attack through the Paikob Tangi on our flank, and to cut the enemy off from the hills should the opportunity present itself The guns were kept till wanted behind the centre reserve In this formation our force advanced until we were within 900 yards of the enemy's centre, and 600 to 700 yards from the fort on which their right rested Here the guns were brought into action, and infantry fire was directed upon the masses near the fort The infantry had been cautioned immediately before coming into action to aim carefully Their fire was remarkably steady and telling, and the bulk of the enemy's right being unable to face it sped towards the hills

11 News of this being brought to me I ordered the cavalry to charge, and the Central India Horse at once swept along between the hills and the fort led by Lieutenant Colonel Martin, and killed here and in other parts of the field twenty five of the

enemy Some of the defenders of the fort, seeing their retreat cut off, stood their ground There were twenty two in all, of these, four were killed either just outside the fort or in the main enclosure, and eighteen retired into a loop holed tower at the south east corner It was quite impossible to storm the tower as it then was, so the mountain guns were brought into the fort and opened at 30 yards range with double shell, cutting down the wall of the tower below the original entrance to within about four feet of the ground level •

12 The torment of these shells exploding in a tower only ten feet in diameter goaded three of its inmates to charge out knife in hand But in a small court-yard at the foot of the tower they were met by Color Sergeant Woods, Private Openshaw, Lieutenant (Local Captain) H Kilgour, and Lieutenant Colonel T Rowland, all of the 5th Fusiliers, and by Private Longworth, 12th Foot, when a desperate hand to hand fight ensued, in which the three Afghans were killed, Lieutenant Colonel Rowland twice slightly, and Privates Openshaw and Longworth severely, wounded,—the first named private receiving three deep knife cuts Whilst this was passing, a fire was being maintained from the tower, but no one knew how many of the enemy it held As soon as the conflict in the courtyard had ended, Color Sergeant Woods with dashing gallantry rushed up the *débris* and disappeared into the tower, closely followed by Captain Kilgour, and there these two found and slew five desperate men at bay A finer display of courage cannot well be imagined, and I do not hesitate to say that it deserves the highest reward that valour can obtain

Fifteen of the enemy's dead were counted inside the tower, and it is probable more were hidden in the *débris*, which was so deep that two *jezails* were buried upright in it to within four inches of their muzzles

13 Whilst this was going on the few sabres of the Central India Horse that were present, a weak troop in all, had swept along the back of the fort down the enemy's line, but many of the latter had already been given refuge in the villages of Besud by the very people we were protecting against them Some were pursued by the cavalry to the banks of the Kunar river, and there slain or forced into its waters Some, probably the majority, escaped by the Tokchi Tangi or over the hills, and a few held the village of Beninga at the mouth of the *tangi*, and fired at our cavalry, but a beautifully pitched shell killed five, and the rest dispersed In this dashing charge many deeds of valour were done by both officers and men I can only regret that the swift footedness of the enemy deprived these splendid horsemen of a fairer field for their prowess

14 It was now 10 o'clock, and the sun was exceedingly hot so I took the troops back to Dabela Kila Our casualties were few One officer was slightly wounded three privates severely amongst the British troops, a Native officer and two sowars in the cavalry A nominal roll is appended The Central India Horse had one horse killed, and five badly cut with knives Fifty three bodies of the enemy were counted by our officers in different parts of the field, whilst several more were seen to fall to the infantry fire at the beginning of the action, and to be carried away I learn that their loss in killed alone is not less than seventy, and that many were wounded When going through the Paikob Tangi, two days later, many traces of wounded were seen Our expenditure of ammunition was small, only 19 shell and 1,572 rounds of small arm having been fired Exclusive of the Staff there were actually engaged 24 British and 10 Native officers, and 674 fighting men of all arms

15 The Political Officer having requested me to proceed to the fort of Abdul Khel to punish Sirdar Nizámúdin Khan of that place for his open hostility to us on the 19th instant I ordered the two guns of C 3rd Royal Artillery into Besud, and sent for a detachment of Madras Sappers and Miners from Rozabad These latter arrived at Dabela Kila at midnight on the 19th, but there was neither Bickford's fuze nor blasting powder to be procured locally, so I was compelled to postpone further operations for a day On the 20th some fuze arrived by special messenger from Ali Boghan Powder was procured by directing the Commissary of Ordnance to break up 300 nine pr service cartridges I also reinforced the column with another troop of the Central India Horse

These would have been useful in the plain beyond Besud had the fort of Abdul Khel been held

16 On the morning of the 21st the troops marched to Abdúl Khel, a very strong fort, with six towers, at the northern entrance to the Tokchi Tangi It had been held on the day of the action by about 300 men, but was now deserted The distance to Abdúl Khel from Dabela Kila by the Paikob Tangi—the route taken—is about nine miles A party of the 5th Fusiliers was left to hold the heights between and commanding the two passes, and one of cavalry to watch the undulating hills to the west of the Paikob From these heights communication with Jellalabad could easily have been established had instruments been available Here I desire to record

that the want of signalling apparatus has been most severely felt Although Dabela Kila is only a mile from Fort Sale, Jellalabad, there was no night communication between them for want of serviceable lamps

17 At 8 A M the sappers began working at the towers During the day about 1000 lbs of gunpowder were found in one of the towers of the fort, so that only some 200 lbs of our own were used At 2 P M I caused the whole of the season's crops of wheat and barley to be fired These had been cut and gathered ready for threshing, but were still in ear At 3 the interior of the fort, which was handsomely fitted up for such a place, was fired, and half an hour later the six mines (which had been laid from outside) were sprung The destruction was complete Sending the troops back to Dabela Kila by the Paikob Tangi, I took a small escort and returned myself by the Tokchi passing the fort of that name in flames It and the cut crops around had been fired earlier in the day by a small party of cavalry with the Political Officer The troops reached Dabela Kila somewhat exhausted, for the march had been long and tiring and the heat very great Here I would bring to notice the excellent service done on this day by the twenty men of the Madras Sappers and Miners under Lieutenant T Digby, R E This small party worked for seven hours hard and incessantly for the foundations of the towers were of stone laid in mud, and were extremely difficult to undermine Such constant and severe work in excessive heat and in addition to a march of eighteen miles, shows an amount of pluck and endurance which merits special mention Lieutenant R H Brown, R E, Assistant Field Engineer, Jellalabad helped to supervise the work and rendered valuable assistance During the operations of the 21st there was no opposition A few shots were however, fired at our videttes from a village on the left bank of the Kunar

18 On the 22nd at the request of the Political Officer I directed Lieutenant Colonel Rowland, 5th Fusiliers to surprise Kila Bandras Khan, a fort in Besud belonging to Mahomed Farukh to fire it, and to bring in the owners prisoners These directions were ably carried out by Lieutenant Colonel Rowland whose report accompanies these papers * No opposition was offered Mahomed Farukh had distributed powder and bullets amongst his people, and had collected them ready to attack us in rear on the 19th instant in case of reverse Letters addressed to Mahomed Jan and other leaders were found in this fort

19 On the 22nd the recrossing of the Kabul river began During our sojourn in Besud, the waters had been daily rising, and on the morning of this day it was found that two small foot bridges, thrown across shallow water between sand banks, had been swept away By that evening, however, the division of C 3rd Royal Artillery and the detachment of the 12th Foot had recrossed The guns were at once placed in position to cover the passage, and so remained till it had been completed

20 Dawn on the 23rd showed the Kabul a torrent During the night the river had cut in behind the abutment of the bridge over its southern branch, and it became evident that a few inches more rise would carry away the whole structure This actually happened a few hours after and the portion of the force still in Besud had now to cross the whole breadth of the Kabul river in full flood—some 400 yards—and with a current estimated at not less than seven miles an hour Twenty elephants and seven small rafts of skins were the means at hand It became quite impossible to tow the rafts against the stream, and a question how much longer elephants could breast it Indeed I saw one of these animals forced back stern first by the current, unable even to hold his own against its force In places where the elephants had to ford, the water was more than six feet deep The rafts had to be taken out of the water at each trip and carried, some on men's heads, some on elephants, to the starting point half a mile up stream Under these difficult conditions the division of the mountain battery with all its mules, three troops of cavalry with all their horses and some of their ponies, the detachment of Sappers and Miners, and some Madras Infantry, effected the passage The guns were brought over on elephants The saddlery baggage, and some of the men came on rafts or elephants The whole of the mules and horses, and all the baggage animals swam the 400 yards of river, in very many cases with their owners or drivers riding them or swimming alongside Some of the men of the Central India Horse crossed as often as ten times this day to swim horses and ponies over many crossed six and seven times The men worked splendidly Picked swimmers with ropes and unrolled turbans were placed down stream and did excellent service in rescuing exhausted men and animals

But it was not to be expected that so dangerous a passage could be made without loss A driver and a sowar's horse were, I regret to say, drowned

21 On the 24th the remainder of the troops recrossed, 65 men of the 5th Fusiliers on the twenty elephants being the last of all to leave Besúd I had sent some infantry to aid the guns in covering the retirement, but not a shot was fired

* Not published

22 It now only remains for me to make a few concluding observations

I have to thank Colonel F Dawson, 1st Madras Native Infantry, for the prompt and skilful manner in which he carried out my wishes as regards the disposition of the troops before and during the action of the 19th instant, as also for his aid and counsel throughout the expedition

The handling of the cavalry left nothing to be desired It reflects the highest credit for gallantry and skill upon Lieutenant Colonel C Martin, who commanded It enabled us to inflict severe punishment upon the enemy

My best acknowledgments are due to Major M Protheroe, Political Officer, Jellalabad, not only for the accurate and reliable information he has always given me of the strength and movements of the enemy, but for his valuable aid in procuring rafts and boatmen, and for his cordial co operation at all times

To Major H P Pearson, my Brigade Major, I am specially indebted It was on his observation and report of events in another part of the field that I ordered the cavalry charge which contributed so greatly to the success of the day Major Pearson gave me the greatest assistance during the operations, and proved himself then, as on all occasions, a most efficient Staff officer

Major H M Buller, Central India Horse, pushed a reconnaissance on the 16th instant beyond Shigi in the Kunar Valley, and brought me information about the passes which proved most valuable

The conduct of the troops during the operations in Besud merits my warmest thanks Whatever they had to do they did well Officers and soldiers, British and Native, Bengal and Madras troops all alike did admirably that which fell to them to do Without tents they had to seek shelter where they might from the fierce heat of a May sun The cheerfulness with which all ranks endured hardships and exposure, and the energy with which they laboured from dawn to dark during the passage of the Kabul were equalled only by their steadiness in the field and splendid courage where opportunity offered

I enclose a sketch of the scene of action on the 19th instant, done on the ground by Captain J E Porteous, 4th Madras Native Infantry

Nominal Roll of Casualties in action at Beninga (Besud) on the 19th of May 1880

Regimental Number	Rank and Names		Regiment	Nature of wound	Remarks
	Major and Brevet Lieutenant Colonel	Thomas Rowland	5th Fusiliers	Slight	Knife cut and bayonet wound in right hand
1028	Private	Frederick Snowling	5th	Severe	Deep gunshot wound left thigh
55		James Openshaw	5th		Three knife cuts right forearm
32nd Brigade / 104		Jonathan Longworth	12th Regiment		Very deep knife cut back of left shoulder deep muscles severed.
	Jemadar	Fáim Khán	1st Regt C I H		Left elbow joint cut through with knife very severe
933	Sowar	Nand Singh	1st		Right half of leg cut through with knife wound very deep
1090		Kadi Khán	1st		Bullet wound over region of liver

Commanding 2nd Section, Khyber Line Force

FURLOUGH AND LEAVE

No 384—The undermentioned officers are granted furlough out of India, with the necessary subsidiary leave —

Major R E Boyle, s c, Commandant, 11th (Prince of Wales' Own) Bengal Lancers, (m c) for 1 year 182 days under Rules IX and XV of the Regulations of 1868

Major R C W Mitford, s c Squadron Commander and 2nd in Command 14th Bengal Lancers (m c) for 1 year 243 days under Rules IX and XV of the Regulations of 1868

LONDON GAZETTE

No 385—The following extracts are published for general information —

"*London Gazette dated the 1st June*, 1880, *pages* 3272 *and* 3273

THE Queen has approved of the following admissions to the Staff Corps made by the Governments in India —

BENGAL STAFF CORPS

To be Captain

Captain Norman Robert Stewart from the 65th Foot dated 30th October 1879 but to rank from 29th October 1879

To be Lieutenant

Lieutenant Francis Macdonald Drury from the 3rd Foot dated 31st May, 1878, but to rank from 26th March 1871

* * * * *

The dates of rank of the undermentioned Officers admitted to the Staff Corps in the Gazettes named should be as follows and not as therein stated —

BENGAL STAFF CORPS

Gazette, 29th September 1871 —Lieutenant Edward Chetwood Hamilton 10th November, 1869

Gazette 1st February 1878 —Lieutenant John Haughton 28th October, 1871

Gazette, 17th December 1878 —Lieutenant Edmund George Barrow, 30th December, 1871

Gazette 10th May 1878 —Lieutenant Charles Herbert 13th June 1874

THE Queen has approved of the retirement from the Service of the undermentioned Officers of Her Majesty s Indian Military Forces —

Lieutenant Colonel and Brevet Colonel Hamilton Forbes, of the Bengal Staff Corp Dated 3rd April, 1880

Lieutenant Colonel and Brevet Colonel Edmund Tyrwhitt of the Bengal Staff Corps Dated 15th April, 1880

Lieutenant Colonel and Brevet Colonel Alfred Anthony Des Vœux, Bombay Staff Corps Dated 20th March, 1880

BREVET

The undermentioned Officers are granted a step of honorary rank on retirement —

To be Major Generals

Lieutenant Colonel and Brevet Colonel Hamilton Forbes, Bengal Staff Corps Dated 3rd April, 1880

Lieutenant-Colonel and Brevet Colonel Edmund Tyrwhitt, Bengal Staff Corps Dated 15th April, 1880

Lieutenant Colonel and Brevet Colonel Alfred Anthony Des Vaux Bombay Staff Corps Dated 20th March, 1880

To be Surgeons General

Deputy Surgeon General Edward Courtenay Thorp, M D, of the Bengal Army Dated 20th October, 1879

Deputy Surgeon General James Irving M D, of the Bengal Army Dated 13th December, 1879

Deputy Surgeon General George Hutchinson Ray M D of the Bengal Army Dated 17th December, 1879

Deputy Surgeon General John Robert Theobalds, of the Madras Army Dated 1st April, 1880

Deputy Surgeon General William Judson van Someren M D of the Madras Army Dated 3rd April, 1880

To be Deputy Surgeons General

Surgeon Major Charles James Sylvester, M D, of the Bombay Army Dated 13th January 1878

Surgeon Major Francis Day of the Madras Army Dated 2nd June 1880

The undermentioned Officers whose promotion to the honorary rank of Major General was notified in the London Gazette of the 7th May, 1880 should have been described as belonging to the *Bombay*, and not to the *Bengal* Staff Corps —

Lieutenant Colonel and Brevet Colonel Herbert Frederick Disbrowe

Lieutenant Colonel and Brevet Colonel William Creagh

Lieutenant Colonel and Brevet Colonel John Thacker

Surgeon Major Michael Heffernan whose resignation of the Service was notified in the London Gazette of the 7th May 1880, should have been described as an Officer of the *Bombay* and not of the *Bengal*, Army

LEGISLATIVE DEPARTMENT

[First publication]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 2nd July, 1880, and is hereby promulgated for general information —

ACT No XI OF 1880

An Act to provide for the appointment of an Additional Recorder of Rangoon, and for other purposes

Preamble

WHEREAS it is expedient to provide for the temporary appointment, from time to time, of an Additional Recorder to assist the Recorder of Rangoon and whereas it is also expedient to remove certain doubts which exist as to the jurisdiction of the said Recorder under section sixty two of the Burma Courts' Act, 1875, It is hereby enacted as follows —

Short title.

Commencement.

1 This Act may be called "The Burma Courts' Act, 1880", and it shall come into force at once

Appointment of Additional Recorder

2 The Governor General in Council may, from time to time, by notification in the *Gazette of India*, appoint, to be an Additional Recorder and to sit as such in the Court of the Recorder of Rangoon, such person as he thinks fit, being a Barrister of not less than five years' standing, or a person who has for at least three years served as a District Judge, or exercised the like powers as those of a District Judge

Every person so appointed shall hold his office during the pleasure of the Governor General in Council

Cases to be disposed of by Additional Recorder

3 Every Additional Recorder appointed under section two shall sit at such of the places at which under the said Act the Recorder's Court can be held as the Chief Commissioner of British Burma, from time to time directs, and shall dispose of such cases now or hereafter pending in the said Recorder's Court under any enactment for the time being in force, as the said Chief Commissioner or Recorder may from time to time direct, and in the disposal of such cases shall administer the same law, follow the same procedure exercise the same powers and use the same seal as would be administered, followed exercised and used by the said Recorder in like cases

All decrees orders and sentences made or passed in such cases by any such Additional Recorder shall for the purposes of the law relating to appeals references and revision be deemed to be made or passed by the Recorder

The Chief Commissioner may at any time cancel any direction given under this section requiring the Additional Recorder to dispose of a case

Additional Recorder to sit in Special Court in place of Recorder

4 The Additional Recorder shall also sit in the place of the Recorder as a member of the Special Court established under Chapter V of the said Act, for the disposal of such cases as the Chief Commissioner directs, and shall, while so sitting take precedence according to the same rule as the Recorder, and exercise all the powers and perform all the duties which under the said Act may be exercised and

performed by the Recorder as a member of such Special Court

Section 80 of the Burma Courts Act to apply when Additional Recorder sits in Special Court

5 Whenever, in cases tried by the Judicial Commissioner and Additional Recorder of Rangoon sitting together as a Special Court without a Commissioner, a difference of opinion arises, the rules prescribed by section eighty of the said Act shall be observed, the words "Additional Recorder" being substituted for the word "Recorder" wherever it occurs in the said rules

Amendment of section 62 of the Burma Courts Act, 1875

6 For the first paragraph of section sixty two of the said Burma Courts' Act, 1875, the following paragraph shall be substituted —

"Notwithstanding any thing hereinbefore contained, the Recorder shall have all the powers of a High Court, under the Code of Criminal Procedure, in respect of offences committed by European British subjects and persons charged jointly with European British subjects within British Burma"

D FITZPATRICK,

Secy to the Govt of India,

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 29TH JUNE 1880

GENERAL REMARKS.—The monsoon rains have now generally set in and in most Provinces good rain has fallen during the week. In Mysore, Sind and parts of the North-Western Provinces and Oudh the fall has been deficient.

Autumn sowings are in active progress, and agricultural prospects and the public health are on the whole satisfactory.

Presidency or Province and District	Rainfall for week preceding	State of agricultural prospects
Madras— (June 30th)—		
Bellary	·91 (average of fifteen stations)	*Ragi* 28·1 [illegible]; standing crops generally good

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT

CENTRALIZATION OF THE CONTROL OF THE METRE GAUGE RAILWAYS IN MALWA AND RAJPUTANA

Resolution by the Government of India, Public Works Department,—(Nos 493 498 R E dated Simla, 1st July 1880)

Read again—

Public Works Department No 411R E of the 1st June 1880 to the Government of Bombay

Read also—

No 1572 of the 16th June 1880 from the Government of Bombay

RESOLUTION —In anticipation of the early opening to public traffic of the Western Rajputana Railway, and with a view to place under one administration all the metre gauge railways in Malwa and Rajputana, now on the point of being linked together, the Governor General in Council has been pleased, with the concurrence of the Local Government, to decide that the control of the Rajputana Railway between Delhi, Agra Raipur, and Nasirabad, with its branches, as well as the general charge of the lines under construction between Neemuch and Nasirabad and between Raipur and Pahlunpur, shall from the 1st of October 1880 be vested in the Government of Bombay, in addition to the lines now under the management of that Government between Khundwa and Neemuch and between Ahmedabad and Pahlunpur

2 In order to enable the Government of Bombay to discharge the extended duties that will devolve on it, the services of Mr Furnivall, Chief Engineer, Roads, Buildings and Railways, North Western Provinces who is at present temporarily attached to the office of the Director General of Railways, will be placed at the disposal of the Government of Bombay from the 1st of October 1880 till 30th June 1881, and one of the Deputy Consulting Engineers in Calcutta, together with the clerical staff lately sanctioned for the Consulting Engineer's office at that place for the performance of State Railway work, will be transferred, with the records of the Rajputana Railway, to Bombay

3 The charge of the portion of the Sindia Railway south of the Chumbul River will from the 1st of October next be taken over by the Engineer in-Chief of that Railway, and the line will be worked by that officer under the general supervision of the Consulting Engineer at Calcutta until the completion of the Chumbul Bridge, when the two sections of the Sindia Railway will be placed under one management The accounts and returns will continue to be rendered as heretofore by the Examiner attached to the Rajputana Railway

4 The offices of the Manager and other Heads of Departments on the Rajputana Railway will be transferred to Ajmere on the 1st of October next, or as soon after as possible, and proposals for the erection of an office building at that town should be submitted without delay.

5 Arrangements should also be made for placing under the management of the East Indian Railway Company, the junction stations at Delhi and Agra Fort

ORDER —Ordered, that this Resolution be communicated to the Government of Bombay and to the Government and officers marginally noted for information and guidance

FORT SAINT GEORGE
The 21st June 1880

H S GROVES
Offg Asst to Acctt Genl in charge of Paper Currency Dept for Offg Commissioner

ORDERS BY THE VICE CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY

The following changes in the Regulations in Arts, Law Medicine and Engineering having been sanctioned by the Senate and approved by His Excellency the Governor General in Council, are published for general information —

The following foot-note has been appended to the marginal note to the Entrance Certificate (Appendix A) —

"It is in the power of the Syndicate to refuse to recognize any school unless it is certified by a Government Inspector of Schools as having been in existence since the 1st of March next preceding the Examination and as qualified to teach up to the Entrance Standard"

In paragraph 9 of the Regulations for Honours in Arts, the words "History of Philosophy" have been substituted for the words "Natural Theology," and the words "(a) Natural Theology" for the words "(a) History of Philosophy"

In paragraph 9 of the Regulations, for the words "the Syndicate shall notify, three months before the examination the portions of the subjects of Chemistry and Botany in which candidates shall be examined," the following words have been substituted —

> The Syndicate shall notify three months before the Examination the portions of Botany in which candi dates shall be examined

For the words "on the first Monday in December," in paragraph 1 of the Regulations for the Entrance Examination, for the words "on the morning of the fourth Monday after the examination," in paragraph 7 of the same Regu lations, for the words "on the first Monday in December,' in paragraph 1 of the Regul itions for the F A Examination for the words on the morning of the fourth Monday after the examin ation," in paragraph 7 of the same Regula tions , for the words "in the first week in January," in paragraph 1 of the Regulations for the Bachelor of Arts Examination for the words "on the morning of the fourth Monday after the examination, in paragraph 7 of the same Regulations for the words in the first week in February' in paragraph 1 of the Regulations for Honours in Arts for the words 'on or before the 31st day of December,' in paragraph 1 of the same Regulations for the words on or before the 1st of January," in paragraph 2 of the Regula tions for the examination for the degree of Master of Arts for the words 'in the fir t week in January," in paragraph 1 of the Regulations for the degree of Bachelor in Law for the words "in the first week in March in paragraph 1 of the Regulations for the examination for Honours in Law, for the words "in the last week of March,' in paragraph 1 of the Regulations for the License in Medicine and Surgery, and in paragraph 1 of the Regulations for the degree of Bachelor in Medi cine, for the words "in the first week of April,' in paragraph 1 of the Regulations for the degree of Doctor in Medicine, for the words "in the first week of May, in paragraph 1 of the Regulations for the License in Civil Engineering, and in paragraph 1 of the Regulations for the degree of Bachelor in Civil Engineering and for the words "in the first week of June,' in para graph 1 of the Regulations for Honours in Civil Engineering, the following words have been sub stituted —

> At such time as the Syndicate shall determine, the date to be approximately notified in the calendar for the year

CHARLES H TAWNEY,

Registrar

SENATE HOUSE,
The 24th June 1880

Department Public Works Half yearly Examination.

The half yearly examination of candidates for promotion and employment in the Public Works Department, will be held at the Govern ment Engineering College, Howrah, at 10 o clock, on Monday, the 2nd August 1880, and the follow ing days Applications, with fees for admission to the examination, are required to be filed before the 15th of July 1880 Candidates for the grade of Accountant who are not in Government service should be under 25 years of age, and must prove to the satisfaction of the Principal that they are under that age

The following are the centres of examination sanctioned by the Government of India as stations where candidates for 4th Grade Accountantships are to appear for examination —

Agra Ajmere Ahmedabad, Allahabad, Akyab, Bolaram, Howrah, Durbhanga, Darjeeling, Indore, Jabalpore, Lucknow, Lahore, Mhow, Mooltan, Mount Aboo, Meerut, Nagpore, Neemuch, Rawulpindi, Rangoon, Shillong, and Simla

Candidates for the Accountant's examination are therefore requested to select one of the places mentioned above

S F DOWNING,

Principal, Govt Engrg College, Howrah

HENRY F BLANFORD,

Meteorological Reporter to Government of India

THE INDIAN LAW REPORTS

PUBLISHED UNDER AUTHORITY

The "Indian Law Reports," published under the authority of the Governor General in Council, will appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court a third for the Bombay High Court, and a fourth for the Allahabad High Court The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series The Parts of each Series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set

Terms of subscription, payable annually in advance

	Without Postage	With Postage
For the CALCUTTA SERIES	Rs 30	Rs 37 8
" MADRAS SERIES	" 8	" 9
" BOMBAY SERIES	" 8	" 9
" ALLAHABAD SERIES	" 8	" 9
Complete set	" 45	" 47 8

The price of each Part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper It will, however, never be below the following —

	Rs	A
For a Part of the CALCUTTA SERIES	3	8
" " MADRAS SERIES	" 1	0
" " BOMBAY SERIES	" 1	0
" " ALLAHABAD SERIES	" 1	0
Complete set	" 4	0

Persons desiring to subscribe for or purchase the Reports should apply to—

MESSRS THACKER, SPINK AND CO, CALCUTTA,
MESSRS THACKER AND CO, BOMBAY
MESSRS HIGGINBOTHAM AND CO, MADRAS,
THE GOVERNMENT CENTRAL BOOK DEPOT, BOMBAY,
THE GOVERNMENT BOOK DEPOT, ALLAHABAD

Orders and Subscriptions for 1878 should be at once remitted

THE BENGAL LAW REPORTS

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs Thacker, Spink & Co, Calcutta, at Rs 375 a set

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[Second publication]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 2nd July, 1880 and is hereby promulgated for general information —

ACT No XI OF 1880

An Act to provide for the appointment of an Additional Recorder of Rangoon, and for other purposes

Preamble

WHEREAS it is expedient to provide for the temporary appointment from time to time of an Additional Recorder to assist the Recorder of Rangoon, and whereas it is also expedient to remove certain doubts which exist as to the jurisdiction of the said Recorder under section sixty two of the Burma Courts Act, 1875, It is hereby enacted as follows —

Short title

1 This Act may be called The Burma Courts' Act, 1880,

Commencement.

and it shall come into force at once

Appointment of Additional Recorder

2 The Governor General in Council may, from time to time, by notification in the *Gazette of India* appoint, to be an Additional Recorder and to sit as such in the Court of the Recorder of Rangoon such person as he thinks fit, being a Barrister of not less than five years' standing, or a person who has for at least three years served as a District Judge or exercised the like powers as those of a District Judge

Every person so appointed shall hold his office during the pleasure of the Governor General in Council

Cases to be disposed of by Additional Recorder

3 Every Additional Recorder appointed under section two shall sit at such of the places at which under the said Act the Recorder's Court can be held as the Chief Commissioner of British Burma from time to time directs, and shall dispose of such cases now or hereafter pending in the said Recorder's Court under any enactment for the time being in force, as the said Chief Commissioner or Recorder may from time to time direct and in the disposal of such cases shall administer the same law, follow the same procedure exercise the same powers and use the same seal as would be administered, followed exercised and used by the said Recorder in like cases

All decrees, orders and sentences made or passed in such cases by any such Additional Recorder shall for the purposes of the law relating to appeals references and revision be deemed to be made or passed by the Recorder

The Chief Commissioner may at any time cancel any direction given under this section requiring the Additional Recorder to dispose of a case

Additional Recorder to sit in Special Court in place of Recorder

4 The Additional Recorder shall also sit in the place of the Recorder as a member of the Special Court established under Chapter V of the said Act, for the disposal of such cases as the Chief Commissioner directs and shall while so sitting, take precedence according to the same rule as the Recorder, and exercise all the powers and perform all the duties which under the said Act may be exercised and

performed by the Recorder as a member of such Special Court

Section 80 of the Burma Courts Act to apply when Additional Recorder sits in Special Court

5 Whenever in cases tried by the Judicial Commissioner and Additional Recorder of Rangoon sitting together as a Special Court without a Commissioner a difference of opinion arises the rules prescribed by section eighty of the said Act shall be observed the words Additional Recorder being substituted for the word Recorder wherever it occurs in the said rules

Amendment of section 62 of the Burma Courts Act 1875

6 For the first paragraph of section sixty two of the said Burma Courts' Act, 1875, the following paragraph shall be substituted —

'Notwithstanding any thing hereinbefore contained the Recorder shall have all the powers of a High Court under the Code of Criminal Procedure in respect of offences committed by European British subjects and persons charged jointly with European British subjects within British Burma

[First publication]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 9th July, 1880, and is hereby promulgated for general information —

ACT No XII OF 1880

An Act for the appointment of persons to the office of Kázi

WHEREAS by the preamble to Act No XI of 1864 *(An Act to repeal the law relating to the offices of Hindu and Muhammadan Law Officers and to the offices of Kázi-ul-Kuzaat and of Kázis and to abolish the former offices)* it was (among other things) declared that it was inexpedient that the appointment of the Kází ul Kuzaat or of City Town or Pargana Kázis should be made by the Government and by the same Act the enactments relating to the appointment by the Government of the said officers were repealed and whereas by the usage of the Muhammadan community in some parts of British India the presence of Kazis appointed by the Government is required at the celebration of marriages and the performance of certain other rites and ceremonies and it is therefore expedient that the Government should again be empowered to appoint persons to the office of Kazi It is hereby enacted as follows —

Short title

1 This Act may be called The Kazis Act 1880

Commencement

and it shall come into force at once

Local extent

It extends in the first instance only to the territories administered by the Governor of Fort St George in Council But any other Local Government may from time to time by notification in the official Gazette, extend it to the whole or any part of the territories under its administration

Power to Government to appoint Kazis for any local area

2 Whenever it appears to the Local Government that any considerable number of the Muhammadans resident in any local area desire that one or more Kazis should be appointed for such local area, the Local Government may, if it thinks fit after consulting the principal Muhammadan residents of such local area, select one or more fit persons and appoint him or them to be Kázís for such local area

If any question arises whether any person has been rightly appointed Kází under this section, the decision thereof by the Local Government shall be conclusive

The Local Government may if it thinks fit suspend or remove any Kází appointed under this section who is guilty of any misconduct in the execution of his office, or who is for a continuous period of six months absent from the local area for which he is appointed or leaves such local area for the purpose of residing elsewhere, or is declared an insolvent or desires to be discharged from the office or who refuses or becomes in the opinion of the Local Government unfit, or personally incapable to discharge the duties of the office

Náib Kázis

3 Any Kázi appointed under this Act may appoint one or more persons as his náib or náibs to act in his place in all or any of the matters appertaining to his office throughout the whole or in any portion of the local area for which he is appointed and may suspend or remove any naib so appointed

When any Kazi is suspended or removed under section two his naib or naibs (if any) shall be deemed to be suspended or removed, as the case may be

4 Nothing herein contained and no appointment made hereunder shall be deemed—

Nothing in Act to confer judicial or other powers on Kází or

(*a*) to confer any judicial or administrative powers on any Kázi or Naib Kází appointed hereunder or

to render the presence of a Kazi necessary or

(*b*) to render the presence of a Kázi or Náib Kázi necessary at the celebration of any marriage or the performance of any rite or ceremony or

to prevent any one acting as Kázi

(*c*) to prevent any person discharging any of the functions of a Kázi

D FITZPATRICK,
Secy to the Govt of India,
Legislative Department

[First publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 9th July, 1880, and is hereby promulgated for general information :—

ACT No. XIII OF 1880.

THE VACCINATION ACT, 1880.

CONTENTS.

An Act to give power to prohibit inoculation and to make the vaccination of children compulsory in certain Municipalities and Cantonments.

Preamble.

WHEREAS it is expedient to give power to prohibit inoculation and make the vaccination of children compulsory in certain municipalities and cantonments : It is hereby enacted as follows :—

Short title.

1. This Act may be called "The Vaccination Act, 1880" : and

Application.

it shall apply only to such municipalities and cantonments situate in the territories administered respectively by the Lieutenant-Governors of the North-Western Provinces and the Panjab and the Chief Commissioners of Oudh, the Central Provinces, British Burma, Assam, Ajmere and Coorg as it may be extended to in manner hereinafter provided.

Interpretation clause.

2. In this Act, unless there is something repugnant in the subject or context,—

"Municipal Commissioners."

(1) the expression "Municipal Commissioners" means a body of Municipal Commissioners or a Municipal Committee constituted under the provisions of any enactment for the time being in force :

"Parent."

(2) "parent" means the father of a legitimate child and the mother of an illegitimate child :

"Guardian."

(3) "guardian" includes any person who has accepted or assumed the care or custody of any child :

"Unprotected child."

(4) "unprotected child" means a child who has not been protected from small-pox by having had that disease either naturally or by inoculation or by having been successfully vaccinated, and who has not been certified under this Act to be insusceptible to vaccination :

"Inoculation."

(5) "inoculation" means any operation performed with the object of producing the disease of small-pox in any person by means of variolous matter :

"Vaccination circle."

(6) "vaccination circle" means one of the parts into which a municipality or cantonment has been divided under this Act for the performance of vaccination :

"Vaccinator."

(7) "vaccinator" means any vaccinator appointed under this Act to perform the operation of vaccination or any private person authorized by the Local Government in manner hereinafter provided to perform the same operation ; and includes a Superintendent of vaccination :

"Vaccination season."

(8) "vaccination season" means the period from time to time fixed by the Local Government for any local area under its administration by notification in the official Gazette during which alone vaccination may be performed under this Act.

Extension of Act to municipalities

3 A majority in number of the persons present at a meeting of the Municipal Commissioners specially convened in this behalf may apply to the Local Government to extend this Act to the whole or any part of a municipality and thereupon the Local Government may, if it thinks fit, by notification published in the official Gazette declare its intention to extend this Act in the manner proposed

Any inhabitant of such municipality or part thereof who objects to such extension may within six weeks from the date of such publication send his objection in writing to the Secretary to the Local Government and the Local Government shall take such objection into consideration When six weeks from the said publication have expired the Local Government, if no such objection have been sent as aforesaid, or (when such objections have been so sent) if in its opinion they are insufficient, may by like notification effect the proposed extension

Extension to cantonments

4 The Local Government may, with the previous sanction of the Governor General in Council, by notification in the local official Gazette, extend this Act to the whole or any part of a military cantonment

Power to withdraw local areas from operation of Act

5 The Local Government may, by notification in the official Gazette, withdraw any local area, municipality or cantonment, with the previous sanction of the Governor General in Council, any local area ... from the operation of this Act

Inoculation prohibited

6 In any local area to which the provisions of this Act apply, inoculation shall be prohibited, and

Unprotected persons not to enter local area

no person who has undergone inoculation shall enter any such local area within forty days from the date of the operation without a certificate from a medical practitioner of such class as the Local Government may from time to time by written order authorize to grant such certificates stating that such person is no longer likely to produce small-pox by contact or near approach

Vaccination circles

7 Every local area to which this Act applies shall be, for vaccination purposes, in manner hereinafter provided, be divided into a number of such circles

Vaccinators

one or more vaccinators shall be appointed in manner hereinafter provided for each such circle, and

Superintendents of vaccination

one or more Superintendents of Vaccination shall be appointed in manner hereinafter provided for each such local area

Licensing private vaccinators

8 The Local Government may, by written license, authorize private vaccinators to perform vaccination in any vaccination circle, and may suspend or cancel any such license

Unprotected child to be vaccinated

9 When any unprotected child having attained the age of six months has resided for a period of one month during the vaccination season in any local area to which the provisions of this Act apply and has not at the expiration of such period attained the age, if a boy, of fourteen years, and if a girl, of eight years, the parent or guardian of such child shall take it, or cause it to be taken to a vaccinator to be vaccinated or send for a vaccinator to vaccinate it

Vaccinator to vaccinate child and deliver memorandum or certificate of postponement

Such vaccinator shall vaccinate the child and deliver to its parent or guardian a memorandum stating the date on which the vaccination has been performed and the date on which the child is to be inspected in order to ascertain the result of the operation, or shall, if he finds such child in a state unfit for vaccination, deliver to its parent or guardian a certificate under his hand to the effect that the child is in a state unfit for vaccination for the whole or part of the current vaccination season

Inspection after vaccination

10 The parent or guardian of every child which has been vaccinated under section nine shall, on the date of inspection stated in the memorandum, take the child or cause it to be taken to a vaccinator for inspection or get it inspected at his own house by a vaccinator, and

such vaccinator shall then append to the memorandum a certificate stating that the child has been inspected and the result of such inspection

Certificate of successful vaccination

11 When it is ascertained at the time of inspection under section ten that the vaccination has been successful, a certificate shall be delivered by the vaccinator to the parent or guardian to that effect, and such child shall thereafter be deemed to be protected

Revaccination

12 When it is ascertained as aforesaid that the vaccination has been unsuccessful, the parent or guardian shall, if the vaccinator so direct, cause the child to be forthwith again vaccinated and subsequently inspected in manner hereinbefore provided

Duration of certificate

13 A certificate granted under section nine showing the unfitness of a child for vaccination shall remain in force for the period stated therein, and on the termination of that period or, if that period terminates after the vaccination season is over, when the next vaccination season begins, the parent or guardian of such child shall take the child or cause it to be taken to a vaccinator to be vaccinated or procure its vaccination at his own house by a vaccinator

Provided that if the child is still found to be in a state unfit for vaccination, the certificate granted under section nine shall be renewed

Certificate of insusceptibility

14 If the Superintendent of Vaccination is of opinion that a child which has been three times unsuccessfully vaccinated is insusceptible of successful vaccination, he shall deliver to the parent or guardian of such child a certificate under his hand to that effect, and the parent or guardian shall thenceforth not be required to cause the child to be vaccinated

What lymph to be used

15 The vaccination of a child shall ordinarily be performed with such lymph as may be prescribed by the rules to be made under this Act

Provided that,

1st if animal lymph is so prescribed and the parent or guardian of any child desires that such child shall be vaccinated with human lymph, it shall be so vaccinated and

2nd, if in any local area in which animal lymph is procurable human lymph is so prescribed and the parent or guardian of any child desires that such child should be vaccinated with animal lymph and tenders to the vaccinator the amount of such fee not exceeding one rupee as may be fixed by such rules in this behalf, such child shall be so vaccinated

No fee to be charged except by private vaccinator

16 No fee shall be charged by any vaccinator except a private vaccinator to the parent or guardian of any child for any of the duties imposed on such vaccinator by or under the provisions of this Act

Proviso

Provided that it shall be lawful for a vaccinator to accept a fee for vaccinating a child by request of the parent or guardian elsewhere than in the circle for which such vaccinator is appointed

Duties of Superintendent of vaccination

17 The Superintendent of vaccination in addition to the other duties imposed on him by or under the provisions of this Act shall ascertain whether all unprotected children under the age of fourteen years if boys and under the age of eight years if girls within the local area under his superintendence have been vaccinated and if he has reason to believe that the parent or guardian of any such child is bound by the provisions hereinbefore contained to procure the vaccination of such child or to present it for inspection and has omitted to do so he shall personally

Notice to parent or guardian to comply with Act

[illegible] the house of such [illegible] parent or guardian and there [illegible] and shall if the fact is proved forthwith deliver to such parent or guardian or [illegible] at the house a notice requiring that the child be vaccinated or (as the case may be) that it be presented for inspection at a time and place to be specified in such notice

Order by Magistrate when notice not complied with

18 If such notice is not complied with the Superintendent of vaccination shall report the matter to the Magistrate of the District or such Magistrate as the Local Government or the Magistrate of the District may from time to time appoint in this behalf and the Magistrate receiving such report shall summon the parent or guardian of the child and demand his explanation and shall if such explanation is not satisfactory make an order in writing directing such parent or guardian to comply with the notice before a date to be specified in the order

Procedure when order not obeyed

If on such date the order has not been obeyed the Magistrate shall summon the parent or guardian before him and unless just cause or excuse is shown shall deal with the default as an offence punishable under section twenty two

Magistrates to be non-official natives

The Magistrates appointed under this section shall as far as conveniently practicable be natives of India and not paid servants of the Government

Power to make rules for municipalities

19 When this Act has been applied to any municipality or any part thereof the Municipal Commissioners may, from time to time make rules consistent with this Act for the proper enforcement of this Act within the limits to which it applies Such rules shall be made in the manner in which under the law for the time being in force the Commissioners make rules or bye-laws for the regulation of other matters within the limits of the municipality and shall when confirmed by the Local Government and published in the official Gazette, have the force of law

Provided that the Local Government may at any time rescind or modify any such rule

Power to make rules for cantonments

20 When this Act has been applied to any cantonment or any part thereof the Local Government may from time to time, subject to the control of the Governor General in Council, make such rules

21 The rules to be made for any local area under section nineteen or twenty may among other matters provide for—

Matters for which rules may provide

(*a*) the division of such local area into circles for the performance of vaccination

(*b*) the appointment of a place in each vaccination circle as a public vaccination station and the putting of some distinguishing mark in a conspicuous place on such station

(*c*) the qualifications to be required of public vaccinators and Superintendents of vaccination

(*d*) the authority with which their appointment suspension and dismissal shall rest

(*e*) the time of attendance of public vaccinators at the vaccination station and their residence within the limits of the vaccination circles

(*f*) the distinguishing mark or badge to be worn by them

(*g*) the amount of fee chargeable by private vaccinators and their guidance generally in the performance of their duties

(*h*) the facilities to be afforded to people for procuring the vaccination of their children at their own houses

(*i*) the grant and form of certificates of successful vaccination, of unfitness for vaccination or of insusceptibility of vaccination

(*j*) the nature of the lymph to be used and the supply of sufficient quantity of such lymph

(*k*) the fee to be paid for vaccination with animal lymph under [illegible]

(*l*) the fee to be paid to a public vaccinator for vaccinating a child beyond the vaccination circle at the request of the parent or guardian of the said child

(*m*) the preparation and keeping of registers showing—

the names of children born in such local area on or after the date of the application of this Act

the names of unprotected children born in such local area previous to the application of this Act and who are at the time this Act is applied under the age of fourteen years if boys and of eight years if girls

the names of unprotected boys and girls respectively under those ages brought within such local area at any time after the application of this Act and who have resided there for a month

the result of each vaccination or its postponement and the delivery of certificates if any

(n) the assistance to be given by the Municipal Commissioners and municipal servants in the preparation of these registers, and in other matters and

(o) the preparation of vaccination reports and returns

Punishment for offences

22 Whoever commits any of the undermentioned offences (that is to say) —

(a) violates the provisions of section six

(b) neglects without just excuse to obey an order made under section eighteen

(c) breaks any of the rules made under section nineteen or twenty or

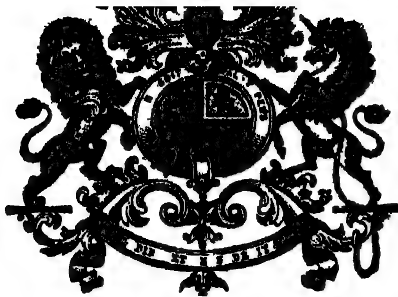
(d) neglects without just cause to obey an order made under section eighteen after having been previously convicted of so neglecting to obey a similar order made in respect of the same child,

shall be punished as follows (that is to say) —

in the case of the offence mentioned in clause (a), with simple imprisonment for a term which may extend to three months or with fine which may extend to two hundred rupees or with both,

in the case of the offences mentioned in clauses (b) and (c) with fine which may extend to fifty rupees and

in the case of the offence mentioned in clause (d) with simple imprisonment for a term which may extend to six months or with fine which may extend to one thousand rupee or with both



Municipal fund to receive fines and bear expenditure

23 The amount of all fees and fines realized and the amount of all expenditure incurred under this Act in any municipality shall respectively be credited to and paid from the municipal fund

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[First publication]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 9th July 1880, and was referred to a Select Committee —

No 9 of 1880

A Bill to amend the Bombay Revenue Jurisdiction Act 1876

Preamble

WHEREAS it is expedient to amend the Bombay Revenue Jurisdiction Act 1876 in manner hereinafter appearing, and to make further provision for the recovery of certain advances made in the territories administered by the Governor of Bombay in Council for purposes other than those specified in the Land Improvement Act 1871. It is hereby enacted as follows —

Short title

1 This Act may be called 'The Bombay Revenue Jurisdiction Act 1880

Commencement.

and it shall come into force at once

Repeal of sections 8 9 10 and 17 of Act No. X of 1876

2 Sections eight, nine, ten and seventeen of the said Bombay Revenue Jurisdiction Act, 1876, are hereby repealed

Proviso as to second paragraph of section 17

Provided that the repeal of the second clause of the said section seventeen shall not be deemed to render invalid or illegal anything made valid or legal by the said clause

Addition to section 32 of Act No XIV of 1869 as amended by section 15 of Act No X of 1876

3 To section thirty two of the Bombay Civil Courts Act No XIV of 1869 as amended by section fifteen of the said Act the following words shall be added —

Proviso as to municipalities of which Government officer a member

Provided that nothing in this section shall be deemed to apply to any suit merely because a municipal corporation constituted under Bombay Act No VI of 1873 or any other enactment for the time being in force, is a party to such suit and an officer of Government is in his official capacity a member of such corporation'

Governor in Council to make rules as to certain advances for purposes other than those specified in Act No XXVI of 1871

4 The Governor of Bombay in Council may from time to time with the previous sanction of the Governor General in Council, prescribe rules as to advances to be made in the territories administered by the said Governor in Council to owners and occupiers of arable land for the relief of distress, the purchase of seed or cattle or any other purpose not specified in the Land Improvement Act, 1871 but connected with agricultural objects Act X of 1876 s 3.

All such rules shall be published in the local official Gazette

Recovery of such advances

5 Every advance for any such purpose which may heretofore have been made by or on behalf of the Government in the said territories, and every advance which may hereafter be made under such rules shall when it becomes due be recoverable from the person to whom it was made, or from any person who has become surety for the repayment thereof, as if it were an arrear of land revenue due by the person to whom the advance was made or by his surety Act X of 1876 s 3

STATEMENT OF OBJECTS AND REASONS

THE passing of the Bombay Land Revenue Code (Bombay Act No V of 1879) has rendered certain of the provisions of the Bombay Revenue Jurisdiction Act (No X of 1876) superfluous Thus sections 9 and 10 of that Act, which provide for appeals from the proceedings of Revenue-officers and for review of the orders passed on such appeals in certain specified cases are covered by the provisions of the Code, which provide for such appeals and reviews generally Again, the need for paragraph 1 of section 17 of the Act is removed by section 151 of the Code, whilst Bombay Regulation XVII of 1827, to which the second paragraph of the same section refers, is entirely repealed by the Code, sections 45 and 48 of which render lands within the sites of villages, towns and cities liable to assessment to the land revenue

2 The present Bill repeals all these provisions of the Revenue Jurisdiction Act Care, however has been taken when repealing the second clause of section 17, to add a proviso maintaining the validity which that clause gives to things done before the Act was passed

3 The opportunity has been taken to make one or two other amendments in connection with the Bombay Revenue Jurisdiction Act which have been suggested by the Bombay Government

4 Section 8 of the Act had an intelligible meaning as it stood with its original context in Bombay Regulation V of 1830 section 1 clause 6 but as it stands alone in the Act its correct interpretation is by no means clear and as the Bombay Government state that in practice its provisions are a dead letter, it has been thought advisable to repeal it altogether by the present Bill

5 It has recently been held by the Bombay High Court (Melvill J and Kemball J), in the case of the Ahmadábád municipality (I L R 3 Bom p 116) that, in a suit by or against a municipality constituted under the Bombay Municipal Act (No VI of 1873) every individual Commissioner must be regarded as a party within the meaning of section 15 of the Revenue Jurisdiction Act 1876 and that, consequently if any officers of Government are in their official capacity Commissioners such a suit can be entertained by the District Judge alone A large number of the suits in which municipalities are concerned are of a trifling nature and there appears to be no adequate reason for depriving the Subordinate Judges and the Judges of the Small Cause Courts of jurisdiction with regard to them whilst the result of confining such suits to the Court of the District Judge is to impede that officer in the disposal of the more important suits and which properly fall within the jurisdiction of his Court A proviso has, therefore been added to section 34 of the Bombay Courts Act (No XIV of 1869) as amended by section 15 of the Revenue Jurisdiction Act saving from the provisions of the section suits by or against municipalities in cases in which Government officials are, as such, members of such municipalities

6 Lastly, the third paragraph of section 17 of the Revenue Jurisdiction Act, though rendering advances made by Government for purposes other than those specified in the Land Improvement Act, 1871, recoverable as arrears of land revenue is restricted in its operation to the case of the persons to whom such advances have been made, and does not extend to the sureties of such persons This is an evident defect in the law Instead however of merely amending the paragraph, it has been thought more expedient to repeal it altogether and to enact a new provision based on section 3 of the Northern India Takkávi Act, 1879

The 6th July, 1880

D FITZPATRICK,
Secy to the Govt of India,
Legislative Department

[First publication]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 9th July, 1880, and was referred to a Select Committee —

No 10 of 1880

A Bill to exempt Pársís from certain provisions of the Administrator General's Act, 1874

Preamble

WHEREAS Hindus, Muhammadans and Buddhists are exempted from the operation of certain provisions of the Administrator General's Act (No II), 1874 but are subject to the operation of certain other provisions of the said Act,

and whereas it is expedient that Pársís should be exempted from, and be subject to, the operation of the said Act to the same extent as Hindus, Muhammadans and Buddhists, It is hereby enacted as follows —

Short title

1 This Act may be called "The Administrator General's Act, 1880"

Commencement

and it shall come into force at once

Amendment of sections 16 17 18 36 and 64 of Administrator General's Act 1874.

2 In sections 16, 17, 18 36 and 64 respectively of the said Act between the word 'Muhammadan' and the words 'or Buddhist' wherever they occur, the word "Pársi" shall be inserted

Saving of letters and certificates already granted

3 Nothing herein contained shall affect any letters of administration or certificate granted under the said Act before the passing of this Act

---

STATEMENT OF OBJECTS AND REASONS

1 As the law now stands, all the provisions of the Administrator General's Act (No II of 1874) apply to Pársis to the same extent as to their European and Christian fellow subjects On the other hand, Hindus, Muhammadans and Buddhists, though subject to certain portions of the Act which are expressly declared applicable to all persons without exception, are by the terms of the Act itself exempted from some of its most important provisions.

2 So far as can be gathered from various memorials and communications on the subject which have been received, the Pársís are almost unanimous in their desire to be exempted from the provisions of the Act, in the same manner and to the same extent as Hindús, Muhammadans and Buddhists

3 Briefly stated, the chief grounds on which the Pársis base their claim to exemption appear to be, first, that there is no necessity for such an Act in their case secondly, that in its operation the Act is oppressive and burdensome to them and repugnant to their social and religious customs

4 With regard to the former ground, there is no doubt that the Act was originally designed to meet the case of Europeans and other foreigners similarly situated in this country, whereas Pársís are distinctly Asiatics with an Indian domicile They have always relatives or friends willing to take charge of their property and to enforce its proper administration It is thus clear that Pársis are in a totally different position from those for whose benefit the Act was intended and it would accordingly seem that there is a great deal to be said in favour of the arguments of the Pársis on this ground

5 As to the second ground, it could scarcely be contended that the provisions of the Administrator General's Act are in themselves either oppressive or burdensome but looking to the repugnance with which Pársís regard such an exposure of their family affairs and resources as would sometimes result if the Act were enforced in their case it may be admitted that this second ground is not altogether without foundation

6 The present Bill, by a slight alteration of the Administrator General's Act 1874 puts Pársis in exactly the same position with regard to that Act as Hindus, Muhammadans and Buddhists

The following Report of a Select Committee, on the Bill for the appointment of persons to the office of Kazi, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 2nd July, 1880 —

REPORT

WE, the undersigned Members of the Select Committee to which the Bill for the appointment of persons to the office of Kázi was referred have the honour to report that we have considered the Bill and the papers noted in the margin

From Secretary for Birár to Resident Haidarábád No 77 dated 10th March 1880 [Paper No 1]
Secretary to Chief Commissioner Coorg No 1261 7 dated 8th March 1880 and enclosures [Papers No 2]
Officiating Secretary to Chief Commissioner Central Provinces No [illegible] dated 1[illegible]th March 1880 and enclosures [Papers No 3]
Chief Secretary to Government Madras No 556 dated 9th March 1880 and enclosures [Papers No 4]
Ditto ditto No 638 dated 19th March 1880 and enclosures [Papers No [illegible]]
Acting Under Secretary to Government Bombay No 2178 dated [illegible]7th March 1880 and enclosure [Papers No [illegible]]
Ditto ditto No 2014 dated [illegible]0th March 1880 and enclosures [Papers No 7]
Chief Secretary to Government Madras No 718 dated 30th March 1880 and enclosures [Papers No 8]
Chief Commissioner Ajmer Mhairwara No 17 dated 1[illegible]th April 1880 [Paper No [illegible]]
Under Secretary to Government Bengal No 2061 dated 1[illegible]th April 1880 and enclosures [Papers No 10]
Secretary to Government North Western Provinces and Oudh No 300 dated [illegible]th May 1880 [Papers No 11]
Secretary to Government Punjab No 1643 dated [illegible]th April 1880 and enclosure [Papers No 1[illegible]]
Chief Commissioner Ajmer Mhairwara No 381 dated [illegible] May 1880 and enclosures [Paper No 13]
Officiating Junior Secretary to Chief Commissioner British Burma No [illegible] dated [illegible] May 1880 and enclosures [Papers No 1[illegible]]
Chief Secretary to Government Madras No 1[illegible] dated [illegible]4th May 1880 and enclosures [Papers No 15]

2 We have in section 2 restricted the power of the Local Government to suspend or remove a Kazi by specifying the circumstances under which that power may be exercised

3 We have at the instance of some of the authorities consulted added a section (3) empowering a Kázi to appoint a Naib and suspend or remove him at pleasure

There is a precedent for this in Bombay Regulation XXVI of 1827, section 5

4 It has been urged by some of the authorities consulted that the Act should define the duties of the Kazis to be appointed under it and should give them an exclusive right to perform those duties Any attempt to do this would we consider be altogether outside the scope of the Bill as introduced and referred to us and would moreover give a weight which they have not at present to the objections that have been taken to the Bill on the ground that it would practically force upon many persons the services of Kazís whom they did not care to employ

We may add that in many places owing to the way in which the Muhammadan population is split into sects not always well defined it would be almost impracticable to confer upon one or more persons a monopoly of the office

5 We think it is clear that the Bill should be carefully confined to its original object namely that of providing a Kazi appointed by the Government for those who desire to avail themselves of the services of such a Kazi and as it has been suggested to us that a Kází appointed under the Bill as originally framed might possibly be held to have an exclusive claim to perform the duties of a Kazi and to have a right to restrain others from performing those duties in the local area for which he was appointed we have added a clause to section 1 to make it clear that he will not

The result of the Bill as it now stands will be that there will be a Kazi appointed by the Government for those who choose to avail themselves of his service but that those who prefer to employ any other so called Kazi will be at liberty to do so

6 The publication ordered by the Council has been made except in Assam Ajmer the North Western Provinces and Mysore we do not consider that the changes now made are such as to render republication necessary and we recommend that the Bill as amended be passed

From Surgeon Major W R Cornish Sanitary Commissioner Government of Madras No 120V dated 16th March 1880 [Paper No 27]

2 The most important point we have had to deal with is that to which our attention was directed by the instruction with which the Bill was referred to us namely "the expediency of providing that the Act should not be introduced into any municipality or military cantonment unless the local authorities were satisfied that there was a preponderance of local Native opinion so far as could be ascertained, in favour of its application"

3 We are of opinion that there is no need of imposing any such limitation on the extension of the Act to cantonments A large proportion of the civil residents of an Indian cantonment consists of persons who in the wider sense of the words may be called followers of the army and all who take up their abode there do so with the knowledge that they are joining a community subject to exceptional laws of a peculiarly stringent nature especially in matters of conservancy and sanitation This being so, we do not think that the application to them of a measure of this description, so necessary for the protection of the military class for whose benefit cantonments are established, can afford any reasonable ground of complaint

4 The case of a municipality, on the other hand stands on a totally different footing There, as we believe some limitation to the power of extending the Act is clearly desirable and we have accordingly provided (section 3) first, that the Local Government shall move in the matter only on the application of a majority of the Municipal Commissioners assembled at a meeting specially convened for this purpose and secondly, that, before the Act is extended, a notification shall be issued in the same way as when it is proposed to extend certain municipal Acts allowing six weeks to persons who object to the extension to submit their objections for the consideration of the Local Government

5 Subject to these two checks we think that the power of extending the Act to a municipality may be safely confided to the Local Government

6 In connection with this matter of the extension of the Act, we think it well to explain that we have omitted all reference to the application of the Act to cantonments situate beyond the limits of British India only because we consider that such cantonments should be dealt with not by an Act of the legislature, but according to the practice uniformly adopted of late years, by orders issued by the Executive Government

7 We have (section 2, clause 8) left to the Local Government to fix the limits of the "vaccination season," as it appears that neither the limits fixed by the Bill as introduced nor any other absolutely fixed limits would be suitable everywhere throughout the widely varying territories to which the Bill is applicable

8 We have provided a power to extend the Act to any part of a municipality or cantonment, as well as to the whole, and a power to withdraw any local area to which the Act may have been applied from its operation

9 We have (section 9) fixed as the limit of age up to which vaccination can be insisted on fourteen years for boys and eight years for girls The reason for putting this latter limit so low will be obvious to any one who reads the papers connected with the Bill and considers the feelings of the Natives of this country on such matters

On the other hand we have with a view to insuring protection at an earlier age, reduced the age at which vaccination becomes compulsory from one year to six months, and further reduced from three months to one the time allowed for procuring the vaccination of a child brought into a municipality subject to the Act

10 The power of granting a certificate of insusceptibility to vaccination was by the Bill as introduced placed in the hands of the vaccinators We do not think it could safely be entrusted to Native officials of that rank and we have accordingly (section 14) restricted it to the Superintendent of Vaccination

11 In section 15 we have dealt with the important question of the lymph to be used

The Bill as introduced provided in deference to the views of those who fear the dissemination of constitutional disease by arm to arm vaccination that animal lymph should be used whenever it was procurable

We have thought it well to modify this whatever difference of opinion there may be as to the precise degree of danger involved in arm to arm vaccination it is clear that the risk arising from it is with ordinary care so small as to render a rule of this sort altogether unnecessary

Moreover we are of opinion that no such hard and fast rule could safely be laid down for tracts of country so extensive so widely scattered and so diversified as those to which the present Bill applies

12 Vaccination with animal lymph may no doubt be pronounced on the whole a success in the town of Bombay and in other places where it has been tried but it appears from the papers submitted to us that owing to some causes as yet unexplained it occasionally fails or produces inflammation Moreover it has been suggested from some parts of the country and the objection has been also put forward in a paper which has just been circulated by our hon'ble colleague the Raja of Jhind that the use of animal lymph would be distasteful to the Hindu portion of the community This we must observe is contrary to the experience acquired by the working of the animal lymph system in Bombay but there is no saying how far an objection of this sort may be felt elsewhere and we cannot accordingly omit the point altogether from consideration

13 On the whole we have deemed it best to leave it to the local authorities to determine the description of lymph to be used reserving at the same time to any parent objecting to the lymph prescribed a right to have his child vaccinated with lymph of the other description

As however vaccination with animal lymph requires special arrangements involving a certain amount of expenditure and as moreover allowing an option of vaccination with animal lymph when human lymph is prescribed is a concession to apprehensions which have in the opinion of the most competent judges but little foundation we have thought it right to provide that any person exercising this option shall be required to pay a small fee, the maximum limit of which we have fixed at one rupee

14 We have omitted section 11 of the Bill as introduced which purported to prohibit a vaccinator taking lymph from a vaccinated child without the consent of the parent and to legalize an offer of remuneration for such consent It need hardly be observed that such a provision would have been mere surplusage adding nothing to the existing law and it has been objected to by persons of experience as likely to suggest difficulties and objections where none are now made

15 We have in section 18 provided that the Magistrates other than the Magistrate of the district by whom the provisions of the Act are to be enforced shall, as far as is conveniently practicable, be natives of India and not paid servants of the Government This we think will secure the object in view namely, that of working as far as possible through Native Honorary Magistrates, more effectually than section 25 of the original Bill, which really added nothing to the existing law

16 We have in section 22 clause (c) provided an enhanced penalty against a parent who having been punished for refusing to have his child vaccinated still persists in his refusal We think this is preferable to the somewhat impracticable course suggested to us of empowering the Magistrate to order the child to be vaccinated in spite of the parent's resistance

17 The publication ordered by the Council has been made The amendments we have made, in so far as they affect the persons to whom the Act will apply are on the whole calculated to place additional restrictions on the exercise of the powers conferred to give the people a larger share in the working of the measure and in other ways to diminish its stringency The only exception of any importance is the fresh penalty referred to in the last preceding paragraph Under these circumstances we consider any further publication unnecessary, and we recommend that the Bill as amended be passed

BOMBAY REVENUE JURISDICTION BILL

The Hon'ble MR COLVIN moved for leave to introduce a Bill to amend the Bombay Revenue Jurisdiction Act, 1876

He said that the necessity which had arisen for amending this Act could be explained in a few words A portion of that Act had been virtually repealed The provisions of three of its sections had been deprived of all practical effect by a later law—the Bombay Land revenue Code in fact, two of those three sections were avowedly passed for a temporary purpose, and with the intention that they should only remain in force until the latter Act became law Since these three sections as they now stood were useless, it was proposed to repeal them expressly

Again, the meaning of a fourth section of the Act, which referred to a Bombay Regulation of 1830, had become obscure, if not altogether unintelligible, by the subsequent repeal of that Regulation, that section had therefore become inoperative, if indeed it had not always been so, and it would be better to strike it also out of the Act

When these sections were being rescinded, the Government of Bombay wished to take the opportunity of making two changes in the law In the first place they desired to relax in certain cases the rule which declared that all suits in which the Government or any officer of the Government was a party should be brought in the Court of the District Judge only It was found in practice that this rule was too comprehensive It brought a very large number of petty suits into a superior Court, and formed a needless exception to the general principle, which was that all suits should be tried in the lowest Court which could properly exercise jurisdiction in respect of the claim made In the second place, the Government of Bombay wished the law amended which regulated the recovery of advances that might be made to cultivators in the way of agricultural relief It was proposed to assimilate its law on the subject to that which is contained in 'The Northern India Takkávi Act" according to which advances of the nature he had described were declared to be recoverable in the same way as arrears of land revenue from the persons who had received them, and from their sureties Those were the reasons which made legislation necessary, and for which he asked leave to introduce a Bill to amend the Bombay Revenue Jurisdiction Act

The Motion was put and agreed to

BURMA COURTS' BILL

The Hon'ble MR STOKES moved for leave to introduce a Bill to provide for the appointment of an Additional Recorder of Rangoon, and for other purposes

He said that this Bill had been prepared to meet two difficulties which had lately arisen in Rangoon in connection with the prosecution of twenty-two cases arising out of alleged corrupt practices by officers in the Commissariat Department in British Burma These prosecutions had their origin in disclosures made before the Recorder of Rangoon when exercising his insolvent jurisdiction in the case of the firm of Cohen Brothers and Co, who carried on business in Burma and Calcutta and who failed in 1879 In the course of this proceeding that learned Judge found it necessary to make inquiries into the meaning of certain entries appearing in the books of the insolvents, and those entries formed the basis of the present prosecutions In consequence of his having in the course of the proceedings expressed a strong opinion that Cohen Brothers had been, systematically, administering bribes to the officers of the Commissariat Department at Rangoon, Thayetmyo and Tounghoo, implicated in the present proceedings, these officers and, what was much more important, the learned Recorder himself, considered it was unadvisable that he should sit as Judge at their trial On the other hand, it was very desirable, seeing, as he was sorry to say, that most of the parties were European British subjects, that the cases should be tried in the Recorder's Court at Rangoon Government had been unable to find any way out of this difficulty except by legislation, and as the present difficulty might possibly arise hereafter in similar cases, power had been taken in the present Bill for the Governor General in Council to appoint, from time to time, as circumstances might require, an Additional Recorder who, in the disposal of cases, whether when sitting alone or in the Recorder's place in the Special Court, should have all the powers and jurisdiction of the Recorder

The other difficulty had arisen from a difference of opinion between the Recorder and the Judicial Commissioner as to whether the Court of the Recorder was for all purposes the High Court with regard to European British subjects in respect of offences committed by them in places beyond the limits of the Recorder's original civil jurisdiction The Burma Courts' Act (XVII of 1875), after providing (section 61) that the Recorder should have all the powers of a High Court under the Code of Criminal Procedure in respect of the Magistrates *within the local limits of his ordinary original civil jurisdiction*, and the proceedings of such Magistrates, proceeded as follows —

"62 The Recorder shall have the powers of a High Court under the Code of Criminal Procedure for the trial of *and otherwise with reference to*, European British subjects and persons charged jointly with European British subjects

The Council would see that there was nothing in section 62 (such as there was in section 61) to limit the local operation of the Recorder's powers, and that the words "otherwise with reference to" were wide enough to include appellate and revisional jurisdiction The Recorder and Mr Sandford, the late Judicial Commissioner, were of opinion that section 62 should be interpreted as giving to the Court of the Recorder the jurisdiction of a High Court for all purposes in respect of offences committed by European British subjects in any place in British Burma The present Judicial Commissioner, Mr Jardine, and his *locum tenens* were, on the other hand, of opinion that the section had not that effect The better opinion certainly seemed to Mr Stokes to be,—and he found that the Local Government concurred with him,—that the Recorder had the jurisdiction in question But, as there was room for doubt in two men's minds, and as a different holding might, in the present case, cause a serious failure of justice, the Bill amended the Burma Courts' Act so as to preclude all possible dubitation on the subject

The Motion was put and agreed to

The Hon'ble Mr Stokes also introduced the Bill He said that, as it had been circulated for only a few days, and some Hon'ble Members had probably not had time to look into it, he would, with His Excellency's permission, ask the Secretary to read the Bill to the Council Mr Fitzpatrick then read the Bill as follows —

"*A Bill to provide for the appointment of an Additional Recorder of Rangoon, and for other purposes*

"Whereas it is expedient to provide for the temporary appointment, from time to time, of an Additional Recorder to assist the Recorder of Rangoon,

Preamble.

and whereas it is also expedient to remove certain doubts which exist as to the jurisdiction of the said Recorder under section sixty two of the Burma Courts' Act, 1875, It is hereby enacted as follows —

"1 This Act may be called 'The Burma Courts' Act, 1880', and it shall come into force at once

Commencement.

"2 The Governor General in Council may, from time to time, by notification in the *Gazette of India*, appoint, to be an Additional Recorder and to sit as such in the Court of the Recorder of Rangoon, such person as he thinks fit being a Barrister of not less than five years' standing, or a person who has for at least three years served as a District Judge, or exercised the like powers as those of a District Judge

Appointment of Additional Recorder

"Every person so appointed shall hold his office during the pleasure of the Governor General in Council

"3 Every Additional Recorder appointed under section two shall sit at such of the places at which, under the said Act, the Recorder's Court can be held as the Chief Commissioner of British Burma, from time to time directs and shall dispose of such cases, now or hereafter pending in the said Recorder's Court under any enactment for the time being in force, as the said Chief Commissioner or Recorder may, from time to time, direct, and in the disposal of such cases shall administer the same law follow the same procedure, exercise the same powers and use the same seal as would be administered, followed, exercised and used by the said Recorder in like cases

Cases to be disposed of by Additional Recorder

'All decrees orders and sentences made or passed in such cases by any such Additional Recorder shall, for the purposes of the law relating to appeals references and revision, be deemed to be made or passed by the Recorder

'The Chief Commissioner may at any time cancel any direction given under this section requiring the Additional Recorder to dispose of a case

4 The Additional Recorder shall also sit in the place of the Recorder as a member of the Special Court established under chapter V of the said Act for the disposal of such cases as the Chief Commissioner directs and shall while so sitting, take precedence according to the same rule as the Recorder and exercise all the powers and perform all the duties which under the said Act may be exercised and performed by the Recorder as a member of such Special Court

Additional Recorder to sit in Special Court in place of Recorder

'5 Whenever, in cases tried by the Judicial Commissioner and Additional Recorder of Rangoon sitting together as a Special Court without a Commissioner a difference of opinion arises the rules prescribed by section eighty of the said Act shall be observed the words 'Additional Recorder' being substituted for the word 'Recorder' wherever it occurs in the said rules

Section 80 of the Burma Courts Act to apply when Additional Recorder sits in Special Court

6 For the first paragraph of section sixty two of the said Burma Courts Act, 1875, the following paragraph shall be substituted —

Amendment of section 62 of the Burma Courts Act 1875

' 'Notwithstanding anything hereinbefore contained, the Recorder shall have all the powers of a High Court, under the Code of Criminal Procedure in respect of offences committed by European British subjects, and persons charged jointly with European British subjects, within British Burma' "

The Hon'ble MR STOKES also applied to HIS Excellency the President to suspend the Rules for the Conduct of Business He said that the matter was one of considerable urgency The proceedings had already lasted for a considerable time, and the witnesses could not be expected to remain much longer in Rangoon, which to many of them was a foreign country Furthermore, that gross frauds and malpractices had for many years existed in British Burma there was, unfortunately, no room to doubt The question as to the share taken in these malpractices by the particular persons now accused was (to quote an able letter written by Lieutenant Colonel Weldon, deputed by the Madras Government to enquire into the matter) but a part of the larger question Unless special efforts were made to facilitate the inquiry now pending and take advantage of the presence of evidence with difficulty kept in hand, an opportunity would be lost which, in all probability, would never recur

His Excellency the PRESIDENT considered that the reasons given were quite sufficient to justify the suspension of the Rules He therefore declared the Rules suspended

The Hon'ble MR STOKES moved that the Bill be taken into consideration

The Motion was put and agreed to

The Hon'ble Mr Stokes moved that the Bill be passed.

The Motion was put and agreed to

KÁZÍ BILL

The Hon'ble Sayyad Ahmad Khán presented the Report of the Select Committee on the Bill for the appointment of persons to the office of Kází.

EXEMPTION FROM MUNICIPAL TAXATION BILL

The Hon'ble Mr Grant moved that the Hon'ble Mr Stokes be added to the Select Committee on the Bill to exempt certain persons and property from Municipal taxation

The Motion was put and agreed to

CENTRAL PROVINCES LAND REVENUE BILL

The Hon'ble Mr Grant also introduced the Bill to consolidate and amend the law relating to Land revenue and the jurisdiction of Revenue officers in the Central Provinces He said that he found that he should not have to trouble the Council at any great length in explanation of the Bill—the Central Provinces Land revenue Bill—which he proposed to introduce to day As he had explained on a former occasion, those portions of the original draft which were most likely to give rise to difference of opinion had been excluded, and would be laid before the Council in a separate shape The remaining chapters for the most part followed, with such modifications as might be necessary to meet local circumstances, long established precedents, which it would be a mere abuse of the time of the Council to dilate upon afresh Such remarks as he had to offer, there fore, would be confined to four or five questions only, but before proceeding to embark on them, he should perhaps describe briefly the stages by which the Bill had reached its present shape

Together with the Central Provinces Tenancy Bill, it was originally drafted at the end of 1874—that was nearly six years ago—by Mr W B Jones, now Commissioner of Berar After going through a course of local criticism and modification, both Bills were submitted to the Government of India in the beginning of 1876 Owing partly to the intricacy and difficulty of the subjects themselves and partly, perhaps, to the very elaboration and completeness with which they had been treated, the progress made with them was at first slow, but during the ensuing year they were minutely discussed by Mr Jones and the Hon ble Mr Cockerell, the member then in charge, and in 1878 thoroughly revised drafts were sent down to the Central Provinces Those drafts were laid before Mr Jones and other officers, and the results of their examination and criticism were submitted to the Government of India in April, 1879, and, as it happened that in the same month he (Mr Grant) obtained acting charge of the Central Provinces' Chief Commissionership he took the opportunity to examine both Bills by the light of some very valuable notes furnished in the course of the year by Mr C H J Crosthwaite, whose share in the preparation of the North Western Bills, added to his experience both in the North West and in the Central Provinces, gave exceptional weight to his opinion The result was that some simplifications and curtailments of the Bills were thus effected, without, it was hoped, any sacrifice of real importance and finally, the present season had been devoted, with the skilled aid of the Legislative Department, to improving the form of the Bills He need not perhaps add that, where such improvements were real, as he might safely affirm in the present instance, they had far more than a mere formal importance for the form and the substance were so closely interdependent that the one could not but be materially affected by the defects or excellences of the other

As at present cast the Bill followed very closely what appeared to be the natural lines of the subject It commenced with defining the powers and procedure of Revenue officers, and almost necessarily so commenced, for this portion of the Bill had somewhat of a universal character As he had explained on a former occasion, land revenue collection took so representative a place in the executive administration of the country that the Revenue officers here described not only filled the functions provided for in the Bill but also undertook all general executive duties The next part of the Bill dealt with the assessment of the land revenue, and the

various operations classed with it under the name of settlement, on which of course the whole fabric of land revenue administration depended Then we passed on to the collection of the land revenue, providing the usual armoury of coercive processes against defaulters Although he hoped there would be in the future, as there had been in the past, but little occasion to use those weapons, the knowledge that they were ready in reserve would greatly strengthen our hands Full provision followed for the maintenance of the elaborate Record of-rights prepared at the settlement, and lastly were defined the duties and liabilities of the village officers, on whose aid we so largely depended, not only for the maintenance of the Record of rights but also for other ancillary objects which, if only indirectly connected with the realiza tion of the land revenue, might at least be properly included within the province of the Government in its capacity of partner in the proprietorship of the soil

Passing on to matters of detail he would only notice those few points in which there had been any departure from well established practice or principle

In section 44 there was an attempt to draw attention to a point which so far as he was aware, had not been legislatively noticed elsewhere in the Upper Provinces It was the practice, as was well known in making settlements of the land revenue, to exempt from assessment village sites which returned no rental to the village proprietors and the principle of such an exemption, made once for all and within suitable limitations at the commencement of our settlements might easily be defended But the case was different when habitations encroached upon arable land for the benefit of non agricultural commun ities The sites thus taken up more especially on the outskirts of towns, might by degrees acquire a considerable pecuniary value, and the State could not be justly asked to sacrifice its land revenue on account of a change in the form of occupation which might be actually advantageous to the proprietors Accordingly, it was provided in this section that no village site should be extended by a Settlement officer, at the expense of the revenue paying area, without the special permission of the Local Government

Many of the functions of the Settlement officer were as was well known of a discretionary character and although they might and did affect private rights it would be inexpedient to subject them to the supervision of the regular Courts, which on their part would generally be by their constitution unfitted for dealing with such matters Thus no one probably would contend that the Courts should or could control the assessment or distribution of the land revenue, or the appointment of village officers In those matters, therefore, discretion had been left the Settlement officer subject to the usual checks fur nished by appeal to the higher Revenue authorities

On the other hand where private rights as between two parties were con cerned, claimants should not be deprived of their usual remedies but at the same time vexatious delay would be caused and injurious litigation would be fostered, by staying the settlement proceedings on the occurrence of every little difference of opinion, till a decision had been obtained in a civil Court Accordingly, in section 78 a list had been given of quasi judicial matters in which the Settlement officer was empowered to make a summary enquiry and decision, subject to subsequent challenge by institution of a regular suit Probably most of those petty disputes if intelligently settled would go no further, whilst there would be the means of ultimate redress for all suffering from real grievances

Sections 88 and 89 provided for a class of cases which would not be of per manent recurrence, but which might otherwise have continued to trouble our Courts for some years yet At or previous to the recent settlements in the Central Provinces, proprietary rights were formally conferred on landholders for the first time Before then they had been recognized as farmers or *malguzars* only, but many of them had been long connected with their villages, and, in awarding proprietary rights, Settlement officers were instructed to recognize ' fixed rights, or claims and interests in whatever form they had grown up " The finality of those awards had since been much debated in the civil Courts, and some very

difficult questions had arisen out of the suits to contest or supplement the settlement decisions The opportunity had therefore been taken, in treating of the effects of past settlements to declare that, when a Settlement officer had specifically pronounced on a claim to proprietary right, his decision should not now be open to question in the civil Courts, but that claims left out of consideration at the settlement might still be asserted in the usual way in the Courts, provided that they were not barred by limitation

The methods provided for realising the Government land-revenue from defaulting landholders followed as had been said, the traditional models, and needed no particular discussion here But the Government revenue of course, depended ultimately on the power of the representative landholders to realize their proper contributions from the rest of their body, and means had therefore been taken to strengthen their hands by a section (No 116) borrowed from the Oudh Act, which empowered Deputy Commissioners on application from a representative landholder to realize on his behalf arrears from subordinate or associate sharers in the proprietary right in the same manner, and with the same powers, as would be available for the realization of Government land revenue

The next section (117) dealt in a very simple but it was hoped, a sufficiently effective manner with the important question of revenue free grants of land or revenue assignments made by proprietors It would be obvious that the State was vitally interested in preventing the exclusion of land from the revenue paying class, and the consequent contraction of the area on which its demand had been calculated and the security of that demand rested The old law was not without provision for enabling landholders to resume grants of this kind improvidently made by them or by their predecessors, but the powers given by it were not sufficiently extensive and it had been held by the Courts that twelve years unchallenged possession would secure a grantee against resumption The result might have been and he understood actually had been in some cases in Jhansi to seriously cripple the resources of the land revenue payers and so to imperil the land revenue Fortunately the evil had not made itself so severely felt in the Central Provinces and they had thought it sufficient to provide against the ill effects of such alienations in the future by declaring that nothing in the Limitation Act, and no agreement made after the passing of this Act should bar the right of *malguzars* to demand revenue from any person holding land which had been taken into account in the assessment

The next section claiming notice was section 122 which empowered the Chief Commissioner to enforce any rule custom or condition entered in the Record of rights In settlements made on an Upper Indian model it was usual to wind up the settlement enquiries by framing a record of the general rules customs and conditions by which the different sections of the village-communities were bound *inter se* This record had always been regarded as a kind of village charter and thus being, or being intended to be the ultimate standard for the settlement of all main questions of customary right, and the work of the people themselves there had hitherto been no general inclination to question or demur to its provisions But as Courts and lawyers increased, and people looked more sharply to their rights and liabilities it must be expected that cases should occur in which they would not be content simply to accept the advantages of old institutions but would seek out their defects in order to profit by them, and it must be admitted that the administration papers, drawn as they often were by unskilled hands, and dealing in a somewhat general manner with questions purporting to affect not only numerous executants with various and perhaps conflicting interests, but also others who were not parties to the execution of these papers at all, were somewhat cumbrous instruments to employ in the close combats of the Courts In one recent instance in which the welfare of several adjoining villages depended on obtaining additional land for extending an irrigation tank, a single recalcitrant proprietor found himself able to defy both his neighbours and the Revenue-authorities by taking advantage of the technical insufficiency of the administration papers, and other cases had also occurred, involving, for example, the rights of resident cultivators to forest produce, or to sites for their houses, in

which the settlement provisions were found so difficult to enforce as to be practically inoperative As the general feeling of the village population was still strongly in favour of those records, the mere knowledge that they could, if necessary, be enforced, subject to the usual checks by way of appeal and revision, would probably be quite sufficient to counteract mere isolated attempts to break them down, and, should such attempts still be made it would be to the public interest that the questions which they raised should be settled by simple executive intervention, rather than that whole villages should be arrayed against themselves in contests with which civil Courts were so ill constituted to deal

Finally he should explain what, even to many experienced Revenue officials, would appear an unfamiliar designation—the *mukaddam*, whose functions were defined in Chapter XII *Mukaddams* as stated in section 4 of the Act, were the executive headmen of villages and experience had shewn that such functionaries were in many cases much needed Indeed in Chanda and Nimar, which were among the last settled districts of the Central Provinces the Government made the appointment of mukaddams a condition of settlement The tendency of allowing land to be freely sold and mortgaged was to throw it into the hands of town bankers, who regarding it as a commercial speculation or investment only, did not take further interest in it, and the application of our comparatively advanced theories of land tenure to the quasi proprietary holdings of India had been to relax the feudal feeling which attached important duties to the possession of the soil, and so to weaken materially the executive administration of the country No abrupt reversal of this policy would now be desirable even if it were possible, but we might reasonably insist in the cause of good government no less than in the more particular interests of the State as part proprietor of the soil that the executive authorities should have the means of communicating directly with each village community through a single responsible and representative headman and that large groups of villages should not be left by absentee landlords absolutely without any responsible manager or influential agent to whom the inhabitants might look for advice and aid in their corporate dealings with the State, no less than in other matters

The Bill further in section 142 enumerated some of the duties which would devolve on mukaddams as representing village proprietary bodies and as would be seen they were all of a kind which might reasonably be required from Indian landholders for their own advantage, or as part of the obligation by which they held lands from the State In the former class might be mentioned village sanitation and the guardianship of common rights, in the latter might be instanced the preservation of public survey marks and co operation in the collection of the Government dues

The Hon ble MR GRANT was not aware of any other points in the Bill which needed particular comment or explanation Experienced Revenue officers would no doubt recognise in most portions of it the familiar rules and principles of the Thomasonian system But it was due to Mr Jones, the author of the Bills to say that in no case had he allowed his respect for these time honoured models to betray him into blind adoption of them irrespectively of their adaptation to local circumstances Each detail of the Bill had been independently and thoroughly examined by him, and where the practice of the distinguished North Western Revenue school had been followed it was only because it was not found possible to improve upon it In form, certainly there had been considerable changes in, and he ventured to say ameliorations of the original drafts and for these we were indebted to the high skill and patient labour of the Legislative Department which, without sacrificing the completeness and thoroughness of the original treatment, had reduced both Bills to a shape in which he hoped they would prove clear and simple as well as sound, guides to Revenue officers of all classes in the Central Provinces

ADMINISTRATOR GENERAL'S BILL

The Hon'ble MR STOKES moved for leave to introduce a Bill to exempt Pársís from certain provisions of the Administrator General's Act, 1874 He said that, as the law now stood, all the provisions of that Act applied to Pársís in the same manner as to their European and Christian fellow subjects On the

other hand, Hindus, Muhammadans and Buddhists were expressly exempted from some of the most important provisions of the Act Those provisions would be found in sections 16 17, 36 and 64 So far as could be gathered from various memorials and petitions which had been received, the Pársís were almost unanimous in their desire to be exempted from the Act in the same manner and to the same extent as Hindus, Muhammadans and Buddhists The grounds which they urged were two First of all they said that there was no necessity for the Act in their case, and, secondly, they alleged that its provisions, when applied to them, were oppressive, burdensome and repugnant to their social and religious customs As regards the former ground, there was no doubt that the Act was originally intended to apply chiefly, if not solely, to Europeans and other persons with a foreign domicile residing in India, and that Pársís were distinctly Asiatics with an Indian domicile They always had friends or relations willing to take charge of their property and to administer it properly It was clear therefore, that the Pársís were in a totally different position from those for whom the Act was originally intended, and it would therefore seem that much might be said in favour of their arguments on this ground

The other ground of their contention was not, however, so strong It could hardly be contended that the provisions of the Administrator General's Act were in themselves oppressive, but section 64, for instance required the District Judge in certain cases to take charge of the property of deceased Pársís, and looking to the repugnance which the Pársís like all Orientals had to any intervention on the part of the Courts in their private family affairs and resources and considering that those affairs and resources would certainly sometimes be exposed if this section were enforced in their case, it might be admitted that the second ground was not altogether without foundation The Bill, by some slight alterations of four or five sections of the Administrator General's Act would put the Pársís in exactly the same position, as regards the Act, as their Hindu, Muhammadan and Buddhist fellow subjects

The Motion was put and agreed to

VACCINATION BILL

The Hon'ble Sayyad Ahmad Khan presented the Report of the Select Committee on the Bill to give power to prohibit inoculation, and to make the vaccination of children compulsory, in certain Municipalities and Cantonments.

The Council adjourned to Friday, the 9th July, 1880

Simla, The 2nd July, 1880

D FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 6TH JULY 1880

GENERAL REMARKS —General rain, for the most part moderate and fairly well distributed, has fallen during the week It has been heavy in parts of Bombay the Central Provinces and in Burma In the Central Provinces a break is required where the fall was excessive, and in Burma floods have occurred and fears were entertained of embankments being breached More rain is required in a few of the Deccan districts

Autumn sowings are proceeding satisfactorily, and agricultural prospects and the public health continue favourable

Presidency or Province and District.	Rainfall for week preceding	State of agricultural prospects
Madras— (July 7th)—		
Bellary	1 11 (average of fifteen stations)	*Ragi* 27 1 standing crops generally good paddy harvested in one taluk yield average
Kurnool	1 50 (average of nine stations)	*Ragi* 33 0
Ganjam	4 43 (average of fifteen stations)	*Ragi* 32 32
Kistna	1 30 (average of eleven stations)	*Ragi* 33 09
Chingleput (Madras)	1·04 (average of eight stations)	*Ragi* 21 44 crops generally good
Coimbatore	47 (average of fourteen stations)	*Ragi* 24 03 crops generally fair harvest of *cholum cumboo* and [illegible] outturn av rage
Tanjore	05	*Ragi* 25 04 dry crops generally good
Madura	09 (average of two stations)	*Ragi* 26 0
Malabar	12 14 (average of fourteen stations)	*Ragi* 20 6
Travancore	1 03	
		General Remarks —General prospects tolerably fair
Bombay— (July 7th)—		
Kurrachee	25 at Mirpur Batoro 18 at Jerruck, 02 at Keti	River on 5th 15 feet 5 inches against 15 feet 11 inches on same date last year freshets on 26th and 27th watering extensive areas and reaching town of Jehi slight small pox in Dadu cattle suffering much from want of forage in two talukas
Hyderabad	61 (average of seven talukas)	Small pox in three talukas cattle disease in taluka Sakrand river on 5th 6 inches lower than on same date last year
Ahmedabad	7 71	Sowing operations progressing
Baroda	10·65	Total rainfall 11 72 ploughing and sowing operations progressing prospects believed to be everywhere good public health good prices steady
Surat	5 50	Total rainfall 13 79 sowings progressing
Násik	Good rain in eight talukas	More rain wanted in Niphád Yeola, Nándgaon and Málegaon prices somewhat lower health good
Colaba (Bombay)	15 52	Total rainfall to date 36 05 being 10 36 above average average abnormal temperature 4 cool vapour in air normal abnormal wind light and variable except on 1st, when it was strong from south west
Poona	Good rain in Junnar, Khed, Máwal and Haveli maximum at Mawal 8 0 minimum at Indapur 3	*Bajri* sowing commenced in Sirur and Purandhar rain wanted in Bhimthadi and Indapur
Ahmednagar	1 48 fall general maximum at Akola, 2 73 minimum at Kurjat 13	*Kharif* sowing commenced in parts of Nagar and Parner public health good.
Sholapur	86	Total rainfall 5 34 *kharif* sowing progressing rain urgently wanted in some parts public health good
Dharwar	3 40	Rice crops good sowing of *jowari* partially commenced fever in [illegible] and cattle-disease in one taluka
Kanara	10·78 at Karwar maximum at Sirsi 14 17 minimum at Halial, 6 62	Total rainfall 41 63 transplanting of rice and weeding progressing fever and cattle-disease prevalent
Rajkot	5 80	Total rainfall 7 85 sowing progressing health good
		General Remarks —Good rain everywhere except in parts of Sholapur Poona, and Nasik sowing operations progressing and prospects good fever in Southern Mahratta Country

Presidency or Province and District	Rainfall for week preceding	State of agricultural prospects
Bengal— (July 7th)—		
Chittagong	3 34	Weather seasonable with fine intervals ploughing and sowing going on rapidly cholera in some places cattle disease not yet ceased
Dacca	4 2	Harvesting of early rice nearly completed prospects of late rice and sugarcane good public health good
24 Pergunnahs (Calcutta)	2 24 excessive rain at Barripore and Bus seerhat	Rice and jute crops promising transplanting of late rice continues rivers full fever and cattle disease reported from Barripore
Moorshedabad	1 04 rain general	Prospects of crops good winter paddy sowing still going on public health generally good
Rajshahye	3 26	Standing crops doing well public health good
Burdwan	2 20	Crops good transplanting of late rice going on public health good
Rungpore	1 58	Weather rainy prospects of crops favourable public health generally good
Bhágalpur	1 14	Crop prospects favourable health good
Purneah	1 68	Prospects of crops good autumn crops coming on well winter sowings complete floods subsided Ganges gradually rising health fair
Patna	1 45	Sowing of autumn crops and paddy going on
Durbhunga	6·29	Sowing of autumn crops nearly complete paddy being sown and transplanted indigo manufacture in progress prices falling some fever at head quarters
Hazaribágh	1 76	Weather seasonable prospects of all sorts of crops now on ground good food grains cheap health of district good
Cuttack		Rivers in flood embankments breached in places and young crops destroyed prospects in north more favourable cases of small pox and cholera still reported
		General Remarks Weather during week seasonable and most favourable for growing crops and for cultivation in Jalpaiguri and Cooch Behar prospects improved sowing and transplanting in full progress early rice jute and sugarcane thriving well early rice being harvested in Dacca Furreedpore and Bogra indigo manufacture progressing in Cuttack crops in places destroyed by floods
N W P and Oudh—		
Benares (July 6th)	1 5 and 1 8 all over the district	Rains have now set in generally ploughing has commenced health good prices stationary
Allahabad ( )	Average 1 2 fairly general	Ploughing proceeding everywhere sowings save of rice commenced cholera deaths 80 but disease not spread since last week city and stations very healthy small millet harvest average mangoes a quarter crop mulwa full crop wheat $20\frac{1}{16}$ seers, coarse husked rice $19\frac{4}{16}$ seers unhusked rice $27\frac{1}{2}$ seers
Gorakhpur	1 0 slight local showers	Sky cloudy wind east *kharif* sowing progressing favourably health and prospects good
Jhansi (July 8th)	2 9	Ploughing commenced prices stationary much less fever and less cattle disease
Agra (6th)	Average 1 4	*Kharif* sowings have commenced health improving
Bareilly (7th)	4 3 at head quarters	Prospects good agricultural operations going on health fair prices steady
Meerut („)	Plentiful and incessant rain	Weather cool wind variable fever abating prices falling
Kumaun (6th)	Good seasonable rain	Weather most favourable for crops wind easterly fever abating prices unchanged
Lucknow (7th)	4 at Sadr 2 at out-tahsils	Weather cloudy ploughing and sowing of *kharif* commenced health fair a few cases of cholera in district and city
Partabgarh (5th)	Slight rain in greater part of the district since night of the 1st 4 at Kunda 4 at Patti and 8 at Partabgarh	In part sufficient rain has fallen for commencement of agricultural operations but elsewhere insufficient
Sitapur („ 7th)	[illegible]	Sowings commenced prospects good still a little cholera, but general health good prices stationary
Fyzabad („)	[illegible] to 9 throughout the district	*Kharif* sowing begun

POST OFFICE

NOTIFICATIONS

Simla the 24th June 1880

NOTICE TO THE PUBLIC

With effect from the 1st August 1880 the rates of commission charged on the realization of the value of parcels and registered book packets sent under the value payable system will be reduced to half what they now are and thereby assimulated to the rates of commission charged on the issue of money orders The new rates will be as follows —

		Rs	
On sums not exceeding Rs	10	0	2
	25	0	4
	50	0	8
	75	0	12
	100	1	0
	12[illegible]	1	[illegible]
	150	1	8

and 4 annas for every additional Rs 25 or fraction thereof

The value of the contents of a value payable article will be limited to Rs 600

Value payable articles may be addressed only to Post Offices which are Money Order Offices and they may be posted only in Post Offices which are Money Order Offices The former restriction limiting the posting of value payable articles in Disbursing Post Offices is superseded

The amount realized from the addressees of value payable articles less the commission chargeable thereon will be paid to the senders by means of money orders

When a value payable article is presented at a Post Office it must be accompanied by a memorandum prepared by the sender in the prescribed form printed copies of which may be obtained from the Post Office on application

REVENUE REPORT OF THE IRRIGATION DEPARTMENT IN SIND FOR 1878 79

Nos 1(2)(8 I dated Simla 11th June 1880

RESOLUTION—By the Government of India Public Works Department

Read—

Letter No 38W I —123, dated 2nd March 1880, from the Secretary to the Government of Bombay Public Works Department forwarding the Annual Revenue Report of the Irrigation Department, Sind for 1878-79 and the Resolution issued on it by the Government of Bombay

OBSERVATIONS —This report was received on the 29th March, a month earlier than the report for the previous year, but still four and a half months after the prescribed date

2 The year under review was a very favorable one for irrigation and notwithstanding the occurrence of disastrous floods, the revenue obtained was very largely in excess of the average for the three preceding years

3 The Superintending Engineer s report contains much interesting information on points noticed in the Resolution on the previous report and is altogether the most complete report on the Sind Canals yet submitted The returns of the area irrigated, however it is stated, are still unreliable but it is satisfactory to observe that this matter is receiving attention from the Government of Bombay and the local officers, so that there is a fair prospect of the exhibition of correct results ere long, up to the present time the figures have been at best but approximations With reference to paragraphs 11 and 12 of the Bombay Government s Resolution, the Government of India would be glad to hear the result of the reference regarding the financial prospects of the Desert and Begári canals

4 The area stated to have been irrigated during the year was 2,016,089 acres, of which 1,885,315 acres were Government lands, and 130 774 acres

jaghir In the 3rd paragraph of the Superintending Engineer's report, the mode of ascertaining the area of the irrigated lands is described, but the agency by which the measurement is made is not mentioned The Government of India desires information on this point

5 The total direct expenditure during the year is reported to have been Rs 16 55 537 including the charges in the Civil Department for revenue collection These latter charges appear to have been erroneously included under "direct" expenditure in the report The accompanying statement of financial results has been prepared from the booked accounts in the Accountant General's Office It contains the figures for nine canal systems for which Capital and Revenue accounts are kept The Capital accounts of the Pinyari canal in the Kurrachee Collectorate and those of the Kusmore and Kasimpur bunds which appeared in the two previous statements have been discontinued under the orders of the Government of India On the nine works in progress for which Capital and Revenue accounts are still kept, the expenditure during the year was—

	Rs
On Capital account	2 28,818
On Revenue account	5 61 573
TOTAL	7 90 391

Deducting this amount from the aggregate expenditure for the year (Rs 16 55 537), the outlay on all the other canals amounted to Rs 8,65,146

6 The area irrigated by these nine works during the year under review was approximately 1 062 692 acres, exclusive of the irrigation of jaghir lands on the last four systems in the statement which is not shown separately for these canals in the report The working expenses thus appear to have been about Re 0 53 per acre irrigated against Re 0 60 in the previous year

7 The attention of the Government of Bombay is invited to the 8th paragraph of the Resolution on the previous year's report The separate statements of the working expenses and the area irrigated during the year for each separate canal or system of canals, which were called for, are necessary for a proper comparison of results

8 The figures of the Capital and Revenue accounts embodied in the report agree with those in the Examiner's Appropriation accounts but differ from those recorded in the Finance and Revenue accounts of the Government of India The discrepancies are apparently due to re adjustments by the Government of Bombay of expenditure from ordinary grants The Examiner should be directed in future to report what adjustments have been carried out during the year under the orders of the Local Government

9 It appears from the report that there are 163 canals, each having a separate head on the river Indus under Government management in Sind, aggregating 5 643 miles in length Of these, 12 canals, aggregating 1,287 miles in length are on the right bank of the river, and 151 canals aggregating 4,356 miles in length are on the left bank The river is embanked for 174 miles on its right bank and for 115 miles on the left the inland bunds chiefly in connection with the Eastern Nara system of canals, aggregate 135 miles in length In future reports details of any variations there may be in the lengths of canals or bunds should be appended for information

10 According to the booked accounts the accumulated balances of revenue at credit of these canals after deducting working expenses were increased during the year from Rs 88 62,369 to Rs 94,57,444, and deducting interest charges from Rs 47 63 158 to Rs 19,98 269

11 The calculations of duty of water were vitiated by floods except in the Rohri and Fuleli Divisions The figures which are given for these latter divisions show very poor results and appear on comparison to be more or less unreliable On the Nasrat canal where more than half the irrigation is by natural flow, the duty is shown as 61 6 acres per cubic foot per second, while on the Rhein where less than 7 per cent is natural flow, the duty is shown at 19 acres only, the proportion of rice cultivation being actually less in the

latter case The importance of carrying on these observations with the utmost care and accuracy must not be overlooked

12 The floods in the year under review appear to have been greater in volume than any yet recorded The gauge at Kotri registered the same height as in the great flood of 1874, but the spill above Rohri which flooded the Eastern Nára districts, it is said to an extent unsurpassed since 1826, was not nearly so extensive in that year The bunds above Sukkur on the right bank which were extensively breached in the year under review, stood well in the following season, 1879, owing mainly to the strengthening measures adopted and the careful supervision during the flood season

13 The attention of the Bombay Government is invited to paragraph 14 of the Resolution on the previous year's report The explanations with reference to the Secretary of State's despatch No 9, dated 27th February 1879, to the Bombay Government, are still awaited by the Government of India

14 The report under review is not accompanied by an index map, the Government of India trusts that no future report may be submitted incomplete in this respect, the omission has been noticed already with reference to previous reports

15 The Government of India endorses the commendation of the Government of Bombay of the care with which the report has been prepared

---

ORDER —Ordered that a copy of this Resolution be forwarded to the Government of Bombay in the Public Works Department, Irrigation Branch for information and necessary attention

Also that a copy of this Resolution, of the Report, and of the Resolution by the Government of Bombay be forwarded for information to the Governments of Madras Bengal North Western Provinces and Oudh, and the Punjab, in the Public Works Department Irrigation Branch for information

Also that a copy of this Resolution, of the Report and of the Resolution by the Government of Bombay be forwarded to the Department of Finance and Commerce, and to the Home, Revenue and Agricultural Department, for information and to the Publisher of the *Gazette of India* for publication in the Gazette Supplement

ANNUAL REVENUE REPORT OF THE IRRIGATION DEPARTMENT IN SIND FOR 1878 79

1 The inundation of 1878 was the best on record, and though during the month of August it was not as high as that of 1876, yet it shows a steady curve from the 10th of June to the 20th September, which is about 2 feet above what is known as the curve of a good inundation From the 14th July to the 28th August, with the exception of a slight depression of a few inches between the 22nd July and the 1st August, it never read less on the Bukkur gauge than 15 feet and from the 14th June to the 14th September which is the longest period required for the kharif, it never read less than 12 feet The curve in fact, is that of the best inundation known

2 Unfortunately, however, the inundation was a most disastrous one for the country An unusually heavy fall of rain occurred in July and August, and the hill floods swept across the Desert Canal and the western half of the Shikarpur Collectorate then the Kusmore Bund was breached, and the embankments on the Sind Canal, between the head and Abad Mehlani were swept away, and the combined floods passed down to the south completely submerging the whole of the country from Kusmore down to Sehwan The floods on the left bank north of Rohri, were unprecedentedly heavy and the Eastern Nara Districts were visited by the heaviest flood which has occurred since the one of 1826 the whole of the kharif cultivation on the Mithrau and Thar Canals was submerged, and the flood passing on to the south seriously threatened the town of Baga Tanda, and submerged the greater portion of the crops in the Badina Taluka The Hajipur Bund on the left bank, about 15 miles south of Hyderabad was topped and swept away and the greater part of the country between the Fulali and the Indus down to the sea was under water

3 Notwithstanding this, the returns show an increase of 443 431 acres of cultivation and an increase of Rs 5,26 767 net consolidated revenue over the average of the three previous years, as the following figures show —

		Net consolidated Revenue	Acres
		R	
1875 76		26 58 076	1 352 11[illegible]
1876 77		26 78 [illegible]03	1 706 180
1877 78		29 40 031	1 267 054
	Average	27 58 966	1 441 881
1878-79		32 85 733	1 885 31[illegible]
	Increase	5 26 767	443 431

The increased area of cultivation is principally on account of the increase of rabi as will be seen from the following figures —

		Kharif	Rabi	Jagir	Total	Remarks
1875 76		1 100 985	251 13[illegible]	191 398	1 543 517	
1876 77		969 673	436 8[illegible]7	136 030	1 812 510	Flood
1877 78		1 [illegible] 92	201 [illegible]52	119 269	1 386 313	
	Average	1 145 250	296 [illegible]31	148 896	1 590 780	
1878 79		1 333 546	[illegible] 769	130 774	2 016 089	Flood
	Difference	+ 188 296	+ [illegible]135	— 18 122	+ 425 309	

and this increase is in all probability due to the flood Not much reliance can however be placed upon the figures for the area of cultivation is not properly recorded as has been explained in former reports In the frontier districts the area of cultivation is ascertained partly by measurement and partly by examination of survey numbers and the figures are for the revenue year, and show the kharif of 1878 and the rabi of season 1879 In settled talukas of the Collectorates the area in assessed numbers is obtained by approximation after inspection of the numbers and in the unsettled talukas, the area irrigated by wheel is calculated at so many acres per wheel that irrigated by natural flow is measured and that on leased lands by approximation after inspection of the fields When the revised settlement, which is now being introduced in several talukas, comes into force generally, more accurate returns of the cultivation and description of crops irrigated may in all probability be expected, and better returns will be undoubtedly shown

4 The acreage and net consolidated revenue of the province, that is the consolidated revenue less remissions, is shown in Table I for the year under review, and for the three previous years The increase as stated before is Rs 5 26,767 Table II shows the area of cultivation, both on Government and Jaghir land, the consolidated revenue, the collections on account of water rate, and miscellaneous collections from plantations, fisheries, rent of build

ings &c., the remissions and the net canal revenue, as contrasted with the figures for the three previous years. The results are —

		Acres
Area of Government land		+ 443 431
Jaghir		— 18 122
		Rs
Consolidated revenue		+6 32 848
Hakaba		— 11 906
Miscellaneous		— 58 207
Remissions		+1 06 081
	Net Canal Revenue	+ 4,56 594

The falling off in the area of Jághír lands and in Hakaba is due to Jághírs lapsing on the death of the owners and this area and Hakaba will continue to decrease yearly up to a certain limit. The decrease in miscellaneous collections appears to come principally from the Hyderabad Collectorate the collections being only Rs 6 690 in 1878 79, while in 1876 77 they were Rs 1 18,916. The net canal revenue is obtained by adding the consolidated revenue, the Hakaba, and miscellaneous, and deducting the remissions.

5 The remissions are higher than the average of the three previous years by Rs 1,06 081 but are not so high as they were in 1874 75 and 1876 77 notwithstanding that the flood of 1878 was higher and more destructive than those of 1874 and 1876. The remissions for the 6 years 1873 74 to 1878 79, being for 3 years of flood and for 3 ordinary inundations, are shown in the following table for each district and collectorate separately —

	Frontier	Shikarpur	Thar and Parkar	Hyderabad	Kurrachee	Total	Remarks
	Rs	Rs	Rs	Rs	Rs	Rs	
1873 74	3 964	73 832	2 943	16 361	1 98 107	2 95 19[illegible]	
1874 75	8 317	1 89 901	1 15 377	15 387	71 176	4 00 188	Flood
1875 76	17 307	[illegible]2 617	14 937	12 087	98 030	1 [illegible] 978	
1876-77	10 576	2 25 213	56 356	[illegible] 152	98 109	4 02 486	Flood
1877 78	8 301	20 659	7 259	25 304	41 818	1 09 101	
1878 79	893	98 [illegible]	1 08 987	84 692	48 205	3 41 703	Flood
					Average Rs	2 90 659	

The large remissions given in the Hyderabad Collectorate were due to the heavy flood which passed down the Eastern Nara. As a rule in this Collectorate they are generally light and are only given on account of such accidents as blight, locusts, &c. In the other Collectorates the remissions are nearly always due to floods.

6 In the following table are shown the areas assessed under the settlement the areas culturable and unarable the total areas and the areas cultivated in 1878 79 for the whole province by Collectorates separately —

Collectorate and Deputy Collectorate		Total Area	Area assessed under the Settlement	Culturable Area	Unarable Area	Area cultivated in 1878 79

	Grand Total	21 814 380	2 743 694	5 608 662	13 462 024	1 924 243
					Khelat Territory	91 846
					Total Area cultivated in 1878 79	2 016 089

* Note — The Begári Division includes the whole of the Frontier Districts. The Sukkur Canal Division includes the Deputy Collectorates of Rohri and Sukkur and Shikárpur. The Rohri Canal Division includes the Deputy Collectorates of Naushahro and Hala and the Fulali Division those of the Tanda and Hyderabad.

The area shown as unarable in the Rohri District and in Kipra and Umarkot includes a portion of the sandy desert the Kohistan has not been included in the area of the Kurrachee Collectorate, though a portion of the hills in the Jerruck District has been included The areas marked × are the cultivated areas, as the settlement has not been introduced in the districts The whole area may be taken as 34,100 square miles and the culturable and cultivated area 8,352,361 acres the area cultivated is 23 04 per cent of this The whole of the area shown as cultivated is irrigated by canals The consolidated canal revenue for each district or collectorate was for 1878 79 —

	Rs
Frontier Upper Sind	2 30 523
Shikárpur	12 90 328
Thar and Parkar	4 12 923
Hyderabad	11 73 400
Kurrachee	5 20 253
TOTAL	36 27 436

7 The land and irrigation shares of the net consolidated revenue is shown in Table VI The total water share, including Hakaba, is Rs 29 62 552, and the land share is Rs 3,28 571 The figures in this statement do not agree with the figures shown by the Examiner in his general revenue accounts of canals though they agree with the figures shown by him in the separate revenue accounts of the works for which capital and revenue accounts are kept In the former he has taken the whole of the average revenue before improvements were made as the share of land revenue, which is manifestly incorrect In the statement 90 per cent of the net consolidated revenue has been taken as the irrigation share and 10 per cent as the water share

8 The total expenditure on canals and bunds in the province during the year was Rs 16,55,537 as shown in Table IV The outlay on works was Rs 14 01 448 and the cost of revenue collection Rs 2,54 089 Of the amounts expended on works Rs 2,27 753 were on account of capital and the remainder, Rs 11 73 695 was on account of revenue an expenditure of Rs 1,92,472 was incurred on the Kusmore Bund in the construction of a new outer loop line, and on strengthening and repairing the old line the whole of this amount was contributed from Railway funds The amount expended on capital and revenue account are shown below —

		Capital	Revenue	Cost of Revenue Collection
		Rs	Rs	Rs
Frontier U S	Begari Canal	32 184	76 073	9 519
	Desert do	81 069	17 421	8 927
	Kusmore Bund		1 92 472	
Shikarpur	Sukkur Canal	19 150	66 512	3 264
	Canals in S C Division		1 43 194	23 017
	Ghar Division	7 017	2 66 358	62 788
Thar and Parkar	Eastern Nara	85 528	1 29 163	24 113
Hyderabad	Rohri Canal Division		1 96 136	62 052
	Fulali Division	2 775	1 15 662	15 819
Kurrachee	Kurrachee Collectorate Canals		2 24 093	43 960
	TOTAL	2 27 753	11 27 784	2 54 089
			2 27 753	
	TOTAL Rs		16 55 537	

The cost of revenue collection shown above is included in the column of revenue expenditure Omitting the Kusmore Bund, the expenditure on which was incurred from Railway funds, the percentage of establishment on expenditure for new works was 28 16 and for repairs and maintenance 37 77 the percentage of establishment on the whole outlay was 34 57

9 Table V shows the net revenue, the expenditure the percentage of expenditure on revenue, and the cost of maintenance per acre it also shows the number of miles of canals and bunds in each district or division, and the cost of clearance in cubic feet per rupee The percentage of expenditure on revenue for the whole province is 24 52 and the cost of maintenance per acre Re 41, which is reasonable The cost of maintenance is highest on the Sukkur Canal and lowest on the Desert Canal The total mileage of canals is 5,633 and of bunds 374 The canal mileage includes all the branches which are cleared and maintained at Government expenses The diminution in length of canals, noted in paragraph 4 of Government of India Resolution No 160 661 dated 3rd July 1879, is due to the fact of several branch canals and small canals from the river having been given up, as the revenue was insufficient to cover the cost of clearance In the Kurrachee Collectorate 185 miles of small canals have been abandoned from time to time since 1873 74, and several new branches have been taken over in the Ghar Division It is believed that the mileage now entered is as nearly correct as possible There may, however in future years be some variations as the river has cut into the Western Nara in two places, and the present head is now more than

18 miles as the crow flies lower down than it was a few years ago the Wahooiwah has also been cut into in two places and unless the river forms fresh channels, the lengths of these two canals will have to be entered differently in future statements to what they are in this

10 The capital expenditure on all works, for which capital accounts are kept up to the end of 1878 79, is shown below, as well as the balance of revenue or balance of charges of each work —

	Capital Expenditure Rs	Balance of Revenue Rs	Balance of Charge Rs
Begari Canal	11 54 152		18 914
Desert do	6 60 288	54,281	
Sukkur do	12 81 117		79 413
Eastern Nára Works	33 2 891	40 541	
Char Canal	4 35 039	1 39 983	
Abhar Kacheri	23 917	7 819	
Great Mairak	1 75 748	38 801	
Sarfraz	1 21 111		12 304
Fulali	11 20 870	8 325	
	83 12 783	3 19 783	1 10 661
Eastern Delta Survey	21 060	Balance of Revenue	2 39 122
Rohri and Hyderabad Canal Survey	91 801		3 49 783
Jambrao Canal Survey	44 915		
TOTAL Rs	84 71 159		

Had the proper revenue been levied on the cultivation in the Frontier Districts on the Begári and Desert Canals, there would have been, as will be explained further on in the body of the report, a balance of revenue on the former of Rs 97 273 instead of a deficit of Rs 18,914 and on the latter a balance of revenue of Rs 1,30,323 instead of a balance of only Rs 54 281 The balance of revenue of the works for the whole province would then have been Rs 4,31,351 instead of only Rs 2,39 122

11 The areas of kharif and rabi for each separate canal or system of canals are shown in Table VII It has not been considered necessary to give the areas for previous years as in the first place the areas are not stated with sufficient accuracy to make the comparison of any use and in the next place the greater part of the kharif was destroyed by floods and the rabi area is due entirely to these, and is not except in few instances due to the canals

12 The table showing the duty performed by a cubic foot of water during the year only includes the canals in the Rohri Canal Division as the whole of the other canals were swept from end to end by the floods during the months of August and September, and calculations would be worthless

FRONTIER DISTRICTS UPPER SIND

13 These districts are irrigated by two canals the Begari and Desert Canal Formerly there were a few other small canals the Bakshaliwah Nurwah, Unharwah and a Zemindar's canal near Dari but they have all been closed by the construction of the Kusmore Bund, with the exception of the Nurwah, and the land on them has been rendered useless for kharif cultivation owing to the floods A sluice is now being built at the head of the canal near Dari and the other sluices will be built next year the surveys of the Bakshaliwah and Nurwah are in hand and when all these canals are taken over and improved and extended, and the land recovers there will be a very fair area of cultivation on them

14 The length of the Begari is 76 miles and of the branches, the Sonwah, Mirzawah and Nurwah, 20, 10 and 19 miles respectively the length of the two tail branches, the Edenwah and Sir Canal, are 18 and 15 miles The total mileage is 118 On the Begari there are bed stones 660 feet apart from the 37th mile to the tail at Khairagarh, 39 miles in all on the Sonwah, Mirzawah and Nurwah there are bed stones 200 feet apart in 6 10, and 19 miles respectively in the Edenwah and Sir Canal there are no bed stones Out of the total length of 148 miles bed stones have been fixed in 71

15 The assessed area on the Begári is 366 110 acres, made up of 301,601 acres in the Frontier Districts, 12,902 in the Shikárpur Collectorate and 51 607 in Khilat Territory The area cultivated in 1878 79, and the consolidated revenue was as below —

	Kharif Acres	Revenue Rs	Rabi Acres	Revenue Rs
Frontier Districts	54 546	90 156	29 569	563
Khilat Territory	23 812	21 174	35 110	
Shikárpur Collectorate	5 089	10 125	4 391	9 596
TOTAL	83 176	1 21 454	69 070	10 159
	69 070	10 159		
TOTAL ACRES AND CONSOLIDATED REVENUE	1 52 246	1 31 613		

In addition to this there were 4 390 acres of Jaghir kharif and 34 acres of Jaghir rabi the assessed water rate of which was Rs 721, the actual realization being Rs 442, as shown in Table III The miscellaneous collections were Rs 872, of which Rs 38 were on account of

plantations, and Rs 834 on account of fisheries the remissions were Rs 899 of which Rs 687 were for kharif and Rs 212 for rabi, the net canal revenue was, therefore Rs 1,32 028 and the net consolidated revenue Rs 1,30 714 The land share of this last was Rs 13,071 and the water share Rs 1,17 643 the total water share including Hakaba was Rs 1 18,005

16 The revenue arrangements in the Frontier Districts are not satisfactory, as the figures in the last paragraph plainly show The assessment on 29 569 acres of rabi in the Frontier Districts is entered as only Rs 563, and in Khilat Territory the assessment on 35,110 acres of rabi is nil The reason of this is apparently that under the terms of the lease a Zemindar pays nothing for any portion of his holding on which he grows a rabi crop he holds a certain area on which the assessment is fixed at 10 annas 8 pies per acre, and he is supposed to cultivate one third of this yearly which would bring the actual assessment up to Rs 2 per acre There appears to be yet no sort of restriction imposed on him and whether he cultivates one third on the whole of his holding he pays exactly the same The figures, as entered in the return, gives the following rates of assessment per acre —

			Revenue R	Rate per Acre R	A	P
Frontier Districts	Acres 84 114	Kharif and Rabi	90 718	1	1	3 07
Khilat Territory	58 952		21 174	0	5	8 96
Shikárpur Collectorate	5 089	Kharif	10 125	1	15	10 00
Do do	4 391	Rabi	9 596	2	3	0 00
Total Acres	152 546	Total Revenue	1 31 613			

The proper revenue should be—

		R
Frontier Districts	Acres 84 114 Kharif and Rabi at Rs 2 per acre	1 68 228
Khilat Territory	58 952 Rs 1	58 952
Shikárpur as above		19 721
	Rs	2 46 901

instead of Rs 1 31 613 the loss of revenue therefore, owing to the false principles of the assessment was Rs 1 15 288

17 The capital expenditure on the Begari Canal during the year was Rs 26 820 on account of works Rs 1 341 on account of establishment direction and Rs 1 023 on account of executive establishment The revenue account after deduction of Rs 50 072 interest at 4½ per cent on capital expenditure of Rs 11 22 111 shows a net deficit of Rs 18,914 But as explained above had the proper assessment been levied on the actual area of cultivation, the balance would have been Rs 97,273 to the credit of the works instead of a deficit of Rs 18 914

18 The revenue charges for the canal were Rs 66 554 exclusive of Rs 9 519 on account of the cost of revenue collection The percentage of expenditure on revenue was therefore 50 11, and the cost of maintenance per acre Re 0 42 The percentage of cost of establishment on works was for capital 20 00 and for revenue 37 80 Of the 148 miles of canal 120 were cleared and repaired at a total cost of Rs 48,297, being at the rate of Rs 402 per mile, the rate for earth work was 226 cubic feet per rupee or Rs 4 41 per 1,000 cubic feet The maintenance charges comprise canal maintenance Rs 34,892 repairs to sluices Rs 2 106 and Abkalani establishment Rs 9,048

19 There are altogether 9 124 trees on the canal which have been planted out by the canal establishment 8 102 ... 1, 67? tali 21 nim, 193 siras 100 bhan and 36 pipal The young trees suffered a good deal from the floods

20 As to the general condition of the canal it may be said that owing to the repeated floods of late years its upper portion has become more like a river than a canal it has been widened out and deepened to much more than its proper size and it will be many years before it can be brought into proper form again The result of the widening and deepening has been a lowering of the water level which prejudicially affects the cultivation on the upper part of the canal Practically there is no cultivation above the 37th mile except on the Sonwah and the Muzawah The construction of the drop gate bridge and regulator at the 19th mile will partially obviate the difficulty and time and silting up with perhaps some small regulating works must do the rest

21 The length of the Desert Canal is 60 miles and at present it has no branches except those which have been dug and are maintained at the expense of the Zemindars Mile stones have been fixed in the first 50 miles of its length, 1 mile apart Only a portion of the canal has, up to the present time, been carried out

22 The assessed area on the canal is 109 160 acres, all in the Kusmore and Thul Táluka The area cultivated in 1878 79 and the consolidated revenue was as under —

	Kharif Acres	Revenue Rupees	Rabi Acres	Revenue Rupees
Frontier Districts	51 509	76 942	16 520	
Khilat Territory	10 479	21 968	22 415	
Total	61 988	98 910	38 935	—
	38 935			
Total Acres and Consolidated Revenue	100 923	98 910		

In addition to this there were 1,942 acres of Jághir* kharif, the assessed water rate of which was Rs 690, the actual realization being Rs 247 The miscellaneous collections were Rs 22 on account of plantations Rs 84 on account of rents of buildings, and Rs 101 on account of fisheries &c —total Rs 207 There were no remissions The net canal revenue was, therefore Rs 99,304 and the net consolidated revenue Rs 98,910 of this last the land share is Rs 9,891, and the water share Rs 89,019, the total water share, including Hakaba is Rs 89,266

23 The remarks which were made in para 16 regarding the revenue of the Begári are applicable too here A cultivated area of 103,923 acres of kharif and rabi only produced a revenue of Rs 98,910 which is at the rate of 15 annas 3 pies per acre, while the proper assessment which was promised before the canal was dug was Rs 2 an acre for land within the frontier and 1 Re per acre for land in the Khilat Territory The true revenue should therefore have been—

Frontier Districts	Acres 71,029	Kharif and Rabi at Rs 2 per acre	Rs 1,42,058
Khilat Territory	32,894	Re 1	32,894
		Total Rs	1,74,952

instead of Rs 98,910 there was therefore a direct loss of revenue of Rs 76,042

24 The capital expenditure on the canal was Rs 62,328 on account of works, Rs 3,117 on account of establishment direction, Rs 14,423 on account of executive establishment and Rs 1,201 on account of tools and plant The revenue account deduction made of Rs 27,662 for interest on capital Rs 6,38,384 at 4½ per cent shows a balance of revenue of Rs 54,281 Had the proper assessment been levied the balance would have been Rs 1,30,323

25 The revenue charges for the year were Rs 6,350 on account of works, and Rs 2,144 on account of establishment—total Rs 8,494, exclusive of Rs 8,927 on account of cost of revenue collection The percentage of expenditure on revenue was 8 55, and the cost of maintenance per acre Re 0 08 The cost of maintenance is very low, owing to the stoppage of all but the most emergent repairs The percentage of cost of establishment on new works was 30 69 and on repairs 33 76 out of the length of 60 miles 20 were cleared and repaired at a cost of Rs 6,350, being at the rate of Rs 317 50 per mile The rate of earth work was 294 cubic feet per rupee, or Rs 3 41 per 1,000 cubic feet The maintenance charges comprise canal maintenance Rs 3,389, and Abkalani establishment Rs 2,961 The accounts of expenditure given by the Executive Engineer do not agree with those furnished by the Examiner, Public Works Accounts The latter have been used in the compilation of the tables

26 Considerable damage was caused to the banks and bed of the canal both by the floods from the hills and the floods through the openings left in the Kusmore Bund which are now however closed The latter swept across the upper portion of the canal from left to right, and the former poured across the canal from right to left nearly the whole way from the 16th to the 50th mile From the 50th mile to the tail the canal was completely submerged by the floods from the breaches in the Kusmore Bund near Tori The river floods will for the future be shut off, but there will always be considerable damage done to the canal in years of rain, and the expenditure after these years will be heavier than usual

27 The expenditure on the Kusmore Bund, 47 miles long, was during the year Rs 1,92,472 The amount expended on the new outer loop line from Dari to the Ghoraghat was Rs 1,11,915 on closing breaches and the flood openings originally left in the bund near Kusmore Rs 31,448 and on repairs to the bund and strengthening between the Ghoraghat and Kusmore Rs 19,118 The cost of the maintenance establishment was Rs 4,956, and of Abkalani establishment kept up during the inundation Rs [illegible]982 The percentage of cost of establishment on new works was 5 57, and on repairs [illegible]8 The whole of the expenditure incurred was contributed by the Railway Department The expenditure on this work has been included in Table IV, but is shown at the foot of the table so as not to affect the general percentages for the province This bund really protects a large portion of the cultivation on the Desert Canal, nearly the whole of the cultivation on the Begári a portion of the cultivation on the Sukkur Canal, the Ghar and Western Nára, and a portion of the cultivation in the Dadu and Sehwan Tálukas of the Kurrachee Collectorate it also protects the line of railway now under construction from Ruk to beyond Jacobabad and portions of the Indus Valley State Railway between Sukkur and Sehwan It is impossible to distribute the outlay over so many works in varying degrees of interest and the work will have for the future to be kept quite separate and distinct in the accounts and several tables of the revenue report

SHIKARPUR COLLECTORATE

1—SUKKUR CANAL DIVISION

28 The canals in this division on the right bank are the Sind Canal with its branches, 67 miles long and the Sukkur Canal with its branches, 127 miles long On the left bank in the Rohri Districts counting from the north comes the Deharwah 45 miles long, the Masuwah 32 miles the Mahário 37 miles the Lundiwah 16 miles, the Dengrowah 16 miles, the Maheswah 13 miles, the Koraiwah 23 miles, and the Jámbwah 7 miles all these are north of Rohri, south of Rohri are the Umarkas and its branch the Arorwah 21 miles, and a small canal

* Note —The Revenue Authorities state that no record is kept of the area cultivated in Jághir but that it is assumed that one third of each Jághir is cultivated and the Hakaba is calculated accordingly

the Mirwah 2 miles long The bunds on the right bank are the Sukkur and Begári Bund 36 miles long, north of Sukkur, the Syudabad Bund 10 miles, and the Jhali Bund 18 miles long south of Sukkur These form a continuation south of the Kusmore Bund, and complete the protection to the canals and railway afforded by it On the left bank are the Naitch Bund 14 miles long in the Mirpur Táluka, which protects an area of 3 000 acres from flood the Ahmed and Mirpur Bunds 12 miles long, the Kasimpur Bund 10 miles long and some smaller bunds round the towns of Ghotki, Panuakil, &c , in all 18 miles long The total mileage of canals in the division, leaving out the Sukkur Canal is 279, and of bunds 118 Bed stones have been fixed at intervals in the Sukkur Canal for a length of 76 miles and have been collected for two of its branches, the Khaira and Bira Kurs In the Sind Canal there are no bed stones In the Masuwah and Jánibwah they have been fixed for the whole length of 32 and 7 miles, and in the Umarkas for a length 5 miles out of 21

29 On the Sukkur Canal the area assessed under the settlement is 127,693 acres the area cultivated in 1878 79 was 84 408 acres of Government land and 56 acres of Jaghir land, and the consolidated revenue was Rs 1,28,613 as shown below—

			Rs.
Kharif	Acres 52 545 at Rs 1 12 3 66 per Acre		92 957
Rabi	31 863	1 1 10 85	35 656
		TOTAL Rs	1 28 613

The assessment of the Jaghir land was Rs 21, and the realization Rs 17 the remissions were Rs 1,441 for kharif, and Rs 4 612 for rabi the net canal revenue was therefore Rs 1 23 959, and the net consolidated revenue Rs 1 22,560, of which Rs 12,256 is the land share, and Rs 1,10,304 the water share The total water share on the canal was Rs 1,10,821

30 The capital expenditure on the canal was Rs 15 734 on account of works Rs 731 on account of establishment direction, Rs 2 448 on account of executive establishment, and Rs 237 on account of tools and plant The revenue account after deduction made of Rs 54,501 on account of interest at 4½ per cent on capital expenditure, Rs 12 43 453 and of Rs 82,389 as the average direct income for 12 years before the first work of improvement came into operation shows a net deficit of Rs 79 443 The revenue charges on account of maintenance and repairs were Rs 50 784 made up of Rs 40 899 for works and Rs 9 885 for establishment and exclusive of Rs 3 264 on account of cost of revenue collection The percentage of expenditure on revenue was 40 97 and the cost of maintenance per acre Re 0 60 The number of miles cleared and repaired was 40 and the cost of clearance 230 cubic feet per rupee, or Rs 4 34 per 1,000 cubic feet at the rate of Rs 590 per mile The maintenance charges include Rs 34,310 for canal maintenance and Rs 5 233 on account of Abkalani establishment As in the case of the Desert Canal the figures given by the Executive Engineer do not agree with those given by the Examiner, and the latter are the ones which have been made use of

31 The returns furnished by the Executive Engineer show the acreage of different crops grown in the kharif season to have been—

	Acres
Rice	18 380
Jowari and Bajri	23 211
Other crops	10 954
TOTAL ACRES	52 545

Assuming these figures to be correct, the rice cultivation was about 35 per cent of the whole area and it is probable that this not far short of the truth, as if we take 30 acres of rice to the cubic foot of discharge and 60 acres of dry crops the required discharge comes out 1,181 cubic feet per second and the actual discharge of the canal during the month of July, when the cultivation was in full swing, and before the floods swept across the canal, was 1,168 cubic feet per second

32 The canal is not a profitable one at present and it is most unlikely that it ever will show anything but a deficit The discharge throughout the kharif season cannot exceed 1,400 cubic feet per second under any circumstances and the most it can irrigate is 29 400 acres of rice and 25,200 acres of dry crops Supposing that under the revised settlement, which is about to come into force, the assessment on rice is raised to Rs 3 an acre on an average, and that the average rate for dry crops is Rs 2 this would give a kharif revenue of Rs 1,37,600, and if by any possibility a rabi supply can be ensured sufficient to irrigate 20 000 acres at Re 1 4 0, the total assessment will still be only Rs 1,62,000 or 34 000 more than in 1878 79, and the deficit will still be Rs 45 000 An average of Rs 82,389 has to be deducted from the present revenue, and to make the canal clear this, pay its working expenses and interest on capital at 4½ per cent it must give Rs 79 443 more than it did in 1878-79, or a yearly revenue of Rs 2,08,000, and this it never can do with a discharge of only 1,400 cubic feet per second It was sanctioned, however, as an experiment, and the result is not altogether so unsatisfactory as it apears at first sight

33 The acreage assessed under the settlement on the Sind Canal is 81,803 and the area cultivated in 1878 79 was 61 675 acres of Government land, and 1,709 acres of Jághir The kharif and rabi acres and the consolidated revenue were—

		Rs
Kharif	Acres 47 653 at Rs 2 11-0 27 per acre	1 28 134
Rabi	14,022 at Re 0-15 2 34	13 317
	TOTAL Rs	1 41 451

The Hakaba assessed was Rs 639 and that realized Rs 455 the miscellaneous collections were Rs 265 and the remission Rs 265 the net canal revenue was therefore Rs 1 34 288, and the net consolidated revenue Rs 1,33,568 the land share of this being Rs 13 357, and the water share Rs 1,20 211 The total water share was Rs 1 20 666 The expenditure during the year on regulating sluice at the head was Rs 12 016 and on establishment Rs 2 875 the cost of maintenance and repairs was Rs 7 324 including Rs 1 812 for establishment the percentage of expenditure on revenue was only 5 45, and the cost of maintenance per acre Re 0 11

34 The area assessed under the settlement on the canals in the Rohri Districts is 61,524 acres, and the area cultivated in 1878 79 was 49 735 acres of Government land and 1,072 acres of Jaghír The kharif and rabi areas and the consolidated revenue were—

		Rs
Kharif	Acres 35 277 at Rs 2 12 8 67 per acre	98 668
Rabi	11 458 at Re 1 12 6 07	25 759
	TOTAL Rs	1 24 427

The Hakaba realizations were Rs 278 the miscellaneous collections Rs 759 and the remissions Rs 8,971 the net canal revenue was Rs 1 16 523 and the net consolidated revenue Rs 1,15 456 the land share was Rs 11,545 and the water share, including Hakaba Rs 1 04,189 The cost of maintenance was Rs 13 714 the percentage of expenditure on revenue 11 80, and the cost of maintenance per acre Re 0 27 The percentage of expenditure on revenue for the Naitch Bund was 15 75 and the cost of maintenance per acre Re 0 33 The expenditure on all the canals and bunds in this division, excluding the Sukkur Canal, was as in the following table —

		New Works		Repairs		Total		Total
		Works	Establishment	Works	Establishment	Works	Establishment	
		Rs	Rs	Rs	Rs	Rs	Rs	Rs
Sind Canal		12 016	2 879	5 512	1 812	17 528	4 691	22 219
Canals in Rohri Districts		5 357	1 283	10 823	2 891	16 180	4 174	20 354
Right Bank	Syudabad and Jhali Bund	9 637	2 309			9 637	2 309	11 946
	Sukkur Begari Bund	17 760	4 255	28 954	7 734	46 714	11 989	58 703

TOTAL BUNDS RIGHT BANK		27 397	6 564	28 954	7 734	56 351	14 298	70 649
TOTAL BUNDS LEFT BANK		2 427	582	3 114	832	5 541	1 414	6 955
							TOTAL Rs	1 20 177

These figures have been taken from the general revenue account of the division furnished by the Examiner and the establishment charges have been taken out proportionally to the expenditure as in the account only the general charges were shown in lump for all the works together The cost of revenue collection for the works in this division was Rs 23,017

2—GHAR DIVISION

35 This division is watered by three main canals the Ghar with its 17 branches 283 miles long the Nara with its 7 branches 217 miles long and the Wahur (23) with its branch (15) the Máruwah 38 miles long—total 538 miles of canal The bunds in the division are two inland bunds the Kandhari 10 miles long and the Supri 7 miles long and 4 bunds along the river bank the Philu Bund 11 miles long the A bad Hatri Bund 21 miles, the Nángesháh Bund 20 miles and the Rul an Bund 11 miles these last three form a continuous line along the river bank from A bad on the left bank of the Nara south east of Lárkhána, to the boundary of the Kurrachee Collectorate The Kandhári Bund lies 10 miles north of Lárkhána, and runs nearly east and west it prevents the flood which might come through the Jhali Bund from

turning to the south after it crosses the tail of the Nasrat and thereby endangering the town of Larkhana and the cultivation on the low lying lands on the Mirwah and Shah Hamir it protects an area of about 90 square miles The Supri Bund lies about 6 miles west of Mehar and protects that town and also the cultivation on the Kalol from the hill floods The Phulu Bund protects an area of about 32 square miles round Lárkhána and the line of bund from Abád to Rukan protects about 159 square miles in the Labdarya Mehar and Kakar Tálukas There are no bed stones in the Ghar, but there are bench marks fixed at the foot of the spoil at every furlong on the Ghar itself and at every mile on most of its branches In the Nára there are no bed stones but there are some in the two branches, the Kudan and Kakol they have however been for years completely buried in the silt and it is most improbable that they have retained their proper level or would be of any use if found There are no bed stones in the Wahur or its branch the Márui It may be remarked generally, that bed stones would be of but little use in this division as the water is kept throughout at a high level

36 The assessed area on the Ghar is 289 593 acres and the area cultivated in 1878 79 was 219 937 acres of Government land and 5 319 acres of Jaghir The kharif and rabi areas and the consolidated revenue for 1878 79 were—

			Rs
Kharif	Acres 181 043 at Rs 2 7 3 12 per acre		4 30 178
Rabi	38 894 „ R 1 4-2 15		41 115
		TOTAL	4 71 293

The assessed Hakaba on 5 319 acres of Jaghir was Rs 1 706 and the realization Rs 1 111 the miscellaneous collections were Rs 7,831 including Rs 158 on account of plantations and other canal produce and Rs 356 on account of rents of buildings the remissions were Rs 17 606 being Rs 15 380 for kharif and Rs 2 226 for rabi the net canal revenue was Rs 4,90 959 and the net consolidated revenue Rs 4 81 687 the land share of this was Rs 48 169 and the water share Rs 4 33 518 the total water share including Hakaba being Rs 4 34 959 The water share is correctly shown by the Examiner Public Works Accounts, in the revenue account of the Ghar though in the general revenue account of the division he has shown the whole of the average direct income for a year before the first work of improvement came into operation namely Rs 1 31 889 as the land share this is manifestly incorrect

37 The capital expenditure on the Ghar Canal was Rs 7 017 made up of Rs 5 627 for works Rs 851 for establishment direction Rs 1 125 for executive establishment and Rs 14 for tools and plant The revenue account deduction made for all charges and Rs 18 853 interest at 4½ per cent on capital expenditure Rs 4 23 978 shows a balance of revenue of Rs 1 93 953 The revenue charges were Rs 1 07 710 exclusive of Rs 32 518 for cost of revenue collection giving a percentage of 21 91 for the rate of expenditure on revenue and Re 0 48 for the cost of maintenance per acre The establishment charges were 30 per cent of the expenditure on works

38 The assessed area on the Nara and Wahurwah is 259 491 acres and the area cultivated was 176 762 acres of Government land and 6,105 acres of Jaghir The areas of kharif and rabi and the consolidated revenue were—

				Rs
Nara	Kharif	Acres 116 799 at Rs 2 1 11 40 per acre		2 39 727
	Rabi	32 867 „ 2 1 0 30		70 059
Wahurwah	Kharif	21 514 „ 1 10 4 03		3 311
	Rabi	4 551 „ 1 3 1 51		7 224
Abad Hatri Bund	Kharif	950 „ 2 6 11 60		2 314
	Rabi	78 „ 5 3 8 28		408
	TOTAL ACRES	176 76[illegible]	TOTAL Rs	3 21 131

The Hakaba assessment on 6 405 acres of Jaghir on the Nára was Rs 2 267 and the realization was Rs 1 781 the miscellaneous collections were Rs 1,788 of which Rs 192 were for rents of buildings and the remissions were for kharif Rs 47 737 and for rabi Rs 10 152—total Rs 58 189 The net canal revenue was Rs 3 36 511 and the net consolidated revenue Rs 3 32 942 The land share was Rs 33 294 the water share Rs 2 99 648 and the total water share including Hakaba Rs 3 01 429 This agrees with the amount shown by the Examiner in his general revenue account of the division The maintenance charges cannot be separated in the accounts, as they are given in lump sums for each taluka For the three works collectively the maintenance charges were Rs 69 286 not including Rs 30 270 for revenue collection the percentage of expenditure on revenue was 20 59 and the cost of maintenance per acre Re 0 37 For the whole division the percentage of expenditure on revenue was 21 40, and the cost of maintenance per acre Re 0 43, as shown in the Table V

39 The canals in this division are affected more than in any other by a high inundation, and in the year under review they all had a plentiful and seasonable supply For several years past the river has been steadily encroaching on its right bank all down the division and principally at and about the mouths of all the main feeders and on this account the water level in the Ghar (the most important one) has been very considerably raised and its supply largely increased The effect of the same cause on the Nára and Wahur has been on the contrary to lower their water levels as the river has cut into both these feeders at long distances below their mouths thereby causing a considerable loss of head not compensated by the rise consequent on the near approach of the river The supply in both these canals

was however, very fair during the year though in a less favourable inundation they will suffer severely until the cultivators accommodate their cultivation to the altered conditions of supply

40 The raising of the water level of the Ghar from the causes above explained, and from the river having of late years been higher than previously, would have had disastrous consequences had it not been that the people at once changed their cultivation from dry crops to rice and thus utilized the extra supply It is unfortunate that under the present settlement no account is taken of this change of crop consequent on an increased supply of water at a higher level as an increased water rate or a substitution of the assessment on rice for that on dry crops, would have largely increased the revenue of the division The total kharif cultivation on the Ghar is shown to be 183 604 acres and from figures obtained from the Mukhtyarkars it appears that 153 000 acres of this is rice This change in the cultivation which is pretty general all over the division accounts for most of the complaints of want of water which are still received notwithstanding the increased level of supply

41 As the river has now been setting steadily on to the right bank for 9 or 10 years it is more than probable that it will, in the course of the next few years go over to the other bank When this happens the water level in the Ghar and Nara will be considerably lower than it has been for years past and is now, and it will be necessary for the cultivators to revert again to dry crops and wheel cultivation And this change in the water level of the main feeders which may be expected within the next few years should be as far as possible provided for in the revised settlement about to be introduced More account ought to be taken in fixing the assessment, of the kind of crop grown and greater facilities should be given for arriving at the actual area of cultivation On some of the branches of the Ghar such as the Naorang Nurwah Ghat, and Chila the high level supply may be looked upon as permanent to all intents and purposes and on these there is no objection to the assessment being fixed as at present But on all the other canals and branches the supply is liable to periodical changes and fluctuations, which cannot be provided against and on them it is very desirable that the assessment should be based on the area of cultivation and the kind of crop grown

42 Though in the early part of the season the prospects of the most plentiful kharif harvest were very favourable, yet these were in a great measure blighted by the disastrous floods which during August and September swept over the western half of the division, and completely submerged over 110 000 acres of cultivation The revenue derived from the rabi cultivation after the subsidence of the floods more than made up the direct loss to Government, but the Zemindars suffered very heavily, especially those on the Nara in the Mehar and Kakar Tálukas who had cultivated large tracts of land which had been continuously under water since 1871 but which had dried up owing to the unusually low inundation of the previous year The Kusmore and Abul Mehlani floods did not reach the division until September and they added but little to the damage that had already been done by floods from the hills, arising from the unusually heavy rainfall of over 13 inches

THAR AND PARKAR DISTRICTS

EASTERN NARA DIVISION

43 The canals which irrigate this district are the Mithrau Canal and its branches 141 miles long the Dimwah 18 miles long, the Heranwah 3 miles long and the Thar Canal, with its branches, 52 miles long The mileage of bunds is 118 that is 60 miles on the left bank, including 26 miles of protective bund to the Thar Canal and 58 miles on the right bank The bunds on the left bank are nearly all of short lengths and principally across the channels leading into dhands and hollows among the sandhills of the desert On the right bank there is nearly a continuous line from Bakái opposite the head of the Mithrau Canal to Syudjogote about 17 miles below Kipra As the water in the several canals contains hardly any silt and clearance is not required, it has not been considered necessary to fix bed stones except in the Dimwah for 7 miles, and in the Desewah a branch of the Mithrau Canal for 10 miles Bench marks have been fixed at every furlong along the bunds on 86 miles of the Mithrau Canal and 23 of its branches, and on 24 miles of the Thar Canal and 33 miles of its branches

44 The area of land in the Eastern Nára has not been assessed but the culturable area is 712 732 acres, and the area cultivated in 1878 79 was 239 090 acres or about one third of the whole The cultivated area is made up of 237,523 acres of Government land, and 1 567 acres of Jághír, and the areas of kharif and rabi and consolidated revenue were as below —

			Rs
Kharif	Acres 77 733 at Rs	2 2 8 84 per acre	1 68 761
Rabi	159 7	1 8-5 38	2 44 162
		Total Rs	4 12 923

The Hakaba assessment on 1,567 acres was Rs 588, and the realizations Rs 464 the miscellaneous collections were Rs 12,314, including Rs 521 on account of plantations, the rest being principally on account of fisheries, and the remissions were Rs 1,08,987 The net canal revenue was Rs 3,16,714, and the net consolidated revenue, including Hakaba,

Rs 3,03 936 The land share was Rs 30 394 and the water share including Halalba Rs 2,74,006 The remissions exceeded by Rs 69 613 the average of the 5 previous years comprising 2 years of flood and 3 ordinary inundations, but were less by Rs 6,390 than the remissions given on the flood of 1874

45 The capital expenditure on the Eastern Nára works was Rs 85 162 made up of Rs 69,309 for works, Rs 16,219 for establishment with a deduction of Rs 366 on account of tools and plant The revenue charges were Rs 1 05 386 exclusive of Rs 24 143 on account of cost of revenue collection and the balance of revenue to the credit of the works after paying all charges for maintenance and Rs 1,42 825 for interest at 4½ per cent on a capital expenditure of Rs 31,93,540 was Rs 40 544 The percentage of expenditure on revenue was 33 27, and the cost of maintenance per acre Re 0 44

46 The flood, which in 1878 79 left the Indus north of Rohri and passed down the valley of the Eastern Nara, was the largest on record and the whole district with the exception of about 50 square miles was submerged The damage done to the khariff crops was very great nearly the whole of the khariff on the Nara, more than half on the Mithrau Canal and the whole on the Thar Canal being completely destroyed The remissions given on the several works for both khariff and rabi are shown in Table VII Those of the khariff were—

	Average Khariff Revenue	Loss by flood
	Rs	Rs
Eastern Nara	11 783	11 604
Mithrau Canal	1 45 828	83 3[illegible]
Thar do	10 224	10 2[illegible]4
Dimwah	362	3[illegible]2
Hiranwah	551	533
TOTALS Rs	1 68 748	1 06 042

The total direct loss of khariff revenue was Rs 1 06,042 or over 62 per cent of the consolidated revenue

47 Besides this direct loss of revenue there was a loss of Rs 53,133 on account of damage done to canal buildings and embankments namely —

	Rs
Buildings	12 000
Rater Embankment	28[illegible]6
Jalal do	3 832
Mulla do	3 122
Mithrau Canal Banks	10 8[illegible]
Nara Embankments	5 0[illegible]
Thar Canal Banks	[illegible] 28
Dimwah Banks	3 48[illegible]
TOTAL Rs	53 133

and there was besides a direct loss of kharif revenue on some of the tail branches of the Fulali in the Umarkot Bago Tando and Badina Talukas, amounting to Rs 54,920 The actual total loss therefore, due to the flood was —

	Rs
Kharif revenue in the Nara	1 06 042
Do do on tail of Fulali	54 926
Repairs to buildings and embankments	53 133
TOTAL Rs.	2 14 101

To compensate this loss there was a rabi revenue due to the flood of Rs 2 21 386 made up of revenue from land flooded by the Jhambrao Sang, Rs 24 559 and from land flooded in the Nara Rs 1 96,827 The balance in favour of the flood was therefore Rs 7 285 It must be remembered though that had the flood not come, the regular rabi crops on the several canals would have been largely in excess of what they were

48 Although, owing to the flood the area of cultivation is in excess by 132 118 acres of the average of the three previous years and there is in consequence a balance of R 40,544 to the credit of the works for the year yet there will in all probability be a very large decrease next year on the average owing to the land being temporarily ruined, and the deficit will go on again as before until the protective works to the Mithrau and Thar Canals are carried out The net consolidated revenue on the Thar Canal for the year was only Rs 23, while before the flood of 1872, it was over Rs 75,000, and had the protective embankment been constructed some years ago it would in all probability have been not far short of a lakh of rupees instead of twenty three

HYDERABAD COLLECTORATE

1—ROHRI CANAL DIVISION

49 The canals which irrigate this division having separate heads in the river are 29 in number, their total length being 1 760 miles Of these 17 are small works whose aggregate length is 260 miles, and the remaining 12 are canals varying in length from 58

(the Dambrowah) to 267 (the Mahmuda Ghário), the latter including the Awat, Sarang, Aliganj and Sangro The total length of these 12 main canals is 1,500 miles There are no bunds in the division as the whole district with the exception of a small portion at the north of the Kundhara Taluka near the boundary of Mir Ali Murad's territory is high lying land beyond the reach of the highest inundation

50 The names of the canals which have been levelled and in which bed stones have been fixed with their mileage, are as below —

	Total length in Miles	No of Miles in which bed stones have been fixed
Mahmal	61	58
Nasrat	72	68
Naulakhi	137	13
Dambro	58	47
Ghar	141	131
Alibhar Kacheri	75	51
Great Maral	212	130
Gharo	267	131
Sarfráz	102	81
TOTAL	1125	843

The mileage entered includes that of all the branches as well as that of the canal itself

51 On the general subject of bed stones in canals the Executive Engineer, who has had great experience states it as his opinion that the mere fact of bed stones being set in a canal is not of such importance as is generally supposed and that they require to have their level checked at least every 5 years for the following reasons 1st the workmen constantly remove the stones and reset them at a higher level when they wish to get rid of the work of clearance 2nd Zemindars or their people constantly shift the bed stones near their kurriah heads or in front of their wheel channels with the idea that by doing so they benefit their individual supply 3rd where bed stones have been set in a canal which runs through salt ground locally known by the name of Kalar the bed stones in a short time disappear and in a few years all trace of them is lost 4th in the large canals the stones are often scoured out and 5th in all large canals the stones are constantly sinking by their own weight within from 4 to 12 miles of the river owing to subsoil near the river becoming saturated with water He states that it is a mistake to suppose that these stones when once put in serve as permanent guide for clearance and that any reduction of establishment can be effected when all the canals are regulated and marked for they require quite as much if not more skilled attention and supervision than before The cost of setting the stones he estimates as about Rs 20 per mile In most of the 917 miles of canal remaining unregulated there are bed stones at 100 800 or 1 000 feet apart and though they have not been set by level but from a measurement taken from the water line they serve as useful guide in estimating for clearance The work of regulating the bed stones is progressing each year as time can be spared

52 The area in this division assessed under the settlement that is the old settlement which is now fortunately falling in is 679 908 acres or about 26 per cent of the whole culturable area The total area cultivated during 1878 79 was 362 542 acres of Government land and 44 464 acres of Jaghir and the areas of kharif and rabi on Government land and the consolidated revenue were as below —

		Rs
Kharif	Acres 320 811 at Rs 2 3 6 26 per acre	7 12 230
Rabi	11 731 at Rs 1 8 76	56 6 4
	TOTAL Rs	7 68 901

The assessment on the 44 464 acres of Jaghir was Rs 14 354 and the realization Rs 11,028 the miscellaneous collections were Rs 2 668 and the remissions Rs 22 472 on account of kharif and Rs 512 on account of rabi The net canal revenue was therefore Rs 7,59,216 and the net consolidated revenue Rs 7,45 520 The land share was Rs 74 5?2 and the water share, including Hakaba Rs 6,81 096 The amounts shown by the Examiner Public Works Account, in his general revenue account are incorrect as he has here again mixed up the average direct income of the Alibhar, Máral, and Sarfraz before the improvements were carried out, with the land share proper The revenue expenditure in the division was Rs 1 30,303 exclusive of Rs 62 6?2 on account of revenue collection the percentage of expenditure on net revenue was 17 16, and the cost of maintenance per acre Rs 0 32, both of which are low

53 For three of the canals in this division the Alibhar Kacheri, the Great Marak and the Sarfraz capital and revenue accounts are kept on account of the expenditure which was incurred some few years ago in improvements The capital accounts have been closed, and no expenditure was incurred during the year The revenue account for the year of the first shows a balance of revenue after paying all charges of Rs 7 819 against a balance of Rs 1,171 for the previous year that of the second shows a similar balance of Rs 38 801, as against Rs 33 703 for 1877 78 and that of the third and net deficit of Rs 12,304 against a net deficit in the previous year of Rs 7 ?0? On this last, although there was an increase of direct income of Rs 1 121 there was an increase for establishment charges of Rs 2 706 and for

repairs of Rs 3,035 The cause of so large an increase in the establishment charges—Rs 328 for direction, Rs 2 306 for executive and Rs 72 for revenue collection, is not understood It must be borne in mind however, that the expenditure of former years was not incurred with a view to any return, but simply to save the whole of the existing cultivation on the canal, which had become obliterated for some miles of its length by an enormous sand drift

54 The increase in the revenue of the other two canals, and the increase on all the canals in the division generally is most satisfactory and as the old settlement falls in, and until the revised settlement is introduced throughout the whole division, a large yearly increase may be expected The introduction of the revised settlement in the tálukas of Kandiáro, Naushahro Moia and Sakharand, which are watered by the Mehrab Nasrat Naulakhi, Dambro, Dád, and Rhein has given an increase of over 2 lakhs of rupees on the average of the 3 years 1874 75 to 1876 77, as the following figures show —

			Rs
1874 75 net consolidated revenue			[illegible]
1875 76	do	do	5 22 787
1876 77	do	do	[illegible]
		Average Rs	5 36 090
1877 78	do	do	6 66 920
1878 79	do	do	7 45 220

The increase of net consolidated revenue was in 1877 78 Rs 1 30 830, and that of 1878 79 Rs 2 09 130 over the average The settlement in Shahdadpur is now being revised and when this work is completed the good effects of the improvements to the Marak and Alibhai especially the former will be made apparent and the balance of revenue will be very largely increased These two canals between them irrigate the whole of the taluka with the exception of a very insignificant area on the tail of the Áwatwah and therefore the whole increase of revenue due to the works of improvement can at once be estimated

55 In Table VIII is shown the duty per cubic foot of supply throughout the kharif season on the 12 principal canals in the division and the smallness of the duty as compared with that of previous years will be at once apparent The cause of this is purely and simply the difference between the two inundations That of 1877 was a very bad one indeed the curve only three times during the whole season and then only for a few days at a time reaching the line of a good inundation and that of 1878 being the best on record the curve being for the whole of the four kharif months about two feet above the line While the discharge of all the 12 canals taken together was in 1877 only 3 607 cubic feet per second and the duty 68 5 acres to a cubic foot the discharge in 1878 was 7,269 or a little more than double and the duty only 36 acres to the cubic foot The highest duty was on the Naulakhi 73 acres and the lowest on the Dad and Rhein on both 19½ acres The canals all had far more water than they required and the greater part of it was practically wasted A very good average throughout if the water is used economically is about what it was in 1877, namely 68 acres to the cubic foot

2—FULAH DIVISION

56 The Fulah Division is irrigated by 12 canals with separate heads in the river The principal canal is the Fulah with its 100 branches 994 miles long Of the others the longest is the Mulchand with its 8 branches 64 miles long and next to this is the Chandan with 6 branches 24 miles long there are 9 other small canals whose united length is 65 miles Of the 994 miles of the Fulah there are as nearly as can be ascertained 392 miles in which bed stones have been set to a regular gradient On the Mulchand 21 miles have been regulated and in three other canals 32 miles The work of setting bed stones in this division owing to a constant change of officers and to one cause and another has been very much neglected of late years and of the stones which have been set very little record can be found In many cases they were apparently set at too low a level, and as the clearance grant was never sufficient to allow of the canals being cleared to the level and even supposing such a depth was at all necessary the stones have never been seen since they were put down The only bund in the division is the Hajipur Bund 8 miles long built to protect the left bank opposite the Baran river when that river comes down in heavy flood

57 The settlement has only been introduced in a part of this division the area assessed being 135 512 acres The area cultivated in 1878 79 was 236 714 acres or about 29 per cent of the total culturable area The areas of kharif and rabi on Government land and the consolidated revenue for the year were —

Kharif	Acres 172 676 at Rs 2 3 70 per acre	Rs 3 90 182
Rabi	13 325 " 1 1 2 28	14 323
	Total Rs	4 04 505

The assessment on 50 713 acres of Jagir was Rs 17 078 and the realization Rs 11 901 the miscellaneous collections were Rs 1 022 and the remissions Rs 61 308 The net canal revenue was Rs 3 62 210 and the net consolidated revenue Rs 3,43 197 The land share was Rs 51 320 and the water share, including Hakabo Rs 3 23 865 The Examiner Public Works Accounts in his general revenue statement of the division makes the land share Rs 1 54 519 but as has been before explained this is incorrect The land share of the Fulah consolidated revenue is correctly shown in the revenue account for that canal as Rs 31,161 and that for the

other canals is Rs 3 159 The remissions in the division were very high, being Rs 51,305 above the average of the 4 previous years but out of the whole sum of Rs 61,308 no less than Rs 54,926 were given on account of the damage done in the Bágo Tando and Badina Tálukas on account of the Nára floods, as was shown in para 47, and Rs 5 264 were granted on account of the breaching of the Hajipur Bund from the heavy floods down the Báran caused by the unusually heavy rainfall of nearly 20 inches of rain The revenue expenditure in the division was Rs 96,383, exclusive of Rs 15,819 on account of revenue collections the percentage of expenditure on revenue was 26 61, and the cost of maintenance per acre Re 0 41

58 The revenue account of the Fulali Canal shows for the year a balance of revenue of Rs 8 325, as against a net deficit of Rs 48 099 in 1877 78 This is due entirely to the small sum expended during the year on repairs, owing to the grant for the division being reduced to meet excess expenditure in two of the divisions in Upper Sind The decrease of direct income was Rs 1,842 the decrease in the expenditure on establishment Rs 12,591 and the decrease in that on repairs Rs 46,418 The general result for the whole division is an increase of net consolidated revenue of Rs 12,487 and an increase of 35 088 acres of cultivation on the average of the three previous years The area of cultivation is, however, incorrectly stated either for 1878 79 or for the previous years, as the increase of revenue is not commensurate with the stated increase of cultivation

59 The duty of the canals in this division per cubic foot of kharif supply is shown in Table VIII and as in the case of the Rohri Canal Division, the duty shown is considerably under that for the previous year The discharge of the Fulali which was 4 083 cubic feet per second in 1877 78 giving a duty of 37 36 acres to the cubic foot, was 7 818 cubic feet in 1878 79, and the duty 25 50 acres there was however in this year an increase of 36 871 acres of cultivation The united discharges of the other canals, which was 1 285 cubic feet in 1877 78 was 2,709 cubic feet in 1878 79 The duty shown in the table for this division however, is of very little value, as during the kharif season many of the canals were closed owing to the floods, the Hajipur flood breaking into the tail branches from the west and the Nára floods from the east, and towards the end of the season none of the water was used at all From 38 to 40 acres per cubic foot may be looked upon as a fair average on the Fulali where more than half the cultivation is rice, and the water is not used very economically

KURRACHEE COLLECTORATE CANALS

60 There are in the Kurrachee Collectorate 104 canals with separate heads on the river the total length being 1 360 miles and 31 bunds whose aggregate length is 83 miles The two northern tálukas of the collectorate Dádu and Sehwan are irrigated by the tail of the Western Nára, 37 miles in length from the boundary of the Shikárpur Collectorate which flows into the Manchur lake the Phitu 27 miles long which leaves the river about 8 miles to the south east of Dadur and irrigates the land between the Nára and the river and the Áral 12 miles long, which during the inundation acts as a feeder to the Manchur Lake and in the cold season as a drainage channel Between Sehwan and Kotri there are no Government canals at least they were given up some years ago as being too costly to clear the strip of country which they watered was very narrow lying between the hills and the river and whenever rain fell they were swept from end to end almost at right angles by the floods and completely filled up with soil

61 On the right bank south of Jhiral, the principal canals are the Kalri with its 15 branches 136 miles long and the Bagár, which was formerly one of the main channels of the Indus with its 16 branches, 125 miles long On the left bank the principal canal is the Pinyári with 83 branches 410 miles long the Satuh 58 miles long, and the Khantah 70 miles long On the left bank there is practically a continuous line of bund along the river bank to a point 30 miles due south of Tatta where the river separates into two channels, the Ochitta and Kokawari The bunds on the right bank are small works and of no great extent There are only 257 miles of canals in the collectorate in which bed stones have been fixed to a regular gradient

62 In the Sehwan and Dádu Tálukas out of a total culturable area of 318 714 acres 145 191 acres have been assessed and 86,782 acres were cultivated during the year, the percentage being respectively 15 and 27 of the total culturable area The settlement has not been introduced in the Jhirak Shahbandar and Kurrachee Deputy Collectorates but the cultivated area was 174 107 acres out of a total culturable area of 552 200 acres, or about 31 per cent The total area cultivated in the collectorate during the year was 260,889 acres including 13,103 acres of Jaghir land and the kharif and rabi areas of Government land, and the consolidated revenue were —

		Rs
Kharif	Acres 155 793 at Rs 2 3 7 40 per Acre	3 46 806
Rabi	91 993 at Rs 1 12 9 31	1 73 447
	TOTAL Rs	5 20 253

The assessment on 13 103 acres of Jaghir was Rs 4,914 and the realization Rs. 4 606 the miscellaneous collections were Rs 13,375, and the remissions Rs 48,205 The net canal revenue was Rs 4 90 029 and the net consolidated revenue Rs 4,72,048 The land share was Rs 17,205, and the water share, including Hakaba, Rs 4 78,654 The revenue expenditure not including Rs 43,900 on account of cost of revenue collection, was Rs 1,29,070 the

percentage of expenditure on revenue was 26 34 and the cost of maintenance per acre Re 0 49 The remissions were Rs 53,243 below the average of the 5 previous years

63 The figures showing the duty per cubic foot of supply on the canals in this division have not been entered in Table VIII, as the floods swept over nearly all the canals in the division, and disarranged all the calculations

64 The usual tables, and capital and revenue accounts of the various canals for which these accounts are kept, are attached to this report The report is a little overdue, but it is submitted six weeks earlier than that for the previous year, and it is hoped that next year there may be less delay still

J LEMESURIER, *Colonel, R E*

Superintending Engineer for Irrigation in Sind

Camp Larkhána 6th January 1880

NOTE —The [illegible]

Extract from the Proceedings of the Government of Bombay, Public Works Department,— No 38 W I—123, dated 23rd March 1880

Read—

No 189 dated 15th January 1880

Endorsement by the Commissioner in Sind

Submitted* to Government The report for 1878 79 by Colonel LeMesurier, R E Superintending Engineer for Irrigation in Sind, shows that the inundation was a remarkably good one, and, had it only been under control, the season in almost every part of the province would have been a favourable one, but unfortunately the Kusmore Bund was breached and the whole of the western side of the Indus from Kusmore to Sehwan was swept by disastrous floods

* Annual Revenue Report of the Irrigation Department in Sind for 1878 79

2 On the left bank of the river also the floods occasioned serious losses, being the highest on record since 1826

3 Notwithstanding these misfortunes, the year has not financially been a bad one, the revenue, owing to the large area of rabi cultivation showing an increase of about five lakhs and a quarter of rupees over the average of the three preceding years

4 As Government are aware, the figures given in these Irrigation Reports do not tally with those given in the reports by Revenue Officers, and the causes of the discrepancy are at present being investigated, and will it is believed be satisfactorily ascertained, on which steps will be taken to ensure uniformity in future In the meantime the figures of this report will be accepted

5 The remissions of revenue, as was to be expected in a year of such floods, were large, but owing to the stricter rules now in force they were less than in 1874 75 and 1876 77

6 With regard to the figures in paragraphs 16 to 23, it must be borne in mind that one great object in the Desert Canal was political —to attract the unsettled and plundering Bugti and Biluch tribesmen, and induce them to settle down to honest labour With this end in view it was necessary to fix low rates and introduce a simple and easily understood system There can be little question that, viewed on broader grounds than revenue returns, the canal has been a great success and is doing the work for which it was made

7 As regards the revenue for water supplied to Khilat territory, the system hitherto in force has not been a good one, but, as Government are aware, proposals are now under consideration for remedying existing defects

8 In several portions of his report the Superintending Engineer takes exception to the existing methods for arriving at the actual area under cultivation His objections are well founded, but as the revised settlement, now rapidly progressing, takes the place of the former or 'diffused rate' system, the record of areas under cultivation will be more accurately recorded and at the same time an increase of revenue may be looked for No very great improvement can, however, under any system be looked for until the present arrangements are altered and some system of village accountants and village headmen substituted in its place A change in this direction is absolutely essential if the work of the settlement is to be permanent, and if Government is to realize its revenue fully and obtain statistics about cultivation

9 The Commissioner in Sind, having in other reports treated of many of the subjects referred to in this report, does not consider it necessary to add further remarks at present or to allude in any way to the purely professional details given by Colonel LeMesurier in his interesting report

Resolution—Government notice with satisfaction that this report has been submitted six weeks earlier than that for the previous year still, more punctuality is necessary, and Government trust this is the last time they will have occasion to refer to this subject

2 The inundation of 1878—as far as its curve is concerned—was undoubtedly a very favourable one, being about 2 feet higher than what is known as the curve of a good inundation

3 As indicated however in paragraph 3 of Government Resolution No 76 W I—232, dated 26th April 1879, reviewing the report for 1877 78 it is very questionable whether an inundation so much above the standard curve is really beneficial, as it leaves no margin whatever for heavy local falls of rain which usually occur when the river is at or near its highest inundation level--thus causing as in the year under report (1878) disastrous breaches and floods

4 Large sums have recently been granted for strengthening and improving the works of control, and it is hoped that in future there will be comparative, if not complete, immunity from floods on the right bank of the Indus

5 Works for protecting the cultivation on the left bank of the Indus and the Eastern Nára Districts are under consideration, and those for improving the discharging power of the Nara Channel are now under construction

6 Notwithstanding the disastrous breaches and floods of 1878, there was an increase of revenue of Rs 5,26,767 over the average revenue of the three previous years The Commissioner attributes this increase to the large area of rabi cultivation which invariably follows a season of flood

7 Both the Commissioner and Superintending Engineer for Irrigation point out that the figures exhibiting the areas of cultivation are unreliable, but when the revised system of settlement which is now being gradually introduced comes into full operation, more accurate returns of the cultivation and description of crops irrigated may be expected The present report shows an increase of 443,431 acres of cultivation over the average of the three previous years, the total for the year (1878 79) being 1,88[illegible],315 acres

8 The outlay upon works and repairs was larger than usual owing to special grants having been made for the Kusmore Bund

9 The percentage of establishment on new works, *viz*, 22 01, is moderate, but that on repairs, *viz*, 34 48, is very high, and every effort must be made to reduce it at once Government direct the special attention of the Superintending Engineer to this most important point

10 The percentage of expenditure on maintenance and repairs, *viz*, 24 52 of the revenue, and the cost of maintenance, *viz*, 0 41 rupee per acre, taken over the whole province, are both very reasonable and somewhat below the average

11 The loss of revenue upon the Begári and Desert Canals in the Frontier Districts of Upper Sind, referred to in paras 15 to 23 of the report and in para 6 of the Commissioner's endorsement, is serious as affecting the financial results of both these works, the first of which is already classified in the category of "*Productive Public Works*," and the other recommended by this Government to be so classified The Acting Commissioner in submitting the report for 1877 78 made the following remark "The question of loss of

revenue on the Desert Canal has already been reported on by the Commissioner, and it is hoped that a temporary settlement of the district may be effected this year so as to ensure a fair amount of revenue being realized" Government would be glad to learn if anything in this direction has been since done, as these canals although originally sanctioned chiefly on political grounds, were nevertheless represented by the late Commissioner Sir William Merewether as calculated to be highly remunerative undertakings upon rates which he himself, after a very long experience on the Sind Frontier, approved, and which do not appear to have been as yet levied

12 The question of the settlement upon these two canals, as also the general points raised in para 8 of the Commissioner's endorsement, should be specially transferred to the Revenue Department for consideration and final orders

13 It is satisfactory to notice that the expenditure on the Kusmore Bund in 1878 79 resulted in its remaining staunch during the inundation of 1879, thus realizing the hope entertained by this Government and expressed in para 10 of Government Resolution No 76 W I—232, dated 26th April 1879 The recent orders however regarding sufficient and efficient Abkallani establishment being maintained upon the Bund, next inundation must be most carefully attended to

14 Government regret to notice so large a deficit again on the Sukkur Canal The area under rice cultivation since the opening of this canal has gone up from 1,988 acres to 18,380 acres and this fact alone is sufficient to account for a very large proportion of the additional supply of water afforded by the new canal The Survey and Settlement Commissioner should be asked if the terms of the settlement admit of the people changing their cultivation from dry crops to rice, which consumes so much more water, without payment of an additional rate for the same

15 The Superintending Engineer for Irrigation has already received instructions to develope the powers of this canal during the cold season, and Government trust that the area under rabi irrigation will ultimately attain a higher figure than that set down in the report In this respect the canal has not up to the present time, owing to frequent changes of officers, disastrous floods and other causes, had a fair chance

16 The indication of changes in the set of the Indus as likely to affect the canals in the Ghar Division (paras 39 to 41) is worthy of careful consideration, and should be specially brought to the notice of the Survey and Settlement Commissioner

17 The Eastern Nara system of canals again suffered most severely from floods Although the revenue account for 1878 79 shows a surplus of Rs 40,554 after paying working expenses and interest on capital, still it is feared that there will be a deficit next year owing to a large quantity of the lands under command of the canals being temporarily destroyed for purposes of cultivation The remedy for this evil has been already indicated in para 5 *ante* and every endeavour should be made to push forward those works for which sanction has been already accorded

18 The increase in the revenue on the canals in the Rohri Division due partly to the high inundation but in larger measure to the introduction of the revised settlement, is particularly satisfactory

19 Government conclude from the last clause of para 51 that the Superintending Engineer does not entirely concur with the Executive Engineer in his observations regarding the doubtful utility of bed stones in canals though a definite opinion should have been expressed The recent Irrigation Act VII of 1879 contains clauses sufficient to prevent the people from moving these bench marks in the manner complained of, and it should be brought into operation accordingly

20 The Fulali and Kurrachee Collectorate Canal Divisions need no special remarks

21 In paras 7 and 57 the Superintending Engineer alludes to certain general revenue account statements prepared and furnished by the Examiner of Public Works Accounts These should have been sent up with the report

They should now be submitted with any remarks the Superintending Engineer may have to make regarding them, when the final orders of Government will be issued thereon, meanwhile it will suffice to state definitely that the figures recorded in Table VI appear to have been prepared in strict accordance with the most recent orders on the subject, and are correct

22 Finally, Government have pleasure in acknowledging the great care that has evidently been bestowed in the preparation of this interesting and valuable report, which reflects the highest credit upon Colonel LeMesurier, R E, the head of the Irrigation Department in Sind

23 Copies of the report and of this Resolution thereon should, as usual, be forwarded to the Government of India and the Secretary State

C J MERRIMAN, *Colonel, R E,*
Secretary to Government

GOVERNMENT OF INDIA

HOME REVENUE AND AGRICULTURAL DEPARTMENT

EMIGRATION TO ASSAM

No 994 dated Shillong 17th May 1880

From—C J LYALL Esq C I E Offg Secretary to the Chief Commissioner of Assam

To—The Secretary to the Government of India Home Revenue and Agricultural Department

I am directed to forward, for the consideration of His Excellency the Viceroy and Governor General in Council, the annexed memorial from the Indian Tea Districts Association, London, in which they represent the present state and prospects of the tea industry in India, and suggest certain measures which, in their opinion, are calculated to promote the interests and further the development of this industry

2 The Chief Commissioner, having ascertained from His Honor the Lieutenant Governor of Bengal that he is willing to take into consideration the general question of revising Act VII (B C) of 1873, is circulating the Memorial to District Officers in Assam, with a view to collecting their opinions and those of the leading tea planters on the points on which the Act requires amendment Sir Steuart Bayley is not, therefore, at present in a position to discuss that portion of the Memorial which deals with the revision of the law, he has, however, the following remarks to make on the specific requests stated on page 3 of that document

3 The first point noticed, and the one which is considered by the memorialists of the most pressing importance, is that the maximum period of contracts under the Act should be extended from three to five years This proposal seems to the Chief Commissioner to require much consideration, not only by Government, as interested in the due protection of the labourer, but also by the planters themselves From a protective point of view, he sees no serious danger in it, as immigrant labourers are now so well taken care of and so constantly inspected, and the powers given by the Act for closing unhealthy gardens are so ample, that a coolie is not likely to be exposed to greater risk under a five years' contract than he now is under one for three But it seems to be overlooked by those who advocate the extension that it is likely, by diminishing the advantages held out to the labourer, to render service in the tea districts more unpopular than it at present is The power to change after three years' service and the high bonus given for re enlistment are elements of importance in the attractions set before the immigrant, in default of which he may very probably require higher wages for the extended period And, if the extension in this way raises the cost of imported labour it will be a doubtful boon to employers The Chief Commissioner is not prepared to give a definite opinion on the proposal till he has consulted District Officers and the

leading planters in the Province, but he will be glad to receive any instructions which the Government of India may wish to give on the subject, as if His Excellency in Council is of opinion that the extension is absolutely and wholly inadmissible, it would be desirable not to keep up agitation by bringing the matter before the Bengal Legislative Council

4 On the second point urged,—the simplification of the regulations and conditions attaching to recruitment in the labour districts,—the Chief Commissioner has nothing to say, as he does not know the specific grounds on which the dissatisfaction with the present system implied in the request for its revision, is based Sir Steuart Bailey had some correspondence last year with the Government of Bengal* on the subject of encouraging free immigration, and correcting some mistaken notions as to the illegality of this system, and the Lieutenant Governor was good enough to issue a circular on the subject, but, beyond this, the question has not been before the Chief Commissioner

* Vide para 2 Section 1 Chapter I of the Report on Labour Immigration into Assam for the year 1878

5 On the third point, viz, "that the influence of Government should be exercised to induce the rulers and sirdars of the quasi independent territories bordering on the ordinary recruiting districts to remove the impediments which stand in the way of free immigration from such territories," the Chief Commissioner is also unable to offer any opinion, nor is he aware what the impediments are to which the memorialists refer He believes that the Chief of one of the tributary States of Chota Nagpur prohibited recruiting in his territory, but this is a matter for the consideration of the Government of Bengal, and the Chief Commissioner will therefore abstain from comment on it

6 In regard to the fourth suggestion,—that the diet scale for immigrants in transit by boat or steamer should be simplified, and reduced in cost,—I am to say that modifications have already been made in the direction urged by the memorialists

7 In reference to the matter discussed in the concluding paragraph of the memorial, I am to remark that the Government of India are aware that there is no balance at the credit of the Labour Transport Fund, and that the question of enlarging the purposes to which this fund may legally be applied, as well as that of reducing the fees, is now under the consideration of the Government of Bengal

---

To His Excellency the Viceroy and Governor General of India in Council

Memorial of the Indian Tea Districts Association dated London March 1880

It has for some time become manifest to those engaged in the growth of tea in India, that not only is its preservation as a fairly remunerative investment in danger, but that its continued existence as one of the staple industries of the country is menaced by the great and increasing difficulties and drawbacks which attend its prosecution That the pressure of these burdens has become greater than the industry can bear, and survive in a healthy condition, is sufficiently shown by the steadily decreasing profits realized for some years past by those estates most favoured by natural conditions and management, while in the case of by far the larger proportion there have been no profits, and in too many instances heavy losses accumulating from year to year It is true that the unsatisfactory condition of the enterprise, due to local influences, has been further aggravated during the past two years by the depressed state of the tea market, in sympathy with the almost universal depression of trade and industry But though some alleviation may not unreasonably be looked for in this respect it cannot be ignored that, with the largely increased importations of Indian teas, and the new fields which are being opened out in Ceylon Java and elsewhere, producing teas of similar character, the general tendency must be towards a permanently cheaper market than ruled some years ago, and that effective relief can only be found in diminished cost of production That growers are keenly alive to the importance of this is fully evinced by their strenuous efforts to introduce greater economy in all branches of the work, and their prompt adoption of all the mechanical appliances invented with that object The peculiarities of the culture, however, are such that hand labour must always be largely employed and rank as the governing factor in the cost of production On the maintenance therefore of an adequate supply of coolie labour, at a cost calculated to leave a fair margin of profit on the capital invested, hinges the entire question of the future of the tea enterprise

It may not be out of place to give a brief statement of the progress of the tea culture in India during the last 30 years In 1850 the area under plant may be approximately esti-

mated at not more than 1,000 acres, and the total outturn of tea at little over 250,000lb At the present time the area under plant may be put down for—

	Acres
Assam	85 000
Cachar	47 000
Sylhet	18 000
Darjeeling and Terai	34 000
Dehra Doon	4 300
Kangra Valley	7 400
Kumaon	4.400
Chittagong	4 200
Chota Nagpore	3 300
TOTAL	207 600

producing about 40,000 000lb of prepared tea, and representing a capital invested not far short of fifteen millions sterling, while about two millions sterling are spent annually in India in the working and up keep of the plantations Of the advantages accruing to India—directly to the people and indirectly to the Government—from the disbursement of so large an amount of money there can be no question It will be seen that, of the total area of 207 600 acres brought under cultivation, 150 000 acres lie within the administrative circle of the Chief Commissioner of Assam and the statistics of that province demonstrate the continuous and rapid progress of its revenue and general prosperity during the period in question,—a prosperity which may be fairly claimed as being almost entirely due to the beneficial influence of the tea industry There still remains, however, a vast field for future development, not merely in the production of tea but for almost every kind of crop grown in India, more especially rice

The climatic conditions of the districts coming under the operation of Act VII of 1873 regarded as inimical to health, and constituting the justification for legislative interference on the part of Government in the interests of the labourers, are the natural outcome of the exuberant fertility of the soil allowed to run to waste and produce malaria instead of being made subservient to the wants of man The true remedy for this can only be found in a gradual re peopling of the country and reclamation of the wastes That some extra risk to health and life in the case of both Europeans and Natives must attend this operation during the first two or three years of residence, is inevitable but it sinks into insignificance in comparison with the direct mortality and widespread lowering of the standard of vitality which result from the periodical famines and seasons of dearth which occur in other parts of India It is abundantly evident from statistics and otherwise that the normal sanitary condition of the indigenous population of these districts, as well as of the time expired immigrant labourers who have become acclimatized compares not unfavourably with that of the people of Bengal generally showing that any drawbacks of climate are fully compensated for if not neutralized by an improved standard of comfort and general well being And it might be a question deserving the consideration of Government whether a certain amount of direct expenditure, applied to promoting immigration into Assam, would not prove reproductive in the truest sense, by stimulating the productive capabilities of the province, and by contributing to the reduction of future expenditure in connection with famines in other parts of the empire less favoured by nature

Tea culture alone, apart from other products, is capable of almost indefinite expansion Land and capital can be found in abundance, and the sole impediment to its continuous development is the difficulty of obtaining an adequate supply of labour on terms admitting of its profitable employment This hindrance to progress does not arise from the inability of the industry to afford the wages necessary to render labour highly remunerative to the immigrant but from the excessive cost of recruitment and transport largely due, in the opinion of all tea growers, to the stringency of the labour laws

It appears to this Association that Act VII (B C) of 1873 might with great advantage be revised generally in the direction of greater simplicity and freedom of contract But pending such general revision, there are a few points of pressing importance which might be dealt with promptly and which would afford considerable relief These are—

First —The extension of the maximum period of contracts from three to five years

Secondly —A simplification of the regulations and conditions attaching to recruitment in the labour districts with instruction to the local officers to co operate in a friendly spirit towards smoothing the difficulties which stand in the way, thus reducing the cost

Thirdly —That the influence of the Government be exercised to induce the rulers and sirdars of the quasi independent territories bordering the ordinary recruiting districts to remove the impediments which stand in the way of free emigration from such territories, under a guarantee that the emigrants shall receive the same degree of protection as those drawn from our own districts

Fourthly —If the scale of diet and medical comforts prescribed for the immigrants while on board the river steamers in transit shall not have been simplified and reduced in cost, as the Association understands was in contemplation by the Government, that such may be done

In the opinion of the Association, it would tend towards greater regularity and economy if the obligation to provide diet, medical attendance and sick comforts, were transferred from the employers to the steamer companies, as forming part of their contract as carriers

With reference to the *first*, and undoubtedly the most important, of these suggested amendments of the Emigration Act, it may be safely affirmed that there is a complete concensus of opinion amongst tea growers of its urgent necessity

The term of three years is too short to admit of the heavy expenditure incurred in connection with the recruitment and transport of the immigrant being recouped from the profits of his labour especially as during a portion of the term, while becoming habituated to the change of climate and conditions of life, and the novelty of the work he has to perform, his labour is comparatively valueless, whilst considerable extra expense is incurred by the employer under the heads of maintenance, medical treatment, and sick comforts Hardly, in fact, has he settled down steadily to work in a satisfactory manner, than he becomes restless and on the *qui vive* for the termination of his contract in order that he may either exact a heavy bonus for a renewal of a year's service, or wander about the district with a view to securing better terms elsewhere and so keen is the competition for labour, that the coolie has become complete master of the situation The expense is further increased by the necessity the employer is under, in many cases, of importing along with the able bodied labourer his infirm relatives and dependents, and by the legal obligation to defray the cost of re transportation, should health so far fail as to indicate the necessity of this course Admitting the necessity of fixing some limit to the time of contract, there appears no valid reason, taking all the circumstances into consideration, why it should not be made five years or why the tea growers of India should be placed at so serious a disadvantage in this respect in their competition with all outside colonies and countries, whether British or foreign, permitted to draw their labour from India under contracts for five years' service This concession is presumably made in the interests of employers, and if so, surely the hard pressed tea growers of India have at least an equal claim to consideration

In the one case where the extra two years are accorded, the emigrant when he leaves the country is virtually beyond any control or protection on the part of the Government of India In the other where the boon is withheld, but quite as urgently needed, he lives and labours under the over watchful care of the officers of Government

If any additional arguments were necessary to show that the concession solicited while conferring a great boon on employers, might be granted without prejudice to the health and well being of the coolie they will, in the opinion of the Association be abundantly found in the "Review of the Government of India on the Annual Report on Labour Immigration into the Province of Assam for 1878," and in the series of exhaustive Resolutions by the Chief Commissioner of Assam on the same subject

The following extracts are given in illustration of this view, *viz*, from the "Review of the Government of India" —

> The percentage (of mortality) on the average strength is 10 62 for Act VII coolies (*i e* during the first three years of residence) 3 89 for non Act coolies (whose residence exceeds that period) and 6 75 for all coolies taken together It is amongst newly imported coolies that the death rate is highest and owing to the survival of the fittest it falls rapidly as length of service increases * * * Where labour is scarce and employers incur heavy expense in its importation they frequently require the special protection against loss which long term contracts afford

The Chief Commissioner of Assam writes, in his Resolution on Immigration Operations in Upper Assam —

> The comparison of the mortality among coolies under Act VII and among those not under the Act is striking While the former in Sibsagar reaches a percentage of 11 17 and in Lakhimpur of 9 95 the latter is represented by one of 4 38 and 3 46 respectively The real explanation of course is that the non Act labourers are for the most part acclimatized and contain but few new comers The majority of them are time expired coolies who have already served their apprenticeship in the province

And of Darrang —

> It is a significant fact that among non Act coolies the mortality which stands at 14 per cent among contract coolies under the Act is reduced to 4 52 per cent The great danger to life is obviously in the first two or three years of a coolie's residence in Assam and the strong ones who survive the process of acclimatization have as fair a chance of life in Assam as in other parts of India Among these also it is to be noticed that to cholera are due the deaths of 110 out of 389

It has also to be noted that the average death rate of 1878, as well as that of the preceding year was abnormally raised by the excessive mortality, amounting to over 17 per cent, amongst coolies imported from the famine stricken districts of Madras and the North West, whose enfeebled constitutions rendered them peculiarly liable to succumb to so complete a change of climate and general conditions of life In many cases, no doubt the germs of fatal disease are carried with them, and the sudden transition from a life of comparative penury to one of indolence and high feeding on board the steamer is in itself a prolific cause of constitutional disturbance and disease

Notwithstanding the influence of this potent factor in raising the average death rate in 1878 it is only 25 in excess of that of the suburbs of Calcutta, and about 1 80 *under* that of Serampore for the same year whilst in the case of acclimatized coolies it is little more than half that of the Calcutta suburbs and considerably less than half that of Serampore

The Association therefore ventures to hope that the Government will see fit to grant this concession

The other points may be held to be almost sufficiently explained in their statement, and the Association will not therefore trouble the Government with further details respecting them There is one matter however, which it ventures to submit for the favourable consideration of Government

It is believed that a considerable sum has accumulated in the hands of Government in the form of a surplus of receipts over expenditure in connection with the working of the Emigration Act The Association would, therefore, respectfully suggest that this surplus be applied in such manner as commends itself to Government in the general interest of the labour importing districts, and that, as regards the future, the scale of fees levied be revised, experience having shown that they are largely in excess of the cost of working the Act

T DOUGLAS FORSYTH *Chairman*
HENRY HOPKINSON, *Vice Chairman*
ERNEST TYE *Secretary*

No 123 Simla, dated Simla the 24th June 1880

From—C J TUPPER Esq Offg Under Secy to the Govt of India Home Revenue and Agricultural Department

To—The Chief Commissioner of Assam

I am desired to acknowledge the receipt of Mr C J Lyall's letter No 991, dated the 17th ultimo, submitting a memorial from the Indian Tea Districts Association, London, representing the present state and prospects of the tea industry in India, and suggesting certain measures for the furtherance of its interests

2 In reply, I am to say that the Governor General in Council will postpone any full discussion of the points raised by the memorialists, until you have received and reviewed the opinions of the district officers in Assam and of the leading tea planters on the general question of the revision of Act VII (B C) of 1873 The Government of Bengal have also called on the Superintendent of Emigration for a report, which it will be necessary to consider before deciding in what way the particular suggestions made in the memorial should be dealt with

3 Some time must elapse before these inquiries have been completed, and in the meanwhile it seems to His Excellency in Council that the whole question of emigration to Assam might be profitably examined, partly, indeed, from the comparatively restricted point of view of the interests of the tea trade but more especially as a matter of imperial interest, involving the possible permanent advantage of several provinces of the Empire The investigations of the Famine Commission have stimulated discussion upon the over population of some parts of India It has been urged that there are no sufficient outlets for the normal increase of numbers, that in many localities the class of landless labourers tends to grow and that the Government should intervene to promote emigration from densely peopled regions to those where population is sparse

4 Schemes of State emigration to Burma from Bengal and Madras, and to the Central Provinces from the valley of the Ganges, have been tried in former years with little success, and it is frequently alleged that the unwillingness of the people to leave their homes gravely impedes, if it does not altogether frustrate, efforts made by the State to spread cultivation in one province by the agency of the surplus population of another There are, nevertheless, many circumstances which prevent the Government of India from regarding the experiments hitherto made as conclusively establishing the certainty of future failure Under pressure of want people in all parts of India do, in point of fact, leave their homes There is a large free immigration into Ceylon and British Burma from the Madras Coast, and recently, in a single famine year, more than 180,000 coolies migrated from the Madras Presidency for work in Ceylon The failure of the Chárwa colonization scheme was attributed by the Chief Commissioner of the Central Provinces in part, at least, to mismanagement It is possible that the ill success of the Burma emigration arrangements in 1874—77 was due in some measure to over regulation, and to the circumstance that the character of the free movements of the population was too little observed

5 In Behar, in the Benares division, in the Gangetic Doab, in Oudh and in Rohilkhand, there are great areas which would derive much benefit and relief, if an outlet for their surplus population could be found by the establish

H

ment of a steady flow of emigration to thinly peopled parts of India From Saháranpur in the north west to Tipperah, on the south east, the population is very dense, and it is certainly in some places already too thick for the country and its produce, more especially as the great mass of the people are dependent directly or indirectly on the land Assam, a country of bounteous rainfall, with a fertile and vigorous soil, apart from its special claims as a tea-producing province labours under serious disadvantages from the scarcity of population and the need for a much greater supply of labour for its ordinary wants Within the last year reports have come before the Government of India showing that free immigration to Assam is not only practicable but successful It seems to be gradually extending and is not attended with any grave risks, and under the circumstances the Government of India consider that their clear policy should be as far as lies in their power to promote a system which, if carefully established, would solve most of the difficulties from which Assam suffers

6 The Governor General in Council would therefore invite your attention to the whole question of extending free immigration into Assam, not only in view to increase the supply of labour on the tea plantations, but also equally with the object of settling immigrants as cultivators on available land Could the flow of emigration be started and maintained, some moderate outlay upon its proper direction during the first few years, till its continuance was assured would probably be sanctioned from imperial funds At the same time whatever might be done in the way of enlarging the scope of free immigration, it should be understood that the Government of India would not be prepared to relax any of the safeguards for the protection of the labourer for, at least, the years immediately following his arrival in a strange country

7 The question is so important, and affects so many interests and provinces that the Government of India are disposed to appoint a Commission to visit the several recruiting districts, to look into the regulations for despatching labourers to the tea plantations, to examine the existing law in all its bearings, and to advise generally upon the subject of this letter Subject to any modification which local experience may suggest, such a Commission might consist of one Assam officer and one representative of the tea interest with a Bengal officer at its head The Commission would receive instructions from, and submit their report to, the Government of Bengal The cost of the Commission should be payable by the Bengal Government, which has utilised the surplus of the Inland Labour Transport Fund I am to invite the expression of your opinion on this proposal, upon which the views of His Honor the Lieutenant Governor of Bengal have also been asked In the event of your concurrence in the suggestion, you are requested to nominate the two members to be deputed from Assam His Excellency in Council thinks it probable that the tea planting interest would be most successfully represented by a gentleman possessing practical experience of the work of a tea garden and a practical knowledge of the recruitment and character of coolies and of the conditions of their employment in Assam

8 As observed in the 3rd paragraph of Mr C J Lyall's letter under acknowledgment, the point which, in the memorialists' opinion, claims the most pressing attention is that the maximum period of contracts under the Act should be extended from three to five years The Government of India do not wish, at this stage of the proceedings, to assert that such extension of the period ought not to be sanctioned At the same time it would conflict with the main principle which has guided the suggestions made in this communication, because it would prolong the term during which the relations of employers and employed would be regulated by a special law whilst the ultimate object which the Government of India have in view is to encourage free immigration and to put aside all restrictions other than those which are shown by experience to be indispensable It is admitted that the argument from the practice in the colonies carries weight, that sickness and mortality are most severe amongst new arrivals, and that the planter might reasonably desire to retain the services of his labourers just as they become most valuable by acclimatization But it

must not be forgotten that the prolongation of the term of indenture would impair the prospects of the new hands, and thus tend to make recruitment more difficult and the actual cost of labour higher The real need of the country, of Assam, Bengal, Behar and the North Western Provinces, is that as many labourers as possible should go to Assam, and that a large proportion should settle there and cultivate rice and other staples The increase of production, by affecting prices, would itself diminish the cost of labour, which would, at the same time, tend even more directly to fall by the additions to the strength of the population Free immigration and free labour seem to be the true remedies for the difficulties of the tea industry, and they would bring with them many advantages to the province at large There is no objection whatever to further discussion of the question of the term of service, but at present there seems to be some presumption against a measure which would, as between individuals, postpone the date of entire freedom of contract

9 With reference to Mr Lyall's paragraph 6 I am to request that, in due course, a full report may be submitted succinctly describing the steps taken to simplify and cheapen the diet scale for immigrants in transit by boat and steamer The present communication does not give the particulars which will be required when a reply is addressed to the memorialists

No 189 dated Calcutta the 3rd June 1880

From—C W Bolton Esq Under Secretary to the Government of Bengal General Department

To—The Secretary to the Government of India Home Revenue and Agricultural Department

With reference to your office letter No 100 dated the 22nd May 1880, to the address of the Chief Commissioner of Assam forwarded under endorsement No 101 of the same date, I am directed to say that the Indian Tea Districts Association sent this Government a copy of their memorial, expressing a hope that it would meet with the favourable consideration and support of the Lieutenant Governor and stating that they had requested the Chief Commissioner of Assam to forward the memorial to the Government of India The Superintendent of Emigration has been called upon for a report on certain points in the memorial, and if the Government of India, after perusing the memorial, and the remarks with which it will be submitted by the Chief Commissioner desire a report from this Government, the Lieutenant Governor will gladly comply with their request

No 121 dated Simla the 24th June 1880

From—C L Tupper Esq Offg Under Secretary to the Government of India Home Revenue and Agricultural Department

To—The Secretary to the Government of Bengal

I am desired to acknowledge the receipt of Mr Bolton's letter No 189, dated the 3rd instant, and in reply to say that the Government of India will be glad to receive the report, therein referred to, of the Superintendent of Emigration on certain points in the memorial from the Indian Tea Districts Association, together with any remarks that His Honor the Lieutenant Governor may desire to make upon it

2 The correspondence which has passed between this Department and the Chief Commissioner of Assam is herewith enclosed, and with reference thereto I am to request an expression of the opinion of the Government of Bengal on the proposal to appoint a Commission to investigate and report upon the whole question of free immigration into Assam In the event of His Honor the Lieutenant Governor concurring in the view that such a Commission should be appointed, I am to enquire what Bengal officer His Honor would nominate to serve in the capacity of President

From Chief Commissioner of Assam, No 934, dated the 17th May 1880
Reply No 123 dated the 24th instant

3 The expenditure during 1877 78 from the Inland Labour Transport Fund on projects calculated to facilitate the transport of labourers to the tea districts amounted to Rs 5 34 211 Although this expenditure benefited Assam, it is obvious that Bengal must also have reaped considerable advantage from road construction Under these circumstances, it is apprehended that no objection will be raised to charging the cost of the Commission to Bengal Provincial Revenues

GOVERNMENT OF INDIA

HOME, REVENUE AND AGRICULTURAL DEPARTMENT

PAPERS ON THE SUBJECT OF THE EXPERIMENTAL CULTIVATION OF BAMIEH COTTON IN INDIA.

Dated 26th December 1877

From—Her Britannic Majesty's Consul at Cairo

To—The Under Secy to the Govt of India, Department of Revenue Agriculture and Commerce

In compliance with the request conveyed in your letter of the 3rd ultimo, I beg to forward to you herewith three pounds of the seed of the "Bamieh" cotton, together with a report upon the results up to the present time of the cultivation of the plant in Egypt prepared at the Egyptian Ministry of Agriculture and Commerce

I have taken every precaution to insure that the seed sent herewith, which comes from the Khedive's own garden, should be fresh and of the best quality, and you will perceive from the inclosed letter from the Minister for Foreign Affairs that the Egyptian Government ask for certain seeds in exchange, and propose generally the establishment of a system of exchange of seeds and plants between Egypt and India

Translation from the French

(EGYPTIAN) DEPARTMENT OF AGRICULTURE AND COMMERCE

Report on the Bamieh cotton plant (Cottonier Bamieh) ***presented to His Excellency the Secretary of State for Agriculture and Commerce by Monsieur Delchevalerie First Inspector of the Department***

The new species of cotton which was found some time ago to occur in the Menûfie, and which among the natives is now known as the Bamieh cotton plant has straight stems the tallest of which attain a height of three *metres* and instead of throwing out lateral branches, produce two or three semi verticillated pods issuing directly from the axilla of each leaf, these being alternately arranged around the stems

The ordinary cotton plant on the other hand (in its varieties *Mako Jumel Gallini Ashmuni etc*), has the form of a shrub with one or more main stems throwing out numerous lateral branches, these occasionally spreading out to a considerable breadth and bearing pods at various intervals, two three or even four leaves often producing no pods from their axilla The leaves of the Bamieh cotton are larger greatly undulated and of a deeper green than those of the ordinary cotton Its flowers are yellow the interior spotted with purple, somewhat like those of the ordinary cotton, but they are frequently larger sized, and grow on elongated peduncles

As to its origin it is thought that the contact of Bamieh plants which existed in the cotton plantations of Birket el sab, having produced this new type, acted upon the seed of the cotton plants at flowering time and that the origin of this species may therefore be attributed to a process of hybridisation between the Bamieh (*Hibiscus esculentus*) and the ordinary cotton (*Gossypium barbadense*) the more so that, when seen from a distance the plantations of this new cotton display like those of the Bamieh (*Hibiscus esculentus*) a multitude of high straight stems without branches, at least as regards three fourths of their length from the tops

If it be true that the new Egyptian cotton is the result of hybridisation between the two species above named the fact is one of great importance to science because in the annals of horticulture the process between species differing so widely is rare enough and because such results as have been recorded down to the present time have generally remained sterile, or at best but of little use in the sequel, whereas in this case nature has produced a more fertile cotton than the ordinary kind

During the past summer at Ghezireh we have, by way of experiment artificially crossed the Bamieh and the ordinary cotton and the seed thereby obtained will be sown in the coming spring and its growth watched during the summer season in order to verify the theory and to ascertain whether the seed thus artificially obtained will produce the same species as the one found to occur spontaneously in Menûfié

On comparison with the ordinary kind this new cotton shows too great a difference to be accepted simply as a variety If not a hybrid, it may very likely be an exotic species, introduced by chance into Lower Egypt

Its origin, however, is after all a question more nearly concerning the scientific world than the cultivator For the latter the essential point is the advantage it has over the cultivated kinds and varieties in producing pods at the axilla of every leaf, in addition to

which the same area under the new species will permit of the growth of one third more as compared to the old kind, that is from nine to ten thousand plants per *feddan* *

When duly improved by means of a rational method of cultivation, and by a judicious selection of the seed intended for sowing, the produce in cotton will steadily increase in quantity as well as in quality, for the Bamieh cotton does not as yet fully develope its pods We have especially observed that in plantations which, owing to close crowding of the trees are insufficiently exposed to fresh air and light a proportion of the pods remain abortive—notably those situated about the lower part of the stems, and that the more elevated pods too are somewhat slow in coming to full maturity

The pods produced on the centre of the stems are usually the healthiest and most perfect Hence it is only the seed from these which should be set aside for sowing in the following year and it must therefore be carefully collected apart from the rest Seeds from imperfectly developed pods, or from those growing on the bases and tops of the stems or which have yielded cotton of inferior quality, as well as those picked from weakly plants, are only adapted for the production of oil and oil cake By steadily adhering to this system this valuable species will be gradually brought to perfection The first plantations made of this new species were treated with tolerable care The seed was collected carefully, and was sown by itself The crop of the following year yielded a large number of plants which were again planted separately and during the past year considerable quantities of them have been cultivated in Lower Egypt

This year all the large proprietors have cultivated the new species for which several hundred *feddans* have been taken up notably in Shûbra Kubbe on the estates of His Highness the heir apparent and at Heliopolis near Cairo &c

In Lower Egypt some of these new cotton plants are said to have yielded from seven to eight *quintaux* of Bamieh cotton per *feddan* a result which might have been considerably improved upon if the seed had not been subjected to fraudulent admixture and if instead of planting *twenty thousand plants* per *feddan* the quantity had been reduced to one half of this number There is no doubt that with a more careful treatment of the seed, as above indicated the yield could be raised to 10 *quintaux* per *feddan*

During the past spring some clever speculators having brought Bamieh cotton seed from the peasants of Menufie of whom they obtained them at low rates afterwards succeeded in selling them at excessively high quotations to the large proprietors even obtaining as much as thirty pounds sterling per *ardeb* but not satisfied with even this high price they further increased their profits by mixing the seed of the new species of which they had practically acquired the monopoly to a considerable extent with seed of the ordinary varieties owing to which all the planters have thus been grievously disappointed We became aware of this practice last July and immediately weeded the plantations under our supervision of all the *branched cotton* plants which were found to be growing intermingled with the *unbranched Bamieh* cotton plant in order to prevent any degeneration in the new type We strongly advise landowners growing *Bamieh cotton* to plant it separately for the future and as far away as possible from the ordinary lands so as to prevent any degeneracy in the new type

Having thus removed all the country cotton plants which were found to be growing among the *Bamieh* species we obtained a pure kind of which a portion which in consequence of the weeding had more space around them than the rest have produced as many as three or even four horizontal stems still retaining however the character of the main stem and producing pods in lieu of lateral branches The new species is keeping up well and we have reason to believe that it has been completely established after several years during which it has been already cultivated

Many planters of Bamieh cotton have like ourselves taken the precaution to weed out the branched plants which they found growing in their plantations of the new species But unfortunately many of them have allowed the mixture of the two species to continue Next spring it will therefore be necessary to take special care in the purchase of the seed of the new species and to exact valid guarantees of its purity

In the month of June and during the first fortnight of July the new species was attacked by a large hairy caterpillar which caused considerable damage by eating the leaves and the tips of the young buds Towards the end of July the caterpillar disappeared and it was impossible afterwards to find even one of them in the plantations

Towards the end of summer after the disappearance of these caterpillars the small caterpillars which have now for a long time past ravaged the Egyptian cotton plantations and for the study of which a commission under the presidency of His Excellency Sherif Pasha (of which we are a member) was appointed by the Home Office in 1871 made their appearance This small caterpillar which attacks the American and Indian cotton plantations as well as those of Egypt finds its way into the pods perforating the epidermis and feeding on the albumen contained in the seeds and completely soils the fibre enveloping the seed

Several entomologists with whom we were in correspondence at this time ascribe this caterpillar (the Egyptian variety) to the genus *Tortrix* Dr Boisduval described it in 1873 under the appellation *Eruphaga gossypiana* and this learned entomologist recommends that the infected pods should be carefully cleaned of all caterpillars and that *these should be burnt* so as utterly to extirpate the pest

* The *feddan* [illegible] 120 [illegible] the ordinary kind and [illegible] beyond this would be incompatible with a rational method of cultivation

No 36—39 dated 13th February 1878

From—C H M Batten Esq Offg Secretary to the Government of India Department of Revenue Agriculture and Commerce

To—The Secretaries to the Governments of Madras Bombay North Western Provinces and Oudh and to the Chief Commissioner of the Central Provinces

I am directed to forward ¾ lb of the seed of the Bamieh cotton received from Egypt together with the translation of a report on the cultivation of the plant in that country, and to request that, with the permission of His Grace the Governor in Council / His Excellency the Governor in Council / His Honor the Lieutenant-Governor, the seed may be sown in the Government farm at Sydapet / Khandesh / Allahabad / Nagpur

I am to request that instructions may be given for the careful conduct of this experiment, and that the results may be reported to the Government of India in due course

No 725 dated 10th May 1878

From—C G Master Esq Secretary to the Government of Fort St George Revenue Dept

To—The Secretary to the Government of India Dept of Revenue Agriculture and Commerce

With reference to your letter, dated 13th February 1878, No 36 forwarding seed of the Bamieh cotton for experimental cultivation in the Government Farm at Sydapet, I am directed to forward for the information of the Government of India, the Proceedings of Government marginally noted embodying letters from the Superintendent of Government Farms on the subject

23rd January 1878 No 118

Extract from the Proceedings of the Government of Madras Revenue Department—No 118 dated 23rd January 1878

Read the following paper —

Proceedings of the Board of Revenue dated 19th December 1877 No 4271

Read the following letter —

No 1040 dated 8th December 1877

From—W R Robertson Esq M R A C Superintendent of Government Farms

To—The Secretary to the Board of Revenue Madras

I have the honor to forward, herewith five bottles containing samples of the lint and a plant of a new variety of cotton which was recently originated in Egypt I shall feel obliged if the samples and the plant when no longer required may be deposited in the Central Museum I have retained a duplicate set of samples and a plant for our own Museum It will be observed that the samples are of the produce of five successive years crops of the new cotton plant

2 The plants and samples of cotton were forwarded to me by George West, Esq , Her Majesty s Consul at Suez from Mr Henry Carcas of Birket-el Sab which village is situated in the delta of Egypt near the line of Railway between Cairo and Alexandria

3 This new variety is said to be a spontaneous cross between the *Hibiscus esculentus* and the ordinary cotton plant both of which belong to the same family It is a very unusual occurrence for two species of plants to hybridize in this way In general appearance the new plant resembles closely the *Hibiscus* the stem is perfectly straight it is almost altogether without branches and the cotton bolls like the seed pods of the *Hibiscus* are placed on short stems around the main stem

4 I had the lint collected that was on the two plants when they reached me the lint in the seed from each weighed about 3½ ounces and yielded 32 per cent of clean lint On examining the plant it will be seen how heavily it is covered with bolls The new variety appears to possess these advantages it is prolific in the yield of lint, the lint is of good quality the produce appears to come altogether the plant occupies a small area of land and from the absence of branches the tillage of the soil during the growth of the plant can be efficiently performed

5 Mr Carcas has been good enough to favor me with a small quantity of seed of this new variety of cotton and a small plot on the Experimental Farm is now under this new crop

Submitted for the information of Government

2 The Board suggest that Mr Robertson s interesting letter should be communicated to the Press, and that the samples be placed in the Central Museum

Order thereon by the Government of Madras

Ordered accordingly

Extract from the Proceedings of the Government of Madras Revenue Department—No 744 dated 10th May 1878

Read the following paper —

Proceedings of the Board of Revenue dated 8th April 1878 Miscellaneous No 3695

Read the following letter —

No 287 dated 26th March 1878

From—W R ROBERTSON Esq M R A Superintendent Government Farms

To The Acting Secretary to the Board of Revenue Madras

In acknowledging the receipt of the packet of seed which accompanied the Board s Miscellaneous Proceedings, No 2689 of the 19th I have the honor to point out that the seed in question is that of the same cotton hybrid referred to in my letter to the Board No 1040 of the 8th of December last printed in Board s Proceedings No 5271 of the 19th of December We have already on the Experimental Farm a large plot of this cotton however the seed now received will be sown as directed

---

Submitted for the information of Government

Order thereon by the Government of Madras

ORDERED to be forwarded together with G O 23rd January 1878 No 118 to the Government of India, for information, with reference to letter from that Government, dated 1 th February 1878, No 3(

No 1(71A dated 14th June 1878

From—C ROBERTSON Esq Secretary to the Government of North Western Provinces and Oudh

To—The Secretary to the Government of India Department of Revenue Agriculture and Commerce

With reference to your letter No 38 dated the 13th of February 1878, I am directed to submit, for the information of His Excellency the Governor General in Council copy of a letter marginally noted, being a report on the cultivation of Bamieh cotton

N $\frac{T}{34 A}$ dated the 31st of May 1878 from the Officiating Director of Agriculture and Commerce of the North Western Provinces and Oudh

No $\frac{T}{38}$A dated 31st May 1878

From—F N WRIGHT Esq Officiating Director Department of Agriculture and Commerce of the North Western Provinces and Oudh

To—The Secretary to the Government of the North Western Provinces and Oudh

In connection with your No 609A dated the 7th of March 1878 I have the honor to report that in June 1877 a small packet of the seeds of the Bamieh cotton was received from the Secretary Agri Horticultural Society, Calcutta, which was made over to the Superintendent, Cawnpore Farm for experiment

2 He reports—

A small patch of land measuring 7 feet by 17 feet was prepared in the vegetable gardens and thrown up into ridges 2½ feet apart and the seed planted 2 feet apart in the row The seed was sown on the 19th of July and began to appear above ground on the 24th

Of the 20 seeds sown 13 germinated the first bolls were picked on the 20th of December and picking went on at intervals till the beginning of March

The amount of uncleaned cotton collected from the 13 plants was 6lb of which ½ lb was sent to the Bulandshahr Agricultural Show The remainder was cleaned in the native gin and gave 22 oz clean cotton and 3lb 2 oz seed

From the almost total cessation of rain the season cannot be said to have been a good one yet the plants grew to the height of 5 to 5½ feet and throw out long lateral branches I am of opinion seed ought to be sown 3 feet apart at least

Some of the cotton was sent to the Agent of the Elgin Mills, who reports as follows —

With reference to samples of Bamieh cotton forwarded for opinion I have to state that so far as I am aware there is no machinery in India capable of working cotton of so long a staple

Such cotton is used in England for counts ranging between 100s and 200s and requires peculiarly delicate machinery

Its probable value in England would be 1s per lb

This report is not encouraging as to the advisability of extending the cultivation of this breed of cotton but further experiments will be conducted this year with the seed forwarded with your No 609A, dated the 7th of March 1878, and the result communicated in due course

---

No 86 dated 19th July 1878

From—A. O HUME Esq C B Secretary to the Government of India Department of Revenue Agriculture and Commerce

To—The Secretary to the Government of the North Western Provinces and Oudh

I am directed to acknowledge the receipt of your letter No 1671A, dated the 14th ultimo, and of its enclosure, being a report on the experimental culti

vation of Bamich cotton at the Cawnpore Model Farm, and in reply to convey the following remarks

2 It appears to be doubtful whether the cotton grown at Cawnpore was Bamich which species, it is believed, does not throw out "long lateral branches," as described by the Superintendent of the Farm The seed sown, which was obtained by Mr Buck from the Agricultural and Horticultural Society of India was possibly adulterated, it being well known that great frauds have been committed in the sale of the seed in Egypt in consequence of the excessive demand which has arisen for it

3 Whether it was really Bamich or not the cotton raised appears to have been of a very fine description, and the yield of $25\frac{1}{3}$ ozs of clean and 5 lbs of unclean cotton is a large one for 13 plants The valuation of 1*s* per lb in England given by the Manager of the Elgin Mills at Cawnpore is, however probably excessive, the best Egyptian cotton being at present quoted in Liverpool at only $10\frac{1}{4}$*d* and American at $7\frac{1}{2}$*d* per lb

4 It is not understood why the Officiating Director of Agriculture and Commerce is of opinion that the report of the Manager of the Elgin Mills "is not encouraging as to the advisability of extending the cultivation of this breed of cotton," the manager having merely stated that there is no machinery in India capable of working such a long staple This is no doubt true for the present but if long stapled cotton can be grown in India, it will not be long before machinery suited to its manipulation is introduced and in the meanwhile all that is produced can be exported The short stapled cotton now grown in India does not fetch as much as 6*d* per lb as a maximum in the Liverpool market and the average price is far below that sum

5 I am to request that a small sample of the cotton grown at Cawnpore may be forwarded for inspection to this Department and that the results of the further experiments to be made during the current year may be reported in due course for the information of the Government of India

No 87 Jo

Copy with a copy of the report referred to, forwarded to the* for information

* Government of Madras Bombay Bengal Punjab	Chief Commissioner of British Burma Mysore and Coorg Assam Ajmere and Merwara Resident at Hyderabad

No 126 dated 9th November 1878

From—C L Tupper Esq Offg Under Secretary to the Govt of India Department of Revenue Agriculture and Commerce

To—The Secretary to the Government of the North Western Provinces and Oudh Revenue Dept

In continuation of Mr Hume's letter No 56 dated the 19th July last I am directed to forward for information and communication to the Director of Agriculture and Commerce, copy of a demi-official letter* from Mr C Kapp of the Firm of Messrs Volkart Brothers and a member of the Bombay Chamber of Commerce reporting on the sample of the Bamich cotton grown at Cawnpore, received with the Director's letter No $\frac{1408 A}{CLVII}$ dated the 9th August last The report is very encouraging, and I am to request that with the permission of His Honor the Lieutenant Governor and Chief Commissioner Mr Buck may be asked to continue to give his attention to the cultivation of this variety of cotton with a view to determine whether it can be grown in Upper India without any very material increase in the cost of cultivation

* Dated 23rd September 1878

Report by Mr Kapp on the Bamich Cotton dated 23rd September 1878

After examining the sample of cotton carefully, I have come to the conclusion that the nearest comparison in appearance and touch to it is fully good fair brown Egyptian cotton The staple is silky, but very irregular and very wasty, which deficiency would debar this style of cotton from being mixed together with Egyptian, or used separately for high numbers Besides the irregularity in the staple, there are very objectionable knots and nests

in it, which reduce the value of the cotton Taking into consideration that the price of Egyptian cotton is exceptionally high now and fully good fair brown being quoted about 9½*d*, I value the sample at ¼*d* below that class of cotton, say 9¼*d* If the cotton has not been allowed to mature fully, this circumstance might account to some extent for the wasty staple, but even admitting that some of it has been picked in an unripe condition, the best of it would not be worth more than 9¾*d*, which would be equal to good brown Egyptian

No 143 dated 10th January 1879

From—The Hon ble E W Ravenscroft c s i Chief Secy to the Govt of Bombay

To—The Secretary to the Government of India Dept of Revenue Agriculture and Commerce

Memorandum from the Commissioner Central Division No $\frac{R}{4356}$ dated 30th December 1878 submitting a letter (No 5346 dated 21st idem) from the Collector of Khandesh and its accompanying report from the Superintendent Bhadgaon Farm

With reference to the correspondence ending with this Government letter No 1258, dated 9th March last, I am directed to forward, for the information of the Government of India, the accompanying copies of the papers noted in the margin containing a report by Mr Stormont Superintendent of the Experimental Farm at Bhádgaon in the Khandesh Collectorate, on the experimental cultivation at the farm of Bamich cotton, and to state that the further particulars promised by the Collector at the end of the year will be furnished to the Government of India when received

---

No 5346 dated 21st December 1878

From—W H Propert Esq Collector of Khandesh

To—The Commissioner Central Division

With reference to Government Resolution No 1257 of 9th March 1878, Revenue Department, I have the honor to forward herewith the report of Mr Stormont, the Superintendent of the Government Farm at Bhadgaon on the results of the cultivation of Bamich cotton at the farm and regret that the experiment proved rather a failure on account of excessive moisture It is however hoped that the second crop will yield a good outturn, and a further report will be submitted in due course

---

No 237 dated 11th December 1878

From—A Stormont Esq Superintendent Government Farm Bhadgaon

To—The Collector of Khandesh

I have the honor to report the results so far of the experimental sowing of Bamich cotton made here under Government Resolution No 1257 of 9th March last

2 The quantity of seed received was one quarter of a pound A few packets of 100 seeds each were given to cultivators for trial the remainder was sufficient to sow about three quarters of an acre

3 The ground selected had been previously prepared for sugarcane and was rich in manure, and in excellent tilth The seeds were planted on 28th June in lines four feet apart, and four feet also from plant to plant About [illegible] per cent of the whole germinated, and the plants made astonishing progress for a few weeks when they were attacked by *aphis* which considerably checked them After a time these disappeared and the plants started afresh and rapidly shot up to heights varying from 6 to 10 feet

4 A very promising show of flowers was succeeded by a somewhat scanty supply of pods, a large portion of the former having been beaten to the ground by the heavy and persistent rains which also sapped numbers of the plants

5 The surviving trees have yielded only a few pods each, bringing up the entire crop so far to about 3lbs of very long, but somewhat weak, seed cotton The trees are again sprouting luxuriantly from the roots, so that a second crop may be got further on in the season

6 Although it is very improbable that the Bamich cotton will be found suitable to a soil and in a climate such as that of Khandesh, yet the completeness of the failure in this case is certainly to some considerable extent owing to the unusually heavy rains, which in black land damaged severely even the hardy Dharwar American variety

7 With regard to the history of the Bamich cotton, I venture to think that some element of error must have crept in in making the observations on which it has been framed There is really little apparent difference between it and the ordinary Egyptian cotton, with the exception perhaps that the habit of the former is less bushy The flowers, the seed, and the cotton of the two are scarcely to be distinguished

8 Full particulars of this experiment will be available by the end of the official year

No 4356R dated 30th December 1878

Endorsed by the Commissioner Central Division

Submitted to Government

2 It is to be regretted that the heavy rains so greatly interfered with the crop The further report promised at the end of the year will be submitted to Government The Commissioner cannot but think Mr Stormont is wrong in stating that there is no difference between the Bamieh cotton and ordinary Egyptian cotton Experienced cultivators in Egypt and elsewhere could not have made any error on the point

No 11 dated 23rd January 1879

From—J F O'CONOR Esq Assistant Secretary to the Government of India Department of Revenue Agriculture and Commerce

To—The Secretary to the Government of Bombay

Referring to your letter No 143 of the 10th instant, I am directed to request that, with the permission of His Excellency the Governor in Council, this Department may be furnished with a sample of the Bamieh cotton produced from the seed sown in the Experimental Farm at Bhadgaon

No 845 dated 18th February 1879

From—The Honorable E W RAVENSCROFT C S I Chief Secretary to the Government of Bombay

To—The Secretary to the Government of India Department of Revenue Agriculture and Commerce

In accordance with the instructions contained in Mr Assistant Secretary O'Conor's letter No 11, dated 23rd ultimo, I am directed to forward (by parcel post) a sample of the Bamieh cotton lately grown at the experimental farm at Bhadgaon in the Khandesh Collectorate

No 28 dated 25th February 1879

From—A O HUME Esq Secy to the Govt of India Dept of Rev Agri and Commerce

To—The Secretary to the Bengal Chamber of Commerce

I am directed to transmit herewith a sample of Bamieh cotton grown at the experimental farm at Bhadgaon in the Khandesh Collectorate, Bombay Presidency, and to request that you will be good enough to obtain and favour the Government of India with reports upon the quality and value of this cotton

Dated 27th February 1879

From—H W I WOOD Esq Secretary to the Bengal Chamber of Commerce

To—The Secretary to the Government of India Department of Revenue Agriculture and Commerce

I am directed to submit the following report on sample of Bamieh cotton received with your letter No 28 of the 25th instant

The staple is long and strong, the cotton is clean and very free from stain, and the color and general characteristics are those which belong to cotton grown in Egypt

The Committee of the Chamber are of opinion that if the quality were kept up to the sample before them, and spinners could depend on a certain regular supply, this description would in process of time come to compete side by side with Egyptian and the better qualities of Brazils in the home markets

It is very superior to any Surats yet reported, and till it becomes known and appreciated it is difficult to fix the value

The Committee think however they may roughly quote it to day at Rs 20 to 21 per maund, or to sell in Liverpool $5\frac{1}{2}d$ to $5\frac{3}{4}d$ per lb

No 519—29 dated 1st February 1879

From—A H L FRASER Esq Assistant Secretary to the Chief Commissioner Central Provinces,

To—The Secretary to the Government of India Department of Revenue Agriculture and Commerce

I am directed by the Chief Commissioner to forward copy of a letter, No 8 of the 28th ultimo, from the Superintendent of the Model Farm, Nagpur, being a report of the result of the experiment with the Egyptian Bamieh cotton seed received with your office letter No 39 of the 13th February 1878 The heavy rain fall of the past season may probably have occasioned the failure of the experiment, but as it will be repeated this year with the seed that has been saved from the few plants reared in Agri Horticultural Society's gardens, a further report on the subject will be submitted in due course

No 8, dated 28th January 1879

From—MAJOR J W MACDOUGALL Superintendent, Model Farm Nagpur

To—The Assistant Secretary to the Chief Commissioner Central Provinces

With reference to your office No 849 44 of the 9th March 1878, I have to report that the Bamieh cotton proved a failure The seeds received having been sown at the same time as the country cotton, germinated with considerable freedom It is, however, evident that the plant cannot endure the heavy rains which accompany the true setting in of the monsoon in July, and last season was an unexceptionally wet one I think it is probable that the plant will succeed better when sown (like the "jharri" cotton of the Chanda District) in September and irrigated during the cold weather Some few seeds which were made over to the Agri Horticultural Society throve very well, yielding bolls from which seed has been saved From this last experiment it was seen that the true Bamieh was not sent out, all the plants having branched out

No 1528 dated 22nd July 1879

From—J H GARSTIN Esq Acting Secretary to Government Fort St George

To—The Secretary to the Government of India, Home Revenue and Agricultural Department

With reference to your letter, dated 13th February 1878, No 36, and in continuation of the letters from this Department, dated 10th May and 3rd August 1878, Nos 725 and 1228, I am directed to forward the accompanying Proceedings of this Government of this day's date, No 1527, embodying a letter from the Superintendent, Government Farms, to the Revenue Board, reporting that the several experiments made on the Saidapet Farm in the growth of Bamieh cotton have all proved unsuccessful Copies of the Farm Report for 1877-78, referred to in the Superintendent's letter, will be furnished to the Government of India in due course

---

Extract from the Proceedings of the Government of Madras Revenue Department —No 1527 dated 22nd July 1879

Read the following paper —

Proceedings of the Board of Revenue dated 14th June 1879 Miscellaneous No 5437

Read the following —

No 511 dated 7th May 1879

From—W BENSON Esq M R A C Acting Superintendent Government Farms

To—The Acting Secretary to the Board of Revenue

With reference to the Proceedings of the Board of Revenue Miscellaneous No 4067, dated 6th May 1879, I have the honor to state that several experiments have been made in the growth of Bamieh cotton on the Saidapet Experimental Farm but with uniform ill success notwithstanding that every care was taken and that the seed was sown under many varied conditions The growth of several crops was referred to in paragraphs 50 and 51 of the Farm Report for 1877 78

Submitted to Government with reference to official memorandum, dated 28th April 1879, No 247

Order thereon by the Government of Madras

Ordered to be communicated to the Government of India

Extract from the Annual Report of the Agricultural Department of the Madras Presidency for the year ending 31st March 1878

50 *Bamieh Cotton* —Some seed of this variety, which is supposed to be a hybrid between the ordinary cotton plant (*Gossypium vitifolium*) and the edible okro or ladies fingers (*Hibiscus esculentus*) was obtained early last year from Mr Henry Carcas of Birket el Sab, a village of Lower Egypt between Cairo and Alexandria A plot of 1 260 square yards was sown with it on the 23rd of August in a field, the soil of which had been manured with horse manure The fertility of the land is, compared with our soils generally, fair but its condition was low, probably in this respect comparing most unfavorably with the soil on which the crop from which the seed sown was produced had been grown, and thus exposing the crop to some risk of failure from the sudden change The following is a translation of a description of the plant, which appeared in a French paper published in Egypt —

It is possible that this new variety may be the result of a cross between the *Hibiscus esculentus* and the ordinary cotton plant it is further a most interesting plant because it yields much more heavily than the ordinary cotton The growth is more upright than that of the ordinary cotton (*Gossypium vitifolium*) it has a straight unbranching stem in this respect differing from the latter plant which is of shrubby form with numerous branches themselves again branching and producing irregularly at their joints a boll of cotton On the contrary in the Bamieh cotton plant the stem is straight taller and unbranched excepting perhaps a few small branches at its foot The bolls grow in clusters of two or three at the axils of the leaves

Mr Carcas has also favored me with a description as follows —

The new cotton plant grows to the height of eight to ten feet on one vertical stem, without any horizontal branches with very few leaves and gets covered with a quantity of cotton buds as much as eighty have been gathered from one plant It happens however but not as a general rule that one or two sprouts are often seen shooting off the stem within three to five inches from the ground growing vertically alongside the mother plant but never acquiring a full development nor yield consequently they should be considered as parasites and ought to be suppressed in proper time The absence of branches allows the plant to grow comfortably very close together and as much as four plants can be allowed to grow in a square foot of land

Its origin remains unknown but evidently is a matrimony between hemp and cotton The Arabs being in the habit of planting round their cotton fields a small strip of hemp the phenomena must have originated from the pollen of either of the two plants having been carried by the wind or bees from one flower to the other

It requires no particular mode of treatment from the ordinary cotton plant

Not a crop apparently of great value —The crop grown here did not come up to the expectations formed of it from the descriptions given, for, from some reason which I am unable even to suggest, although the plants came up rather more uprightly than our ordinary cotton (New Orleans) after some time it began to throw out branches near the roots and occupied fully as much space as the other plants do When several months old, the crop became blighted and at the end of March it was removed The yield of cotton from the plot was very low, partly no doubt from the poverty of the soil, and partly probably from the crop being blighted as well as from the well known infertility common to most hybrids

51 Another plot was planted in December 1877, but with the same results regarding the habit of growth as in the first case the plants are now (1st July) looking well but have not produced much cotton A further small supply of seed was received from the Government of India on the 26th of March for experiment we had at the time a sufficient supply in stock from the crop previously grown

No 503 dated 19th March 1880

From—C ROBERTSON Esq Secretary to Government North Western Provinces and Oudh

To—The Secretary to the Government of India Home Revenue and Agricultural Department

With reference to correspondence ending with your reminder No 103 dated the 23rd of February 1880, I am directed to submit, for the information of His Excellency the Governor General in Council, copy of a letter, No 406 dated the 8th of March 1880, from the Director of Agriculture and Commerce, North Western Provinces and Oudh, being a report on the cultivation of Bamieh cotton during 1878 79

No 406A —LXVI dated 8th March 1880

From—J B FULLER Esq Asst Director for Director Department of Agriculture and Commerce North Western Provinces and Oudh

To—The Secretary to the Government of the North Western Provinces and Oudh

With reference to your endorsement No 2565 * dated the 15th December 1879 and subsequent reminder I have the honor to submit the following report on the cultivation of Bamieh cotton during the years 1878 and 1879

2 In March 1878, 3lb of seed of this variety of cotton were forwarded to this Department by the Government of India † with the request that it might be carefully sown and the result reported in due course The attention of the Department had been attracted to the reported excellencies of Bamieh cotton before this and in the previous year (1877) a little seed had been obtained through the Agri Horticultural Society of Calcutta and sown at the Lucknow Horticultural Gardens and on the Cawnpore Farm The result of the experiment at Cawnpore was communicated to Government in this office No 326T, dated the 31st of May 1878 So far as the quality of the cotton produced went, the result was eminently satisfactory, and a portion of the produce, which was forwarded to the Government of India, was very favorably reported‡ on by Mr C Kapp of the Firm of Messrs Volkart, Brothers Bombay The seed produced at Cawnpore and Lucknow was distributed to the Manager of the Elgin Mills, Cawnpore, and the Deputy Commissioners of Jaloun and Lalitpur, but did not succeed

3 The seed received from the Government of India was distributed to the Saharanpur Botanical Gardens and to the Cawnpore and Allahabad Experimental Farms Experiment has also been continued at the Lucknow Horticultural Gardens with the seed originally obtained from Calcutta but which has much deteriorated, and during the past year gave little or no return

4 The seed received from the Government of India, which was sown both at Allahabad and Cawnpore, failed to give a crop In the case of Allahabad, the seed was sown too late, and

* Forwarding Government of India's (Department Home Revenue and Agriculture) No 466 dated the 5th of December 1879 requesting the submission of a report on the experimental cultivation of Bamieh cotton since the year 1877

† Government of India No 38 dated the 13th of February 1878 forwarded to the Government of the North Western Provinces and Oudh in its No 603A dated the 7th of March 1878

‡ Communicated in Government of India's (Department Revenue Agriculture and Commerce) No 126 dated the 9th of November 1878

the bolls had not therefore sufficient time to ripen before frost set in and cut them back At Cawnpore the cultivation was systematically neglected in both 1878 and 1879 by two Superintendents, both of whom it has been necessary to remove for incompetency Where cultivation was conducted with care, as it has been at the Saharanpur Botanical Gardens under the superintendence of Mr Duthie very favorable results have been obtained

5 In 1878 an ounce and a half of seed was sown at the Saharanpur Gardens The following account of the experiment is taken from the Superintendent s (Mr Duthie's) report —

The seed was sown in pots on the 27th of May the seedlings being transplanted to ridges of well manured ground each plant being 2½ feet apart from those round it There were 78 plants and the average height which they attained was 6½ feet The number of bolls on each plant averaged 30 after the removal of about ⅓rd of the bolls to strengthen the remainder The plants maintained in a striking manner the peculiar upright habit originally observed in this variety when first detected in Egypt

A sample of the cotton produced which was submitted for report to the Manager of the Elgin Mills, Cawnpore was considered superior to all other sorts of cotton which were then grown in the garden (comprising New Orleans tree cotton, ordinary Egyptian, Upland Georgian, Nankin and Hinganghat) and was pronounced to be of excellent staple, strong and clear would make very superior 100s to 130s yarn value in Liverpool about 8*d* to 8¼*d* per lb

6 Having succeeded so far, Mr Duthie was desired by me to cultivate this variety of cotton on a larger scale during 1879 but the seed in hand was only sufficient for one eighth of an acre The soil was a light sandy loam manured with old city manure at the rate of 8 tons to the acre Half the seed was sown on April 30th *in situ* at a distance of three feet apart and the other half in seed beds from which the seedlings were transplanted Four waterings were given before the rains set in and the plants were weeded altogether four times and their roots were earthened up twice The result shows that the ground had been far too heavily manured The plants grew to an extraordinary height some of them measuring 15 feet, and hardly one was under 10 feet They ran to leaf instead of producing flowers, and the total produce in cleaned cotton was only 3 lbs 4 oz or at the rate of 26 lbs per acre

7 The plants exhibited their characteristic habit of growth completely but from a report kindly furnished by the Manager Elgin Mills on a sample of the outturn it seems probable that the plants had degenerated, and that (as has been found to be the case with Hinganghat cotton grown in these Provinces) the cotton produced from acclimatized seed was inferior to that produced from imported seed While the Bamieh cotton is pronounced still superior in staple to the other varieties of cotton grown at Saharanpur it is noticed that it is much inferior to the sample submitted from Saharanpur last year and the counts it is considered fit for spinning are 70 or 80s instead of the 100s to 130s for which the cotton produced in 1878 from imported seed was pronounced fine enough

Note on a new variety of cotton (Bamieh) from Egypt by the Secretary to the Agri Horticultural Society

At the commencement of 1877 a correspondent of the *Times* at Alexandria sent the following account of a discovery which appears to have excited considerable curiosity amongst a large branch of the manufacturing community —

The cotton world of Alexandria is just now immensely interested in the alleged discovery of a new species of the cotton plant which promises to effect a revolution in the prospects of Egyptian cotton Every one knows the story of M Jumel who fifty years ago walking in the garden of a Turk at Cairo noticed how well a certain cotton tree flourished, and how he took away the seeds therefrom and planted and re planted them until he founded the present cotton culture of Egypt Well it appears a Copt has now made a new departure of a similar kind The results already obtained from the new plant are most extraordinary It compares with the old as follows —An ardeb (270lbs) of ordinary cotton seeds sows on an average eight feddans (acres) and produces four cantars (100lbs) of cotton in seed that is to say the cotton with the seed inside it as it comes out of the cotton pod Taking this yield as the average every ardeb planted produces 32 cantars of seed cotton and about 21 ardebs of seed An ardeb of seed of the new species sows like the other eight feddans but its yield is more than treble and has even been stated at five fold But my most trustworthy informant only gives ten cantars per feddan which I may add is the amount taken by one of the leading firms as the basis of their calculations as to the effect of the new plant They add that it is difficult to say exactly what would be the ordinary yield as all returns hitherto are the result of exceptional culture on a small scale On this calculation of ten cantars each ardeb of seed would produce 80 cantars of cotton in seed that is to say over double the amount produced by ordinary seed At present prices each ardeb would return about 240 lbs in seed and cotton together, instead of 96 lbs as it does now

' The new cotton I am assured by the best authority is of good appearance commercially speaking, and quite equal in quality to ordinary Egyptian cotton The plant grows in a different manner to the ordinary cotton plant It grows to about the height of ten feet, has a straight vertical stem, without branches with very few leaves and is thickly studded with pods Seventy are said to have been gathered from the first plant discovered The ordinary cotton is found on a shrub some four to five feet high with spreading branches Nearly a yard must be left for air, light and growing room between each shrub whereas the new plant from the absence of branches requires only half the space This fact is of material importance with a view to its capabilities of production in a given space It is called here Bamieh cotton, from the resemblance of the plant to a vegetable of that name, and the Arabs

maintain that it is the result of a cross between the two shrubs But others say it has been brought from the Soudan or Equatorial Africa Nothing, however is positively known
